VOLUME 73 JUNE 24, 1915 NUMBER 25

Messhouse Management at the Arrowrock Dam

By Ray R. Clawson*

In the construction of the Arrowrock Dam near Boise, Idaho, it has been necessary to operate messes of sufficient capacity to accommodate 800 to 900 men. This operation, extending over a period of about four years, has given a good opportunity to make studies of possible interest to contractors and engineers.

In these days of unusual agitation on account of the "high cost of living" the management of messhouses on large construction work where numbers of healthy laboring men are fed at an established price per meal becomes a very interesting problem. The generally established price on work of this nature in the West is 25c. per meal. For this price it is necessary that the men be fed a substantial ration, including meat and other food, and it is usually expected by the management that a small margin of profit will be made.

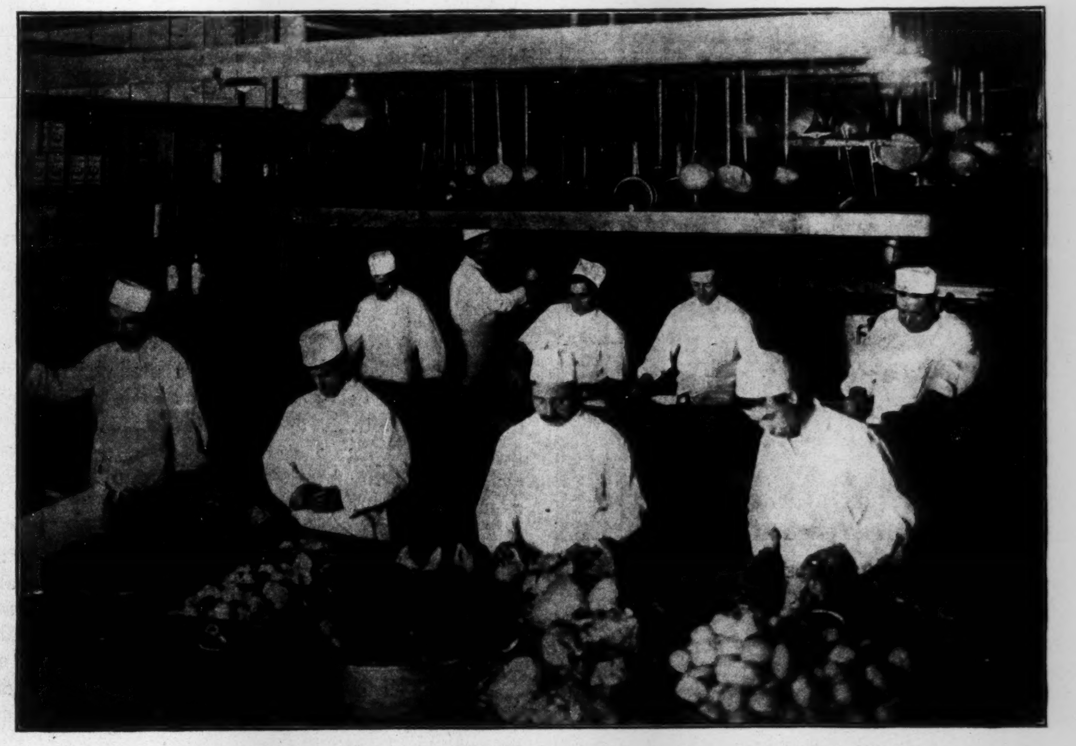

Fig. 1. Kitchen Force Preparing Vegetables in Arrowrock Dam Messhouse

The satisfactory operation of the messhouse is one of the controlling elements in keeping an efficient force on construction work. Those in charge of the work soon learn that it is economy to serve good meals, even at a loss, to the mess.

Dining-Room Service

Good service is as important as good food. No matter how much time the men may have for eating, they are generally in a hurry. Meals should therefore always be served on time, and particular effort should be made to give prompt service.

At Arrowrock small tables accommodating eight persons are provided, as this number may be served from one set of dish-ups. These small tables have been found to be a decided improvement over the long tables commonly used in construction camps. Separate dining rooms are provided for the different classes of employees—one room for foremen, mechanics, carpenters, etc.; one for American laborers and one for foreign laborers. The employees are better satisfied if they are classified in this manner at table, as they are better able to select their associates. At Arrowrock very little trouble has been given by a desire on the part of any one of the above-mentioned classes to encroach upon the others, after they have been once classified.

---

*Principal Clerk, United States Reclamation Service, Arrowrock, Idaho.

Service is made "family style"; that is, all food is on the table at the time the meal is called. With this method one waiter can attend to five tables of eight persons each in an efficient manner. When the force is large enough to justify it, a head waiter is employed to supervise the setting up of tables and the work of preparing the cold part of the meal; and it is his duty to see that all dishes are thoroughly cleaned before they are placed on the tables, as this is one of the things which has to be carefully watched over in camps.

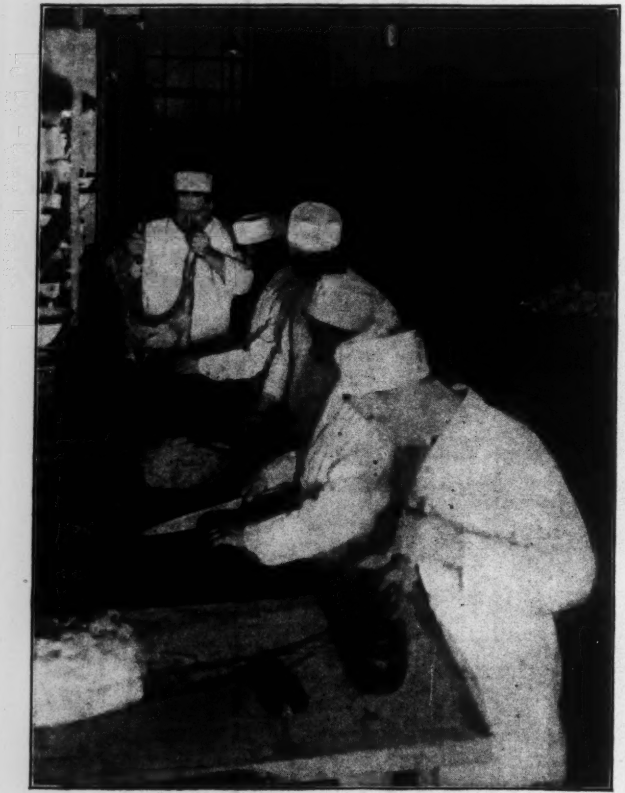

FIG. 2. PREPARING MEAT IN THE MESSHOUSE KITCHEN AT THE ARROWROCK DAM

KITCHEN EQUIPMENT

Although the messhouse may be considered a small feature of a construction job, there is probably no place where labor-saving equipment can be used to greater advantage. Every possible piece of equipment should be power-driven.

At Arrowrock, where electrical power is available, the following pieces of motor-driven equipment have been used with very satisfactory results: Vegetable peeler, dish-washing machine, coffee grinder, combination potato and vegetable masher, and meat grinder.

The vegetable peeler and dish-washing machine are the two greatest labor savers, and the character of service obtained with them is much better than it would be possible to obtain by hand.

The center range, composed of six sections, has a total cooking surface of 72 sq.ft. There is a steam-table, which has proved to be a very economical piece of equipment for carrying cooked foods from one meal to the next without loss or deterioration. There is also a steam cooker for steaming vegetables, boiling eggs, making puddings, etc., where there is danger of burning if cooked on the range.

On account of the great number of dishes required in serving as large a number as we are handling at Arrowrock, we have found it advisable to use enamelware dishes, as the dish-washing machine is particularly efficient in cleaning this ware. In smaller messes, however, I have known of heavy hotel chinaware dishes being used with success.

CHOICE AND UTILIZATION OF FOODSTUFFS

The economy in the preparation and serving of food is not so much in reducing what is actually eaten by the men as it is in keeping the waste down to the minimum. The most important factor in the economical use of foodstuffs is therefore the utilization of all food cooked and the preparation of food in such a manner that the portion left over may be modified in some form and used again at a subsequent meal. It must always be borne in mind that the class of men being fed on work of this nature have no interest in the economical use of food. The food must therefore be prepared in such a way that any unusual waste may be detected.

Meat is by far the most expensive item of diet, and therefore more attention must be given to its use than to that of any other item. At Arrowrock, where physical conditions make it necessary to keep meat for a considerable length of time, it has been necessary to provide refrigeration facilities. Our refrigeration plant is what is commonly called the "brine system." We have one cold-storage room with sufficient capacity for storing about 26,000 lb. of meat and another smaller room for storing eggs, butter, etc. Provision is also made for the freezing of forty 50-lb. cakes of ice at one time, and we are able to produce ice in about 20 hr. continuous running of the plant. This is used around the work in warm weather, and is sold to the families in the camp, of which there are as many as 150 or 200 during most of the year.

Purchase of meat is made by the carcass. Pork sides and trimmings are made into pork sausage and stuffed into casings, after a sufficient quantity has been salted to provide all of the salt bacon required. Hogs' heads, together with other trimmings, are made into headcheese and stuffed into casings and served cold. After a little experience with the requirements a definite system can be worked out so that every particle of usable meat can be used as wholesome food.

From actual experience and test at Arrowrock it has been found much more economical to remove all bones from the meat before it is cooked. These bones are then used for soup stock, and in this manner every particle of meat is cooked from them and utilized. If the bones are cooked and served with the meat, a considerable portion of meat is always left on the bones by the men when eating, and this is an absolute loss. The serving of excess fat meat is also avoided, because if only the actual edible meat is served it will lessen the tendency on the part of the men to be wasteful in the use of meat. Excess fat is absolute waste if served, but can be trimmed off before cooking and rendered into marketable lard or tallow.

A lard-rendering kettle has been provided, and all fats are carefully cared for and rendered. Sufficient lard has been manufactured for use at the mess and for sale to the families who desire it, and occasional shipments of pure lard are made to wholesale merchants in the vicinity, where it brings the same price as the packing-house product. All tallow and refuse fats are rendered, and practically all of this product has been transferred to the machine shop, where it has been manufactured into "cable dressing," which has been used on the work with good results. Credit is given to the messhouse operations for the market price of this tallow, and still a considerable saving has been made in the cost of cable dressing after allowing this price. Occasional shipments of excess tallow have been made to the nearest soap-making establishments. It has been found to be poor economy to make this tallow and grease into "home-made soap," as we have been able to obtain 5c. per lb. for it at the soap works, and common laundry soap can be bought for less and gives much better results. In this manner the general tendency to use home-made soap extravagantly under the assumption that it is cheap is also done away with.

ORDERING SEASONABLE ARTICLES

It is necessary that constant attention be given to ordering to avoid the purchase of articles which are out of season or on which the market price for one reason or another may be prohibitively high. Fresh berries, fruits and green vegetables may be served plentifully in the height of the season, but should not be served until the full crop is on the market and the price is low. If the market is carefully watched, practically all perishable produce, even though it may be regarded as a luxury, may be economically served at some time of the year. For example, it is generally thought that fruits such as bananas and oranges cannot be served in a mess for 25c. per meal; but at certain times of the year, in the height of season, when the local market may be in a slump on account of an oversupply, these may be served prepared in a salad at a saving over the ordinary canned fruits. Watermelons and cantaloups can be used to the exclusion of all fruits after the full supply is on the market and the price is reduced. Constant effort should be made to find something in the market on which the price is reasonable and which may reduce the consumption of meat. Practically anything which may be served which will reduce the consumption of meat will prove to be an economy. Moreover, the variety thus afforded is worth while, even if no special saving is effected thereby.

The views in Figs. 1 and 2 show the messhouse employees at work preparing the food to be set before the men.

COSTKEEPING

A sufficient charge is made against messhouse operations each month for rental to absorb the cost of messhouse construction during the time of construction. A monthly charge is also made to cover the depreciation of equipment.

It is very necessary that a careful record of cost be kept and reports prepared each month to show the results accomplished. Classification of cost should be made into the principal items of cost, so that the items may be compared from month to month. The following cost accounts have been used in connection with the messhouse operations at Arrowrock:

Labor, cooks and helpers.
Labor, miscellaneous.
Subsistence.
Supplies.
Utensils.
Rental.
Fuel.
Lights.
Depreciation of equipment.
General and overhead expense.

By comparison of the cost report with the preceding reports it is possible to detect where the cost is running high, and an effort can then be made to reduce this item. After the mess has been operated for a sufficient length of time, certain standards of cost will be established, and effort can then be made by watching these cost reports to maintain these standards. Different local conditions, such as transportation facilities, etc., make it impracticable to compare cost data thus assembled covering operations in different localities, but these data are very valuable for comparison of cost of operation of messes in the same locality where the conditions are similar.

From data kept under this classification it is possible to prepare at the end of the month cost reports in the following form:

DEPARTMENT OF THE INTERIOR
United States Reclamation Service
Boise Project, Idaho

Field Report of Messhouse Operations at Main Mess, Arrowrock, during the month of September, 1914.

Some of the things which have been mentioned in this article may seem to be trivial details, but it must be remembered that the management of this operation is a mass of details and failure to give attention to the smallest feature may change the operation from a paying to a losing proposition.

The Arrowrock Dam is being constructed in the Idaho District of the United States Reclamation Service, of which F. E. Weymouth is Supervising Engineer. Charles H. Paul, Construction Engineer, has general charge of all features in connection with the construction of the dam. James Munn, Superintendent of Construction, has direct charge of construction work. The writer has direct charge of messhouse operations and incidental features.

Intercolonial Railway Pier 2 at Halifax Harbor, Nova Scotia

By A. F. Dyer*

SYNOPSIS—A reinforced-concrete pier on long unsupported concrete piles in an ocean harbor subjected to severe ice conditions. Special pile construction and driving.

The Department of Railways and Canals of Canada is just completing in Halifax Harbor the construction of new Pier 2, which is the first of a series of shipping piers in a project to enlarge the terminals of the Intercolonial Railway. The particular scheme of which this pier is a part was initiated in 1910 and comprises the construction and reconstruction of four large piers, replacing all of the other piers owned by the railway at Halifax. The general layout is shown in Fig. 1. In 1912 another project, entirely separate from the one noted, was started by the department. This comprises a landing quay, piers and a breakwater at the southerly part of Halifax Harbor, with a new double-track connection from the present tracks in the north part of the city. The first scheme is in charge of John Kennedy, Consulting Engineer to the Montreal Harbor Commissioners; the second, of F. W. Cowie, Chief Engineer of the Montreal Harbor Commissioners. The present article describes the construction of the first unit, Pier 2, of the first-named scheme.

In designing the new piers the two considerations of economy of construction and permanency of the structure determined the type to be used, which is a reinforced-concrete floor supported on reinforced-concrete piles. This type of construction was well suited to the local conditions of the site, where the depth of rock bottom varied from 42 to 68 ft. below low-water level of spring tides, which compelled the building of a substructure below the pier floor of from 61 to 87 ft.

Borings taken over the site of the new pier indicated that a layer of hard clay or hardpan covered the rock to a depth which varied from 2 to 12 ft. Above the hardpan there was found a layer of soft mud that had a depth of nearly 30 ft. at the shore end, but ran out to about 5 ft. at the outer end of the proposed pier.

The elevation of the pier deck was fixed at 19 ft. 2 in. above extreme low-water level of spring tides, which is 3 ft. 6 in. above the top of rail of the tracks in the yard. Owing to the small height of the structure above low water compared with the depth of the foundations below low water, a system of diagonal transverse bracing would not have greatly increased the stability of the pier and its ability to withstand the shock of a large vessel striking it on one of its sides; therefore, recourse was had to the use of reinforced-concrete brace piles driven at an angle of one in three to the vertical and having their heads consolidated with the transverse girders of the pier floor. It is believed that this is the first instance of such a system of bracing being used for a reinforced-concrete pile pier. Further stiffening of the structure was obtained by forming a bank of dredged material under the outer end of the pier, where the depth of water was greatest and the thickness of the material overlying the rock was least.

Concrete in Sea Water

The question of the durability of reinforced-concrete piles immersed in sea water in a climate such as prevails during the winter months in Halifax had now to be dealt with. The large ratio between the surface exposed and the bulk of the concrete in this type of construction is one of its weak points, and special measures had to be taken to prevent any deteriorating action of the water on the concrete.

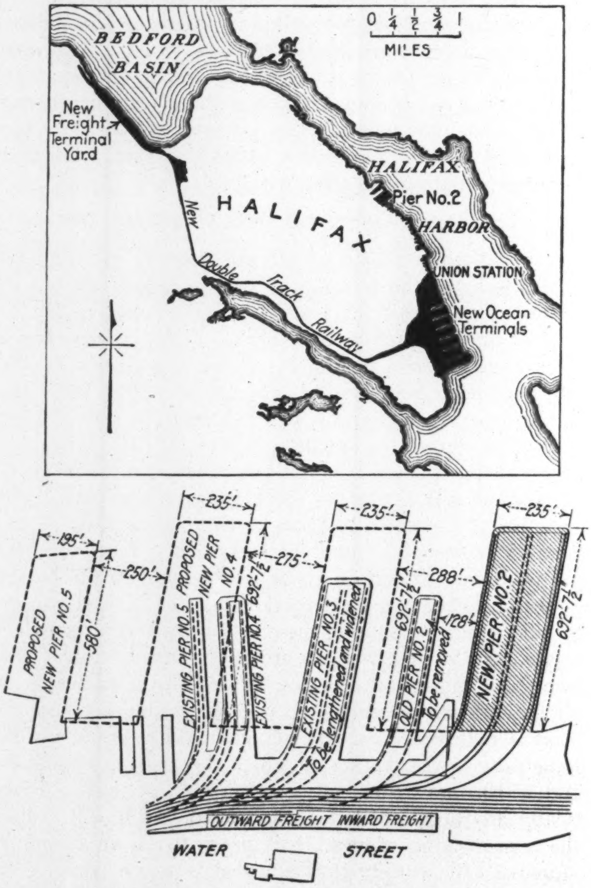

Fig. 1. Map of Halifax Showing Location of New Pier Projects and (below) Enlarged Layout of Northern Terminal

The principal causes of deterioration of concrete immersed in sea water act between the levels of low and high water and are: (1) The chemical action between the magnesium sulphate contained in sea water and the alumina in the portland cement, which forms a sulphoaluminate of lime within the concrete, thus disintegrating and weakening the structure; (2) the intermittent wetting and drying of the concrete with the rise and fall of the tide, which causes an increase in its porosity, ultimately allowing the water to reach the reinforcing steel, which, on rusting, swells and bursts off portions of the concrete; (3) the freezing at low tide of the water absorbed by the outer surface of the concrete at high tide, with consequent scaling of the surface and exposure of fresh surfaces; (4) the abrading action of floating ice on the concrete surfaces. Causes 3 and 4 are the most active along the coasts of Nova Scotia, where the temperature frequently falls to zero, during at least three months in the year.

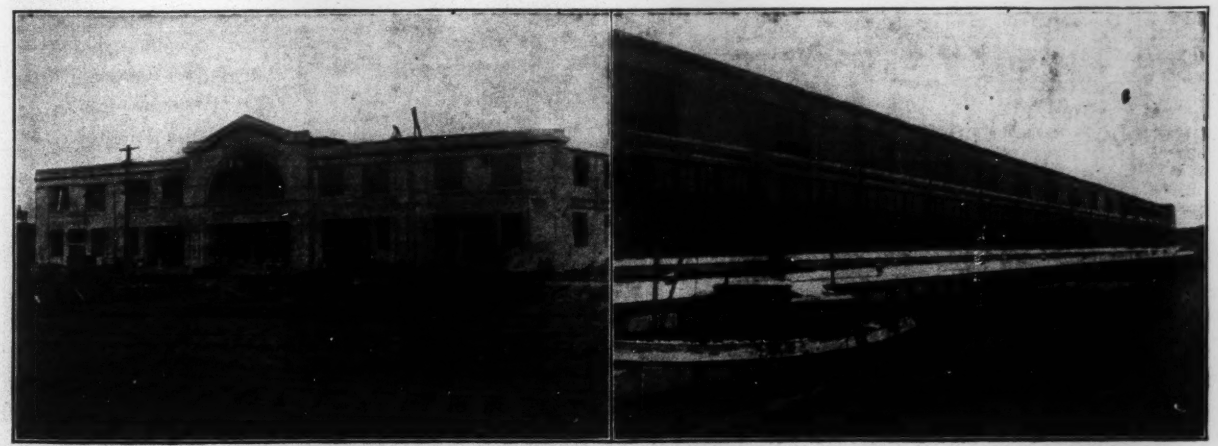
FIG. 2. DETAILS OF PIER 2, INTERCOLONIAL RY. TERMINAL, HALIFAX HARBOR

The measures taken to prevent, as far as possible, the above-mentioned actions on the piles were: (1) The portland cement used for the making of all concrete below high-water level did not contain more than 6.3% of alumina; (2) all concrete below high-water level was mixed in the proportions of 1 part cement, 1½ parts sand and 3 parts crushed quartzite gravel, with the object of obtaining a rich and as dense and nonporous a concrete as possible; (3) all concrete surfaces from low-water level to about 2 ft. above high water were sheathed with two layers of 2-in. creosoted pine planking, bedded on cement mortar. The inner surfaces of the planks were coated with pitch to prevent any deteriorating action taking place between the creosote in the wood and the concrete of the piles. This sheathing keeps the concrete surfaces moist, prevents all frost action and protects the concrete from abrasion by ice as well as the wearing action of the wash of the water.

GENERAL DESIGN

The pier is 235 ft. wide and 693 ft. long and carries a two-story freight shed 200 ft. wide and extending from



FIGS. 3 AND 4. HEAD HOUSE AND SIDE ELEVATION OF PIER 2

the bulkhead line to within 15 ft. of the outer end of the pier. This shed allows room to run a railway track along each edge of the pier. Two additional railway tracks run the whole length of the shed down the center of the pier, dividing the lower floor into two separate freight floors each 88 ft. in width. The columns supporting the shed are spaced 39 ft. 6 in. transversely and 18 ft. longitudinally, the long transverse span being decided upon in order to facilitate the handling of gangways.

The loads for which the pier and shed floors are designed are: Pier deck, 1000 lb. per sq.ft. live-load; track girders, 4500 lb. per running foot of each rail live-load; upper floor of shed, 500 lb. per sq.ft. live-load; and roof, 110 lb. per sq.ft. total load.

REINFORCED-CONCRETE PILES

The longitudinal spacing of the shed columns determined the distance between bents of piles, and it was decided to use piles capable of supporting a load of at least 100 tons, including their own weight in water. This compelled the use of piles 24 in. square in section and required 33 vertical and 6 sloping piles in each bent. Two vertical and 1 sloping piles are located beneath each side column of the shed, 3 vertical and 1 sloping piles beneath each interior column, and the remainder of the vertical piles are spaced out between the column groups at approximately 10ft. centers. They range in length from 57 to 77 ft. and were driven with the special piledriver described hereinafter.

The amount of reinforcement in the piles varied in accordance with their length as cast and was fixed by the amount required for their safe handling when being placed in position for driving. All piles under 60 ft. in length are reinforced with eight 1-in. round rods longitudinally; 1⅛-in. rods were used for piles over 60 ft. and under 70 ft. in length, and 1¼-in. rods for those over 70 ft. in length. One-quarter-inch lacing rods securely tied to the longitudinal reinforcement at 12-in. centers were used. All longitudinal reinforcing rods were continuous from end to end of each pile, no laps being allowed. The points of the piles are tapered for a length of 1 ft. 9 in. and finished 3 in. square, being reinforced with four additional 1⅛-in. rods and ¼-in. spiral hooping at 2-in. pitch. No metal shoes were used. Some additional stirrups were placed near the head of the piles to prevent excessive breakage while driving, and the longitudinal rods were allowed to project 3 ft. beyond the concrete to save the labor of cutting away the concrete in order to secure the necessary bond of the pile reinforcement with the concrete of the pier deck. A staple made from a 1¼-in. square steel bar was also cast into the head of the pile for use in handling it in the leads of the piledriver. In order to minimize the bending moments during handling it was specified that all piles were to be lifted in such way that they were suspended at points one-fifth of their length from each end while in a horizontal position. By the observance of this rule the cracking of the piles while being conveyed from the molding yard to their ultimate position ready for driving was entirely eliminated.

The piles to be driven as brace piles were reinforced in a similar manner to the vertical ones, but were cast with a camber, so that when built into the pier and under an axial load of 80 tons, the stresses on the cross-section of the concrete due to this load and the bending moment of its own weight would be uniform. The amount of camber required was determined by equating the moment due to the axial load into the unknown camber to the moment due to the weight of the pile in water.

The camber equals the bending moment due to weight of pile after being driven in water at angle divided by 160,000 lb.

This formula gives the camber required for a pile 45 ft. long as 2 in. and 5½ in. for one 75 ft. long. Brace piles were placed so that their heads could be built into

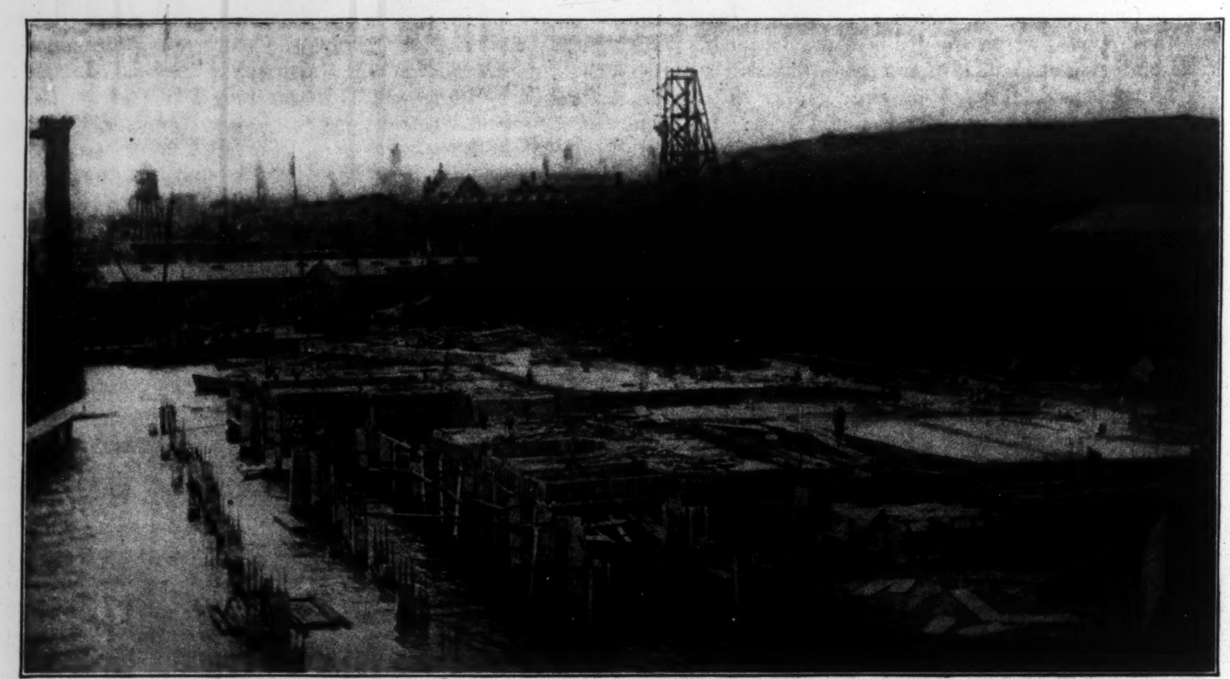


FIG. 5. PIER 2 IN EARLY STAGES OF CONSTRUCTION
(Note batter piles and also wooden casing for piles above water)

FIG. 6. BUILDING THE SHED ON PIER 2, INTERCOLONIAL RY., HALIFAX

the deck beams immediately under a shed column, so that all danger of a brace pile breaking through the pier deck was prevented. The number of concrete piles used in the work is 1801, 238 of which were driven at an angle as bracing piles.

REINFORCED-CONCRETE DETAILS

The pier deck is built entirely of reinforced concrete carried on reinforced-concrete girders 36 in. deep, which run transversely across the pier along the pile bents and on girders of the same depth running longitudinally at an average of 9 ft. 10½-in. centers. The 18x9 ft. 10½-in. rectangle thus formed is divided again by a transverse floor-beam 24 in. deep. The slab is 8 in. thick, reinforced in both directions with ½-in. round rods at 7-in. centers, every alternate rod being bent up over the supporting beam. The design is detailed in Fig. 2.

All beams and girders are designed as T-beams, sufficient web reinforcement being used to take care of the excessive shearing stresses, the top ends of the U-stirrups being bent horizontally and carried into the slab as far as the table of the T extends, in order that the shearing stresses occurring between the web and table be properly cared for.

Owing to the side and central railway tracks being carried at a level 3 ft. 6 in. below that of the pier deck proper, transverse concrete gussets were built in at the four breaks in the floor level so that the rigidity of the floor system would be maintained from one side of the pier to the other and the whole floor would act as a monolith in resisting the shocks of large vessels.

A concrete beam 51 in. deep is carried along each edge of the pier, and to the outside of this is secured a rubbing fender of pitch pine with a vertical face of 20 in. At the outer corners of the pier the depth of the fender beam was increased to about 11 ft., the corners being cut diagonally across, leaving a flat concrete surface 16 ft. wide by 11 ft. deep, strongly braced at the back by gussets from the pier floor. Numerous holes were left in this concrete face for attaching thereto fenders made of birch or willow saplings bound together into bundles.*

The interior columns supporting the upper floor of the shed are circular in cross-section, 25½ in. diameter, reinforced with 1⅛-in. vertical rods and ¼-in. hooping at 1-in. pitch. The side columns are rectangular in section, 16x20 in., reinforced with vertical rods with ¼-in. lacing at 6-in. centers.

The upper floor-beam system consists of transverse girders supported on the six columns of each bent and longitudinal beams at 9 ft. 10½-in. centers carrying a concrete slab 7 in. in thickness. The transverse girders have a span of 39 ft. 6 in. c. to c. of columns. In order to reduce the height of the upper floor above the pier deck to a minimum and at the same time to have adequate headroom for the lower story, the depth of the girders was made 50 in. and the thickness of the floor-slab was increased to 9 in. for a strip of 18 in. along each side of the girder, to provide sufficient compression area. The heavy shearing stresses were taken care of by bending the ends of eight of the horizontal rods in each beam diagonally up at intervals as required and also by the addition of U stirrups. Knee-brace brackets are provided at the heads of all columns to insure lateral stiffness. The width of the girders was made 36 in. to provide plenty of concrete for the proper bedding in of the large amount of reinforcing steel.

The roof consists of tar and gravel roofing laid on boarding and carried on a light reinforced-concrete slab.

---

*Described in "Engineering News," June 3, 1915, p. 1083.

The roof-beam system consists of 12x42-in. transverse girders carried on 12x12-in. concrete posts and 8x12-in. longitudinal beams with spans the same as the upper floor. The center bay of the roof is raised 5 ft. for the total length of the building, thus forming a monitor and providing good light for the upper story.

Steel sliding doors inclose each side of the lower story except for a length of 72 ft. at the shore end given over to shipping and railway offices. On the upper floor a 17-ft. opening closed with two steel sliding doors is provided at 36-ft. centers. All sliding doors for both floors are provided with windows glazed with ribbed wire glass.

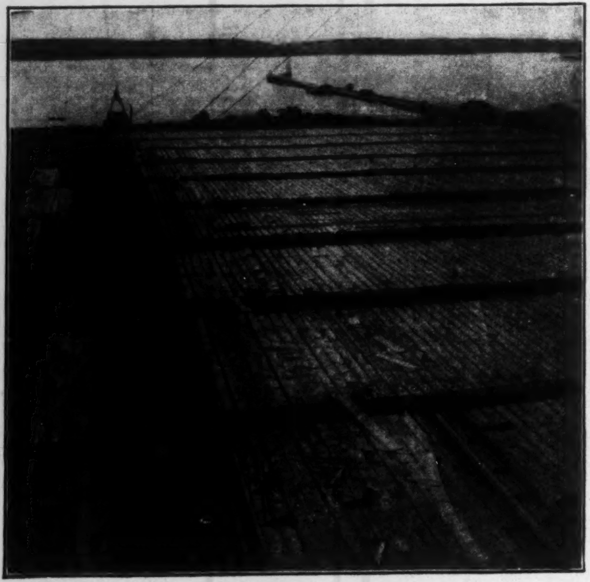

FIG. 7. THE CONCRETE PILE YARD AT HALIFAX

The two end walls of the shed are of reinforced concrete. The entrance for the two central railway tracks through the west end wall, 33 ft. wide by 18 ft. high, is provided with a rolling steel-slat door, as are also the 18-ft. wide roadway entrances. All window frames are of steel glazed with wire glass.

There are no expansion joints in either the pier deck or the upper floor, but as the upper story is to be temporarily used for an immigration examination building and will be heated during the winter months, it was thought advisable to leave expansion joints in the roof to relieve the bending stresses which would occur in the columns toward the ends and sides of the building.

Transverse joints are made by simply leaving a ½-in. space midway between two bents of columns, the longitudinal beams thus cut being designed as cantilevers. Where it was necessary to have an expansion joint to guard against transverse expansion, it was made by having the north end of the monitor girders rest on steel plates and rollers. (Fig. 9.)

PILE MAKING

A level area of sandy beach about seven miles by water from the site of the new pier was leased and graded for a pile-making yard. To the back of this area were large deposits of gravel and coarse sand, which on examination proved to be mostly composed of quartzite. Cubes and briquettes of mortar made from this material and cement easily passed the limits of strength required by the specifications, which were based on those of the Canadian Society of Civil Engineers.

The molding yard measured 800x600-ft. (Fig. 7.) A gravel-excavating, crushing and concrete-mixing tower was erected at the east end of the yard, mounted on wheels which ran on tracks across the whole width of the yard. Parallel tracks were laid across the west end of the yard, on which an anchor tower, similarly mounted on wheels, was placed and a cableway stretched between the two for the conveying of the concrete to the pile molds.

On top of the main tower, 80 ft. above track level, was placed a winding winch operating a dragline excavating bucket. This bucket emptied its contents of sand and gravel into a hopper over a grizzly, all stones not passing through being conveyed to a jaw crusher. The material then passed ¼-in. and 1-in. screens to separate the sand from the stone, any stones not passing through the 1-in. screen being elevated to a second crusher.

Chutes from the stone and sand bins led the materials to the mixer platform, where they were measured before passing into the one-yard batch mixer which discharged each batch into a bottom-dumping bucket that traveled along the aërial cableway to the pile molds.

Once the concreting of a pair of piles began, no stop was allowed before they were completed, so that all joints were eliminated. The first pile was concreted on May 21, 1912, and all were completed by Dec. 17 of the same year. The maximum amount of concrete poured by this plant in a day of 10 hr. was 168 cu.yd.

A timber pier 1000 ft. long by 22 ft. wide except for 85 ft. at its outer end, where its width is increased to 38 ft., carrying one railway track and a 30-ton loading derrick at its outer end, was built at the west end of the pier, extending westward into the harbor. This pier was also equipped with stone- and sand-storage bins.

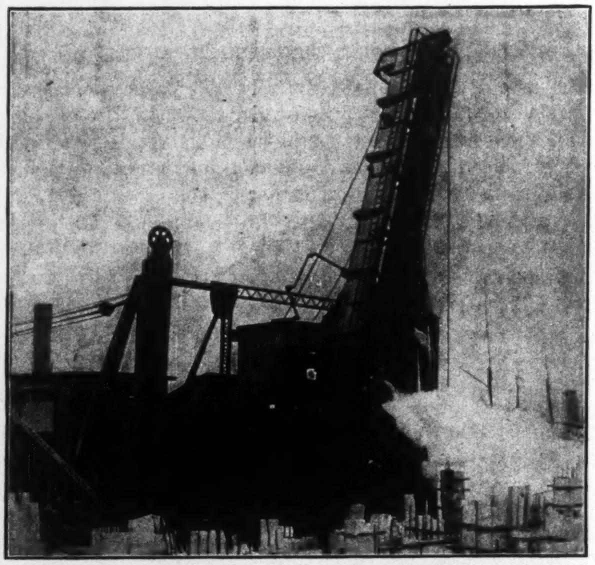

FIG. 8. THE PILEDRIVER DRIVING A BATTER PILE

Owing to the weight of the concrete piles, the smallest of which weighed 12 tons and the largest 46,000 lb., the conveying of them to the site of the work presented certain difficulties. The railway track from the loading pier was continued along the north side of the yard. Counterweighted cars with projecting ends were used for bringing the pile to the pier track. These cars were furnished with a heavy screw-jack on their overhanging ends, by which the pile was raised off the mold bottom and laid between the two rails of the longitudinal track. It was there raised up under two cars which straddle the pile and pushed out to the pier head, where the derrick lifted it onto a scow for conveyance to the new pier. The scows used were capable of taking nine piles on each trip.

PILEDRIVING

The difficulty of driving such long and so many battered piles required the adoption of a very heavy and somewhat complicated piledriver which was capable of being easily moved in any direction and shifted in any angle in the vertical plane. This machine, manufactured by the Bucyrus Co., was fully described in ENGINEERING NEWS, May 28, 1914, p. 1198. (Fig. 8.)

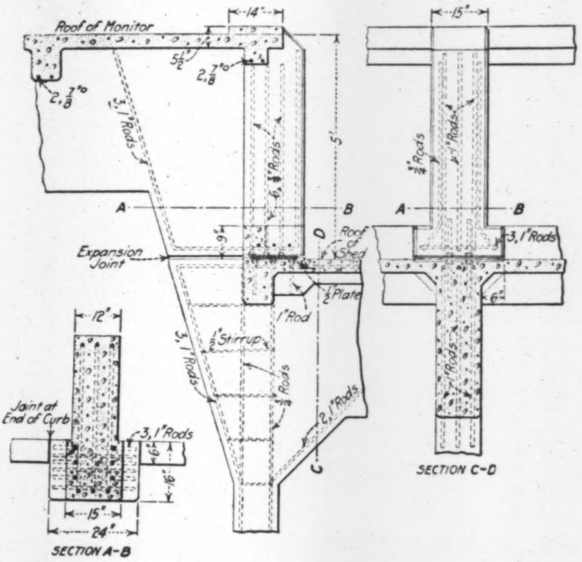

FIG. 9. DETAIL OF EXPANSION JOINT AT MONITOR

The method followed in placing and driving a pile was as follows: The piledriver scow was first placed in position by means of cross-ranges and anchored by lowering her spuds. Straps were placed around the pile to be driven as it lay on the deck of the scow on which it had been brought up from the yard and it was lifted horizontally by one of the forward derricks and swung round in front of the driver so that the head of the pile came in front of the pile leads. The swinging was accomplished by manipulating the forward spuds of the piledriver scow. The pile fall, having been made fast to the staple projecting out of the head of the pile, was hoisted up and at the same time the derrick fall was lowered and the pile gradually raised into a vertical position, the straps being taken off as the strain came off them. The pile leads were then moved as required for the exact centering of the pile. On the pile being lowered it penetrated the overlying soft mud with its own weight. This mud was found to have sufficient stiffness to hold the pile vertically when its depth was about equal to one-third of the length of the pile. As a general rule, however, the piles had to be stayed while the hammer was being adjusted on their heads.

Three separate cushions were used between the head of the pile and the ram of the hammer. On top of the pile was first placed 3 in. of spruce plank. On this rested a cast-steel follower about 4 ft. in height, designed to protect the projecting reinforcing rods and staple. This follower consisted of a hollow steel cylinder with top and bottom flanges. The bottom flange was flat and provided with holes through which the projecting rods passed and by means of which the pile was firmly held while being driven. The top flange had a rectangular depression on its upper side, in which was placed a hardwood block about 15 in. thick, bound round with steel bands. This block received the direct strokes of the hammer and had to be frequently renewed. At times one of these blocks would break up after the driving of only two piles, while others would stand the hammering of twenty, the breakage of the steel band usually being the cause of failure; although at times the heart of the block would become charred owing to the heat generated by the force of the blows.

The amount of hammering which the piles required to drive them to refusal varied a great deal. In some places where the depth of the hardpan was small the pile would come to a stop after 200 to 300 blows, while in other places they would require nearly 1800 blows to drive them to rock. The rate of penetration through the hardpan was small, the last foot or so in many cases being penetrated at not more than $^1/_{30}$ in. per stroke.

The following are records of the driving of three piles which show the great variation met with:

	1	2	3
Number of strokes of hammer.....	1010	505	240
Total amount of penetration, in....	107	0.37	23.2
Average penetration per blow, in...	0.1	0.073	0.1
Average penetration per blow during last foot, in................	0.033	0.036	0.059

Very little damage was done to the piles by the hammering. Only two had their heads badly smashed. These were among the first few piles driven, and the cause of the shattering was the continuation of the hammering after the pile had reached rock. A few blows of the hammer after penetration had stopped did no damage. In a few cases pieces of concrete would be knocked off the top edges of the pile head, usually due to a tendency of the pile to drive to one side or the other, thus making the hammer bear unevenly. To determine what was taking place at the point of the pile, several were pulled up after having been driven to refusal. Out of nine thus pulled and examined only one showed any damage, and in that case a sharp point of rock had been encountered which had entered the concrete point of the pile and spalled a small piece off the corner.

When no machine troubles were met with an average of 10 piles could be set and driven in 10 hr. In some weeks, however, the average would slightly exceed 12 per day, and the best day's work was 18.

In order to test the bearing power of the piles after driving, load tests were made with a floating load of 180,000 lb. on certain piles. The load, which consisted of two scows of 90,000 lb. weight each, was attached to the ends of a steel girder resting on the head of the pile and made fast at high tide, the pile and load being securely braced to prevent swaying of the former when under load. On the tide falling the whole load was carried by the pile.

Tests were made on piles which had been driven to different degrees of penetration with the following results:

Pile going $\frac{1}{16}$ in. per blow, settlement under load $^1/_{15}$ in.
Pile going $\frac{1}{8}$ in. per blow, settlement under load $^1/_{20}$ in.
Pile driven to refusal, settlement under load nil.

The problem of building forms of the necessary strength and stiffness on the short length of pile projecting above the water was not an easy one, but was successfully solved by the contractors. Horizontal wales of 4x8-in. sticks were bolted on each side of the piles as soon after driving as possible, and on these were erected the vertical forms for the building up of the pile to deck level. The bottoms of the beam forms were carried on joists supported by the pile-extension forms and braced by diagonal shores from the pile walings. Slight settlement of the forms took place on the pouring of the deck concrete, but in no case did any failure occur. It was found that by filling the pile extension forms at least 24 hr. ahead of the pouring of the deck, the settlement was reduced considerably.

By the middle of December, 1913, the piles had been driven and the pier floor completed to within 115 ft. of the outer end, at which place the work was suspended until the following spring, and the portion of the pier built was equipped with temporary wooden freight sheds and used throughout the winter by freight steamers. During this time the ability of the pier to withstand lateral blows from large vessels was demonstrated on more than one occasion. In every case the plates of the steamers were the sufferers from the impact. Work was resumed in May, 1914, and the whole of the concrete work completed by December, 1914.

PERSONNEL

The contract for the construction of the pier and shed has been carried out by the Nova Scotia Construction Co. under the management of Hamilton Lindsay, assisted by J. Shepherd Lee. John Kennedy is Consulting Engineer for the Dominion Government for the work and was assisted in the design by the writer, who has acted as Resident Engineer on the construction, assisted by R. A. Lockerby. The cost of the work complete will be about $1,125,000.

⁂

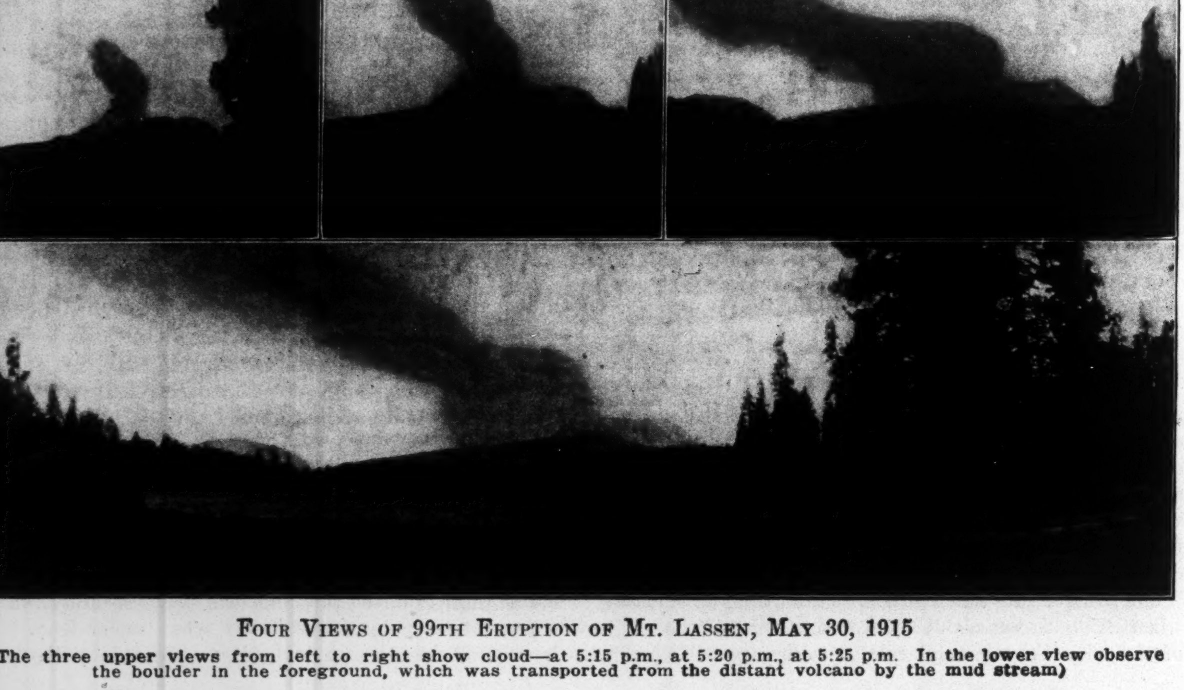
Volcanic Activity of Mt. Lassen

By THOMAS H. MEANS*

One hundred eruptions of Mt. Lassen, California, have been observed since May 30, 1914, when the first one took place. The writer recently made a trip to the volcano, and his observations were of considerable interest to himself, and will probably be to other engineers.

After a long period of comparative quiescence, during the night of May 20, 1915, a violent eruption occurred, and a tremendous flood of mud and water ran down the northeastern slope of the peak into the headwaters of Hat Creek. In the afternoon of May 22 a second and more violent eruption occurred, the steam cloud rising to a height of 5½ mi. above the top of the cone (as calculated from transit observations made by Joseph L. Reading, an engineer in Redding). This second big eruption was accompanied by another mud flood.

The northeastern slope of Mt. Lassen is very steep, being nearly 45 deg. in places. Two ridges or shoulders, one running to the east and one to the north, form a cirque or cove which is more than a mile wide. Prior to May, 1914, this cirque was filled with a glacier of unknown depth. Deep snow and ice remained here at the end of a hot dry summer. Nearly all other exposures of the peak were denuded of snow each year. This glacier varied in



FOUR VIEWS OF 99TH ERUPTION OF MT. LASSEN, MAY 30, 1915
(The three upper views from left to right show cloud—at 5:15 p.m., at 5:20 p.m., at 5:25 p.m. In the lower view observe the boulder in the foreground, which was transported from the distant volcano by the mud stream)

EROSION AND DÉBRIS FROM FLOODS OF MAY 20 AND 22, 1915

length from about 10,000 to 7500 ft. Since the eruption of May 20, 1915, this side of the mountain has been greatly changed. The glacier is gone, the mountainside is bare, and in the center of the cirque, where the snow was deepest, a line of steam holes extends from the crater's top down 7000 ft.

Mud and water sliding down this mountainside gained sufficient momentum to splash and run up the opposite mountainside to elevations of 200 ft. or more above the valley bottoms. The flood then divided, part going down Upper Hat Creek and part down Lost Creek, the main tributary of Hat Creek.

This flood carried with it trees, brush, rocks, boulders and mud, and swept a pathway from 600 to 1000 ft. wide, leaving a desolation of mud and boulders, with here and there logs and brush, as shown in the views. In the upper valleys the waters rose from 10 to 30 ft. Lower down the stream the crest flattened out and the water was absorbed by the valleys and the porous cove, and at Cassels (35 mi. distant) the rise did not exceed 6 in. The character of the destruction in the upper parts of the valley indicates that the flood was plastic, as though mud and ice were abundant.

It is very difficult to estimate the volume of the flood at maximum flow, for we have no measure of the velocity. At several points the area of the cross-section of the stream was estimated by pacing, and it was found to average 6000 sq.ft. The velocity was great enough to roll rocks 10 ft. in diameter. The average velocity of the flood for the first 10 mi. was roughly estimated at 15 to 20 ft. per sec. In the upper Meadows the writer believes the water must have flowed at a rate of 30 ft. per sec. Even with these rough figures it is seen that the flood must have been between 90,000 and 180,000 sec.-ft. in Lost Creek alone. No estimate was made for Upper Hat Creek.

No evidence of molten rock has yet been found around Lassen. That the rocks are getting hot no one can deny. We found a boulder 10 ft. high by 60 ft. in circumference which had been carried by the water 2 mi. from the crater. Our visit took place 8 days after the second flood and 10 days after the first, and yet this rock was too hot to touch and hot enough to ignite a match.

There is no evidence to show that rocks have been dropped on any point a mile away from the main crater. A search of the hillsides for 1½ mi. around revealed nothing so large as a pea. Dust, or volcanic ash, has been found several miles away, and the ground within 2 mi. of the crater shows the results of several dust showers.

On May 30, 1915, during a visit to Upper Hat Creek, a very beautiful eruption was observed from a distance of about 5 mi. Photographs of this eruption, taken by the writer, are reproduced herewith. The height of the steam cloud was estimated to be 7000 ft. above the crater.

Mt. Lassen eruptions have increased in intensity, but to date they have been associated with the wet season and the period of melting snow. Whether the water which makes the steam comes from some distant source, such as the ocean or Big Meadows Reservoir, is a question yet unanswered.

⁂

Exposition of American Chemical Industries—The first American exposition of chemical industries will be held at Grand Central Palace, New York City, during the week beginning Sept. 20, 1915. It is to be managed by C. F. Roth and A. Nagelvoort, assisted by an advisory committee of nine eminent chemical engineers. It is expected to include coal, wood and petroleum products, metals, minerals, water and sewage purification, air and gas processes, glass and ceramics, oils, varnishes, plastics, rubber, leather, glue, etc. Working exhibits will be shown. Inquiries should be directed to the National Exposition of Chemical Industries, 46th St. and Lexington Ave., New York City.

Relative Reliability of Long-Time Rainfall Observations

By F. H. Millard*

In dealing with rainfall there is always the feeling that one more year's observations might bring a maximum or minimum rainfall entirely out of relation to those observed in previous years. It would be very satisfactory if one could observe the rainfall for a year and then state with assurance that this is an average year or a year which bears a certain definite relation to the average of all years.

Recently there have appeared two tabulations—one covering the rainfall in Milwaukee for a period of 63 years and the other covering rainfall for 100 years at New Bedford, Mass. It is of considerable interest to take these rainfall records and to combine consecutive years into groups of varying lengths and to note the maximum and minimum average rainfall per year obtained by these combinations of consecutive years.

TABLE I. VARIATION IN YEARLY RAINFALL IN INCHES DURING PERIODS OF VARIOUS LENGTHS

Number of Years Observed	63-Year Record at Milwaukee, Maximum	Minimum	Variation	100-Year Record at New Bedford, Maximum	Minimum	Variation
1	50.4	18.1	32.3	65.41	34.51	30.90
2	48.3	22.9	25.4	65.04	33.58	31.46
3	44.6	22.7	21.9	63.75	40.06	23.69
4	42.6	24.9	17.7	60.14	39.40	20.74
5	40.3	24.6	15.7	58.64	41.13	17.51
6	38.7	25.5	13.2	57.99	41.06	16.93
8	36.9	26.9	10.0	54.99	42.08	12.91
10	35.5	26.8	8.7	54.26	43.23	11.03
15	33.9	28.4	5.5	51.00	43.24	7.76
20	33.2	28.7	4.5	49.24	44.52	4.72
25	33.1	29.1	4.0	48.35	44.36	3.99
30	32.7	29.8	2.9	48.07	44.37	3.70
40	32.2	30.7	1.5	47.86	45.16	2.70
50	....	....	....	47.20	45.17	2.03
60	....	....	....	46.92	45.93	0.99
70	....	....	....	47.12	46.07	1.05
80	....	....	....	47.28	45.97	1.31

Table I shows the results of these groupings and Fig. 1 gives the same information in graphic form. It is interesting to note the fact that the variations above the average are considerably larger than the variations below the average, and that if one is to observe for a short period only, the variation above the average is likely to be appreciably larger than the variation below the average.

Table II shows the percentage which the average rainfall per year, determined from the maximum and minimum groups of different lengths, is of the average rainfall per year for all observations. It will be noted that in one case the maximum single year exceeded the average by over 60%, while the minimum year was less than the average by 40%. In the other case the figures show a variation of 40% above the average for the maximum and 26% below the average for the minimum. Taking 10-year periods, the maximum is only 16% greater than the average, while the minimum is 13% less in one case, the maximum being 17% greater and the minimum 7% less in the other case.

TABLE II. PERCENTAGES WHICH AVERAGE RAINFALL FOR VARIOUS SUB-PERIODS ARE OF AVERAGE RAINFALL FOR WHOLE PERIOD

	63-Year Record at Milwaukee, Average per Year, 30.65 in.							100-Year Record at New Bedford, Average per Year, 46.40 in.

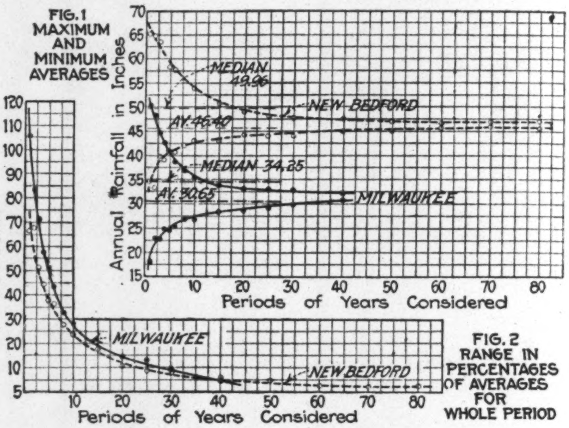
40	32.2	105.1	30.7	100.2	1.5	4.9	9.6	47.86	103.1	45.16	97.3	2.70	5.8	15.4
50	....	.....	....	....	....	.....	.....	47.20	101.7	45.17	97.3	2.03	4.4	11.6
60	....	.....	....	....	....	.....	.....	46.92	101.1	45.93	99.0	0.99	2.1	5.7
70	....	.....	....	....	....	.....	.....	47.12	101.6	46.07	99.3	1.05	2.3	6.0
80	....	.....	....	....	....	.....	.....	47.28	101.9	45.97	99.1	1.31	2.8	7.5

Fig. 2 shows graphically the range from the maximum to the minimum in per cent. of the averages for both series of figures and for groupings of different lengths. These curves are remarkably similar.

Table II shows also the percentage variation of each length of observation in terms of the percentage variation of the five-year observations. The five-year period was arbitrarily taken as a unit, and from this table it appears that in the matter of accuracy the increase of the period of observation from one year to five years does more than the inclusion of an additional 35 years in the one case, and in the other, it appears that the inclusion of the first four additional years contributes to the accuracy of the averages observed to about the same extent that the inclusion of an additional 20 years would.



Figs. 1 and 2. Maximum and Minimum Average Yearly Rainfalls for Various Periods at Milwaukee and New Bedford

(Based on a 63-yr. record at Milwaukee and a 100-yr. record at New Bedford)

No attempt has been made to study these figures with the aid of higher mathematics, and the curves are shown here as illustrative of the increasing accuracy of rainfall observations when averages are based on records covering increased periods of time. More such long-time records should be made available in order that the curves here shown representing rainfall on the Eastern seaboard and in the Great Lakes district may be compared with rainfall on the Pacific Coast or in the Plains states.

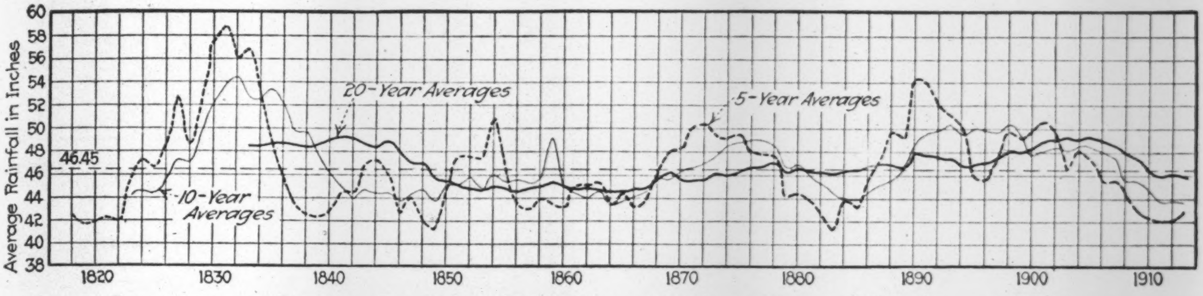
Average Rainfall in the Light of the New Bedford Record

By N. M. Stineman*

An article in Engineering News of Nov. 19, 1914. by X. H. Goodnough gives a continuous record of rainfall at New Bedford, Mass., from 1814 to 1913 inclusive. A thorough discussion of the record is given in the article; but further investigation throws light upon the question as to what reliance may be placed upon records of a much shorter duration. Would rainfall observations continued for 5, 10 or 20 years be of any value?



Comparison of Rainfall Averages for 5-, 10- and 20-Year Periods, New Bedford, Mass.

Recently I had occasion to analyze the New Bedford records, in order to determine, if possible, the probable value of a record which is continuous for only 20 years. The accompanying diagram gives the results. Five-year, 10-year and 20-year averages are plotted to the same scale, the ordinate over any given year representing the average for the period ending with that year. For example, at the ordinate 1840 may be read the average rainfall for the 5-year period from 1836 to 1840, the 10-year period from 1831 to 1840 and the 20-year period from 1821 to 1840.

COMPARISON OF RAINFALL AVERAGES, NEW BEDFORD, MASS.

Year at End of Period	5-Year Averages	10-Year Averages	20-Year Averages	Year at End of Period	5-Year Averages	10-Year Averages	20-Year Averages

Assuming for the time being that the New Bedford record is an indication of what might be expected elsewhere, the curves show conclusively that a 5-year record is too short to give dependable results. The averages vary from 41.13 in. to 58.64 in. Expressed in different terms, these figures vary from 11.4% below to 26.2% above the 100-year average of 46.45 in. The 10-year curve is more regular than the 5-year curve; but the ordinates vary from 6.9% below to 16.8% above the 100-year average. On the other hand, the 20-year averages vary only from 44.48 in. to 49.24 in., or from 4.2% below the 100-year average to 6% above. Hence during the entire century it would not have been possible to select any 20 successive years in which the average rainfall would have deviated by more than 6% from the 100-year average.

This should be accurate enough for all practical purposes, although an examination of the 20-year curve shows further that only in a few cases does a variation of as much as 6% occur. About 77% of the 20-year averages fall within 4% of the average for the century, which is close enough for most purposes.

It would be interesting to know whether other long rainfall records would show similar results, and whether these conclusions could properly be applied to the flow of rivers.

⁂

Pumping Plant for Dry Dock No. 1, Balboa Terminal, Balboa, C. Z., will be furnished by Henry R. Worthington, New York, under a contract recently let. The plant comprises four main pumps, two drainage pumps and one bilge pump. The four main units are identical in all parts, each consisting of a 54-in. vertical-shaft, single suction, single-impeller, volute centrifugal pump, with a minimum capacity of 11,000 cu.ft. of sea water per minute, when pumping against static heads ranging from 0 to 48 ft., and when operating at 250 r.p.m. Each unit is direct-connected to a 1000-hp. constant-speed alternating-current vertical-shaft motor of the squirrel-cage induction type, three-phase, 25-cycle current at 2200 volts. The average overall efficiency of each unit pumping against the total heads encountered must be not less than 64.5%. The two drainage pumps are of the same type as the main units, each consisting of a 20-in., vertical-shaft, volute centrifugal pump with a minimum capacity of 1200 cu.ft. of sea water per minute, against the range of heads encountered, when operating at a speed of 750 r.p.m. The bilge pump is of the vertical self-contained centrifugal type, having 4-in. suction and 3-in. discharge, with a capacity of 25 cu.ft. of sea water per minute when pumping against any stage of the tide. The overall efficiency is specified at not less than 32%. The contractor will also furnish the floors, platforms, gangways, ladders, stairs and handrails necessary for safe and convenient access to all parts of the plant equipment. The time for delivery of all the material is specified at 210 days. The Balboa dry dock is one of the largest in the world, having a length of 1110 ft., an entrance width of 110 ft. and a depth over the sills of 41.5 ft. at high water.

Concrete Bridges with Stone and Brick Facing

By C. E. Drayer*

The use of facing on concrete bridges is displayed in interesting contrast by two recently built arch bridges in Fort Wayne, Ind. In both cases the esthetic value of the facing quite evidently justifies its use. To what extent the facing affects repair and maintenance charges will have to be learned from slow experience.

Brick Facing: Tennessee Ave. Bridge

Tennessee Ave. crosses the St. Joseph River by two reinforced-concrete arch spans of 105 ft. The view shown in Fig. 1 brings out the successful selection of form and the good appearance of the bridge in adaptation to the surroundings. The bridge has an ornamental facing of dark brick and white stone. The balustrade is wholly built of brick and stone, the panels being of brick, while the coping and posts are of stone. In the facing of the arch itself stone is used only for the quoins and for picking out the panels.

The main surface of the arch is formed of wire-cut brick of deep-red color, with matt surface, and is laid in Flemish bond. There is enough variation of color in the brick itself to make the surface as a whole quite picturesquely variegated (see Fig. 2). The stone trim is No. 1 oölitic Bedford sandstone. The pieces used in the balustrade are of very substantial character, the coping rail being in one piece between posts or 12 ft. 8½ in. long. The intermediate posts are solid single pieces extending through the thickness of the balustrade, and the pier caps are single pieces 3 ft. 5½ in. by 9 ft. 4 in.

The bridge was designed by A. W. Grosvenor, of Fort Wayne, and built under his supervision by the Lafayette Engineering Co., Lafayette, Ind., contractor. Above the arch barrel no forms were used. The concrete was placed inside the brick facing, the latter being carried up sufficiently in advance to permit of doing this concreting in 2-ft. layers.

The cost of the bridge was a little over $39,000, including the pile foundation.

Stone Facing: Coombs St. Bridge

Fig. 3 shows the stone-faced bridge over the Maumee River on Coombs St., in the suburb of Lakeside. Here the facing used is sandstone. The esthetic effect depends largely on the emphasis of the arch barrel by the quarry-faced ring stones of the facing, although the effect is somewhat reduced by the detail of the railing. The cost of this bridge was about $65,000.

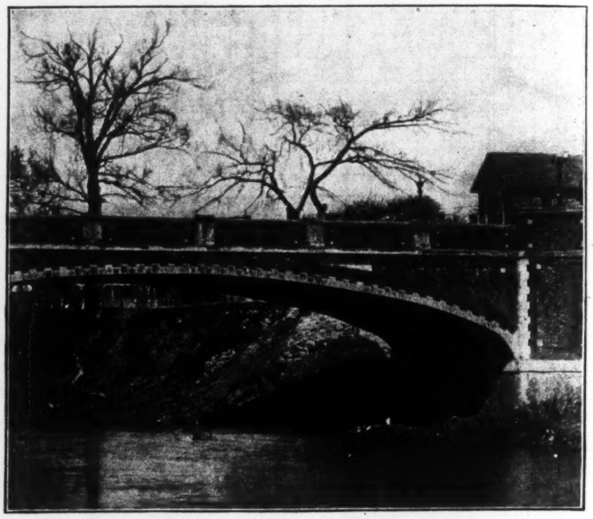

Fig. 2. Detail View, Tennessee Ave. Bridge

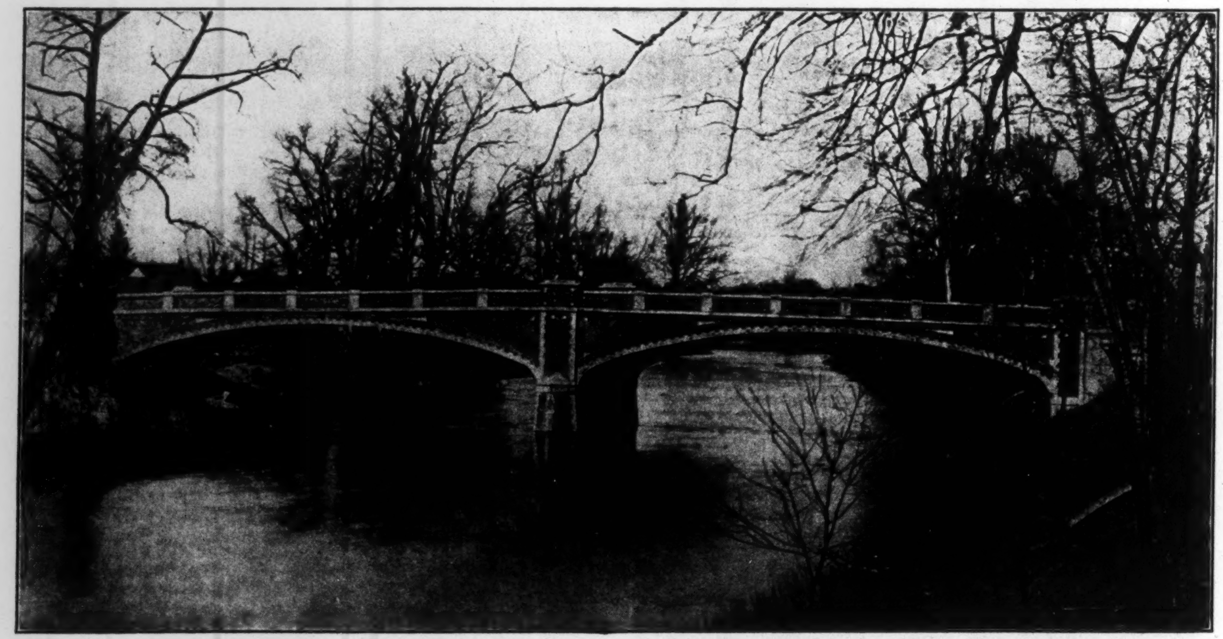

Fig. 1. Tennessee Ave. Bridge, Ft. Wayne, Ind.
(Brick facing with stone trim)

---

*1801 East 93d St., Cleveland, Ohio.

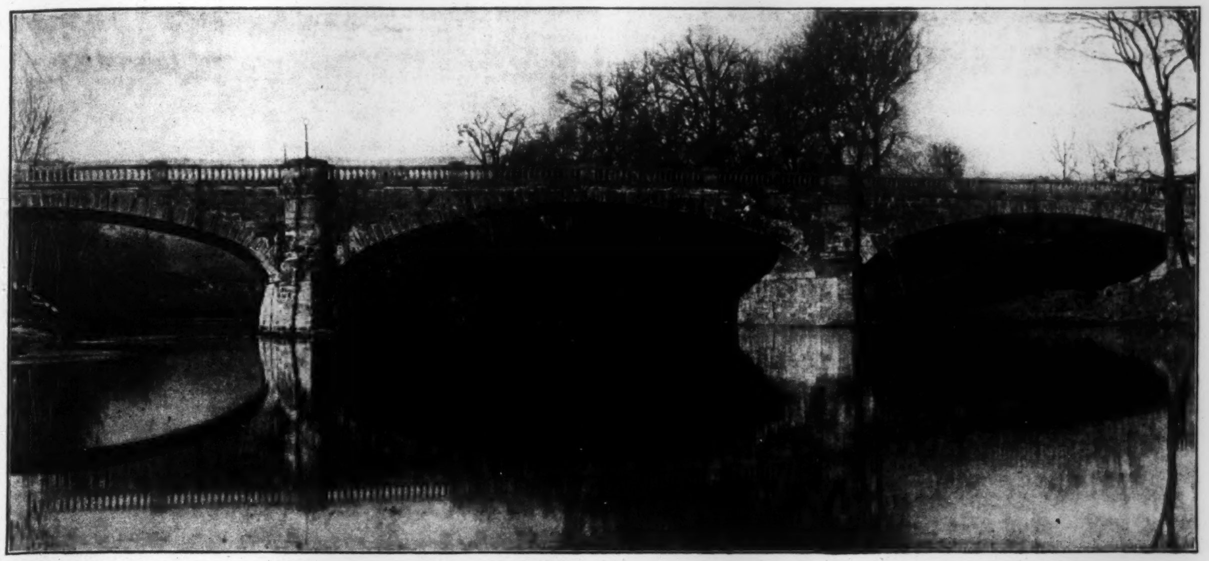

FIG. 3. COOMBS ST. BRIDGE
(Sandstone facing, concrete balustrade)

The bridge is said to have been built to curves sketched empirically to fit lines traced from drawings of the Tennessee Ave. bridge, under the following curious circumstances:

According to Indiana law, the county must have plans to accompany the advertisement for the letting of a bridge, and any person may submit a plan provided it is filed with the auditor ten days before the bids are opened. When the county commissioners of Allen County were ready to let a contract for the Coombs St. bridge they accepted plans drawn by a man who had been employed as carpenter foreman on the construction of the Tennessee Ave. bridge. His plans were drawn without any study to determine the necessary size of the various parts of the structure, but from a cardboard templet which he made of the arch curve of the Tennessee Ave. bridge from contract drawings of it on file in the county commissioners' office. The radii of the arch ring of the Tennessee Ave. bridge were changed to make a curve suitable, in his mind, for the new spans.

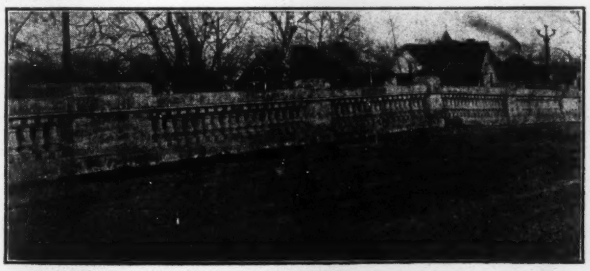

FIG. 4. ROADWAY SUMMIT AND CONCRETE BALUSTRADE, COOMBS ST. BRIDGE

Construction brought out both the amusing and the serious features of the design. In the Tennessee Ave. bridge the two spans are each 105 ft. long, while in the Coombs St. bridge the channel span is 100 ft. long, flanked on each side by a 90-ft. span. When forms were laid out by the contractor for the Coombs St. bridge, using radii shown on the plans, each span failed by about 2 ft. to connect up with the masonry it was to rest upon. So he and his foreman made full-sized arch-ring templets, pretty much by eye, that would spring over the foundations. Their curves reduced the waterway below what it would have been if proper elliptical curves had been used. The templets were taken to shops in Fort Wayne and Melan-type arch ribs bent to fit them.

Not only was the design of the arch curves defective, but in the plans of the Melan trusses a serious omission occurred, due to ignorance. The ribs were made in three sections, but no top and bottom flange plates were provided at the joints where the angles butt. In other words, at the two points of approximate maximum stress the flange connections containing two-thirds of the rivets at the joints were omitted.

⁂

San Francisco Specifications for Concrete Pavements—Some interesting points in the specifications for concrete pavements, written by M. M. O'Shaughnessy, City Engineer of San Francisco, and recently adopted by the Board of Supervisors, follow: The concrete is of 1 : 2 : 3½ mixture. After mixing, the concrete is deposited rapidly in successive batches; the concrete is deposited to the required depth and for the entire width of the pavement in a continuous operation between transverse and longitudinal joints without the use of intermediate forms or bulkheads. In case of a breakdown, concrete must be mixed by hand to complete the section or to an intermediate transverse joint placed at the point of stopping work. Any concrete in excess of that needed to complete a section at the stopping of work is not to be used in the work. Longitudinal joints filled with ⅛ in. of prepared felt are constructed between the curb and the pavement on each side of the roadway, and along the center line where the roadway exceeds 25 ft. in width. Transverse expansion joints are constructed in straight lines at right angles to the center line of the roadway for the full width of the pavement and at intervals not exceeding 25 ft. The surface of the pavement is sprayed with water as soon as the concrete is sufficiently hardened to prevent pitting and is kept wet until a sand covering is placed. As soon as this can be done without damaging the concrete, the surface of the pavement is covered with a layer of sand at least 1 in. thick, and covering kept moist for at least 10 days. The pavement is not to be opened for traffic for a period of at least 20 days after being laid. The contractor is required to maintain the sand covering for a period of at least 10 days and must erect and maintain barriers to protect the concrete from traffic, and any part of the pavement damaged by traffic or other causes prior to its official acceptance must be repaired or replaced by the contractor at his own expense in a manner satisfactory to the engineer.

Rail-End Connections for Bascule Bridges

A special design of mitered joint for the rail connections of bascule drawbridges has been in use for about three years at the Calumet River bridge of the Chicago & Western Indiana R.R., and is described briefly in a paper in *Bulletin 175* (March, 1915) of the American Railway Engineering Association. It was designed by W. A. Casler, Assistant Engineer of the railway.

The design was made after a study of the merits of square-cut and miter-cut rails, and a special feature is that it brings the rails into line regardless of the alignment of the bridge. The bridge alignment in this case is found to vary as much as ½ in. in summer, owing to warping. In the usual type of mitered or lap joint there is a possibility of the rails interfering or becoming jammed while closing, unless a very wide joint spacing is provided. Such a spacing is objectionable, as in connection with the decreased tread surface it causes severe pounding at the joint, and the consequent wear reduces the life of the connections. These objections are overcome in the design described. The main parts are manganese-steel castings, each forming in itself the track rail, guard rail and joint at the bridge connection.

The lifting ends are provided with guiding members, cast on the under side. These are tapered at the lower portion and then straight for a distance slightly greater than the height of the running rails. These guides enter pockets on the abutment, and thus bring the rail ends into line before the rails engage during the closing of the bridge.

The abutment rail ends are riveted to a bedplate made in two parts, these being put together with an insulated joint to permit the use of track-circuits for the signals. The bedplate has openings to receive the taper guides, with short heavy angles beneath the openings to form the sides of the pockets for the guides. This arrangement permits of a very close miter joint, as noted.

FIG. 1. MITER JOINT FOR RAIL-END CONNECTIONS ON BASCULE BRIDGES; CHICAGO & WESTERN INDIANA R.R.

The locking is effected by horizontal sliding bolts whi engage the flanges of the lifting ends and hold them dow upon the abutment bedplate. Automatic latches preven the movement of the bolts when the bridge is open. Th locking bolts are operated by a lever pivoted in the center line of the track and connected to a switch-operating motor mechanism, controlled by the interlocking plant for the signals and derails.

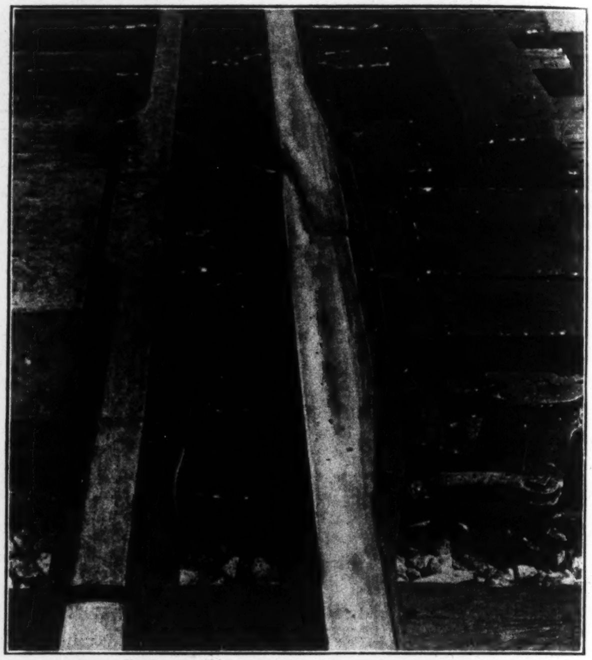

FIG. 2. MITER JOINT FOR RAIL-END CONNECTIONS ON BASCULE BRIDGES; SHOWING THE CONTINUOUS GUARD RAIL AND THE FLOOR TO CARRY DERAILED WHEELS OVER THE JOINT

Another feature of the device is the protection afforded to derailed trains. In Mr. Casler's opinion more attention should be given to guard-rail equipment at drawbridge connections and to the elimination of mechanism in the path of derailed wheels. It will be seen from the illustrations that in this case the guard rail is maintained continuously opposite the rail joint, and with a flange-way support to carry derailed wheels on their flanges. The locking bolts and operating mechanism are also protected from damage due to derailment. The device permits of using the 8-in. guard-rail spacing employed on fixed bridges, while some other devices require a 10-in. spacing. It is considered that a derailment at such a point would be no more dangerous than if it occurred upon a fixed bridge having the usual guard-rail protection.

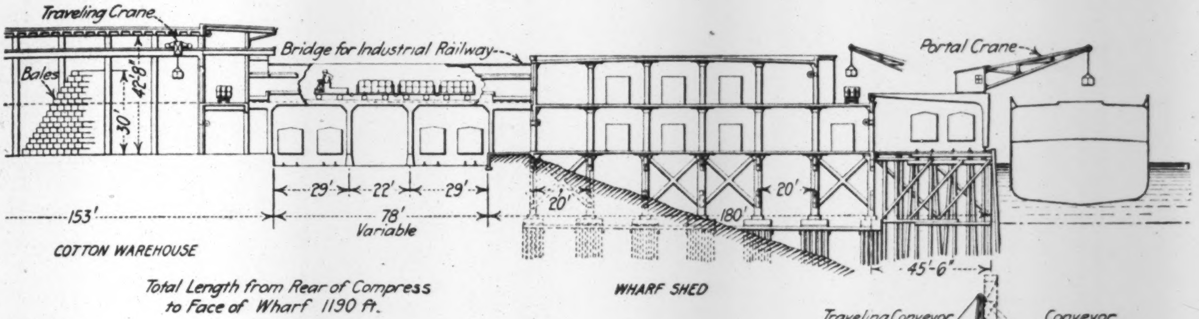
Mr. Casler believes that the mitered type of rail connection is superior to the square-end type. It gives smoother riding and can be made safer and less liable to injury by derailments, since it can be made free of obstructions in the path of derailed wheels. This last feature is difficult to obtain in sliding-bar or sleeve joints, where the operating rods are either in the guard-rail troughs or immediately adjoining the outer rails.

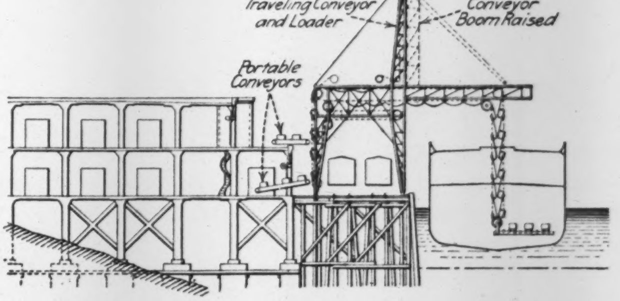
⁂

Cotton Warehouse and Terminal at New Orleans

Extensive new facilities for the cotton-shipping business at New Orleans, La., are being built by the Port Commission. These comprise a warehouse and terminal plant with capacity for storing nearly 500,000 bales and for handling and shipping about 2,000,000 bales annually, while future extensions are planned to double this capacity. The plant was designed by Ford, Bacon & Davis, consulting engineers, New York, and the work is being done under their direction. The designs were made with the coöperation of representatives of the Cotton Exchange. The Jefferson Construction Co., of New Orleans, has the contract for the buildings.

The site is on land reclaimed from the Mississippi River by hydraulic dredges pumping material behind a levee or bank. About 50 acres are occupied by buildings and an equal space by railway tracks and yards, the latter having capacity for about 2500 cars.





Cross-Section of the River Front Portion of the New Cotton Terminal at New Orleans, La.; Showing Methods of Handling the Cotton Bales

Along the waterfront will be a line of two-story wharf sheds 120 ft. wide (100 ft. on the upper floor), extending for a distance of about 2000 ft. Behind these will be a group of four warehouse buildings (in pairs) 670x270 ft., with tracks laid between them. Next to these will be two sorting sheds, 670x130 ft. At the rear will be a cotton-compress building, 410x230 ft., flanked on either side by a warehouse, 510x270 ft. The buildings will be of reinforced-concrete and steel-frame construction, with creosoted-pile foundations. In front of the wharf sheds will be a timber wharf of creosoted piles and timbers. This will have two railway tracks for cars delivering cotton direct to vessels, and on it will travel dock cranes and conveyors which span the railway tracks and deliver bales from the sheds to the vessels.

The warehouses are of the one-story cellular, or compartment, type, 35 to 45 ft. high, with no intermediate floors. This arrangement greatly reduces the cost, since all the load is carried directly upon the ground and all load-carrying floors and columns, with their foundations, are eliminated. The cost is said to be about $4 per bale, as compared with $10 per bale if the floor type of warehouse had been adopted. For handling and transporting the bales in the compartments there are overhead traveling cranes and hoists. Special hoisting devices are provided also, by which a bale can be taken from the bottom of a pile without removing the bales above it.

For handling the bales from cars to the warehouses and from warehouses to the wharf sheds there will be a system of narrow-gage industrial tracks on which small cars will be operated by electric locomotives. These tracks will be on the level of both floors of the wharf sheds, being connected by inclines and the upper-level tracks being carried on runways extending between the buildings. The bales delivered on either floor of the wharf sheds will be transferred to ships or lighters by means of portal cranes with revolving booms or by traveling conveyors.

⁂

An Employee May Use His Technical Knowledge gained in the service of an employer in connection with work for a competing employer after he leaves that service, notwithstanding a direct agreement to the contrary. This is the substance of a decision recently rendered by the Court of Appeal of Great Britain. As described in London "Engineering" of Apr. 9, the case was that of an engineer who had been chief draftsman of a manufacturing firm and later was placed in charge of its sales department. While in that position he made a contract with his employer that he would not for the term of seven years from the date of his relinquishing employment with him go into the business of manufacturing or selling pulley blocks, overhead runways, overhead traveling cranes, or any parts thereof. Notwithstanding this agreement, the engineer after leaving the employ of this company entered the service of a firm which was its chief competitor. The former employer appealed to the court for an injunction. The case was heard by the court and the judge ruled that the enforcement of the agreement would deprive the defendant and the public of the benefit of the skill and experience he had acquired in the plaintiff's employment and would prohibit him from using knowledge which formed part of his mental equipment. The case was carried to the Court of Appeal but this affirmed the judgment of the lower court. One reason the latter court gave for its decision was that the defendant at the time of signing the contract was not really in the position of a free man negotiating on equal terms with his employer, but was bound by a previous agreement made in 1906 for seven years.

Interstate Bridge Over the Columbia River, Portland, Ore.

By E. E. Howard*

SYNOPSIS—Bridge and approaches, construction of which is just being started, will extend across the Columbia River valley from the city limits of Vancouver, Wash., to the city limits of Portland, Ore., a distance of about 3¼ mi., and will include about 5000 lin.ft. of steel bridge structure and 12,000 ft. of embankment, with a secondary approach on the Oregon side, for which at the present time an embankment about 6000 ft. long will be built. The bridge and approaches will provide a roadway for street traffic and for street cars, and over the steel structures will provide a sidewalk. The Columbia River at times of extra-high water covers the entire 3-mi. width of the valley. The total cost is to be about $1,700,000.

The main channel of the Columbia River at Portland, Ore., is 3500 ft. wide, with a maximum depth of 30 ft. at extreme low water, and with variations from extreme low to extreme high water of 33 ft. The water rises each spring to about 20 ft. and about once in four years to about 25 ft. So far as known, it has reached 33 ft. only once. The bed of the river consists of sand, with small amounts of gravel extending to great depths. At the north shore very compact cemented gravel is found a few feet below the surface, dropping off to 100 ft. below at about 700 ft. from the north shore. Over the remainder of the river only sand with some gravel was found at depths of more than 100 ft.

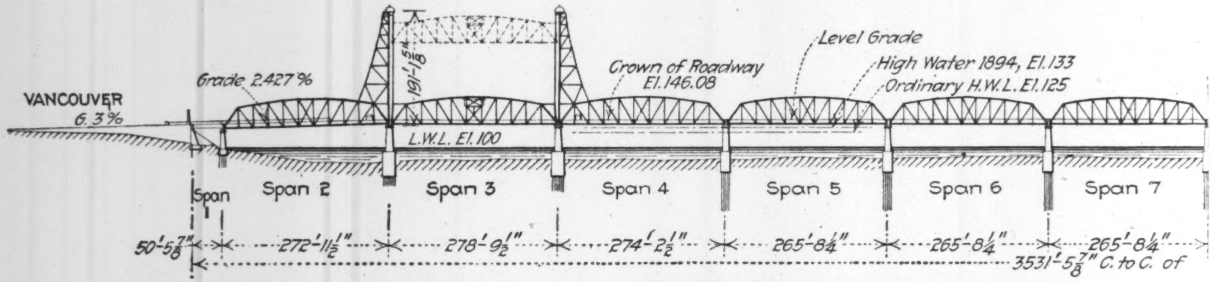


Fig. 1. Outline Elevation of the

The Oregon Slough forms an important secondary channel, particularly for flood conditions. It is about 1000 ft. wide and 25 ft. deep, and is separated from the main river by an island about 1500 ft. wide. The United States Government has built a dike some distance above the bridge site and the island to divert practically all of the low-water flow down the main channel of the river, the top of the dike being about 6 ft. above low water. The bed of this slough is principally sand.

The Columbia Slough provides some drainage near the Oregon side of the valley and is about 300 ft. wide and 20 ft. deep at low water. The bottom is of clay and sand. Hard and compact gravel is found about 80 ft. below low water.

The average elevation of the ground across the river valley is from 12 to 15 ft. above low water, so that much of it is inundated at every high-water period.

Bridge Structure

The roadway is 38 ft. wide between curbs, or 41 ft. between trusses, with steel handrails where required. Over the steel spans there is one sidewalk 5 ft. wide. Double-track street-car tracks for both standard and narrow gages are placed in the middle of the roadway, spaced 10 ft. 8½ in. c. to c. The vertical clearance in trusses is 21.5 ft. The entire roadway, both on the bridges and embankment, is to be paved with hard-surface pavement.

The live-loads for which the structure is designed are as follows:

For floor system:
  On street-car tracks—50-ton cars on both tracks.
  On roadways—12-ton motor truck, Class A, uniform load, with special provisions for 24-ton machinery truck.
  On sidewalk—120-lb. per sq.ft.
  For impact allowance, 50 per cent. is added to all except sidewalk loads.
For trusses and girders:
  On street-car tracks—40-ton cars on both tracks.
  On roadways—Class B uniform load.
  For impact allowance the following percentages of each load is added to it:

For street-car loading—$I = \frac{230}{N\,L + 300}$, but not greater than 50 per cent.

For roadway loading—$I = \frac{180}{N\,L + 30}$, but not greater than 50 per cent.

Where
  I = Percentage;
  L = Length of load on bridge producing maximum stress;
  N = Number of loaded tracks for street-car loading or number of lines of traffic for highway loading.

The working stresses used in the design are as allowed by Harrington, Howard, and Ash specifications.

Main Truss Bridge

The bridge over the Columbia River (Fig. 1) consists of a series of through riveted truss spans with curved top chords, three spans 275 ft. long and ten spans 265 ft. long, together with a small deck-girder span at the Vancouver end, making a total length of 3531 ft. 5⅞ in. between end shoes. Provision for navigation on the river is made by a vertical lift span of the Waddell & Harrington type. The central of the three 275-ft. spans is arranged to lift between towers on the other two, so as to afford a channel 250 ft. wide at right angles to the current of the river and 150 ft. high above ordinary high water.

FIG. 2. OUTLINE ELEVATION OF THE TWO SLOUGH CROSSINGS

The trusses are spaced 41 ft. c. to c. with the roadway between and the sidewalk beyond one truss. The floor is a reinforced-concrete slab 5¼ in. thick, and the sidewalk is also of reinforced concrete. The arrangement of the beams and of the concrete slab for the floor merits attention, as it is new and original (Fig. 3). Between usual floor-beams are longitudinal stringers spaced about 9 ft. c. to c. On top of the stringers, extending entirely across the roadway, there are 8-in. I-beams spaced about 33 in. apart. These roadway cross-beams are bent to conform to the crown of the roadway, and the concrete slab rests immediately on top of them. The six rails required for the two-gage, double-deck street-car tracks rest immediately upon the roadway cross floor-beams and are fastened to them by standard Carnegie steel tie clips. The rails are 7 in. high, so that there remains a space of 2 in. in depth above the top of the concrete slabs to the top of the rail for the 2-in. special bituminous concrete surfacing which forms the pavement. To afford a rail heading which could be removed, if necessary, for access across the rails, or to the bonding, without injury to the roadway slab, the space, about 5 in. wide, on each side of each rail, is filled with concrete to the top of the rails, a flangeway being provided by forming this concrete.

MAIN TRUSS SPANS, INTERSTATE BRIDGE

This arrangement of floor has the advantage of providing a concrete slab longitudinal in the direction of travel, with comparatively short spans, and of making the supporting steel beams of very simple shop work. It is expected that the cross floor-beams will be formed to their curve by shimming up the hot-beds to a proper curve, so that the beams may form while cooling. Owing to the lateral stiffness of the floor as constructed, the lower laterals of the spans are somewhat lighter than they would be for an open-deck bridge.

Two fixed ends and two expansions of the spans are placed adjacent so as to reduce the number of expansion joints to a minimum. The expansion joints are made by the usual type checkered plates supported by and sliding upon metal supports. The corresponding expansion joints for the rails between the spans consist of manganese-steel castings placed beside webs of the rails, for which one side of the rail heads is planed off.

The towers supporting the lift span are of simple construction, riveted throughout, and so arranged that the front columns of the towers support all the loads of the lift span and counterweights. The rear columns are bracing members.

SUBSTRUCTURE

The river at the site of the bridge is subject to a certain amount of scour, but inspections of the soundings taken for many years past fail to disclose any indication of scour to extreme or unusual depths, although the river for some distance upstream and about three miles downstream is deeper than at this site. The exceptional facilities for securing piles of great length at a very reasonable cost were a considerable factor in determining the exact type of piers to be used.

The piers (Fig. 4) are to be constructed of concrete, containing and resting upon piles sunk by means of water jets to a depth of about 105 ft. below low water. Open cribs of timber, braced by transverse trusses and forming permanent parts of the pier bases, will be sunk to depths of from about 20 to 25 ft. below the river bed and the piles jetted down inside the cribs, averaging about one pile to 10 sq.ft., area of crib. Concrete will then be deposited through the water in sufficient quantities to seal the bottom of the crib; and after this concrete has hardened the crib will be pumped out, the piles will be cut off a short distance below low water, and the remainder of the concrete for the pier placed in the open. amount of heavy stone riprapping will be placed about the piers, and will be replenished, if necessary, during the first two years after the completion of the structure.

The piles used will thus be about 120 ft. long in single sticks, about 10 or 12 in. in diameter at the top and about 22 in. at the butt. No followers will be used in driving, but the necessary cutoffs will be wasted. Piles of this length can be purchased at the bridge site for about 12c. per lin.ft. In the average piers under the 265-ft. span there are 90 piles.

The upper ends of these piles are embedded into the concrete of the base of the piers from 15 to 20 ft., so that the pile forms a definite portion of the pier. It is evident that even though some unusual scour should on some extraordinary occasion extend below the bottom of the base, the pier would still be stable, owing to the great depth of penetration of the piles and to the rigidity of their upper support. The occurrence of ice on the Columbia River in sheets or floes of large size is very rare, so that the concrete piers need no special protection of steel or stone facing.

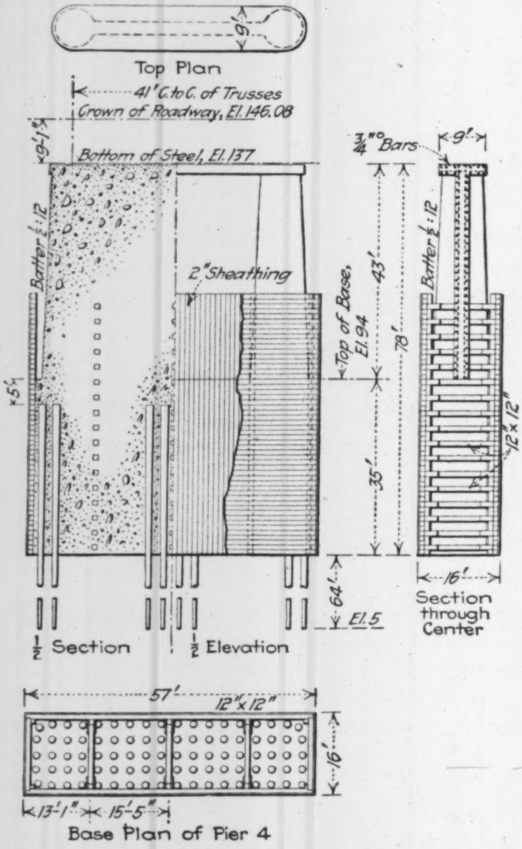

FIG. 4. TYPICAL PIER ON INTERSTATE BRIDGE ACROSS COLUMBIA RIVER, PORTLAND, ORE.

The shafts of the piers above the base are composed of two cylindrical battered columns, one placed under each pair of shoes. These columns are joined by a vertical diaphragm and by a horizontal coping at the top, both of which are reinforced with steel. This design saves considerable weight, which otherwise would require supporting piles, and eliminates a large amount of concrete unnecessary for any structural purpose.

SLOUGH CROSSINGS

The bridges over the sloughs (Fig. 2) consist of deck spans providing a roadway and floor of the same type and character as previously described, except that the girders are placed 23 ft. apart transversely and a portion of the roadway and sidewalk is carried on cantilever beams. There are also other minor differences in details, such as necessary trolley poles, etc. These spans rest on concrete piers supported by piles of the same general type as that described for the main river. The piles will be sunk to about the same depths, but as the likelihood of scour is much less in the sloughs, the bases are not carried as far below the river bed.

The bridge over the Oregon Slough consists of ten deck-girder spans 100 ft. long and one span 115 ft. long, making the total length 1137 ft. 6 in. At the present time there is no navigation in the Oregon Slough above the site of the bridge, but as there is possibility of navigation being developed above the site, it was necessary to provide for some type of movable span to furnish the necessary channel openings for vessels. Permission was secured from the War Department to build the structure with all fixed spans at the present time, with the provision that one span be so arranged that at any time in the future, when it may become necessary, it can be converted into a movable span by providing towers at each end and by equipping it with machinery, counterweights, etc., so that it may be operated as a vertical lift span. The 115-ft. span previously mentioned is arranged for such possible use and will afford a channel 100 ft. wide. This provision and arrangement save the commission an expenditure at the present time of about $30,000 and permit a movable span to be provided when necessary without discarding any parts of the present structure and without interrupting traffic.

The bridge over the Columbia Slough consists of four deck-girder spans, each 75 ft. long, of the same general type as that described for the Oregon Slough. After the first tentative approval of the plan for this slough bridge was given by the War Department the status of this slough was changed so that there has become a remote possibility that it may at some time be considered navigable. It has therefore been agreed that should such development occur one of these 75-ft. spans will be made to lift in the same manner as described in the foregoing, providing a clear channel opening of 60 ft. in width.

EMBANKMENTS

In the main approach on the Oregon side there will be about 1,000,000 cu.yd. of embankment and on the secondary approach there will be about 500,000 cu.yd. The embankments will be made of sand dredged probably from the Oregon Slough. The material will be lifted by suction dredges and will be transported to position through pipes. For the main fill there is being installed a 24-in. suction dredge, with electrically operated pumps, which will deliver the material about 5000 ft. At this point there will be installed a booster pump, also electrically operated, so that for the extreme end of the approach the material will be carried through about 10,000 ft. of pipe. The embankments are to be 42 ft. wide on the top, with slopes of 2 to 1, and average 20 to 25 ft. high.

The upstream side of the embankment will be protected to an elevation of about 20 ft. above low water by concrete slabs laid on the slope of the finished embankment. Here slabs are to be 4 in. thick, reinforced with wire mesh and in strips of about 8 ft. wide, extending continuously up and down the slope. The overflow of water, which at times inundates most of the river valley, is largely back water and has very little perceptible current, except that caused by its outflow from the river over the land as the river rises and that caused by its return flow to the river as the river falls. The period of most rapid current, with corresponding danger of erosion, is when the water is just rising above the surface of the ground and when it is falling to its lowest point. The concrete protection part way up the slopes will therefore guard against erosion at these periods. It is planned to sow the remainder of the slopes with grass seed, in an effort to develop a compact sod covering the sides.

The embankments will be paved with some form of hard surface paving, the exact character of which has not yet been decided. As they will be principally of sand pumped into position, it is expected that there will be almost no settlement, so that the pavements may be constructed in time for the completion of the rest of the bridge.

CONTRACT DETAILS

The consulting engineers prepared complete detailed plans covering every feature of the structure and very complete and definite specifications for every part. Bids were called for on the unit basis to be compared upon basis of the approximate quantities of the various materials as given in the specifications. In order to secure the best possible competition, the total contract was divided into twelve units and into such divisions as seemed naturally applicable. Bids were received on Feb. 23, 1915, and contracts were let soon thereafter to six bidders. The manufacture and delivery of the superstructure metal work for the main river bridge are in the hands of the United States Steel Products Co. The manufacture and delivery of the superstructure metal work comprising the girders of the Slough bridges is in the hands of the Northwest Steel Co., of Portland, Ore. The erection and painting will be done by Porter Bros., of Portland. All the substructure work is in the hands of the Pacific Bridge Co., of Portland. The concrete floor will be placed and the pavement laid by the Warren Construction Co., also of Portland. The construction of the principal portion of the embankments and of the concrete protection on them will be done by the Tacoma Dredging Co., of Tacoma, Wash., and the second embankment will be built by the Standard American Dredging Co., of Oakland, Calif. Contracts for the lighting system and for the pavement upon the embankments have not yet been let. The large number of duplicate spans and the careful manner in which the spans were detailed warranted the manufacturers of the steelwork in making exceedingly low prices. These features likewise contributed to securing a very low price for erection. The successful bids on the structure are to be given in the Construction News Supplement to ENGINEERING NEWS of July 1, 1915.

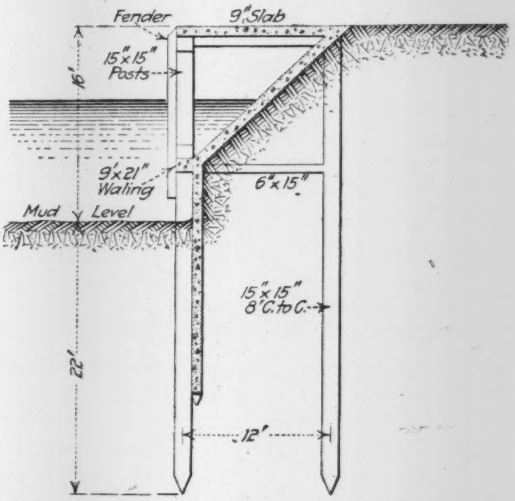
The erectors are planning to erect, rivet and paint the spans on a dock at the shore, to transfer them to barges, and to float them to position on the piers without the use of falsework. The contracts covering the total construction were let for about $230,000 less than the money provided, so that the commissioners were able to arrange immediately for the construction of the secondary approach previously mentioned, to accommodate a portion of the city not immediately adjacent to the principal approach.

The work of the various contractors has been arranged in order of time, so as conveniently to work together, that various operations may proceed consecutively and without interruption. It is expected that the bridge will be in service late in the fall of 1916. The engineering work is being handled in the name of the old firm of Waddell & Harrington; E. E. Howard and L. R. Ash are associated as Consulting Engineers. The bridge is being built under the direction of the Columbia River Interstate Bridge Commission, comprising the commissioners of Clarke County, Wash., and of Multnomah County, Ore. Multnomah County issued $1,250,000 of bonds and Clarke County, $500,000.

⁂

New Quaywall at Southampton, England

A new reinforced-concrete quaywall, recently completed in tidal waters at Southampton, England, is described in *Concrete & Constructional Engineering*, May, 1915. The design, shown in the accompanying section, consists of two rows of piles carrying a continuous deck and joined together by ties and by an inclined slab holding back the fill. The piles were first driven to refusal on 8-ft. longitudinal centers and behind the outer row was driven a line of sheetpiles. All of the piles were then broken down to a level and capped with longitudinal wales on the outside row and cross-ties leading from outside to inside rows. On the pile caps and wales were then formed the vertical posts carrying the deck and sloping slab retaining the earth fill.



REINFORCED-CONCRETE QUAYWALL

The section comprises forty-three 8-ft. bays and is of reinforced concrete, thoroughly tied together as to members. The dimensions are shown in the drawing.

⁂

Reciprocal Liability Insurance for public-utility companies is being furnished by the Utilities Indemnity Exchange, of St. Louis, Mo., with a reported reduction of 40 per cent. in the cost to member companies. The members deposit each month sums about equal to the rates of stock companies. Out of the funds thus accumulated the losses and running expenses are paid, the latter being limited to 30 per cent. At the end of each year the unexpended sums are returned to the members. To guard against very heavy losses for which funds are not available the exchange reinsures the possible losses above the total of deposits.

Modern Submarine Torpedo Boats of the United States and Other Navies

By Herbert S. Howard*

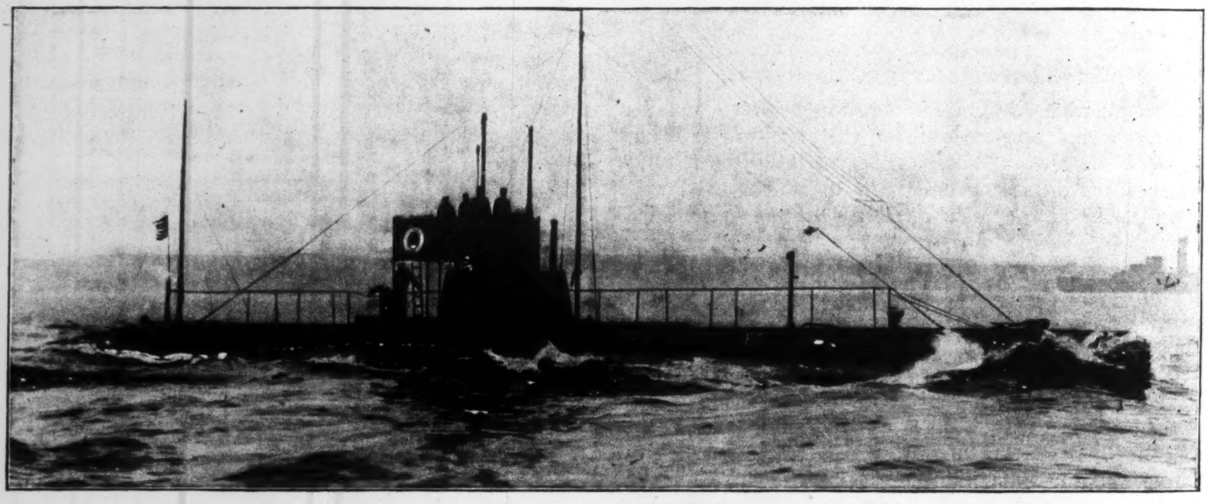
Submarines in the present war have come so much to the front that not only navy men but the laymen throughout the country are evincing great interest in them. The questions which most frequently come to the front seem to be: How do they submerge? How deep do they go? How do they see? How fast can they go? How is it that German submarines can go away over into the Irish Sea or other waters about England and return to Germany? Do they carry guns as well as torpedo tubes? And very often: Are our submarines as good as the German submarines we read of?

In the first place, submarine boats must be strongly built, as they must withstand the pressure of water when they are submerged. For this reason the structure of submarines is heavy when compared to surface vessels, and must be made of a shape capable of resisting high pressure. It is the practice in all countries to design submarines to withstand submergence to depths of 150 to 200 ft., and beyond such depths they must not go.

To submerge a submarine boat, water is admitted to ballast tanks, thus destroying the reserve buoyancy of the vessel. When it is desired to bring the vessel to the surface, water is pumped or blown by compressed air from these tanks. In some types of submarines these tanks are located within the main hull, which is circular in section. In some other types the tanks are located outside of the circular-section hull, between it and a light exterior hull, more or less ship-shaped. Our submarines and those of England are practically all of the first type, while those of Germany and France are of the latter type. In all submarines, however, water is taken in to submerge.

When submerged, submarines ordinarily receive no fresh air, and a submarine may remain submerged for about 10 hours before the air becomes too foul for breathing. In many foreign submarines devices for regenerating the air are fitted, to permit them to remain submerged a much longer time, and it is worth noting that devices of this nature have been tested and are now under consideration for the submarines of our navy. When running submerged the submarine is supplied with one or more periscopes, with which it can see, provided the vessel is only a short distance below the surface. These are optical instruments with lens systems similar to those of a telescope, but with prisms at the top and bottom to turn the rays of light down, and out at the bottom. When completely submerged, however, the submarine is blind. Various forms of searchlights, etc., have been suggested for under-water vision, but so far none have promised success.

Speed in submarines is a feature much sought after. Due to limitations of electric power, size of battery, etc., the submerged speed cannot at present be brought to a high figure. In modern submarines this varies from 9 to 11 knots, and this speed can be maintained for only one hour. If a slower speed is used, the distance covered will be greater, but the maximum submerged radius of a modern submarine will probably be 100 miles at 5 knots.



United States Submarine Torpedo Boat E2

Surface speed offers greater possibilities of development and increase, and along these lines all countries are now working. For several years 14 knots has been considered about a maximum, but with development in oil engines, greater speeds have been attained. Some of the English submarines in service make 16 knots, and some German submarines 17 or 18 knots. At the present time, however, both in this country and abroad, there are submarines building of 20 and 21 knots speed. In such vessels steam or Diesel engines are used. None of these fast vessels are in service, so that it remains for the future to show whether they will usurp the place of the torpedo-boat destroyer. The radius of action of a modern submarine on the surface varies from 2500 to 5000 miles, so it may be seen that long trips are possible.

All modern submarines carry torpedoes as their essential armament. In general it is foreign practice to fit two or more tubes in the bow and two in the stern, while in our navy we have adhered to a bow arrangement with two to four tubes grouped there together. To fire these torpedoes, the periscope must of course be exposed and the vessel herself pointed at the enemy. It is not always realized, and so may be worth noting, that the torpedo itself is really a small submarine boat with high-powered engines. With modern torpedoes, speeds of from 35 to 40 knots are obtained, with ranges up to 4000 yd. or more. Submarines, however, usually fire their torpedoes at ranges of from 600 to 2000 yd. In addition to torpedoes, submarines nowadays generally carry one or two small guns, and the use to which such guns may be put has been brought out clearly in the present war.

---

*Naval Constructor, United States Navy Yard, Washington, D. C.

It is often thought that a submarine is a mass of machinery and that the life on board is simply existence in a whirl of shafts, levers, etc. A submarine is indeed filled with machinery and the crew are mechanical experts; but the quarters provided for the crew are as good as those on a torpedo boat. Bunks are furnished for all the men; electric ranges are installed for cooking food, and everything is done to make these vessels habitable and comfortable as far as possible for comparatively long cruises. For example, fuel, supplies, fresh water, etc., can be carried by modern submarines to make a cruise of 5000 miles. This is a fact not generally realized.

SECTIONS OF TYPICAL SUBMARINE TORPEDO BOAT OF THE HOLLAND TYPE
(From a published drawing)

A modern submarine—and this applies to our own as well as other navies—is a vessel displacing about 450 tons on the surface and 600 tons submerged. The surface speed is from 13 to 15 knots and the submerged speed from 10 to 11 knots. Such a vessel would be 150 to 160 ft. long. Within the boat a certain space is taken by ballast tanks, for as I have stated water is admitted to destroy the buoyancy and to permit the vessel to submerge. The remainder of the space is given up to engines, electric storage battery and motors, torpedoes, crew's quarters and central operating compartment. In this last-named space are grouped the important means for controlling the vessel—the controls for flooding ballast tanks, the air connections for blowing water out of them, the wheels for controlling the steering rudders and the diving rudders, and the periscopes.

When the boat is to submerge, all the deck gear is taken down and all openings in the hull are tightly closed before water is admitted to the tanks. When the boat is running on the surface of the water rail stanchions are fitted, a small bridge is rigged, radio masts are hoisted, and the submarine becomes a small cruising vessel.

In our navy we have kept pace with the world in submarine development. Most of our submarines are of about the size and type described in the foregoing; but in addition we are building at present one large submarine of about 1000 tons surface displacement and of about 20 knots speed, and appropriations for two more such vessels were recently made by Congress. This program parallels those of England, France and Germany, which, in addition to their submarines of 400 or 500 tons surface displacement, are also building submarines of from 1000 to 1100 tons and of from 20 to 21 knots speed.

⁂

Growth of London Passenger Traffic

The marvelous development in passenger traffic in American cities since the introduction of the electric street car is closely paralleled by the development in the principal cities of Europe. London *Engineering*, in its issue of Apr. 30, presents the accompanying table of passenger traffic in Greater London. From the figures in the table it will be seen that the passenger traffic of Greater London substantially doubled in the years from 1906 to 1913. This growth was due to the increase of the habit of travel far more than to actual increase in population.

During the first fifty years of the nineteenth century the population of London grew at an average rate of a little over 30,000 per year. In the latter half of the century, however, the increase was very much more rapid, reaching nearly 95,000 per year in the last decade of the century. In the first decade of the twentieth century the rate of increase dropped to 67,000 per year, the explanation of this being the extensive development in this period of suburban districts beyond the boundary lines of Greater London. The enormous expansion of omnibus traffic in very recent years has been coincident with the introduction of the motor omnibus in place of the horse-drawn vehicle.

PASSENGER TRAFFIC IN GREATER LONDON

	Number of Passengers Carried (1 = 1000)					
Year	By Railway (Local Companies)	By Tramway (Approximate)	By Omnibus*	Total (Approximate)	Estimated Population of Greater London 1 = 1000	Number of Journeys per Head

* The omnibus figures are incomplete. They relate only to the principal companies.

† The figures for these years are based on receipts, and are probably underestimated.

Riensch-Wurl Sewage Screens, Brooklyn

As noted on p. 1095 of the issue of June 3, construction work has been begun on the sewage-treatment plant of the 26th Ward, Brooklyn, N. Y. It is to be equipped with two 6,000,000-gal. Riensch-Wurl sewage screens. The specifications were so worded that one of several methods of treatment would be acceptable to the city. The specifications and plans were prepared on a competitive basis permitting the use of Imhoff tanks or sedimentation tanks with separate sludge-digestion and sludge-drying beds for either of the tank plants, and Riensch-Wurl fine screens. The exact wording of the specifications was as follows:

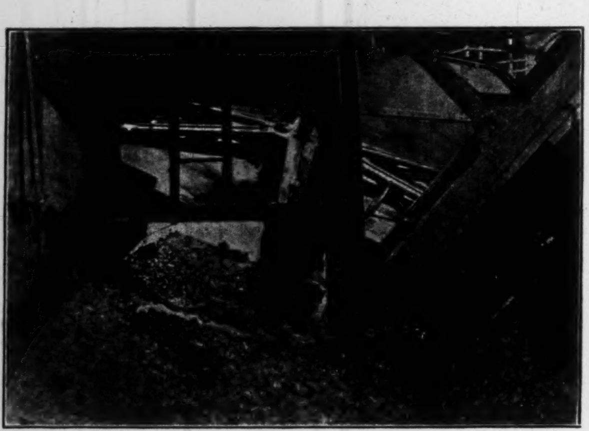

FIG. 1. SEWAGE-TREATMENT PLANT, DRESDEN, GERMANY

(View of a section of a Riensch-Wurl screen in service, showing screenings coming under the action of the brushes; also showing the construction of the screen seal)

> The contractor shall install complete and ready for operation a plant for the purpose of removing suspended solids from the ordinary dry-weather flow of sewage at the 26th Ward disposal plant, Borough of Brooklyn, in accordance with one of three methods and designs for removing suspended solids shown on the plans of the work. The contract gives him the option of installing one of the following three methods and the plant for operating same:
>
> Optional Project A.—Riensch-Wurl screens, with direct removal of screenings.
>
> Optional Project B.—Imhoff tanks with drying beds for sludge.
>
> Optional Project C.—Sedimentation tanks with separate sludge-digestion tanks and sludge-drying beds.
>
> Either of the plants mentioned will be equally satisfactory to the city if it secures the results in removing suspended solids from sewage hereinafter set forth as the general requirements to which the plant installed must conform.
>
> When operating under average ordinary dry-weather conditions the plant shall be of sufficient capacity to treat 12,000,000 gal. of sewage per day.

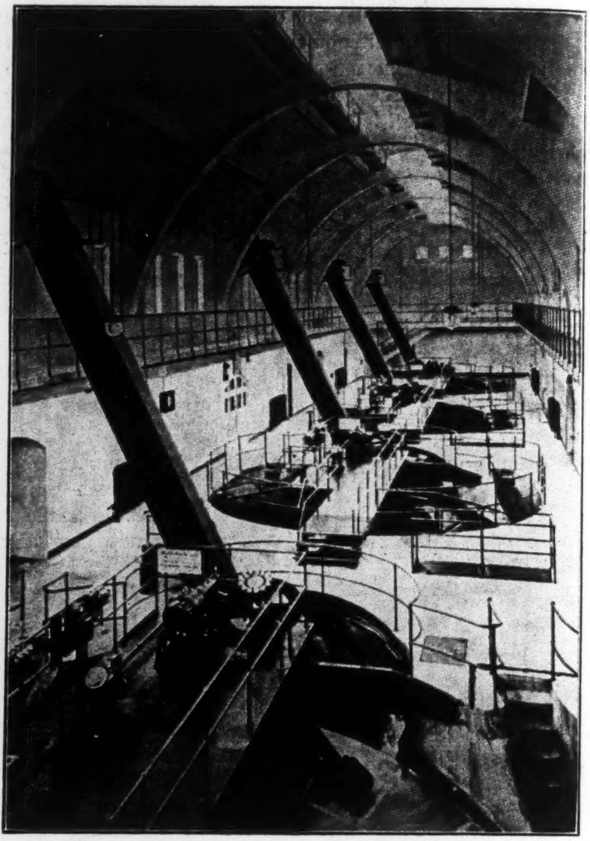

FIG. 2. SEWAGE-TREATMENT PLANT, DRESDEN, GERMANY

(Interior view of the screen house, showing general arrangement of the Riensch-Wurl screens (each 26 ft. 3 in. diameter). The two screens to be installed in Brooklyn are 14 ft. in diameter)

A number of bids were received. The contract was awarded to the lowest bidder, the North Eastern Construction Co., which proposed to use Riensch-Wurl fine screens to fulfill the requirements of the specifications. The work is now under construction and the plant will be in

(View of a section of a Riensch-Wurl screen in service, showing the screen cone brushes and accumulation of screenings. The surface of sewage reflects the structural steel work. The clear portion of the screen cone is available for increased or storm water flow. One screen handles the entire normal flow at the station, of about 26½ million gal. per day)

operation this summer. The screens are furnished by the Sanitation Corporation, Philadelphia.

The accompanying views show the sewage treatment plant at Dresden, Saxony, in Germany, where there are several Riensch-Wurl screens in use. This is the most notable of the European installations.

⁂

A Large Gravel-Washing Plant

A sand-and-gravel washing plant, having the unusually large capacity of 100 carloads of washed material per 10-hr. day, has recently been put in operation by the Akron Gravel & Sand Co., of Akron, Ohio. The plant was designed and built by the Raymond W. Dull Co., of Chicago.

The material is excavated by steam shovels and brought to the plant by two trains, each consisting of a locomotive and two 30-yd. dump cars. One car of each train dumps from the bottom, and the other dumps from both sides, into a large concrete receiving hopper with capacity for about seven carloads. From the bottom of this hopper the material is delivered into an apron feeder 48 in. wide, operated by a variable-speed motor, geared directly to a worm-gear drive running in oil.

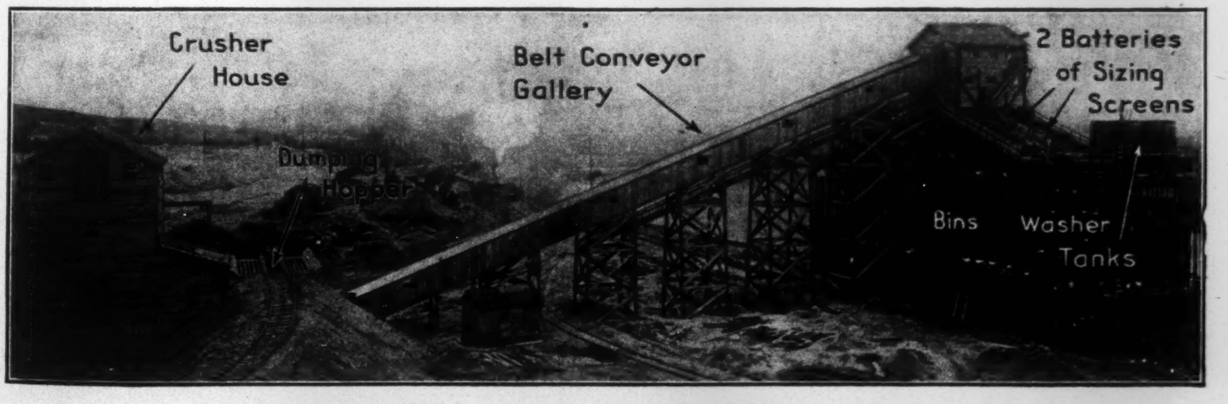
The feeder delivers the material into a 60-in. revolving screen that separates from the sand and gravel the stone which requires crushing. The stone is delivered to a large bucket elevator of special construction, the chains being built up of openhearth steel bars 4½x⅝ in. The chain pins and bushings are of chrome-nickel steel; the chain rollers are steel, and the sprocket wheels on the head and foot shafts have renewable manganese-steel teeth. The buckets are of the continuous type, 36-in. wide, reinforced by heavy steel lips.

This elevator discharges the stone onto a bar screen or grizzly, the larger stone going to a No. 6 Gates gyratory crusher and the remainder to a 48-in. Symons disk crusher. The product from each crusher is delivered to a 30-in. belt conveyor, which carries the crushed stone back to the 60-in. revolving screen for rescreening. The main conveyor from this screen is a 36-in. six-ply rubber belt, with ⅛-in. extra rubber cover on the carrying side, and is supported by troughing idlers.

The gravel washing equipment consists of 16 Dull inclined washing screens, mounted four in a row, with provision for two more rows, or 24 screens in all. There are eight 72-in. conical automatic sand separators or tanks. The screens and separators make five grades of material, which are delivered into seven bins.

⁂

Eight Skeletons were unearthed when the rock walls separating the workings of the Delaware & Hudson No. 1 colliery at Carbondale, Penn., from the old drift in which anthracite coal was first mined in this country were broken through on May 28. One of the skeletons was in a sitting position against the face of the coal measures and still wore miner's shoes. The mine records revealed that the bones were those of eight men who were entombed by a fall of rock Jan. 12, 1846.



GRAVEL-WASHING PLANT OF THE AKRON GRAVEL & SAND CO., AKRON, OHIO

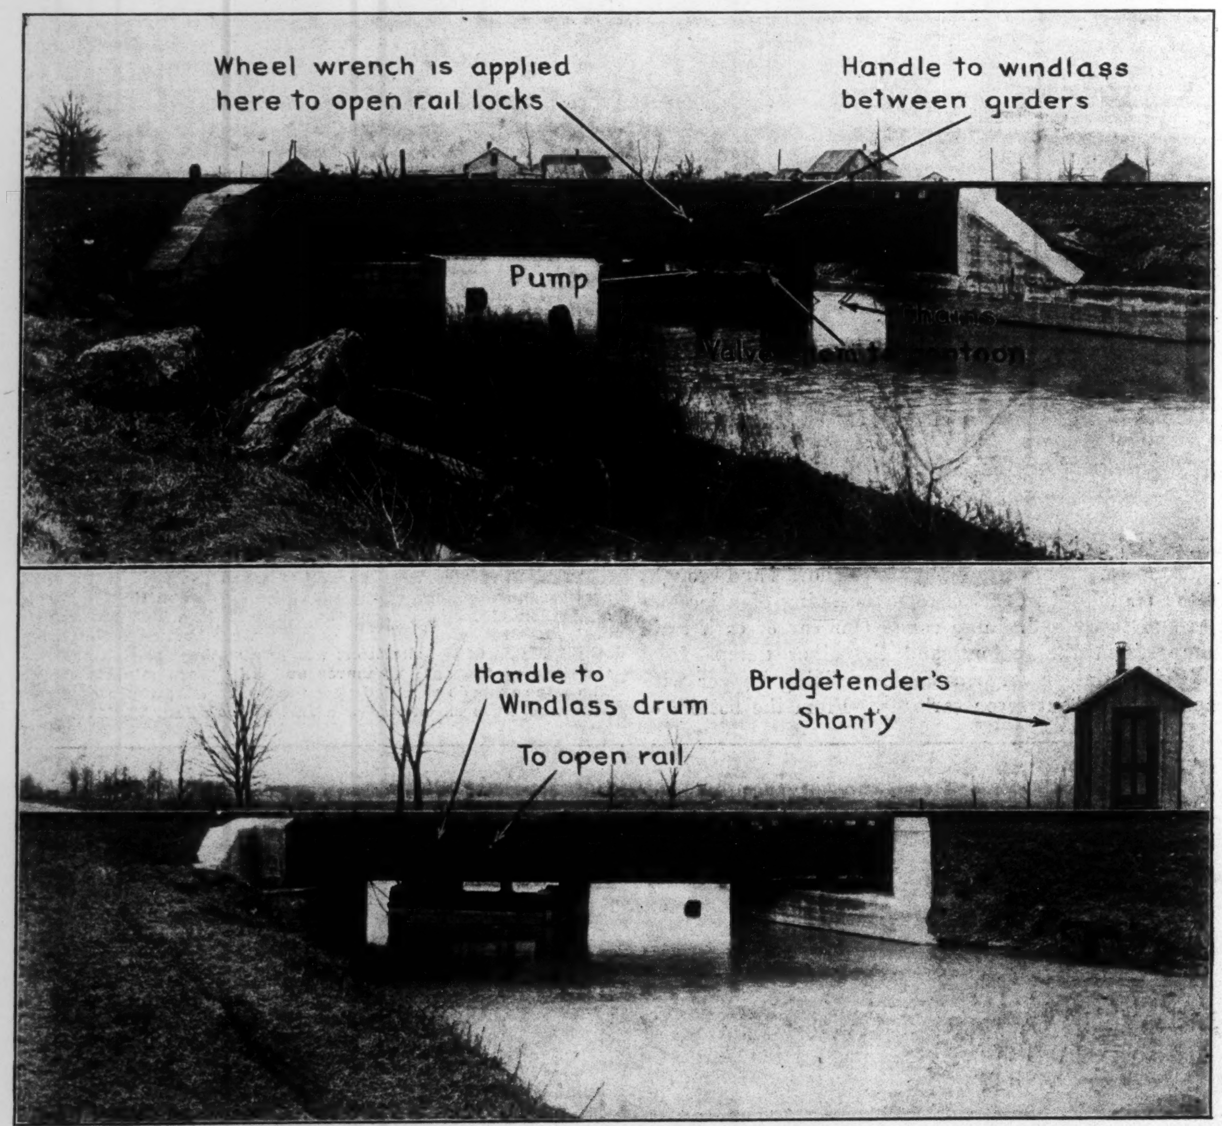
Field and Office

A Removable Fixed Bridge

Where the Nickel Plate railway crosses the Miami & Erie Canal, at Melrose, Ohio, a bridge was needed which would be, from the standpoint of the railway, a fixed span, but for canal traffic, a movable bridge. The view shows the structure put in. The canal is practically out of use; only repair and inspection boats have passed in recent years. Notice is given to the railway a few days before the boat is to come along, so that all may be made ready to open the bridge.

The structure is a pontoon swingbridge, but in normal position it is down on its end bearings, water being admitted to the pontoon. The procedure for opening the bridge is about as follows: The rail locks are opened; the lock-bars extending into recesses in the concrete back-walls are pulled clear, and wedges are released which hold the bridge $\frac{1}{16}$ in. above the circle rail at the fixed end. A gate-valve which admits water into the pontoon is then closed, and the pontoon is unwatered by means of a diaphragm pump (on the pontoon) until the girders are raised off at the movable end. A chain anchored on both banks passes over a windlass on the bridge, and by this windlass the bridge is now swung.

Opening and closing the bridge takes one man about half an hour, ordinarily.



Wheel wrench is applied here to open rail locks
Handle to windlass between girders
Pump
Chains
Valve stem to pontoon
Handle to Windlass drum
To open rail
Bridgetender's Shanty

"Fixed" Pontoon Draw Carrying Nickel Plate over Miami & Erie Canal

Railway traffic is protected by interlocking signals.

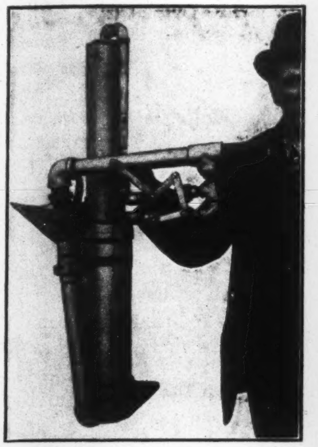
The bridge has been in place about 8 yr., and it has proved satisfactory to both railway and canal people, according to reports.

⁂

Compressed-Air Track-Surfacing Machine

In the maintenance of track a considerable amount of time and expense is expended on keeping the track in proper level, and it is not an easy matter to effect the smaller adjustments by ordinary tamping.

Several years ago a pneumatic surfacing machine was invented by the late E. L. Patterson, of Titusville, Penn., to avoid the disturbance of the bed of the tie by tamping. The machine had grooved wheels, to travel along the rail, and two vertical pipes—one carrying a hopper and the other connected to a compressor or a hand-blower. The pipes united at the bottom in a shoe having a thin flat horizontal nozzle. In using this machine the track was raised to the surface by jacks and the nozzle inserted under the ends of the ties in succession. With the air turned on, screened stone or gravel (not over ¾-in. size) was shoveled into the hopper and blown beneath the tie, filling all cavities and packing so solid as to support the track when the jacks were released. This machine was used on the New York, New Haven & Hartford and the Bessemer & Lake Erie roads, its work in the latter case being in connection with steel ties.



Machine for Surfacing Track by Compressed Air

A modification of this machine has been brought out recently by J. A. Royal, of Spruce Grove, Alta., and is shown in the accompanying view. It consists of two cylindrical chambers, the lower and larger one having a feed hopper at the top (shown at the left) and a discharge aperture at the bottom. Air hose from a compressor on a section motor car is coupled to the horizontal pipe at the right. The air is admitted at the top to drive down the ballast fed into the cylinder and at the bottom to blow out the ballast through the horizontal discharge opening. This opening can be fitted with nozzles of different size, to suit the ballast, and the machine can be used for lifts of ⅛ in. to 2 in. The weight is about 47 lb.

The inventor claims that surfacing can be done at the rate of 4 mi. per day with the following equipment and force: A motor car with air compressor and hose, eight surfacing machines (two working together on one tie), a foreman, eight machine men, four shovelers (each serving the two machines on a tie), one leveler, two jack men and two flagmen.

⁂

Blasting a Pit for a Dipper Dredge

By F. W. Wilson*

Two large ditches were to be dug recently in New Madrid County, Missouri. The contractor (The Hoosier Land & Investment Co.) owned two dipper dredges, but there was no basin in which to float a dredge in order to start the ditching. A pit was required 136x50x6 ft. deep. It was decided that this could be formed quickest by blasting. The hole was shot by a professional dynamiter.

Bore holes were put down, running the length of the proposed pit, in eleven parallel rows 3 ft. apart. The

---

*E. I. du Pont de Nemours Powder Co., Wilmington, Del.

Large Pit to Receive Dipper Dredge, Blasted by One Shot holes in the middle row were each loaded with 2½ lb. of dynamite. The holes in the two rows on either side of the middle line were spaced 15 in. apart in the row and each loaded with 2 lb. of dynamite; the holes in the next two rows were loaded and spaced the same way. The spacing between holes in the next two rows was 2½ ft. and the loading 1½ lb. per hole; in the next two rows the holes were 2 ft. apart, and each was loaded with 1 lb. The holes in the two outside rows were spaced 18 in. apart and loaded with ½ lb. each. In all, 950 lb. of dynamite was used.

The result of the shot was a pit 43 ft. wide, 136 ft. long and 7 ft. deep in the center, with an average depth of 3½ ft., with the exception of one spot where a large cypress stump had stood and which caused the dirt to pile up. The blaster claims that he did not want to blast the pit in one shot, but the contractor wanted it done that way and so he acquiesced. The blaster's idea was to blast out two pits and then shoot out the division. By this method much less earth would have fallen back into the excavation.

The 600-Ft. Self-Supported Radio Towers at Darien*

By Ira W. Dye†

The United States Naval Radio Station at Darien, C. Z., is one of a chain of high-powered wireless-telegraph stations being installed by the United States Government under the cognizance of the Navy Department. The Darien station is located almost exactly half way between Colon and Panama and lies on the west side of the Panama R.R. and on the east bank of the Panama Canal. The Poulsen system of transmission is used.

The design of the three 600-ft. self-supporting structural-steel towers and the method of erecting them are the items in the construction work which are of primary interest to civil engineers. The towers are triangular in plan, the base being an equilateral triangle 150 ft. to the side. The columns are battered toward the center of the triangle so that at the 150-ft. level the side of the equilateral triangle becomes 75 ft.; at the 380-ft. level, 35 ft., and at the top, 10 ft. Fig. 6 shows that the framing is a system of horizontal struts at the panel points, the middle point of the horizontal strut in each face being joined to the end of the horizontal strut above by diagonal web members designed for alternate stresses. Each face of the tower may be considered as a cantilever truss anchored at its wider end (the base of the tower).

Structural Steel Members

The main columns of the lower part of the tower are built up of an I-beam, to the web of which are attached two angles and a web plate. The back of the I-beam is reinforced by a cover plate. The attenuation of the steel is as follows: Farther up the tower the cover plate is omitted; then the I-beam is reduced in section; the I-beam is changed to a channel; the flange angles and web plates are reduced in section; the channel is omitted; and in the last three panels at the top of the tower the web plate is omitted, leaving only two heavy angles back to back as a column section.

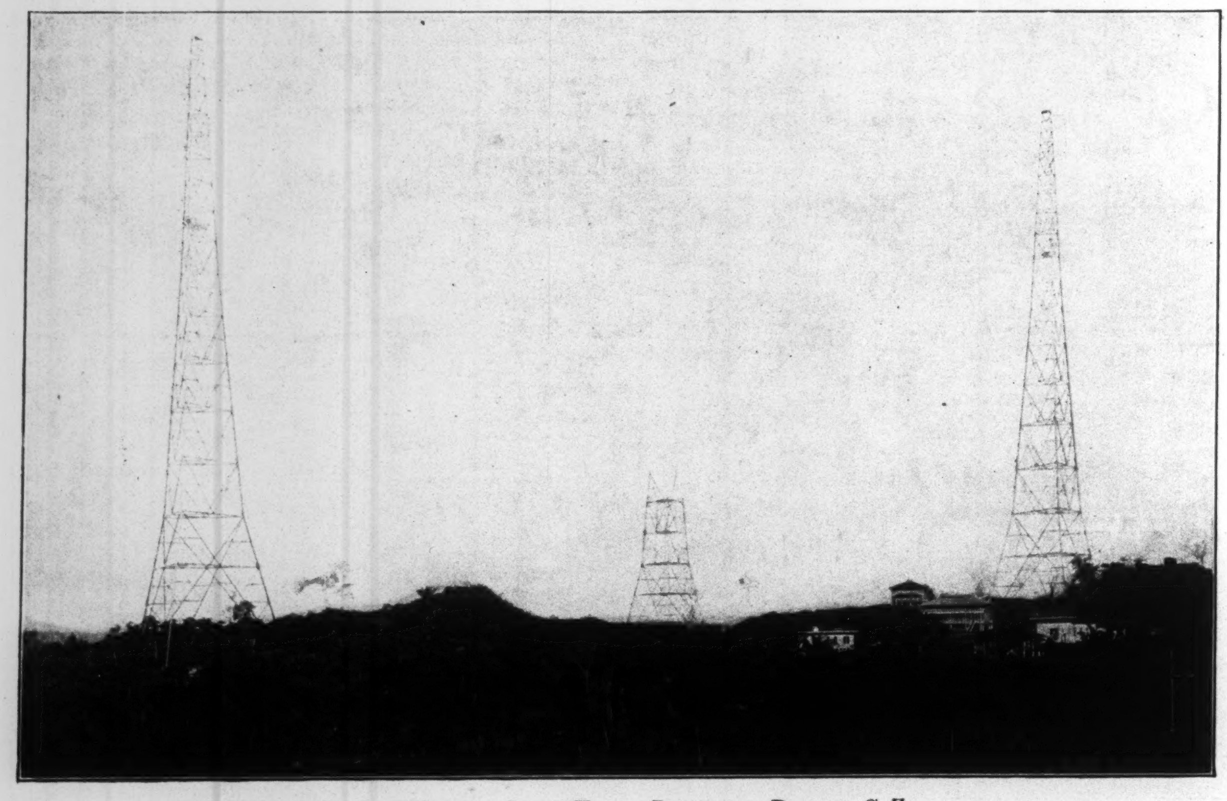


Fig. 1. View of Steel-Tower Layout at Darien, C. Z.

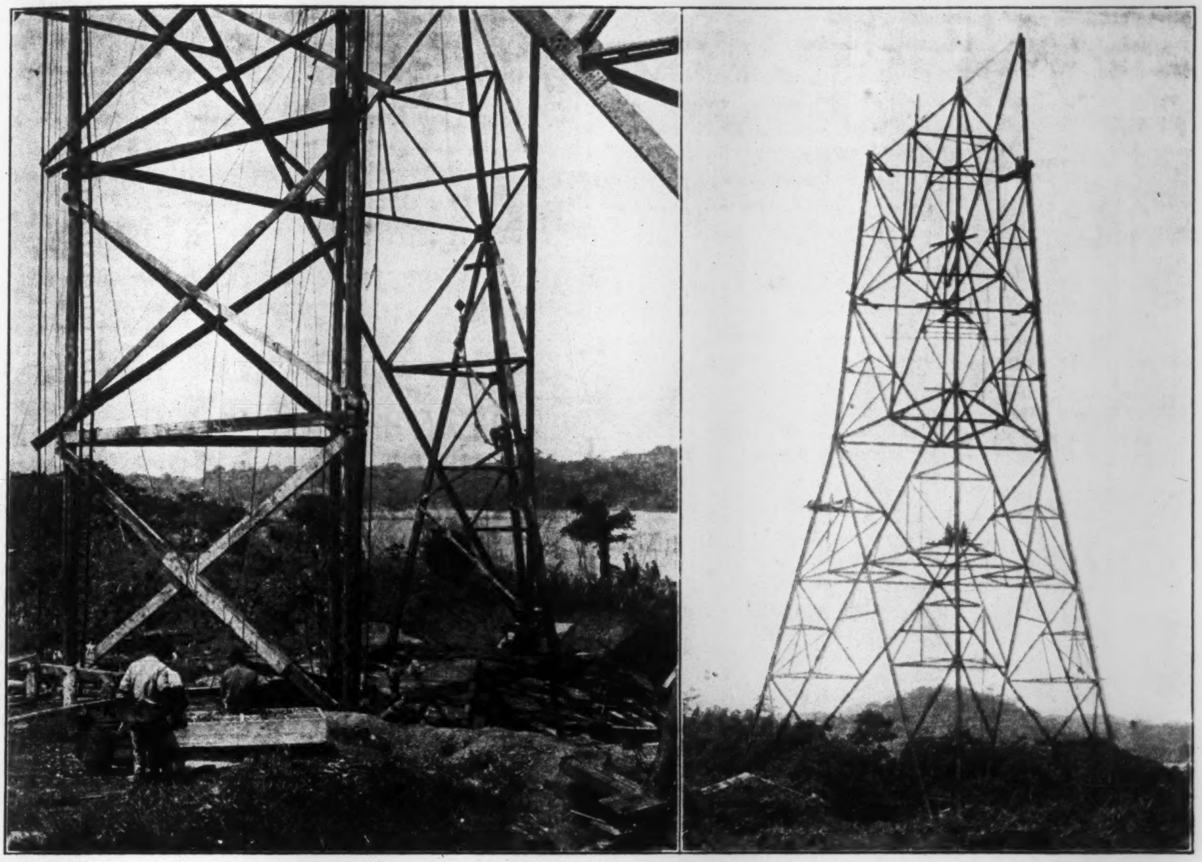
(Middle tower erected above 250-ft. level; other two towers completed)

---

*The Darien radio station was designed, constructed and will be operated by an organization combining the forces of the Navy Department and the Panama Canal. The steelwork of the towers was furnished by the Pennsylvania Steel Co.

†Former Supervisor of Radio Stations, Panama Canal, C. Z.



FIGS. 2 AND 3. ERECTION SCENES AT ONE OF THE TOWERS
(Left—Outfit for erecting from ground to 200-ft. level. Right—Showing ginpole method of erection above 200-ft. level)

Web members are connected to the columns by gusset plates, bent where they leave the column so as to lie in the plane of the face of the tower. In the lower part of the tower these gussets are shop-riveted to the flanges of the I-beam. Above the 200-ft. level, however, the gusset plates are field-connected to the web plate of the column. The web members are for the most part star sections, built up of two angles set corner to corner and battened together with ⅜-in. batten plates spaced about 2 to 2½ ft.

The towers as erected show very little deflection, although all joints above the 150-ft. level were field-connected with bolts instead of being riveted.

TOWER-LEG INSULATORS

Provision was made in the design of the towers for their final support on a nest of large porcelain insulators (Fig. 5). The insulators had been tested in compression to 150 tons. For erection purposes, the towers were supported above the foundations* sufficiently to permit the subsequent installation of the insulators. These were placed on wood wedges, which were made with a very slight slope and were 14½ in. wide on the face. Two wedges were placed under each leg of the tower, each wedge consisting of an upper, lower and middle portion. The upper portion was protected against undue marring by the steel of the tower by being shod with a ½-in. steel plate.

The tower is not self-supporting until the 150-ft. level has been reached. At this level heavy horizontal struts transmit the horizontal reaction from each leg to the *other two*. It is, therefore, necessary to support the first 150 ft. of the tower in position, leg by leg, until all the members below this level have been erected.

The first erection outfit used was a triangular tower (Fig. 2) 30 ft. on a side, with vertical legs. It was set up in the center of the site. On the top of the wood tower, composed of fir piles, 8x16-in. yellow pine and 4x12-in. sway bracing, was laid a circular track of 70-lb. rails. A stiffleg derrick was mounted on the track, the mast standing over a leg of the wood tower. The two stifflegs extended toward the two other legs of the derrick tower and were anchored down by cables passed over them and under a pile of steel members on the ground. The 60-ft. boom was rigged with a three-part boom tackle and a two-part load tackle, the fall line passing down the boom, around a sheave at the bottom of the boom and down the post to the hoisting engine. The reach of the boom was ample to set the first column sections of the tower, which were, of course, the members farthest from the center.

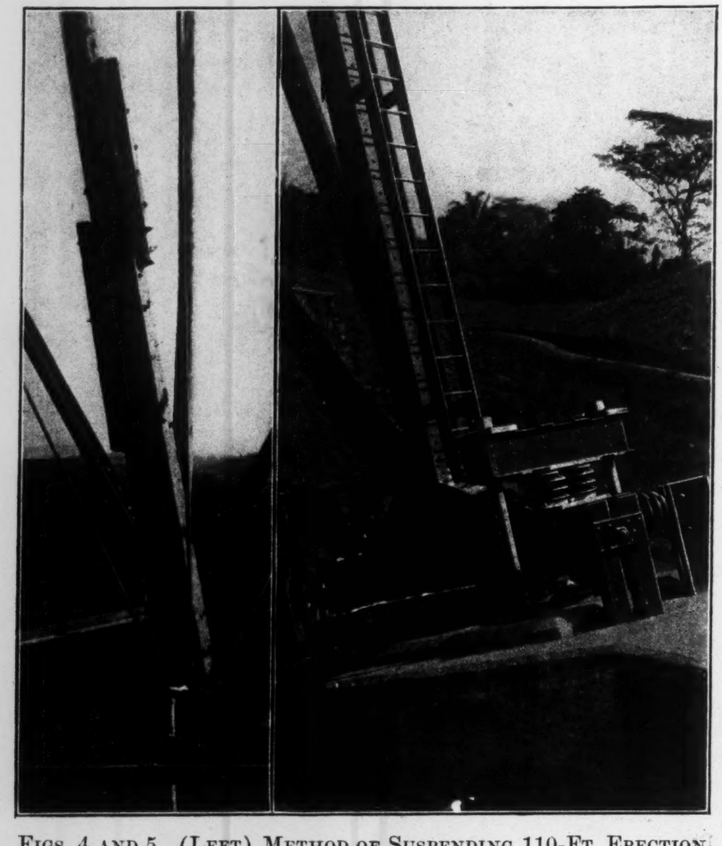
The first two columns, with a total length of 60 ft., were bolted together on the ground, each with the lower end in such a position that when the upper end was picked up, the column tipped back into its proper place on the foundation. It was then anchored on the wedges by means of anchor bolts, so that it would stand until an A-frame consisting of two 60-ft. piles latticed together with 4x12-in. timbers could be raised and secured underneath the column. The wood members up to the level of the top of the second column section were then erected; another column section was added, its web members filled in, and the tower thus brought up to the 100-ft. level.

---

*The foundation work for the three towers of the Darien station was described in "Engineering News," June 17, 1915.

The derrick was then moved around on the circular track until it was in position to erect the second leg to the 100-ft. level. At this level there is a system of horizontal bracing which, while not sufficiently stiff to support the tower without assistance, does aid the temporary A-frame shores. The third leg of the tower was then erected to the same level.

In a similar manner the columns and web members were carried up to the 150-ft. level, leg by leg, and then to the 200-ft. level, which was the limit of the boom reach. The erection outfit was then taken down to be reërected at the next tower site. A new scheme of erection was started at the 200-ft. level.



FIGS. 4 AND 5. (LEFT) METHOD OF SUSPENDING 110-FT. ERECTION GINPOLE. (RIGHT) TOWER-LEG INSULATORS

This second scheme (Fig. 3) involved the use of a ginpole 110 ft. long. The ginpole was built up of a long, heavy pile of Oregon fir, spliced out at the lower end with two 8x16-in. and two 4x13-in. timbers, and at the upper end by two 6x14-in. timbers 35 ft. long. A 2-in. hole was bored into the lower end of the pole for about 2 ft. and a piece of 1½-in. pipe driven into the hole. A slot was then cut in the pole just above the end of the hole and in the slot an 8-in. sheave was fastened by a pin through a hole drilled from the outside, so that the circumference of the sheave was in line with the pipe. A second sheave was mounted in the slot so that it protruded just outside the surface of the pole. The fall line was run through the pipe around the inner sheave and back around the outer sheave, and was led up the pole to a top sheave pinned between the two 6x14-in. timbers. The line dropped from the top of the pole to the hook, and the other end led through snatchblocks to the drum of the hoisting engine.

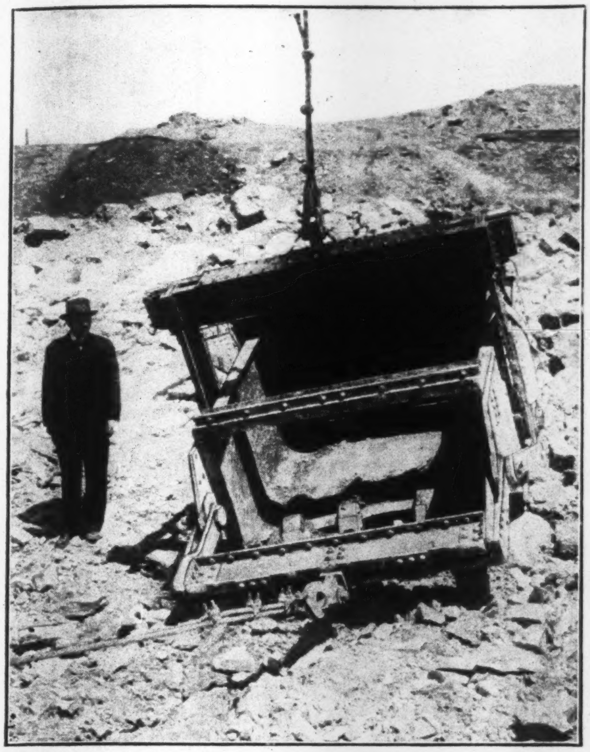
FIG. 6. DESIGN OF THE DARIEN TOWERS

The pole rested on a three-cornered steel saddle (Fig. 4), drilled in the center to admit the 1½-in. pipe in the bottom of the ginpole. A hole was drilled at each corner of the plate for attaching cables. The top of the pole was guyed by two-part manila-rope tackle, so that the top of the pole could be moved to any position inside the tower by adjusting the length of the guys. The suspender cables were of such length that the bottom of the pole hung at about the 150-ft. level. Its top was, therefore, at about the 260-ft. level, allowing 10 ft. of drift to set the next panel columns, which were 50-ft. long. The ginpole thus formed the axis of a double triangular pyramid, the lower apex of which could not be moved unless



Large Dragline Excavator Bucket Designed by E. R. Shnable for Work on Chicago Drainage Canals

the length of the suspender cables was changed and the upper apex of which could be moved at will by adjusting the guys. Steel was hoisted through the center of the tower.

When the ginpole had finished erecting the panel above its point of support it was raised by means of a 50-ft. ginpole resting near one of the columns, on the steelwork already erected, and was resuspended from the top of the panel just finished. This operation was repeated until all steelwork up to and including one panel above the 380-ft. level had been erected. The large heavy ginpole was then taken down and replaced by a similar one 60 ft. long, which finished the erection.

The horizontal web members not being supported at their middle points until the panel immediately above them was erected made it necessary to shore up these horizontals with piles resting on the middle point of the panel below. These shores were left in until the tower had been erected to the 380-ft. level. To this level the horizontal struts were spliced in the middle; but above this point they were continuous from column to column and capable of supporting their own weight. The same set of shores was used in all three towers, as were also the same falsework, derrick and ginpole.

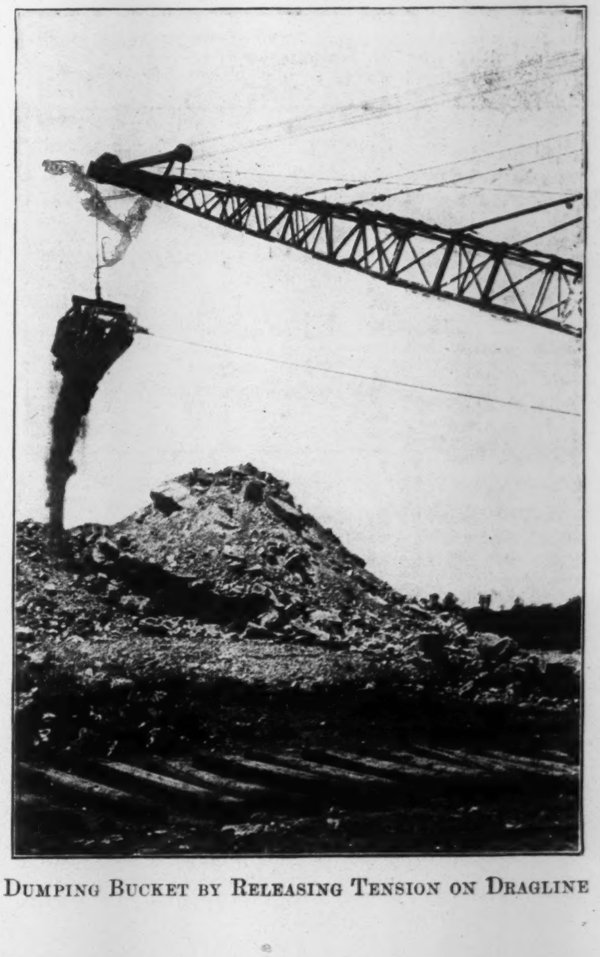
While the first tower was being erected from the 150- to the 380-ft. level, the second tower was being erected up to the 150-ft. level, and when the first tower was being erected above the 380-ft. level, the second tower was going up from the 150- to the 380-ft. elevation. The same schedule of progress was maintained on the second and third towers, so that when the top of tower No. 1 was being finished, work had just started on No. 3, while No. 2 had been erected above the 380-ft. level.

A Very Large Dragline Excavator

A dragline excavator of particularly large and rugged construction has been in use for the past five years on the construction of the Calumet-Sag and North Shore drainage canals at Chicago, Ill. The material excavated included a glacial conglomerate of sand, gravel and boulders cemented with clay and tightly packed, and below this a hardpan full of pieces and ledges of limestone. To be able to handle this material efficiently with a dragline excavator, E. R. Shnable, of Shnable & Quinn, contractors, designed and built the bucket shown in the accompanying illustrations.

It is a back-dumping bucket, and the tension on the dragline keeps the back gate closed. When the tension is released, the bucket, being suspended by the combination hoisting bail and back gate, tips and dumps by gravity. In the bucket's digging position the pulling or dragline bail is connected to the shell at points which are above the center of gravity of the shell. The pulling bail is also connected by links to the hoisting bail and back gate in such a way that the tension on the dragline forces the gate to close and remain so until the tension is released. The bucket is designed to have flexibility, and to prevent binding in any of the parts it has loose-fitting connections.

The operation of the excavator is entirely controlled by the two single-part lines, the dragline and the hoist line. When the bucket is filled, it is raised to dumping position at the end of the boom by pulling in on the hoist



Dumping Bucket by Releasing Tension on Dragline

line and at the same time keeping a tension on the dragline. After the load is dumped the shell resumes its position automatically. No tripping device is required.

Parts of the bucket subjected to the greatest wear are constructed of four separate removable parts, any of which may be quickly renewed. These are the front section of the shell, the manganese-steel cutting plate, the teeth and the manganese-steel teeth points. The teeth are bolted to the cutting plate and have removable points.

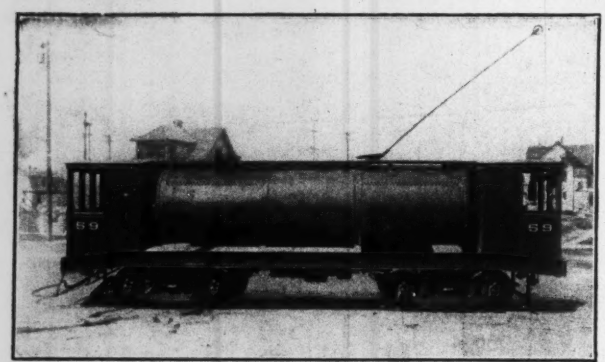
Owing to the way in which the dragline is attached it is possible to dig down a slope, although the dragline is pulling up. The same feature also makes it possible to cut off as thin a slice of earth as is desired by varying the pull on the hoist line. Both bails are short, which permits the bucket to be brought in quite close to the machine.

The patents on this bucket have recently been purchased by the Brown Hoisting Machinery Co., Cleveland, Ohio, and it has been placed on the market under the trade name of "Brownhoist Shnable" bucket.

NOTES

A Street-Railway Track Sprinkler of special design is shown in the accompanying illustration. It was designed by George L. Wilson, engineer of maintenance-of-way, and W. J. Smith, master mechanic, of the St. Paul City Ry. Co., and was built in the company's shops. The two spraying heads are just under the car sill at the rear (right); they are to be used for either water or a solution of calcium chloride. Under them is a spray pipe for oil.

In the rear cab, occupied by the sprinkler operator, are placed a Smith heater, an auxiliary air compressor and levers for controlling the discharge of the oil or water. The operator is provided with an air compressor for the oil spray independent of the air supply for braking purposes. The heater supplies hot water for a coil which runs through the tank, returning through the front cab, for keeping up the temperature of the oil or calcium chloride solution and for supplying heat to the cabs in cold weather. A steam coil is also provided, which is connected up in the yard to a steam plant, and the initial heat is supplied in this way for either the oil or calcium chloride solution. After the oil has been heated to the proper temperature or the calcium chloride fully dissolved, the necessary temperature is kept up on the tank while running by the Smith heater.



OIL AND WATER SPRINKLING CAR, ST. PAUL, MINN.

The car frame is of standard heavy construction, except that the end frames are bent down to give more headroom for the equipment in the cabs. The frame is mounted on two 2-motor trucks set 19 ft. c. to c. The car is intended to sprinkle a single track. The capacity of the tank is 4400 gal., which is sufficient to sprinkle a 19-ft. strip for 4 mi. In freezing weather a calcium chloride solution is used instead of water. The car is being used at present only on paved streets and has not yet been tried with road oil. The weight of the car is 52,100 lb.

Driving and Cutting Off Steel-Pipe Piles for the foundations of the new quarantine landing at Balboa, Canal Zone, Panama, is described in a recent issue of the "Canal Record." The cutting off of the tops of the piles to an even elevation was done with an oxyacetylene torch, which was able to cut some of the pipes, 14 in. in diameter and ⅜ in. thick, in 4 min. In driving the pipe it was necessary to fill them with concrete for about 2 ft. above the bottom of the end cap to weigh them to the sinking point. In order to give the piles the required batter, they were driven through a guide frame, built of timber and ballasted, which was sunk at the point of driving. After it was placed in approximate position movable guides were adjusted for the exact inclination. This frame, 24 ft. high by 20 ft. long and 12 ft. wide, was handled from place to place by a derrick barge which also operated a steam hammer to drive the piles. The pipe was afterward filled with reinforced concrete.

A Steam Shovel Worked Behind House Wreckers to clear ground and excavate for cellar and foundations of the new Mercantile Building to be erected on Broadway between 35th and 36th St., New York City. The revolving shovel shown in operation in the accompanying view was installed on May 24, as soon as a building at one corner of the site had been demolished. Since then the shovel has been worked as rapidly as the wreckers could tear down the other buildings.

FIVE
PROFIT SHARING
COUPONS

STEAM SHOVEL EXCAVATING BUILDING WALLS, NEW YORK

The shovel is digging to a depth of 15 ft. below street level, and the soil handled is loam, clay, boulders, broken rock and broken building-foundations. The new building, which will be eight stories in height, will be founded on rock which at some points is at a depth of 15 ft. Where the rock crops out above this level it is drilled and broken up for the shovel. The Thompson-Starrett Co. is the general contractor; F. H. Chapman Contracting Co., subcontractor. The block is well known to New Yorkers. One of the buildings razed was the old Herald Square Theater.

Third-Tracking the Elevated Railways in New York City under traffic has made necessary an immense amount of fieldwork. Snare & Triest, one of the two steel erectors on this work, gives us some interesting data on its sections (on 8th and 9th Aves. above 65th St. and on 3d Ave. above 147th St.). Work on these sections began about July 1, 1914, and involved the erection of 6500 tons of steel and the removal of 1500 tons of old steelwork. Before the end of April, of the present year 275,000 rivets had been driven by Snare & Triest, 260,000 holes had been drilled from the solid, 20,000 holes subdrilled and reamed, and 125,000 old rivets and bolts had been cut out. It is interesting to note that about 85% of the drilling and reaming was accomplished with electric drills. The motors of these drills are wound to stand a variable direct-current voltage of 550 to 650 volts. The "Duntley" drill, made by the Chicago Pneumatic Tool Co., was employed. In restricted quarters, air drills were used. Riveting was done with pneumatic guns. Steel for the 8th and 9th Ave. work was furnished by the Lewis F. Shoemaker Co.; steel for the 3d Ave. section was supplied by the McClintic-Marshall Co. It was stored at a yard in Greenville, N. J., and delivered by lighters, as required. Whenever material was needed, it was ordered out and lightered to the Pennsylvania R.R. dock at 128th St. and the Harlem River or to the Interborough Rapid Transit Co. dock at 125th St. and the Harlem River, from which points it was hauled to the site on trucks.

Editorials

Long Foundation Piles

Engineers in the Eastern and Middle States, where good timber has of late years become somewhat of a luxury, will read with amazement, touched with envy, of the long piles which are to be driven in the New Columbia River bridge, described on p. 1218 of this issue. Sticks 120 ft. long and straight and staunch enough to be driven as piles are only memories on the Atlantic Coast. That such sticks can be had on the Pacific to the number of nearly 3000 at a cost of only 12c. per lin.ft. is lively evidence of the abundance of our northwestern forests.

The long embedment of these piles is also novel, although not entirely new, as a similar detail was used in another Oregon bridge—the Coos Bay Bridge, described in ENGINEERING NEWS, Apr. 1, 1915, p. 609. Such a construction should undoubtedly add to the lateral stability of the pier and insure a uniform transmission of load, but will probably complicate somewhat the placing of the concrete, both above and below water. There is also the remote possibility that these many piles extending far up into the pier section may tend to cause planes of weakness through the concrete.

⁂

Preventing Telephone Troubles Along Electric Railways

The service interference to telephone and telegraph communication once met with in districts where alternating-current railways operated has been noted at various times in ENGINEERING NEWS, as well as some of the complicated attempts to mitigate it. The degree of elimination secured along the Elkhorn grade of the Norfolk & Western Ry., as noted elsewhere in this issue, illustrates the simplicity of the most successful methods. To cure the troubles—not merely to remedy them—it was necessary only to place the substations judiciously and to discourage the current from leaving the rails.

In fundamental respects these are the same lines along which the New Haven road reached success after a long period of bother with elaborate compensating devices. On this line the very simple expedients were adopted of (1) doubling the feeder voltage, (2) making the supply circuit include only the contact wires and high-tension feeders, and (3) placing numerous single-coil transformers across this supply circuit and connecting their mid-voltage point to the rails. In this way the track and trolley became active conductors only between the two transformers adjacent to a train. The traction currents were made to flow to the train from opposite directions, producing a second diminution of effect on parallel wires. The track current was restrained, more than before, from leaving the rails and cutting cross lots, so that the currents in trolley and track held parallel paths and tended better to neutralize their inductive disturbances. The main supply circuit, by losing its earth return, acted similarly.

The same recourse to fundamental measures of prevention may be seen in the electric-traction installation of the Pennsylvania R.R. out of Philadelphia, though of course the details are varied.

⁂

Value of Permanence in Public Service

In our issue of June 3 we referred to the important public service rendered to New York City by its Bureau of Franchises. It is of interest to put on record that one of the reasons why this bureau has been able to do such thorough and effective work in the protection of the city's interests is that its staff is made up of men of long experience in the city's service. Of the 17 employees in the bureau, 12 have been connected with it since its establishment in 1905, and their total time in the city's service ranges from 10 to 28 years.

A still more notable instance of long continuance in the city service is the very unusual record of David Brower, who has just retired from the Brooklyn Sewer Department after serving as an engineer in that department for 54 years.

So much has been published concerning the corruption of municipal government in the United States, and particularly in New York City, that many people still have the idea that most city employees hold their positions by virtue of political pull. It is well worth while, therefore, to put on record the above showing as an illustration of the fact that, notwithstanding the many changes in political control that have taken place in New York City in the past quarter century, a large proportion of those in the city's service continue on year after year without regard to political upheavals.

We are well aware that many contrary instances can be cited where engineers and others who have rendered valuable service to cities have been displaced for political reasons; on the whole, however, there has been a great improvement in this respect in our municipal governments during the past quarter century.

The enactment of civil-service laws is partly responsible for this, without doubt. Even more potent has been the realization, however, by every man who attains to any important position in governmental affairs that in order to get the public's work done in any sort of satisfactory shape men who know by experience what the work is and how it should be carried on must be retained.

The public probably misunderstands the position of the engineer when he urges that those of the profession engaged in public work should be made secure in their positions. It ought to be realized that the engineer is not only arguing for the benefit of those of his profession who are engaged in public service, but that he is also arguing for the only system that can produce the efficiency and economy in that service which every good citizen desires. What manufacturing firm could succeed in the struggle with its competitors if every time a general election was held all those holding responsible positions with the firm, in which they were able to do constructive work in developing its business, were likely to be displaced on a moment's notice by a set of men wholly inexperienced in the work?

⁂

The Logical Results of the Submarine Torpedo Boat

In our issue of May 13, following the sinking of the "Lusitania," we discussed the results that were likely to follow the rapid development of the submarine torpedo boat as a weapon of warfare. In this issue is printed a statement setting forth the present status of the submarine boat, which has been prepared for ENGINEERING NEWS by Naval Constructor Howard of the Washington Navy Yard, who is in direct charge of the work on the Government's new submarines.

The development of the submarine boat which has taken place within the past four or five years has been extremely rapid. The efficient and reliable operation of such a boat, like that of a motor boat or an automobile, depends upon the development and perfection of a great number of special details of its equipment. Everyone knows what a vastly different machine the automobile or motor boat of 1915 is from the automobile or motor boat of 1910. Some such development has taken place in the submarine.

Notwithstanding the development, there was, prior to the war, no recognition of the enormous potency of this new engine of destruction, save for some such isolated prophecy as that of Admiral Scott of the British Navy, who a little more than a year ago declared that the submarine boat had already made the dreadnought battleship obsolete. The naval experts of Great Britain promptly branded such an idea as absurd; and as Great Britain sets the fashion for the world in all naval matters, no other nation's naval authorities have as yet ventured to recognize the logical results of the submarine boat. Not only this, but as a result of the British military censorship since the war began, and an entirely natural disinclination on the part of the British authorities and press to recognize facts which militate against them, there has not been even a full recognition of the part that the submarine has played in the present war.

This is natural enough on the part of Great Britain; but the United States needs to know and to understand the facts. There is, for example, a demand by the Navy League that our Government borrow half a billion dollars at once to spend on national defense, chiefly, it is understood, on additions to the navy. There is little doubt that large expenditures for national defense will be made as soon as Congress meets. But the question is, On what shall the money be expended? It would be as absurd to decide on our military and naval plans without regard to the epoch-making revolution in methods of warfare which the European war has made as it would have been to buy muzzle-loading shotguns for our infantry at the close of our Civil War.

Notwithstanding all the limitations of the censorship, it is evident that the submarine torpedo boat has been by far the most important factor in connection with the naval operations of the war. And the chief accomplishment of the submarine fleet is not its sinking of the battleships and cruisers and other naval vessels, nor even the destruction it has wrought on merchant vessels. The great achievement of the submarines has been the shutting up of the British and German fleets in home harbors, merely because of the potential danger from submarine attack. This is not cowardice on the part of either combatant, as newspaper writers thoughtlessly claim. It is correct naval strategy. It should be understood that the German fleet is kept inside its own safe anchorages not alone because of the superiority in weight of gunfire of the British fleet, but also because the British submarines are as serious a danger to the German battleships and cruisers as the German submarines are to the British vessels.

The mere fact that the few submarines which each nation possesses constitute so great a peril to the main vessels of both navies as to keep them idle during the greatest war in history is the biggest feat which the submarine has accomplished.

Of course, it is understood that the lighter naval vessels—torpedo boats, destroyers and cruisers—have been more or less active, because their loss might be hazarded; and, as is well known, severe losses have occurred. Again and again it has been graphically proved how helpless are the larger fighting vessels in the presence of their concealed foe. One recalls the sinking of the three British cruisers in the North Sea and the resulting order that a vessel must seek its own safety if a companion vessel is torpedoed, leaving the drowning men to their fate. Other recent examples are the sinking of a British cruiser in the Adriatic at a time when she is said to have been protected by a convoy of half a dozen torpedo boats, and the sinking of a British destroyer and two British torpedo boats in the North Sea.

At the Dardanelles, such reports as have been published indicate that the achievements of the submarines on both sides have been the largest factor in the operations. The losses of the allied fleets have been so serious that, according to recent reports, the large vessels have been compelled to change their position and leave the allied troops unsupported.

There is, however, a prevalent idea, which finds support even in naval circles, that the destroyer type of vessel can make an effective defense against the submarine. It is easy to see why this idea should be given currency, for it would not be good tactics to officially admit that there is no real defense against submarine attack. Not only this, but the navy in all countries is a most conservative body. It will be a long and slow task to convince the rank and file of naval officers that the great battleships and cruisers in which they have taken such pride are as surely rendered obsolete by the submarine torpedo boat as were the grand old sailing frigates made obsolete when the battle between the "Merrimac" and the "Monitor" took place.

What is the foundation for the idea that the destroyer can put up an effective defense against submarine attack? Just this—that the destroyer, because of its superior speed and maneuvering qualities, *can elude the submarine* better than a larger vessel. It must be understood that the only safety for a vessel against the submarine's torpedo is to keep moving and changing its course. So long as the submarine boat remains submerged, a destroyer or any other vessel can do nothing to attack it. When the submarine thrusts its periscope above the surface of the sea to get its bearings, if some lookout on the destroyer is lucky enough to catch sight of the little tube, a quick machine-gun volley may smash the periscope and blind the submarine. But a piece of iron pipe thrust a few feet above the surface of the waves is a very small object to search for over all the area within the radius of a mile or two from the ship. The chances are greatly in favor of the submarine, that it will obtain its bearings and submerge again before its periscope is discovered.

It should be added that the destroyer has one further chance. By a sharp lookout it may discover the wake of the torpedo discharged by the submarine before it reaches its mark, and it is said that a machine-gun volley directed just ahead of the torpedo will explode the charge and thus make the torpedo harmless. In smooth water and clear weather the course of a torpedo may be traced, and by quick action a machine gunfire may be brought to bear on it before it reaches its mark. But the feat of thus discovering and "winging" a torpedo during the minute or two that elapses from the time it is discharged till it reaches its mark is not a thing which can be counted on.

It is said, however, that a dozen or more German submarines have been captured or sunk by British vessels. No details have been made public as to the method by which the captures have been effected, but it may safely be assumed that the captures were made when the boat was on the surface, and some of them have probably been due to some derangement of the submarine's machinery preventing it from taking refuge by diving when danger threatened. It is understood, of course, that before the submarine submerges it is well-nigh defenseless. Its safety lies in the fact that, lying so low in the water and discharging no smoke, the submarine is pretty sure to discover an enemy before it is itself discovered. It can then submerge and seek to torpedo the other vessel; but if by any mischance it is unable to dive, it is liable to capture, since its speed is not enough for it to escape if pursued by a naval vessel.

The time required to prepare a submarine for submergence may vary all the way from 2 to 20 minutes. Upon this more than anything else, probably, depends the liability of the submarine to capture. A fast destroyer may travel a mile in two minutes. Should a submarine discover a destroyer approaching her, therefore, the submarine will have to dive very promptly or the approaching vessel will discover her and open fire.

Briefly stated, therefore, the submarine is a vessel which is defenseless when on the surface, but which when submerged cannot be fought by any means now known. The torpedoes which it discharges are fatal to any form of vessel ever designed, or which is likely to be designed. The latest type of American dreadnought battleship, the "Arizona," launched at the New York Navy Yard June 19, represents a total investment of about $16,000,000. In contrast the United States submarine torpedo boats now building cost $540,000 apiece, so that a fleet of 30 such boats could be built for the cost of one battleship.

It deserves emphasis that the submarine boat is a weapon for defense and not for offense. No nation can now go overseas and attack another nation successfully provided the other nation possesses a fleet of submarine boats and men competent to operate them. And it can have such a fleet at such a small cost compared with the enormous outlay required for modern cruisers and battleships that all the smaller nations of the world are sure rapidly to provide themselves with such protection.

In the present war, as we have seen, the submarine has been the controlling factor. Its development, however, is still going on. Already a German submarine has made the voyage through the North Sea, the Channel, the Bay of Biscay and the Mediterranean, a distance of over 3000 mi., requiring 40 days' time, and sunk three battleships after its arrival. The United States is soon to receive bids for two very large sea-going submarines which will have, it is said, an effective cruising radius of from 5000 to 10,000 mi.

It is yet to be proved, however, that such large boats, except for use in distant operations, have any advantage over the smaller vessels. It is said that some of the most effective work by German submarines has been done by vessels of only about 240 tons' displacement. Even smaller vessels may again come into use, such as were built in the early days of submarine development. In submarine attack numbers are the important thing. No matter how large a submarine is, it can do no more than fire a torpedo, and the amount expended on one submarine of the large sea-going type would build three of the smaller type. We may even see submarines built so small that they can be carried on board a large vessel and put overboard in case of discovery of an enemy.

There seems no escape from the conclusion that the submarine torpedo boat has rendered obsolete and practically worthless all existing types of naval vessels—battleships, cruisers and destroyers. They are unable to offer any effective defense to their underwater foe, whose missile directed against them is far more certain to effect complete destruction than the biggest broadside of the most heavily armed vessel afloat fired at point-blank range.

If there seems to be any reason to doubt this, let it be seriously asked what the big battleships and cruisers are good for. Their impotence successfully to attack shore fortifications, long an axiom of naval strategy, has been again demonstrated by the operations at the Dardanelles. The proper objective of the fleet is well known to be the fleet of the enemy. But why build a fleet of huge vessels to combat the enemy's vessels if they can be more effectively and certainly destroyed by submarine attack?

So much for the logic of the submarine as a weapon of national defense against naval vessels. Can the civilized world afford to permit its use against merchant vessels of the enemy and even against neutral vessels?

To give a fair answer to this question, we may best ignore the conditions of the moment, with all their inevitable accompaniments of international prejudice. Imagine that a few years hence some insignificant nation—let us say in Africa or in South America—provided, however, with a large fleet of submarine boats, should declare war against some powerful European nation—for example, Germany herself, possessing, let us suppose, a large merchant marine and carrying on a large foreign trade. **It is evident that Germany would be powerless to attack her small antagonist, for it would be suicide to send either naval vessels or transports loaded with troops across the seas to be sunk by the enemy's submarines. It is easily imaginable, however, that the small nation might see an easy road to prosperity by emulating the example** of the famous Barbary pirates of the eighteenth century. We can imagine such a nation waging with submarines a warfare against every German merchant vessel, and declaring that every neutral vessel carrying goods either to or from Germany should be subject to capture and confiscation, which it could escape only by payment of a heavy ransom.

Suppose the great League of Peace, made up of the great nations of the world, were organized and in operation; the depredations of such an outlaw nation could not be stopped even by the combined forces of all the powers, by any operations at sea; only by attack on land.

This is only a brief suggestion as to why, in the interest of the world's welfare, no precedent should be established legalizing submarine attacks on merchant vessels. Should this be done, the submarine with its torpedo might easily become a veritable Frankenstein—potent to destroy the civilization which had produced it.

Letters to the Editor

River Terminals at Evansville, Ind.

Sir—In Engineering News, June 3, 1915, we note an article on Ohio and Mississippi River terminals, which states that terminals at Evansville are under consideration. Seven or eight years ago, in conjunction with the Evansville Sand & Gravel Co., we started the construction of a private river-and-rail terminal at Evansville. We now have a plant with derrick hoists, railway switches and warehouses, which we believe to be the best on the river, and which we keep busy for our own use. We transfer sand, gravel, steel, coal, lumber, groceries, furniture, etc., and have lifted a small gasoline cruiser out of the river to repair the propellers. Furthermore, we use a part of the wharf for the construction of river vessels. So we feel the terminals at Evansville are not merely "under consideration."

The Ohio River Contract Co.,
Leslie P. Eichel, Secretary.

Evansville, Ind., June 5, 1915.

[Our inquiry and the article mentioned above related particularly to public or municipal terminal facilities on the Ohio and Mississippi rivers, but we are pleased to make note of the above-cited private facilities at Evansville.—Editor.]

⁂

The Project for a Reserve Corps of Engineers

Sir—A few years ago a committee headed by the late Alfred Noble and made up of prominent members of the American Society of Civil Engineers journeyed to Washington to ask for recognition and promotion for deserving civilian engineers employed upon the works in charge of the Corps of Engineers of the United States Army. As is well known, this committee failed to accomplish its purpose principally on account of strong opposition from the military engineers, but partly also because the members of the committee were insufficiently informed on their subject.

In the last few weeks another committee, also from the American Society of Civil Engineers, has been in Washington to discuss with the authorities the formation of a Reserve Corps of Engineers to supplement the Corps of Engineers of the regular army in case of war or other emergency.

A solution of the two problems studied by these committees would be found in the formation through proper legislation of a Reserve Corps of Engineers comprising the best material among the civilian engineers.

While the civilian engineers are not soldiers, they carry on the same work as the officers of the Corps of Engineers. They are educated technical men, and it would not be difficult to convert them into a military body by a moderate amount of training and instruction.

By organizing the civilians in a separate and distinct corps, much of the opposition raised by the military engineers would be avoided. The army engineer officers are not particularly opposed to the civilian engineers, but are unwilling to admit to their own corps any but graduates of West Point.

Engineering Competitions in a Technical School

Sir—The editorial on engineering competitions in Engineering News, June 3, 1915, was very well taken, and the reasons why the use of competitions in the engineering profession is difficult are especially cogent.

In line with this it may be interesting to note that the Engineers' Society of Western Pennsylvania, in conjunction with several technical schools, some time ago realized the value of competitive work in the field of engineering and that more practical work should be injected into the technical courses of the schools. With these two points in view, the society formed a committee on engineering education, whose duty it is to obtain problems made by practical engineers out of their daily work.

These problems are then submitted to the students as part of their regular course by the respective schools and the solutions are turned in to the committee. Specially selected judges decide the contest.

This has now been done for three consecutive years. So far the plan has met with a great deal of favor by the school authorities and students, and many more schools have used the problems each year.

The branches in which competitive problems are being prepared are civil, mechanical, electrical, metallurgical and sanitary. It is rather early to judge the final outcome of such a movement, but from the results so far obtained it appears probable that a great deal of good will result from it, on account of getting real competition in engineering work and real and practical problems in the school courses.

A. Stucki,
President, Engineers' Society of Western Pennsylvania.
Pittsburgh, Penn., June 7, 1915.

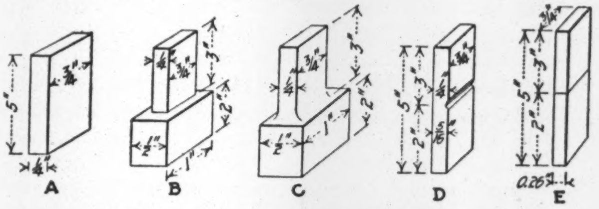
Progressive Fractures from Alternate Bending

Sir—The writer has been very much interested in the report of the broken axle on the Baltimore & Ohio locomotive tender and in your comments and that of your correspondents on Mar. 11 and Apr. 29.

Some time ago I had occasion to investigate the effects of nicks and changes of section in material, and the accompanying sketch shows the five sections that were tested. These pieces were clamped in a vise for a distance of 2 in., 3 in. being above the top of the vise and the uppermost portion being held by a lever which was pulled by hand from side to side. These pieces were subjected to alternate bendings 60 deg. on each side of the perpendicular, one alternation being one bend through 60 deg. and back to perpendicular. Twelve pieces of each size were tested, the material being ordinary steel exactly the same in each case.



Test-Pieces for Alternate Bending

The average results were as follows: Test-piece *A* gave 6.3 alternations. Test-piece *B* gave 3.1 alternations. Test-piece *C* gave 3.1 alternations; but test-piece *D*, with a 60-deg. V-notch $\frac{1}{16}$ in. deep, gave only 22½-deg. bend, bending away from the nick, and 60-deg. plus 40-deg. bend in bending first toward the nick. Test-piece *E*, with a very slight diamond scratch, averaged five alternations.

The immediate conclusions from these results are, of course, what have been long known among engineers—that changes of section and notches or nicks are exceedingly harmful; though why test-pieces *C* and *B* should fail so rapidly is very difficult to understand.

The writer believes, moreover, that if the test-piece *E* had been subjected to a large number of smaller alternations it would have broken down very quickly, as the effects of a diamond scratch are almost as noticeable in steel as in glass. In a high-grade specially hardened alloy steel they are of particular effect.

This progressive fracture is one which causes considerable trouble. From the mere fact that it goes on quite often for an exceedingly long time, and until a large percentage of the total area has become fractured, before complete separation takes place is evidence that the fiber stress must be reasonably low.

The writer has found in his experience that by increasing the size of the section and by paying special attention to the design and material used the tendency to produce progressive fractures can be very considerably reduced or largely eliminated.

John Younger,
Chief Engineer, Truck Department,
Pierce-Arrow Motor Car Co.

More About the Use of Vegetable Matter in Asphalt Pavements

Sir—In Engineering News, May 27, 1915, p. 1046, I note a short article on a "fiber" asphalt pavement laid in Charleston, W. Va., in connection with which my name has been mentioned.

I have nothing whatever to do with what is known as the "fiber" asphalt pavement. The pavement that I invented is purely and simply an improvement over the various classes of bituminous pavements. The finely powdered vegetable matter is practically the only addition to the aggregates used in my invention. This vegetable matter is added for the sole reason of absolutely sealing the voids in the mineral aggregate and acting as a second binder in order to hold the pavement firm on its foundation, doing away with cracking of the surface and allowing the pavement to have a greater amount of expansion and contraction without the surface cracking.

I now have two samples of this pavement, one of the sheet-asphalt type laid with an ordinary Florida sand, using about 30% bulk of sawdust in the mixture. This sample is now 16 months old.

The following extract of a letter from H. M. Sinnott, a representative of the Barber Asphalt Paving Co., who made a personal inspection of this pavement on May 27, is of interest:

> I wish to advise you that on May 27 I personally inspected the piece of pavement laid by you on the Cocoanut Grove Road near the City of Miami, Dade County, Fla.
>
> This is the piece of pavement that was laid by you as an experiment in February, 1914, using Bermudez asphalt, and, as you advised me, from 30 to 35% of sawdust in the mixture.
>
> This pavement is apparently in as perfect condition as it was the first time I inspected it, which was a few days after its completion. This pavement presents as good an appearance as any piece of pavement of the sheet-asphalt type that I have ever seen.

The other sample is of an asphaltic-concrete type using a crusher run of stone with the addition of about 35 to 40% by bulk of sawdust. This sample was laid at the Fourth Ave. and Jackson St. intersection in New Decatur, Ala., during July, 1914, and is in perfect condition.

The use of vegetable matter in these various mixtures also appears to make a noiseless pavement. We do not claim that the vegetable matter in the wearing surface is for the purpose of increasing the durability of the pavement, but that it is simply used as a void sealer and a binder. As it is in its own state a compressible matter, the use of sawdust will do away with the necessary grading of sands, such as are commonly used in a sheet-asphalt type of pavement, and will also do away with the grading of stone in an asphaltic-concrete type of pavement.

B. R. Reno,
General Superintendent,
Southern Asphalt & Construction Co.
Birmingham, Ala., June 4, 1915.

Electric Traction on the Norfolk & Western Railway

SYNOPSIS—This article, supplementing one in ENGINEERING NEWS, *June 17, describes the overhead contact lines by which 11,000-volt single-phase current is supplied to single-phase-three-phase locomotives. The power-generating and switching system is briefly taken up and some interesting minor points are noted—like the suppression of inductive disturbances in telephone and telegraph lines, the absorption of regenerated energy from braking trains, the arrangements for maintenance, etc.*

The use of 11,000-volt single-phase power for the electrified Elkhorn grade of the Norfolk & Western Ry. in West Virginia involves supplying current to the locomotives by an elevated contact wire (with the track serving as a return circuit). No supplementary feeders are employed, the power distribution from substations being entirely by the contact system (and track).

The primary object of the engineers in designing the overhead lines was to hold a No. 000 copper-alloy trolley wire at a uniform height of 24 ft. above the rails and in a location not varying horizontally more than 12 in. from the track center (corrected for superelevation effects). The wire over one track is isolated from that over another. Reliability in service and low cost of maintenance were especially sought.

The contact wire is supported by a single catenary cable, with an auxiliary messenger wire close above the trolley and parallel to it. The catenary is hung from guyed light steel cross-bridges, except in yard spans, where a cross-catenary cable is employed.

INSULATORS

A prominent feature of the design is the use of two or more insulators in series between all live parts and ground. This is possible with suspension-type disk insulators. A string of three disks is used throughout over the main line tracks. Each disk is good for 11,000 volts and has an ultimate mechanical strength of 12,000 lb. There has not been a single failure of an insulator string.

CATENARY BRIDGES

The bridges supporting the catenary on the main tracks are made of tubular steel poles (sections of various lengths, sizes and weights being swedged together) and an H-section cross-beam. A change in size at the height of the cross-beams makes a shoulder on which sits a heavy steel casting for holding the cross-beam and for attaching the guy rods. The beams are partly supported also by side braces. The poles are grouted into rein-

(Power house, and guyed and self-supporting bridges in the background)

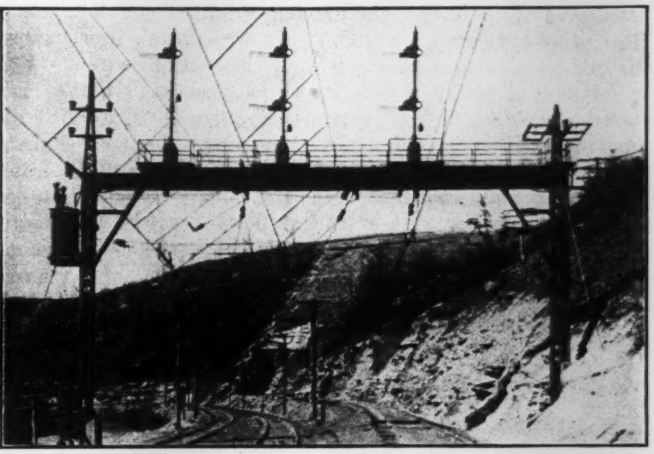

FIG. 3. SIGNAL-BRIDGE CATENARY SUPPORT
(Showing dead-ended messenger, contact-line breaks and booster transformer at the left)

forced-concrete foundations (1 : 2 : 5 mix) set in advance and cored with a collapsible form. A reinforcing collar of ½-in. plate protects the pole at and above the top of the foundations. Under the concrete is a copper plate with a bonding wire coming up to the pole.

BRIDGE GUYS

Each bridge stands alone on tangents, but is back-guyed on curves against the pull of the catenary, the guys carrying a considerable portion of the load. The guy anchors are concrete slabs containing two or more pieces of old rail, the size of each slab being such that its weight plus the dead-weight of earth above it is more than the maximum pull on the guys.

The guys are generally of round steel rod in three pieces. Where they pass through the earth they are protected by a boiler tube with grout filling. The upper sections of the rods are of uniform length, where the middle piece is cut as needed, with the final adjustment made by turnbuckles.

HEAVY BRIDGES

On curves where property for guy anchors was not available, unguyed light bridges, of structural posts and girders, support the catenaries. Where it was desired to anchor or dead-end the overhead system such bridges were used, but guyed along the direction of the track. Heavier bridges were used where both signals and catenaries had to be carried.

This type of supporting structure has proved very satisfactory where there is room on the right-of-way for guying. On long stretches of tangent track the cross-beams might interfere somewhat with the clear view of the signals; but here there is little tangent track, and no long stretches of it.

CATENARY ON TANGENTS

The construction over tangent tracks is very simple. A steel casting attached to the bridge girder supports a string of insulators, and to this, in turn, is attached a malleable-iron messenger clamp with arcing horns, so that if an insulator should break down the arc would be from the clamp casting and not the messenger wire.

The grip of the clamps is such that the cable will pull through at a certain tension; if a messenger breaks between anchors, it will slip through several supports adjacent to the break and distribute the abnormal strain over several intermediate bridges.

The main messenger is of ½-in. galvanized-steel stranded cable having a breaking value of over 30,000 lb. It is jointed by forged sockets designed to develop full cable strength. The nominal sag is 5 ft. in a 300-ft. span, but the actual sag depends on the particular span, which varies with the location. Every 30 ft. along the messenger are bent-strap clips which hold flat gal-

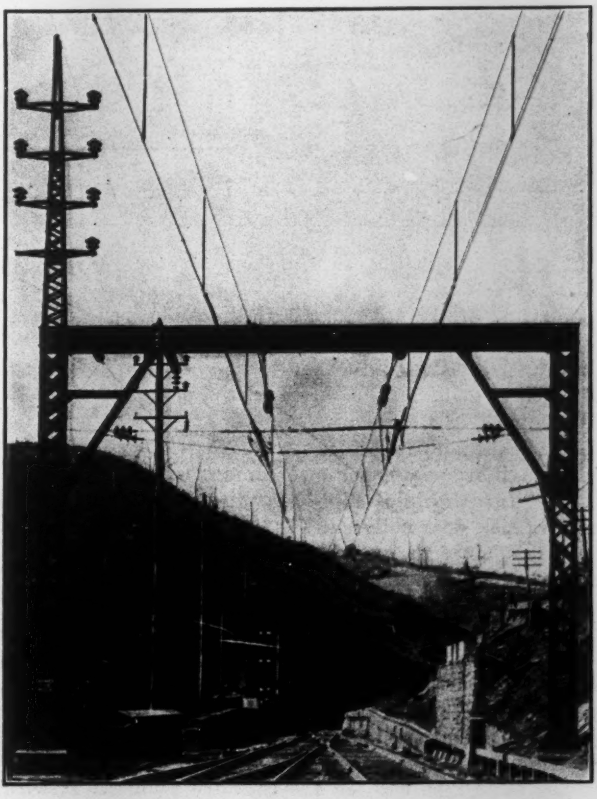

FIG. 4. SELF-SUPPORTING CATENARY BRIDGE; EAST PORTAL OF ELKHORN TUNNEL

vanized-steel strap hangers of varying lengths. On the bottom of each hanger is bolted a pair of malleable-iron trolley clips gripping the auxiliary messenger wire. The latter is a No. 0 round copper or steel wire, the material depending on the current-carrying capacity required. The grooved trolley wire is supported from the auxiliary wire by clips spaced 15 ft. apart and located between the main hangers. On the longer tangent stretches the running wire is held in place crosswise by steady strands insulated from ground and having 4-ft. impregnated wood-stick insulators between tracks.

Catenary on Curves

On curves the contact wire only approximates the track curvature, being permitted to be 12 in. off the center line of the track (or rather off the locus of the center of a locomotive-pantograph shoe because of outer-rail superelevation) in one direction at the bridges or supporting points and 6 in. off in the other direction at the center of the span.

The main hangers on curves are 15 ft. apart and grip both auxiliary messenger and contact wire at the same point. Intermediate clips are dispensed with. This construction does not result in "hard spots" in the overhead line, since the angularity of the hangers allows the contact wire to swing upward.

To avoid an uneconomically close spacing of structures on sharp curves (since the amount of trolley curvature obtainable with a fixed distance between supports is limited by the practical length of hangers and by the possible offset of insulators on the bridge), one or two pull-off poles are used between bridges. These are single tubular steel poles set in concrete, with single guys of the same type used on the catenary bridges. A wire strand from the pole top (insulated by a string of insulators) is fastened to both messenger and contact wire and serves to bend the plane of the catenary system, as shown in Fig. 2.

Yard Supports

Over yards the catenary construction is similar to that already described, except that cross-catenaries are used instead of bridges. Between two or more high structural-steel columns (guyed or self-supporting, as the location dictates) is a main messenger supporting a horizontal auxiliary cable. In some instances the main messenger is of 1½-in. cable having a breaking strength of about 240,000 lb. The hangers between top and auxiliary cables are ¾-in. rods and the connections are malleable castings. All cables are held to integral connection plates on the poles by heavy forged sockets and turnbuckles. In general all the cross-catenary materials are double galvanized.

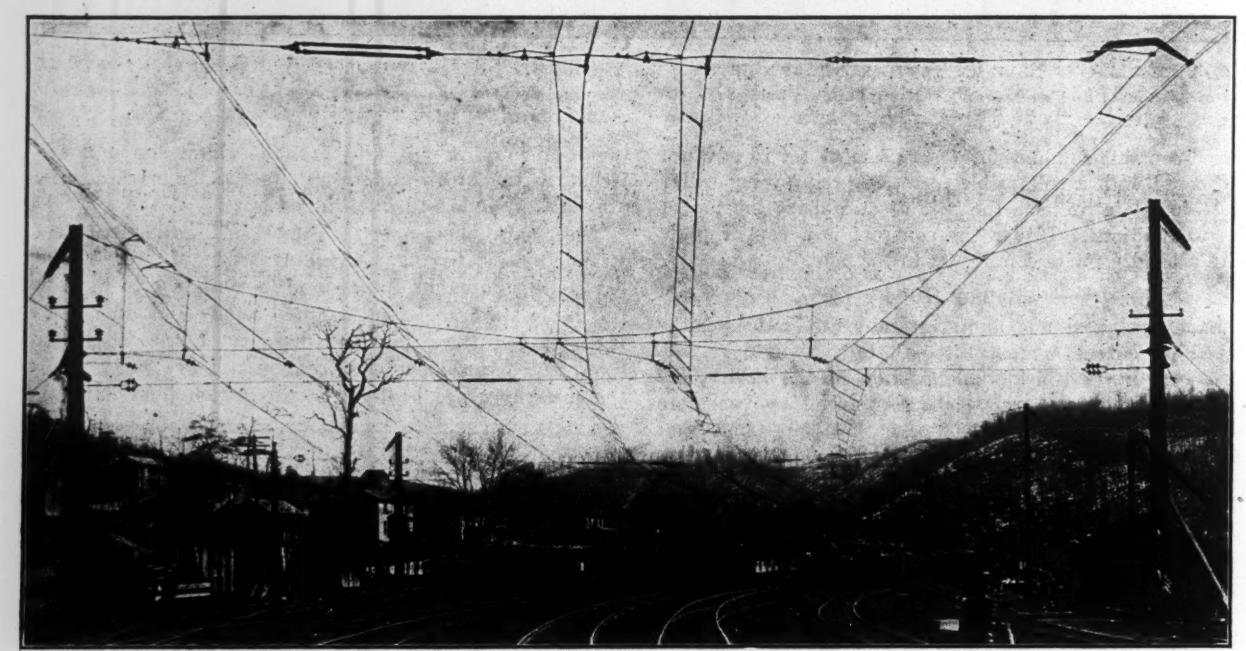

Fig. 5. Cross-Catenary Construction in Norfolk & Western Ry. Yards

Over sidings only two insulator disks in series are used and the auxiliary messenger wire is omitted. Chestnut poles and steel-bracket supports are used on branches and coal sidings.

Tunnel Construction

In the Elkhorn tunnel special construction was necessary. The walls are 14 ft. apart at the springing line and 13 ft. apart at the base; the springing line is 11 ft. 1 in. above the top of rails, and the top of the arch is 19 ft. 3 in. After experimental construction under high voltages with smoke and steam in a sample metal-lined tunnel the arrangement shown in Fig. 6 was worked out.

There is a supporting structure every 75 ft. Two cast-iron brackets are held to the brick lining of the tunnel by large bronze expansion bolts, and on each bracket is a 4400-volt transmission-line insulator. Between the two brackets is a 2-in. bent brass pipe carrying a third 4400-volt insulator on a bronze bracket. A cross-pipe, bent to follow the arch of the tunnel, and going from this pair of brackets to a corresponding one on the other side, supports a bronze messenger wire. There are two bronze contact wires held by triangular hangers from the messenger. In spite of limited clearances the tunnel equipment has stood a test of three times the normal voltage and has been satisfactory in service.

SECTION BREAKS

The running wire is sectionalized longitudinally where necessary by breaking the electrical continuity of the messenger wire with two parallel strings of three disk insulators. Directly below this break in the messenger the auxiliary and running wires are attached by turnbuckles to the ends of a heavy impregnated woodstick insulator. T-iron runners are connected to the ends of the contact wire and are supported by the woodstick insulator approximately parallel to each other at the same elevation. Thus they overlap longitudinally, but have ample electrical clearance. The locomotive-pantograph shoe in passing underneath makes contact with the second runner before leaving the first, and there is no interruption of the current supplied to the locomotive.

FIG. 6. CATENARY SUPPORT IN ELKHORN TUNNEL

Some of these breaks are provided to permit isolation of parts of the line for repairs, and the runners are normally connected by knife switches on top of the woodstick insulators. The blades can be opened and closed from the ground by long impregnated-wood poles.

At certain locations the catenary system is deadended and anchored longitudinally by attachment to the cross-girders of structural bridges with a double string of disk insulators. These breaks limit the zones of mechanical trouble in case of wreck and broken messenger wire.

TEMPERATURE CHANGES

All calculations in the design of the overhead system were made for a normal temperature of 60 deg. F. With lower temperatures the tension in all wires is increased and the contact wire rises somewhat toward the center of the span. A 6-in. rise in a 300-ft. span will make a trolley-wire gradient of only $^1/_{12}$ per cent., whereas ½ per cent. is permissible. With rising temperature above 60 deg., tension is decreased and the contact wire sags uniformly, but well within permissible limits.

TRACK BONDS

The rail joints are bridged by 37-strand (0.0534-0.475-in.) copper bonds. Each bond as received has a terminal welded on one end, but the other end is left free so that it can be pushed under the fishplate. The loose terminal is then soldered on and both ends are expanded into holes in the rail web. At signal bridges insulated rail joints are placed in the track and impedance bonds bridge the gaps, preventing the flow of 60-cycle signal current while passing the 25-cycle propulsion current.

TELEPHONE AND TELEGRAPH PROTECTION

From experience with alternating-current traction it was judged necessary to protect all telephone and telegraph lines along the railway from interruption of service by physical contact with the high-tension wires and from induction effects set up in parallel stretches by the power currents. The company's telegraph and telephone pole line was moved to the south side of the right-of-way and all crossings over the high-tension wire were eliminated.

To help against induction substations were placed somewhat closer together than would be required merely from considerations of voltage regulation and losses, and the end substations were placed near the ends of the line. This results in feeding each important section of trolley from both ends, so that the voltage induced in the parallel telephone and telegraph lines is largely neutralized and localized.

In addition, to provide against emergency conditions with one substation out of service or in case of short circuits, etc., booster transformers have been installed in the trolley and track circuits at 1-mi. intervals. These are series transformers, with their primary windings connected in series with the trolleys and their secondaries in series with the track at the middle point of the impedance bonds required at signals. These transformers were mounted on signal bridges (Fig. 3) and the track connections were carefully worked out so as not to interfere with signals. These transformers prevent the leakage of return current from the rails to the earth and thus keep the feeding and return circuits at a fixed distance from the telephone and telegraph wires. With

FIG. 7. REGENERATIVE-BRAKING RHEOSTAT, BLUESTONE POWER HOUSE

equal currents thus flowing in opposite directions in trolley and track the effect is still further to neutralize the induction in the telephone and telegraph lines. It is reported that since operation has been under way there has been no interference with the telephone and telegraph service.

Locomotive Inspection

Facilities for inspection and maintenance of the whole electric installation are concentrated at Bluestone, where the power station is located.

There is an inspection building and repair shop, 148x 68 ft. in plan, with two concrete main pits running the full length of the building—each accommodating one locomotive and equipped with power and lighting outlets.

The locomotives are not handled in the shop by their own power, but are drawn in and out by a cable and motor-driven winch in one end of the shop between the two main tracks.

Line Maintenance

The old locomotive-supply pumping station has become the headquarters for the line inspection and maintenance force. Here a full supply of materials is kept. A part of the building is fitted up as a bunk room for the repairmen who will be available day and night. On a nearby siding will be an emergency train, comprising a tower car, tool car and flat car to be drawn by a steam locomotive.

The ordinary repairs, however, are made by small gangs of three to five men using gasoline motor cars for carrying tools, materials and impregnated-wood extension ladders. Wherever possible the repairs are made from overhead bridges or from ladders, and while the line is alive, to prevent interruptions of service. Rigid rules are in force permitting the use of only one ladder at a time at one point, only one man on a ladder and no long lengths of wire. Some of the repairmen are regularly stationed at different points along the line.

A patrol telephone line runs the entire length of the electrified section, with instruments in locked boxes on signal bridges about a mile apart. This line leads to the power-station operator, through whom communication can be had with the train despatcher and other officials. The power director at the switch-board in the generating station is also in constant telephone communication with signal-tower operators, passenger-station agents, yard masters and all others responsible for the switching in substations and along the line.

Automatic Signals

The Elkhorn grade was formerly equipped with automatic storage-battery signals having semaphores on posts. Before electric operation started these signals were replaced by 60-cycle alternating-current apparatus adapted to the use of the track return for propulsion current and with the semaphores on certain catenary bridges.

Power Station

The power station follows lines of design familiar with steam boilers and steam turbines. The location, at Bluestone on the Bluestone River, was determined by the only available source of boiler-feed and condensing water in the district. The railway company had already built a dam and reservoir here for supplying steam locomotives.

The main structure, of brick, is 135x158 ft. in plan with a 52x33-ft. extension on the northeast corner for the 44,000-volt apparatus. The boiler room is 79 ft. 3 in. by 158 ft. 6 in., and the turbine room is 36 ft. by 158 ft. 6 in. The basement floors are at ground level, while the turbine room is 18 ft. and the boiler room 13½ ft. above.

On the ground floor of the transformer-house extension are the transformers, and on the second floor is the high-tension switching apparatus. The boilers, stokers, stoker engines and feed-water heaters are all on the main floor of the boiler room. Pumps, oil filters, air compressor, air-cleaning equipment and forced-draft fans are in the basement, with the pumps and filters in a separate room. The main generating units, exciters and signal current generators are on the main floor of the turbine room, with the condenser and fans for cooling the generators in the basement.

A section across the east end of the turbine room, 26 ft. wide, is used for switching equipment, offices, etc., and has intermediate floors and galleries. On the main floor is the low-tension switching room separated from the turbine room by heavy wire screens. The next floor above is the operating gallery. The top floor is used for offices.

There are three 10,000-kw. generating units, with space for a fourth. These are three-phase machines loaded on one phase for traction and carrying a small auxiliary load on all phases.

Cooling Pond

A spray cooling pond 90 ft. wide, 296 ft. long and 5 ft. deep is provided to take the water from all condensers when the supply of river water is low and muddy. When there is sufficient good river water the condensers discharge directly into the pond without spraying and the water flows down into the river reservoir. The basin is formed by a concrete retaining wall and a bottom of 6 in. of clay puddle, laid on a rolled subgrade and covered with 2 in. of asphalt concrete.

Regenerative-Braking Rheostats

The use of the locomotive-driving motors on down grades as generators returning power to the line for braking trains was outlined in the previous article. The excess power returned, when there are no trains on grades and the power-house load is very light, would pass back through the various transformers and reverse the generators so that they would run as motors. To prevent this, two loading rheostats, each consisting of a pair of electrodes in the power-house intake canal, are provided to absorb the excess energy. One electrode is a steel cone, dipping into the water and capable of being raised or lowered by a hand winch and cable; the other is an iron plate at the bottom of the canal and grounded to a copper plate bedded in the earth outside. The power-dissipating capacity of a rheostat is adjusted by varying the distance between cone and iron plate. The cones are connected through circuit breakers to the generator bus.

Action is made automatic by a group of relays, switches, current transformers, etc., so connected as to give the following action: When the returned power reaches 300 kv.-a., the relays and switches connect one pair of the electrodes on the bus. As soon as the returned power exceeds the capacity of one rheostat by 300 kv.-a., a sec-

and relay throws on the second pair of electrodes. The difference between the amount of returned power and the full capacity of the rheostats in service is furnished by the generator.

With two rheostats in service when the excess returned power drops to 2000 kv.-a., one set of the relays and switches disconnects one rheostat. The other remains on the 11,000-volt bus until the excess returned power drops to zero; then all of the rheostat load is carried by the generator and the second relay cuts the electrodes off the line.

TRANSMISSION AND DISTRIBUTION

Single-phase power is transmitted from the generating station to the substations along the line at 4400 volts and 25 cycles. There are two single-phase, high-tension lines the length of the section, comprising four No. 00 seven-strand hard-drawn copper cables. The wires are carried on the extensions of the catenary-bridge poles, except at the tunnels, where the transmission line goes over the summit on chestnut poles. A 3/8-in. steel ground wire is carried along the pole tops. The high-tension insulators are of a four-petticoat pin type giving a 165,000-volt dry flashover test and an ultimate mechanical strength of 4000 lb. at right angles to the pin.

All cross-arms are connected to a ground wire, which is connected to a copper plate at the base of every fourth pole. The high-tension lines are sectionalized at each substation by air-break switches on the roof.

Step-down transformers in the substations are connected to a bus, one side of which is grounded and connected to the running rails and the other side of which is connected to feeders which run to the contact system.

SUBSTATIONS

Brick substation buildings, housing the step-down transformers and switching equipment, are located at various points along the line (as shown in the map of the electrified section in the first article, June 17, p. 1192), except at West Vivian, where outdoor type of equipment is used because of the necessity of moving the substation when the electric-traction system is extended. One substation is located in the transformer house of the generating station, instead of feeding directly from the generator bus, on account of the greater short-circuit disturbances with direct feeders. The location and equipment of substations are summarized in the following table:

Substation	Miles from Power Station	Transformer Units, Kv.-A.	Total Capacity, Kv.-A.
Bluefield	E. 10	2-3000	6,000
Bluestone	0	2-2000	4,000
Maybeury	W. 5	2-5000	10,000
North Fork	W. 13	2-3000	6,000
Vivian	W. 18	1-2000	2,000
			28,000

The circuit-breakers in the substations cutting off current from the trolley wires are remote-controlled and are operated from adjacent signal towers or passenger stations. The substations therefore have no attendants.

The transformers are of a single-phase oil-insulated water-cooled type, water being obtained from a company pipe line. A portable transformer oil filter is provided for the substations, being transferred from one to another as required. In each substation is a 16-ton chain hoist for lifting cores out of the casing.

EQUIPMENT AND ENGINEERING

The heavy electrical equipment was designed and built by the Westinghouse Electric & Manufacturing Co., cooling pond by the Spray Engineering Co., power-house wire and cables, track bonds and oil filters by the General Electric Co., insulators and fittings by the Locke Insulator Manufacturing Co., steel cable and steel trolley wire by John Roebling's Sons Co., copper-alloy ("phono-electric") trolley wire by the Bridgeport Brass Co., copper trolley wire by the Standard Underground Cable Co., catenary-bridge poles by the National Tube Co., catenary structural steel by the Virginia Bridge & Iron Co., steel castings by the Fort Pitt Steel Castings Co. and the Standard Steel Works Co., malleable-iron catenary fittings by the Malleable Iron Fittings Co.

The entire installation was designed in all its details by Gibbs & Hill, of New York City, as the railroad's consulting engineers. The construction, except for some of the buildings and their equipment, was by a specially organized railway force under the direction of the engineers.

News of the Engineering World

Debris-Obstructing Bridge Seized by the Sheriff

During recent high water in the Kansas River the attorney for the Kaw Valley Drainage Board obtained instructions from the Governor of Missouri to the effect that the local sheriff should seize the bridge of the Kansas City Southern R.R. Co., which spans the river at Ohio Avenue, Kansas City, Mo. This bridge is 6½ ft. below the top of the levee, measured from its present lowest point of span, and is approximately 130 ft. short, the west abutment being entirely within the present bed of the channel as defined by the harbor lines.

This 130-ft. space is bridged by a timber trestle, which during high water collects much drift, as do also the three piers of the bridge. The drainage board's requirements are that bridges shall have not more than two piers in the channel, that the abutments shall be behind the harbor lines, and that the lowest point of span shall be as high as the adjacent levee grade.

The governor claimed authority for his act the fact that all navigable streams are under Federal jurisdiction, which is also vested in the drainage district in the event of there being any obstructions placed in the river, if these obstructions constitute a menace to life and property of the land owners in the district. The sheriff was ordered to turn this bridge over to the board of directors of the drainage district, who intended, in the event that the water rose to the lower girders, to remove the trestle at the west end of the bridge. This was done

on the afternoon of June 19, when the water was only 2 ft. below the structure.

There are only three bridges within the Kaw Valley Drainage District at the present time which fail to comply with requirements. These are the Kansas City Terminal, the Kansas City Southern Ry. and the Chicago Great Western R.R. bridges. These three companies are fighting the drainage board over the reconstruction of their bridges.

⁂

A Twin Highway Tunnel for Allegheny Co., Pennsylvania

Bids for a twin highway tunnel 4875 ft. long, with each finished tube 24 ft. wide and 18 ft. high, are to be received on July 12 by the county commissioners of Allegheny County, Pennsylvania. With the approaches, the total length of the improvement will be 5800 ft. The tunnel will be through shale. Its side walls will be of concrete. For the arch lining bids are asked on monolithic concrete, concrete blocks and brick. There will be a brick-paved roadway on a sand cushion and concrete foundation, two steel-bound concrete curbs and gutters, one brick sidewalk, and various drains, water pipe, and wire conduits in each tube. The improvement will extend from East Carson St. near Third St. in a southerly direction beneath Mt. Washington to Warrington Ave. near Boggs Ave., all within the City of Pittsburgh. It will provide direct highway connection with the business center for a section of the city which has had railway facilities for ten years. The county commissioners have authority to make a contract for running street-railway cars through the tunnel, but no steps to that end have yet been taken. It is purposed to ventilate the tunnel by blowing air into one end, after plans by Charles S. Churchill, assistant to the president of the Norfolk & Western R.R., Roanoke, Va. A. D. Neeld, 237 Fourth Ave., Pittsburgh, is Consulting Engineer for the County of Allegheny; Hyatt M. Cribbs is county controller.

⁂

Collapse of Arch Falsework, Detroit-Superior Bridge, Cleveland

On June 17 the steel arch forming the centering for the north inner rib of span 8 of the Detroit-Superior high-level bridge at Cleveland, Ohio, collapsed when 14 men were on it placing lagging for the concrete arch-rib. One man, the carpenter foreman, was killed and nine others were injured. The material damage was confined to the centering itself and to a minor scarring of the pier where the steelwork hit it in falling.

The Detroit-Superior bridge, described in ENGINEERING NEWS, June 18, 1914, p. 1348, comprises 12 concrete arches and one steel arch carrying a double-deck roadway over a total length of 2880 ft. The concrete arches are in four ribs, and their construction, now under way, is being carried out on two sets of three-hinged steel arches, one under each of two adjacent ribs. These steel arches rest on timber bents built close up to the piers, and are slid along the bents from one set of two arches to the opposite set. The thrust of the steel arches is taken by steel cables tying the end pins together.

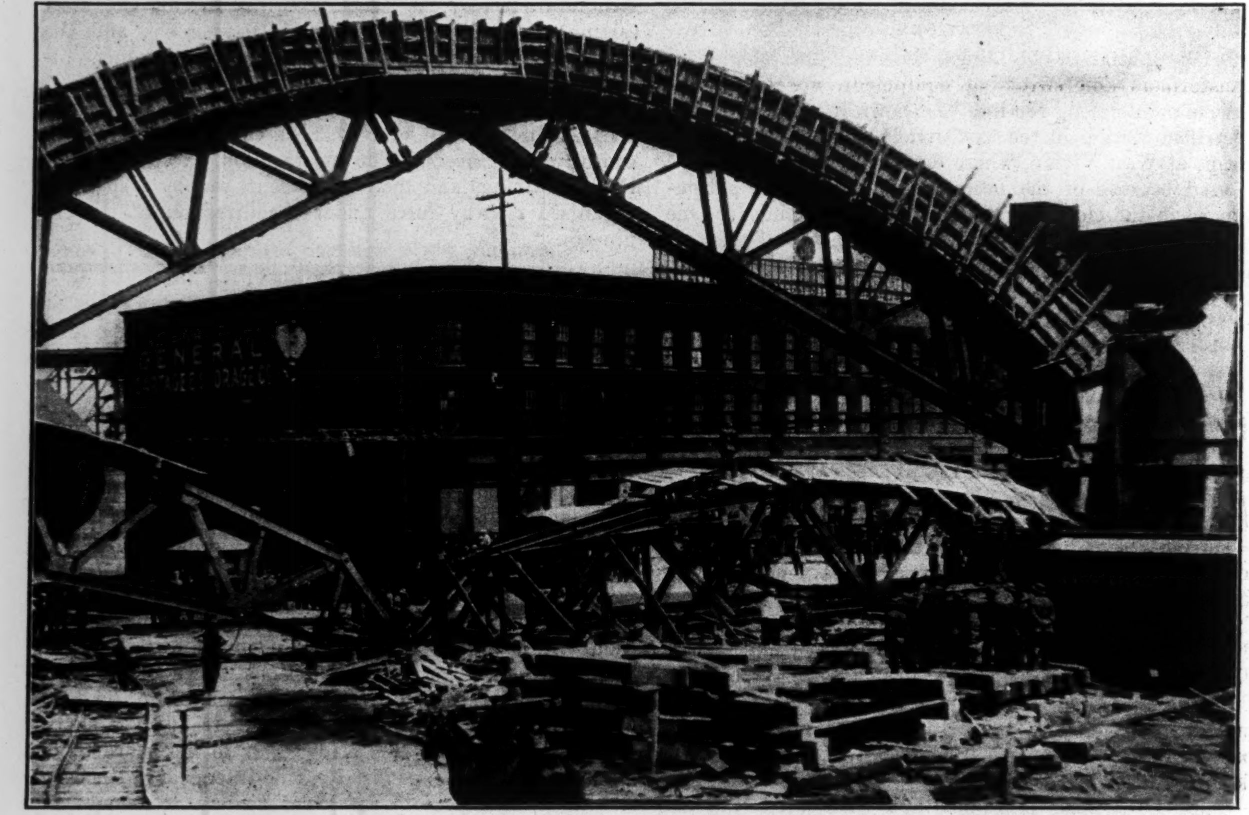

FIG. 1. SPAN NO. 8, DETROIT-SUPERIOR BRIDGE AFTER COLLAPSE OF ARCH CENTERING

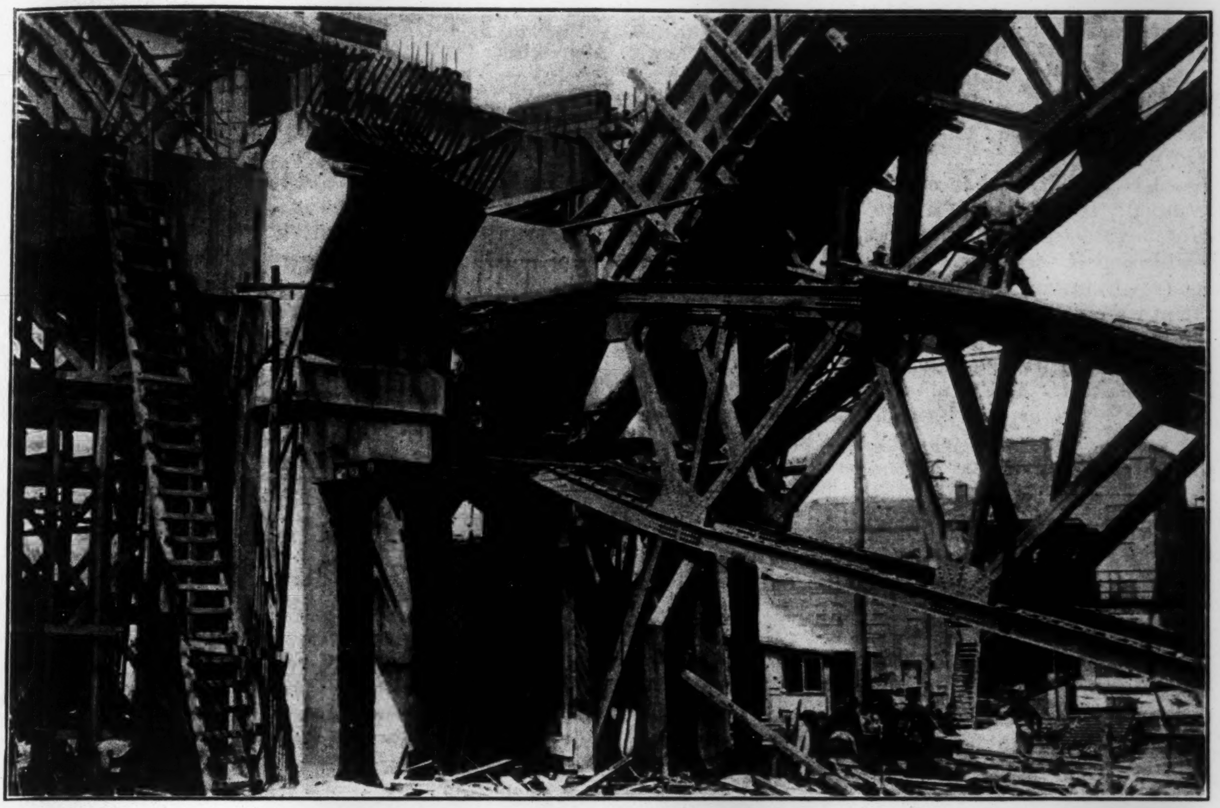

FIG. 2. NEAR VIEW OF COLLAPSED CENTERING

The concrete arch where the collapse occurred is 144 ft. 4½ in. long, and the span of the steel centering is 133 ft. c. to c. of end pins. The crown lagging was 60 ft. above the street. The collapse of the centers was caused by the breaking of two 1⅛-in. plow-steel cables tying the end pins together. The break took place when the centering was being moved along the supporting bents.

Fig. 1 shows the centering arches in place for the north outer rib and, in the foreground, the collapsed north inner rib. Fig. 2 shows the west leaf of the rib after failure. The haunch of this rib was forced against the concrete pier and in falling turned about the runway as a fulcrum, forcing the top chord against the transverse arch of the pier and chipping off a small piece of concrete. The 12x12-in. sticks on the supporting runway were all broken.

The bridge is being built for Cuyahoga County, Ohio, by the Hunkin-Conkey Construction Co. W. A. Stinchcomb is County Engineer and A. W. Zesiger is Bridge Engineer.

⁂

Another "Final" Decision on Flat-Slab Floor Patents

The United States District Court for the District of Minnesota on June 9, 1915, issued a decree providing for a perpetual injunction restraining C. A. P. Turner, of Minneapolis, Minn., from using his so-called "mushroom" flat-slab reinforced-concrete floor design, as described in his patents Nos. 985,119 and 1,003,384, which are ruled to be infringements of the Norcross patent No. 698,542. This injunction follows the decree of infringement handed down against Turner in favor of John L. Drum by the United States Circuit of Appeals, Eighth District, on Dec. 10, 1914 (ENGINEERING NEWS, Jan. 14, 1915, p. 91). A petition for a writ of certiorari was presented by Mr. Turner to the United States Supreme Court, but was denied on June 1, 1915.

The Norcross patent is now owned by the Flat Slab Products Co., McCormick Building, Chicago, Ill. This company has announced that it will license all who wish to design flat-slab buildings, charging a license fee of 1c. per sq.ft. of floor area, with a reduction for large areas used in one year.

Mr. Turner claims that the decision is still not final, inasmuch as the Norcross patent for a flat-slab floor is good only for steel reinforcement at the bottom of the slab. He admits that while he is enjoined from the use of direct and diagonal belts cob-piled over the column, the owners of the Norcross patent cannot build flat-slab floors without raising the steel to the top of the slab over supports, in which case, he contends, they infringe some of his patents which are still in litigation.

⁂

Opening Rapid-Transit Extensions in New York City

The first units of the new rapid-transit facilities in New York City have been opened for service. On June 22 the Fourth Ave. subway from Manhattan to Coney Island, via the Manhattan Bridge (see ENGINEERING NEWS, Oct. 1, 1914, p. 665), was put into regular service by the Brooklyn Rapid Transit Co. On the same day the Belmont or Steinway tunnel under the Harlem River was opened by the Interborough Rapid Transit

Co. for traffic between East 42nd St., Manhattan, and Long Island City, with transfers to the existing subway.

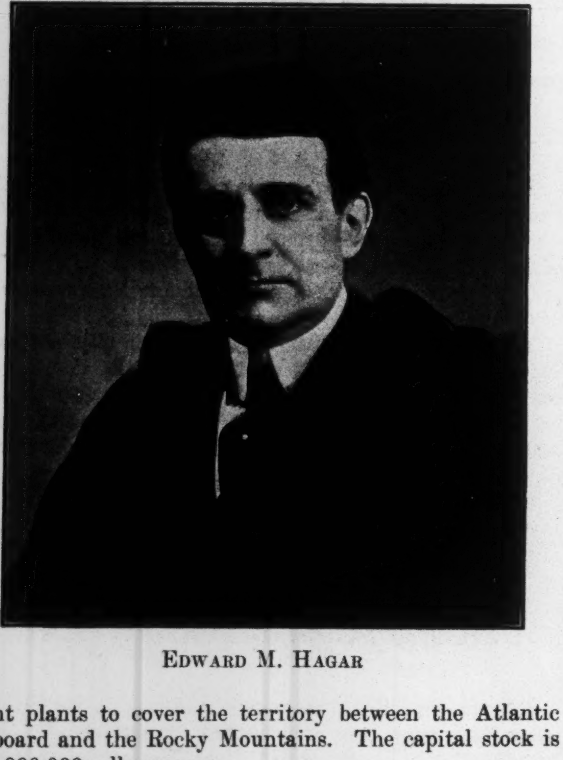
The Belmont tunnel is an old two-track project started in 1905. The tunnel was completed in 1907 (see ENGINEERING NEWS, Sept. 26, 1907, p. 348), but had never been used because of franchise litigation. It was purchased by the city and incorporated in the dual system. Eventually it will extend back to Times Square and forward to the east end of the Queensboro Bridge, whence it will connect with elevated lines to Astoria and Flushing (see ENGINEERING NEWS, Oct. 1, 1914, p. 666).

Until the Long Island connections are completed temporary service will be given with shuttle trains. At the Manhattan end passengers will be brought to the surface by an escalator. Twelve all-steel motor cars of the type used in the subway have been purchased for operation in the tunnel. Under the opening schedule there will be three trains of four cars each, operating on a headway of from four to five minutes.

⁂

A New $20,000,000 Cement Company

On June 9 a charter was issued under the laws of the State of Maine incorporating the Hagar Portland Cement Co., projected by Edward M. Hagar, Assoc. M. Am. Soc. C. E., who lately resigned the presidency of the Universal Portland Cement Co., Chicago, Ill., for the purpose of organizing a company to acquire and operate a chain of cement plants to cover the territory between the Atlantic seaboard and the Rocky Mountains. The capital stock is $20,000,000, all common.



EDWARD M. HAGAR

President Hagar announces the following officers of the new company: Morris Metcalf, Vice-President; B. H. Rader, Vice-President and Sales Manager; Gordon Wilson, Secretary and in charge of Cost Accounting; Leonard Wesson, Assistant to President in Operation and Construction; J. P. Beck, Assistant to President in Exte sion Work; C. W. Lyon, Engineer of Economies; J. I Barbazette, Superintendent of Construction. Pendi the election of a permanent Treasurer, the office will l filled by Gordon Wilson. The general offices of the com pany are located at 208 South La Salle St., Chicago.

Mr. Hagar is a graduate of the Massachusetts Institut of Technology of the class of 1893. He took a Maste Degree at Cornell University in '94. Shortly afterward he organized the firm of Edward M. Hagar & Co., in Chicago, which acted as agents for manufacturers of machinery. In 1899 he was appointed Manager of the C ment Department of the Illinois Steel Co. The steel company manufactured "Universal" portland cement until 1906, when the Universal Portland Cement Co. was formed with Mr. Hagar as President. He resigned the presidency of the Universal Portland Cement Co. in February of the present year.

⁂

Elimination of Garbage-Reduction Odors

A report on the elimination of odors from the Barren Island garbage-reduction works and two nearby plants, all taking garbage and dead animals from New York City, has been made by Irwin S. Osborn, Consulting Engineer of Toronto, Ont. (For copies, address Department of Street Cleaning, Municipal Building, New York City.) Complaints from residents near these plants led to the appointment of an investigating committee of city officials, citizens and representatives of the contractors. The committee engaged Mr. Osborn to study the problem in coöperation with Otto H. Klein, director of the Central Testing Laboratory. Mr. Osborn found that the equipment and operation of the plants were not such as to prevent odors. He recommends that measures be taken to prevent leakages of gases from the digesters and dryers; that condensers and scrubbers be improved, and in some cases enlarged; that more water and pumps be supplied for condensing and scrubbing; that the water used at the garbage-reduction works be metered; and that the city should thoroughly inspect the operation of the plants. The ENGINEERING NEWS is informed by John T. Fetherston, Commissioner of Street Cleaning, that the New York Disposal Corporation, which holds the contract for garbage disposal, is proceeding with the installation of new apparatus.

⁂

A Separate Sewerage System for Stockton, Calif., was authorized on June 15, when the people voted $350,000 for sanitary and $200,000 for storm sewers. D. J. O'Keefe is Commissioner of Public Works and George W. Pulich is City Clerk.

The Reconstruction of the Ohio River Bridge of the Cincinnati Southern Ry. at Cincinnati, Ohio, is under consideration, the general project being to erect a new and heavier superstructure on the present piers. The bridge is 3822 ft. long, including approaches. It has a 519-ft. channel span, two 300-ft. spans, and a 370-ft. drawspan, while the north approach has truss spans of 118 to 190 ft. It was built in 1877 by the Keystone Bridge Co., to the designs of J. H. Linville.

The Battleship "Arizona" was launched at the New York Navy Yard, Brooklyn, N. Y., on June 19. The arrangements were perfect. The 50,000 people admitted to the yard were in designated places. There were no cases of accident or sickness, though hospital provisions were complete. The vessel slid down the ways smoothly and took the water easily. The keel of the "Arizona" was laid Mar. 16, 1914. At the time of launching she was about 65 per cent. complete and weighed 13,000 tons. There was an added moving weight of 500 tons in sliding ways, cradle and timbers. The speed of the ship on entering the water was about 15 mi. per hr. This is the fourth vessel built at the New York Navy Yard and the third in the United States Navy to bear the name "Arizona." It is 608 ft. long overall and 97 ft. in breadth, and will have a displacement or 31,400 tons. She will use oil fuel only and will have 34,000 hp. in Parsons-type turbines Four propellers will give a speed of 21 knots. She will carry twelve 14-in. rifles and twenty-two 5-in. rapid-fire guns, two 3-in. field pieces and four aëroplane guns. The crew will number 927, besides 53 officers.

PERSONALS

Mr. Elwood N. Layfield, M. Am. Soc. C. E., of Chicago, Ill., has been appointed Assistant Secretary of the Western Society of Engineers.

Mr. Ben K. Curtis has resigned as City Engineer of Cañon City, Colo. Mr James Bunten, County Surveyor, has been elected to fill the vacancy.

Mr. Alger C. Gildersleeve, Assoc. Am. Soc. C. E., of New York City, has been appointed Secretary of the Chamber of Commerce of Bayonne, N. J.

Prof. Arthur N. Talbot, M. Am. Soc. C. E., of the University of Illinois, was given the degree of Doctor of Science by the University of Pennsylvania on June 16.

Mr. Thomas L. Fountain, Assoc. M. Am. Soc. C. E., of the Fountain-Shaw Engineering Co., of Dallas, Tex., has been appointed Engineer of Sewers of the City of Dallas.

Maj.-Gen. George Washington Goethals, M. Am. Soc. C. E., had his long list of doctors' degrees added to on June 15, when Princeton University conferred on him the honorary degree of Doctor of Laws.

Mr. Charles J. Hogue, Assoc. M. Am. Soc., C. E., formerly connected with the Cumberland & Pennsylvania R.R., has been elected President of Brownworth & Co., Constructing Structural Engineers, of Philadelphia, Penn.

Mr. W. C. Irwin, formerly of the Engineering Department, of St. Louis, Mo., has been appointed District Representative in St. Louis, of the Kalamazoo Railway Supply Co., of Kalamazoo, Mich. His office will be at 304 Frisco Bldg., St. Louis.

Mr. Daniel B. Sayer, Assoc. M. Am. Soc C. E., formerly of the firm of Major & Sayer, Civil and Contracting Engineers, of Wellsville, N. Y., has opened an office in Wellsville, where he will continue the practice of civil and contracting engineering.

Mr. Stewart M. Marshall, M. Am. Soc. M. E., formerly Chief Engineer of the Cambria Steel Co. at Johnstown, Penn., is now associated with the Southwark Foundry & Machine Co., of Philadelphia, as Manager of its turbine and centrifugal-pump departments.

Mr. Claude L. James, for several years City Engineer of Mattoon, Ill., has been appointed Superintendent of Water Works. He will continue to carry on a private practice as a consulting engineer. Mr. John A. Goetz will succeed Mr. James as City Engineer.

Mr. Charles S. Bilyeu, Assoc. M. Am. Soc. C. E., formerly New York Representative of Colby & Christie, Inspecting Engineers of Philadelphia, is now general manager of the inspection business of Hildreth & Co., Consulting and Inspecting Engineers, of 15 Broad St., New York City.

Mr. David F. Crawford, M. Am. Soc. M. E., Superintendent of Motive Power of the Pennsylvania Lines West of Pittsburgh, and, during the past year, President of the Master Car Builders' Association, received the degree of Doctor of Engineering from the State University of Kentucky last week.

Mr. D. L. Yarnell, Assoc. M. Am. Soc. C. E., who has been in charge of the local office of Drainage Investigations of the U. S. Department of Agriculture at Richmond, Va., has been transferred to the Office of Public Roads and Rural Engineering, 515 14th St., N. W., Washington, D. C. The Richmond office has been discontinued, but Mr. Yarnell will continue to conduct the work at the above address.

Mr. Julian M. Bamberger, formerly Vice-President of the Salt Lake & Ogden Ry., has been elected President and General Manager, to succeed his father, Mr. Simon Bamberger, who recently resigned. Mr. Bamberger's headquarters will be at Salt Lake City, Utah Mr. J. B. Bean, formerly Secretary and Treasurer, has been elected Vive-President and Treasurer. Mr. E. J. Vail has been elected Secretary.

Mr. Charles McHercher, formerly Assistant Engineer of the Cuba R.R. Co., has accepted a position as Engineer with the Dibert, Bancroft & Ross Co., Ltd., of New Orleans and Camagüey, Cuba. Mr. McKercher will be in charge of the engineering of the company, which is building three mills on the island, and will also have charge of railroad location and construction for the development of the company's plantation in the Province of Camagüey, Cuba.

Mr. Edward F. Murphy, Division Engineer in Charge of Sewer Service of the Public Works Department of Boston, Mass., has been appointed Commissioner of Public Works, to fill the vacancy caused by the resignation of Mr. L. K. Rourke, M. Am. Soc. C. E. Mr. Murphy has been in the service of the city since 1887, rising through the grades of rodman, transitman, assistant engineer and district engineer, and finally division engineer. In his new position he will receive a yearly salary of $9000.

OBITUARY

James Everett Allen, Superintendent of the Street and Sewer Department of South Orange, N. J., died at his home in that city on June 16, in his 65th year.

Charles L. Haydock, Assistant Engineer at St. Louis, Mo., of the Missouri Pacific Ry., was drowned recently at Leavenworth Junction, on the Missouri River, while superintending the making of willow mattresses to prevent the river from undermining the tracks. He was 31 years of age.

Lieut.-Col. Charles E. Woodruff, Medical Corps, U. S. A., a well known sanitarian and authority on tropical diseases, died at his home in New Rochelle, N. Y., on June 13. He was the author of "The Effect of Tropical Light on White Men" and "Expansion of the Races." After his retirement, in 1913, on account of disability due to his service in tropical countries, Col. Woodruff served for a time as Chief Health Officer of New Rochelle.

Sir Nathaniel Barnaby, Honorary Vice-President of the Institution of Naval Architects, died on June 15 at London, England, at 86 years of age. He was long and widely known as a naval designer and author of several works on shipbuilding. He was Admiralty Overseer during the building of the royal ships "Viper" and "Wrangler" and was subsequently employed in the designing offices of the Admiralty at Somerset House. For a long period of years he was Head of the Designing and Building Departments of the Controllers of the British Navy. He designed the battleship "Inflexible." He was born at Chatham and educated at that place and at Sheerness and Portsmouth.

Brig.-Gen. Charles Julius Allen, U. S. A., retired, died at Asheville, N. C., on June 15, at 75 years of age. Gen. Allen was born at Buffalo, N. Y., and was a graduate of West Point. At the beginning of the Civil War he was assigned as First Lieutenant of Engineers, and was brevetted Captain in August, 1864. He won the rank of Major in March of the following year, and was Chief Engineer of the Army of Observation on the Rio Grande. After the war he was detailed on fortifications and harbor and river improvements, and during the Spanish-American War was stationed at Washington, D. C., in charge of defenses there. In 1904 he became Brigadier-General, and at that time retired, at his own request, after 40 years of service.

ENGINEERING SOCIETIES

COMING MEETINGS

OHIO SOCIETY OF MECHANICAL, ELECTRICAL AND STEAM ENGINEERS.
June 17 and 18. Semi-annual meeting at Toledo. Secy., Frank E. Sanborn, Ohio State University, Columbus.

SOCIETY FOR THE PROMOTION OF ENGINEERING EDUCATION.
June 22-25. Annual meeting at Iowa State College, Ames, Iowa. Secy., F. L. Bishop, University of Pittsburgh, Pittsburgh, Penn.

AMERICAN SOCIETY OF MECHANICAL ENGINEERS.
June 22-25. Summer meeting at Buffalo, N. Y. Secy., Calvin W. Rice, 29 West 39th St., New York City.

AMERICAN SOCIETY FOR TESTING MATERIALS.
June 22-26. Annual meeting in Atlantic City. Secy., Edgar Marburg, University of Pennsylvania, Philadelphia, Penn.

AMERICAN INSTITUTE OF CHEMICAL ENGINEERS.
Aug. 16-18 and 25-28. Annual meeting in Los Angeles, Calif., Aug. 16-18; in San Francisco, Aug. 25-28. Secy., J. C. Olsen, Cooper Union, New York City.

INTERNATIONAL ASSOCIATION OF MUNICIPAL ELECTRICIANS.
Aug. 24-27. Annual convention in Cincinnati. Secy., Clarence R. George, Houston, Tex.

American Electric Railway Association—The headquarters of the American Electric Railway Association have been removed from 29 West 39th St., New York City, to 8 West 40th St. The secretary is E. W. Burritt.

New England Water Works Association—President Metcalf has appointed the following convention committee to arrange the details of the annual meeting: Alfred D. Flinn, chairman; W. W. Brush, F. F. Langley, H. B. Mocher, Fred S. Bates, and Charles W. Sherman. The convention will be held Sept. 7 to 9, in New York City, at the Waldorf-Astoria Hotel.

American Association of Landscape Architects—The Minneapolis Chapter has volunteered to submit to the City of Minneapolis sketch plans and specifications for a Minneapolis-Minnetonka driveway, which, it is stated, can be made one of the most beautiful in the world. Lake Minnetonka is about 12 mi. from Minneapolis and because of its broken character has a shore line of 100 mi.

Southwestern Water Works Association—The fourth annual convention was held at Galveston, Tex., June 14 to 16. About a dozen papers were read. A resolution granting associate members (supply men) the full privileges of the association was adopted. Action on the proposed constitution and by-laws submitted by L. H. Gray, of Lufkin, Tex., was postponed until 1916. Jesse Shaw, of Topeka, Kan., was elected president. The next convention will be held at Waco, Tex. E. L. Fulkerson, of Waco, Tex., is secretary and treasurer of the association.

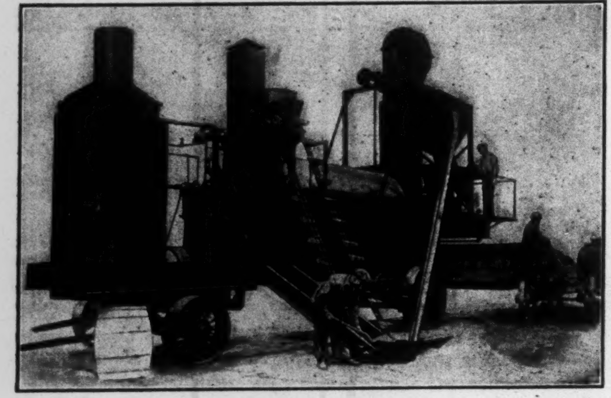
Boston Society of Civil Engineers—The Joint Field Day at Pemberton, Mass., of the New England Water Works Association and the Boston Society of Civil Engineers was held on June 16, as scheduled. After luncheon at the Pemberton Inn, the water-works association held a business meeting, at which 81 active and 3 associate members were admitted. The unusually large number of applicants was partly due to the recent action of the association in remitting entrance fees to members of the American Water Works Association. After the luncheon a baseball game was played by teams from the two societies, with James W. Rollins and William S. Johnson as umpires. We have not yet been informed as to the score.

Appliances and Materials

Barber Portable Asphalt Plant

The new portable asphalt-mixing plant shown in the accompanying view has just been put out by the Iroquois Works of the Barber Asphalt Paving Co., Buffalo. It has a capacity of 800 sq.yd. of 2-in. sheet topping per 10-hr. day; its capacity for asphalt concrete or macadam is much larger. The plant is designed especially to meet the requirements of contractors and municipalities having new construction and maintenance work to perform in scattered territory or in an amount insufficient to make a stationary plant economical.

The mixing platform is elevated so that a wagon can be driven under it to load. The platform is arranged for one-man operation, the levers for controlling clutches, etc., being within easy reach. The mixer is a two-shaft, pugmill type, with removable side and end liners. It is provided with two full sets of blades, the binder blades being solid manganese-steel. The sand-measuring box and asphalt bucket are supported on scales. A special drying drum has been designed for this unit to insure a sufficient amount of heated sand and stone. There are removable steel wearing plates in the material chutes and chilled rims for all chain sprockets.



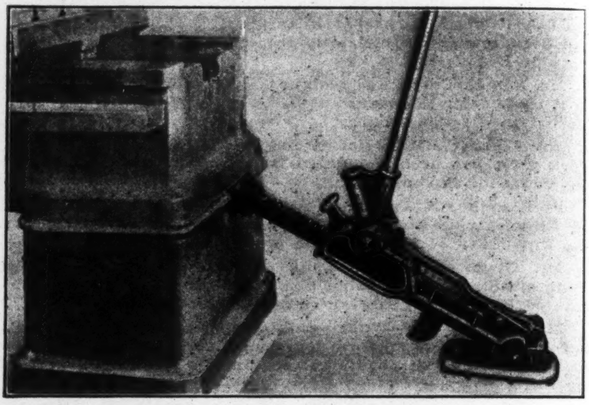
Portable Asphalt Plant

The paving plant having one of these machines would be operated as two units, the second unit being the asphalt kettle. The mixing unit can be supplied, however, without boiler and engine, so that the contractor or municipality already provided with portable boiler, engine and kettles can secure the mixing plant without duplicating that equipment.

* * *

Another Adjustable Jack

A jack with an adjustable base has recently been put out by Templeton, Kenly & Co., of Chicago, for use where pushing or lifting, or both, are required. As shown, the frame is a heavy ribbed malleable-iron casting. The base is broad and toothed on the under side. The frame bears on the base through two-faced circular shoulders and the pin carries no load. The rack bar and cap are forgings.

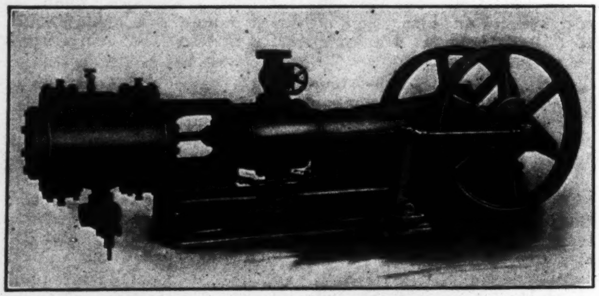


Lifting and Pushing Jack

* * *

New Small Air Compressor

A new design of small air compressor, shown in the accompanying view, has been brought out by the Ingersoll-Rand Co., 11 Broadway, New York City, in response to a demand for small machines of greater efficiency. The new type resembles the company's older small machines, but has such improvements as the Rogler thin-spring air valves, balanced-piston steam valves (for either low or high pressures and superheat), automatic steam cutoff with centrifugal flywheel governor, splash lubrication, air unloader, inclosed construction with removable covers.



New Small Air Compressor

* * *

Sewage-Ejector System

An ejector system for clearing sewage sumps or tanks in which any liquids have accumulated is being made by James Beggs & Co., 36 Warren St., New York City. The familiar scheme is employed of having a large chamber with inlet and outlet check valves on the bottom and inside a float controlling the admission of air above the liquid. In this design the float operates an electric switch which controls a solenoid-thrown air valve and connects the chamber alternately with the compressed air supply and the atmosphere.

Construction News

★Denotes work advertised in ENGINEERING NEWS.
✚Denotes contract awarded. The names of bidders awarded contracts are set in CAPITALS.

THE CONTRACTOR AND THE NEW YEAR

The outlook for work in the New Year is far brighter than was thought possible three months ago. There will be quite as much money, or nearly as much, spent for real improvements, where there is actual work of an economically profitable nature to be done, as before, but less will be spent for expensive residences, extravagant railway stations, and public buildings. It is probable that the automobile expenditures will be on a reduced scale, even though the number of cars bought will be greater.

Local financial interests in almost every community east of the Mississippi River and north of the Ohio, will be able to finance the improvements in their immediate vicinity. In many communities outside this restricted area they will likewise be able to, but it is evident that each locality must be more or less self supporting; they will have to secure the coöperation of their own banks and insurance companies, as well as private investors, to take their loans, rather than try to market everything in New York or Chicago.

Financial conditions steadily improve. Some sales of municipal bonds have been made on a basis of 4.30 per cent., which is very attractive. The total sales of municipal bonds in 1914 aggregated more than $450,000,000, an increase of 13 per cent. compared with the previous year, which also established a new high record. Finances of the country are in excellent shape, and the return from municipal bonds is so large that they will be more generally purchased by the class of investors who formerly put their money into less safe propositions.

Prices of supplies are low. A recent advance of a dollar per ton in steel products may mark the turning point from the extreme low level, but it seems unlikely at this time. Cast-iron pipe is undeniably cheap, and much buying has been induced by the low quotations offered. Metals show little change from a month ago, and have not been active. Copper is not low enough to induce buying, and other metals enter into engineering construction in a limited way, that price has no effect.

The railroad rate decision probably granted the carrier as much gain as any of the railway presidents expected. The railways continue to have a hard time of it, because of light traffic, and, perhaps, imprudent expenditures in the past.

The decision handed down the last day of the year by the Appellate Division of the State of New York which declared the Alien Labor clause unconstitutional, was a victory for contractors. Subway work in New York can now go forward.

More attention will be paid to navigation, the building of docks, and work in shipyards, this year than there has been in the last. The policy of extending trade to foreign lands does not affect the contractor much, but it has a sympathetic effect in that anything which increases the business of the country makes for the welfare of the contractor, and in 1915 there will be a gradual though slow expansion of foreign trade.

A loan to the city of Montreal and one of $15,000,000 to Argentina mean much to American manufacturers, and may result in more American capital going into foreign lands.

The leading manufacturers of cement have dropped their quotations to meet the price of the smaller operators. New quotations represent a decline of approximately 16 cents per barrel from those previously current. These, however, were not strictly adhered to.

LABOR

More studied efforts are being made by men accustomed to large operations to take care of the unemployed than ever before. The efforts are resulting in fewer clashes between employees and the police in New York. The announcement that the U. S. Steel Corporation would not reduce wages is taken as an indication that there will be no general wage reduction. A decision was handed down that the Alien Labor law in New York was unconstitutional. This disposes of a case which, for a short time, caused much furor in New York.

CEMENT, LIME AND BRICK

Portland Cement—The leading makers of cement in the East, last week, reduced their price to conform to that of the smaller dealers. This reduction amounts to about 16c. in the East and 8c. in the West. It is believed that the low prices will be short lived. This represents a quotation of 75c. per bbl. in bulk at the mill.

The preliminary estimate of the production of Portland cement in 1914 indicates a falling off of about 4%, the first reduction in output since the industry was established. It is figured that the total production of portland cement in the United States was 88,514,000 bbl. in 1914, compared with 92,097,000 in the previous year. Stocks at the end of 1914 were figured at 12,818,000 bbl., compared with 11,220,000 at the end of 1913. This increase is specially large, amounting to 14%.

The quotations given below do not include the charge of 40 cents made for bags, but are for barrels of cement delivered at the points named, in cloth sacks less their charge:

Chicago	$1.02	Boston	$1.66
Detroit	1.14	Cleveland	1.23
Jersey City	94	Duluth	1.33
New York	1.02	Minneapolis	1.25
St. Paul	1.25	Pittsburgh	1.00

Lime—Business continues quiet and prices are unchanged; 97c. per barrel for state common, 200 lb. net; $1.37 for 300 lb. barrel; $1.55 for 300 lb. finishing; $1.10 for 200 lb. finishing; and $1.72 for 350 lb.

Brick—Prices are lower and Hudson River common brick can be had at $5 New York.

IRON AND STEEL

Pig Iron—Better business was the rule during December. Some fair buying occurred, especially in the West. The Buffalo furnaces were fairly well cleaned up, as far as the low-priced iron went. A feature of the month's business was the inability of Birmingham producers to maintain a $10 quotation for No. 2 Southern Foundry. In Cincinnati prices went off slightly, but in New York there was an advance. In Chicago likewise prices are slightly higher than they were Dec. 1. It is evident that several additional furnaces will go in blast this month, but the net gain in production is problematical. The pig-iron output is about 50% of normal, and for December will not be far from 1,500,000 tons. The buying movement, which was fair, was not of the broad character which so often marks the depth of depression.

Quotations for pig-iron in lots of 100 tons or over at the points named are as follows: Cincinnati: Southern Foundry No. 2, $12.50 to $13; Northern Foundry No. 2, $14 to $14.50; Northern Foundry No. 3, $13.75 to $14.

In New York, iron is quoted as follows: No. 2-X Northern Foundry, $14.25 to $14.50; No. 2 plain Northern Foundry, $14 to $14,25; No. 2 Southern Foundry, delivered tidewater, N. Y., $14 to $14.25.

In Birmingham, Southern Foundry No. 2 is $9.50 to $9.75. Several sales have been made at the latter figure. In Chicago, Northern Foundry No. 2 is $12.75 to $13.25. In Pittsburgh, bessemer iron is $14.70 and basic $13.45. This includes the 95-cent freight rate from the Valley to the Pittsburgh District.

Steel Rails—The buying of rails was more active in December than in any month of the last half of the year, but even this was nothing to boast about. The New York Central placed a contract for a fair lot, and it is evident that the other trunk lines will buy about 50% of their normal requirement. American mills had very little hope of getting the 30,000 tons of rails wanted in Norway, and consequently were not disappointed when the order was placed with German mills. In the South American trade and Asiatic business, however, there is quite a little likelihood of a change, and considerable steel will be shipped to Siberia by way of the Panama Canal in the spring. It is believed that the Pennsylvania will buy 200,000 tons this year, and the Baltimore & Ohio is reported to be negotiating for 40,000 tons. A feature of the present market is the demand for light rails which has come from rerolling mills, and are selling for about a dollar per ton less. Other quotations are as follows: Standard quotations for lots of 500 tons or over are unchanged. Standard sections of bessemer are $28, and basis $30. These quotations are per net ton f.o.b. Pittsburgh. Girder rails in 30-ft. lengths are $36.40 per gross ton, and in 60-ft. lengths $38.40, both f.o.b. New York. Other prices f.o.b. Pittsburgh for large lots are as follows: Standard sections, $1.25; 25- to 45-lb. sections, $1.15; 16- to 20-lb., $1.20; 12- to 14-lb., $1.25; 8- to 12-lb., $1.30. All of these quotations are per 100 lb. Relaying rails in New York are cheaper at $19 to $19.50 per ton.

Structural Shapes—Reports of the Bridge Builders' Society show that business has not improved to any extent. Fabricating shops are still running about 30% of maximum capacity. Most of the work is small lots. The most interesting piece of news is the advance of a dollar per ton in structural shapes and the announcement that the subway work in New York will go forward without any further hindrance due to the recent decision that the Alien Labor Law was unconstitutional. Prices are stated a dollar per ton higher than last month, and for large lots from mills Pittsburgh are as follows: I-beams, 3 to 15-in.; channels, 3 to 15-in.; angles, 3 to 6-in.; and T's, 3 in. and over, 1.10c. Other quotations are: I-beams over 18-in.; H-beams over 18-in.; channels over 15-in.; angles over 6-in., 1.25c.; T's, 1.20c. Deck beams and bulb angles, 1.45c; handrail T's, 1.90c. Cutting to specified lengths is charged at the following rates: Under 3 ft. to 2 ft. inclusive, 25c. per 100 lb.; 2 ft. to 1 ft. inclusive, 50c.; less than 1 ft., $1.55. No charge is made for cutting into specified lengths over 3 ft. In Chicago the base price is 1.25 to 1.30c. for mill shipment, and for shapes out of warehouse 1.80c. is demanded. In New York the base price is 1.29c.

Cast Iron Pipe—It is generally recognized that prices of cast-iron pipe are unusually low. Business shows more activity, due, doubtless, to the attractive quotations. Most of the buying comes from private water companies, gas companies, and other consumers who are quick to recognize bargains, but there has been a notable increase in buying by municipalities. Boston is again in the market for 4000 tons, having bought a similar lot in November. It is believed that some foreign business will shortly be developed. Operations in the foundries in the Birmingham district have been increased within the last week. The following quotations are per net ton at the points named:

Birmingham, Ala., 4 in., $20; 6-in. and upward, $19.
New York, N. Y., 6 in. and larger, $20 to $20.50.
Chicago, 4-in., $25.50; 6- to 12-in., $23.50; over 12-in., $22.
Gas pipe is $1 per ton higher in all markets.

Plates—The advance from the low quotation of 1.05c. Pittsburgh made on Dec. 30 did not stimulate any trade, but it improved the situation. Inquiries have come up for several boats, mostly tankers, and there is a fair inquiry for plate for water pipe on the Pacific Coast. Railroad business is exceedingly quiet. It is rumored that the Pennsylvania will build several thousand steel gondolas, but most of the railways are content to wait, as they have plenty of rolling stock for the traffic now offering, and can get new stock made up in a very short time. The base price is 1.10c. Pittsburgh, and includes all sizes above ¼ in. For sizes under ¼ in., to and including 2 1/16 in., 1.20c., is paid. In Chicago mill shipments are 1.25c., and for plates from stock 1.75c. to 1.80c. In New York, mill shipments are 1.31c.

Pipe—Business shows more activity. There are several inquiries for line pipe, and while no one expects the trade of last year, it is evident that there will be a fair run of business. Discounts continue without change the following discounts and net prices being repeated from last month:

	Black	Galvanized
¾- to 2-in. steel, butt welded	81%	72½%
2½- to 6-in. steel, lap welded	80%	72½%
7- to 12-in. steel, lap welded	77%	66½%

At these discounts, the net prices of pipe per foot, in large lots, at Pittsburgh are as follows:

	Cents			Cents	
Diameter	Black	Galvanized	Diameter	Black	Galvanized
¾-in.	2.20	3.15	5-in.	29.60	42.20
1-in	3.24	4.67	6-in.	38.40	54.60
1¼-in	4.38	6.30	7-in.	55.00	80.00
1½-in	5.25	7.55	8-in.	57.50	84.00
2-in.	7.05	10.15	9-in.	79.50	$1.16
2½-in.	11.70	16.70	10-in.	95.00	$1.38
3-in.	15.25	21.80	11-in.	$1.06	$1.55
4-in.	21.80	31.00	12-in.	$1.17	$1.70

Sheets—While it is not generally recognized as a sign of improved conditions, it is almost always the case that larger buying of steel products in general is foreshadowed by more activity in the sheet trade. The news that the mills of the corporations are operating at 60% of capacity, and some of the independent mills as high as 75%, will be welcome to those who are looking for an improvement in the trade. Business is fairly active, and there is a disposition to let conditions take their course, and not force a market, as it is recognized that prevailing prices are unusually low.

The following quotations are for large lots of sheets in Pittsburgh and small lots from store, New York.

	Cents per Pound			
	Large lots Pittsburgh		Ware house delivery New York	
	Black	Galv.	Black	Galv
No. 10	1.55	1.90	....	....
No. 12	1.55	2.00	....	....
No. 14	1.60	2.00	....	....
No. 16	1.65	2.15	2.35	2.75
Nos. 18 and 20	1.70	2.30	2.40	2.90
Nos. 22 and 24	1.75	2.45	2.45	3.05
No. 26	1.80	2.60	2.50	3.20
No. 27	1.85	2.75	2.55	3.35
No. 28	1.90	2.90	2.60	3.50

Steel Sheet Piling—Very little business is offering and the base price in Pittsburgh is unchanged, at $1.55 to $1.60.

Steel Shapes—For small lots of iron and steel from jobbers' warehouse in New York. Quotations are $1 per ton higher than last month. The revised prices are given below:

	Cents Per Lb.
Refined iron:	
1 to 1⅞ in., round and square	1.85
1½ to 4 in. x ⅜ to 1 in	1.85
1½ to 4 in. x ¼ to 5/16 in	2.05
Norway bars	3.20
Burdens bar iron	3.15
Soft steel:	
¾ to 3 in., round and square	1.85
1 to 6 in. x ⅜ to 1 in	1.85
1 to 6 in. x ¼ and 5/16	2.00
Rods—⅝ and 11/16 in	1.95
Bands—1½ to 6x3/16 in. to No. 8	2.15
Beams and channels—3 to 15 in	1.90
Angles:	
3 in. x ¼ in. and larger	1.90
3 in. x 3/16 in. and ⅛ in	2.35
1½ to 2¾ in. x 3/16 in. and thicker	2.00
11½ to 2½ in. x ⅛ in	2.10
1 to 1¼ in. x 3/16 in	2.10
1 to 1¼ in. x ⅛ in	2.15
Tees:	
1½ to 2½x¼ in	2.05
1½ to 2½x3/16 in	2.15
3 in. and larger	1.95

Freight Rates via Panama—The ocean freight market is very uncertain. It is difficult to secure enough vessels to carry the cargoes offered. An advance of 5c. per 100 lb. is now demanded for shipments from New York and Philadelphia bringing the quotation to 30c. For large lots of steel such as shapes, reinforcing bars, plates wire and similar products the rates to Pacific Coast points are as follows: From Bethlehem, 37.5c.; Chicago, 55c.; Cleveland, 44c.; Coatesville, 40c.; Johnstown, 39.5c.; New York, 30c.; Niles, 43c.; Philadelphia, 30c.; Pittsburgh, 46c.; Steubenville, 41c.; Wheeling, 41c.; Youngstown, 43c.

Wire—Foreign business is the life of the market; it is estimated that 80,000 tons are wanted for export. Most of this is barbed wire. Plain wire, is $1.40 to $1.45; galvanized wire, $1.80 to $1.85; painted barbed wire, $1.60 to $1.65; galvanized barbed wire, $2 to $2.05; galvanized staples, $2, and polished staples, $1.60. All these prices are per hundred pounds for large lots in the Pittsburgh market.

Old Material—Business shows little improvement but prices are better. These have not been established so much by actual transaction as by quotations named on hoped for business. It is recognized that those having scrap for sale at first hand are unwilling to dispose of their supplies at the old low quotations, and somewhat higher figures have been made, without inducing any business. In New York the demand shows an improvement and quotations per net ton are as follows:

	Per Net Ton
Heavy-melting steel scrap	$7.25 to $7.50
Pipes and flues	7.00 to 7.25
No. 1 railroad wrought	8.75 to 9.25
Stove plate	7.50 to 8.00
Malleable cast	7.00 to 7.50
No. 1 machinery cast	9.75 to 10.25
No. 1 yard wrought, long	8.25 to 8.75
Wrought turnings	5.50 to 6.00

The Chicago market reports little or no demand but there is some hope for an improvement. Quotations are from 25 to 50c. per ton higher than a month ago.

	Per Gross Ton
Heavy-melting steel scrap	$8.75 to $9.00
	Per Net Ton
No. 1 railroad wrought	$8.25 to $8.75
No. 2 railroad wrought	7.50 to 8.00
No. 1 cast scrap	9.25 to 9.50
Pipes and flues	6.25 to 6.75
Agricultural malleable	7.25 to 7.50
Railroad malleable	8.00 to 8.25

In Pittsburgh the demand shows an improvement and there is hope for much better business after the first of the year. Heavy melting scrap has advanced rapidly, and some business has been transacted. Practically all of the quotations given below, which are per gross ton, show an advance compared with last month.

	Per Gross Ton
Heavy-melting steel scrap	$11.25 to $11.50
Re-rolling rails	11.75 to 12.00
No. 1 foundry cast	11.25 to 11.50
Old car wheels	10.75 to 11.00
Machine shop turnings	7.75 to 8.00
Railroad malleable	10.00 to 10.25

Wire Rope—Prices are lower and the new discounts are 47 and 5% from list for galvanized and 55 and 5% for bright. At these discounts the net price of wire rope at the mill is as follows:

Diameter in Inches	Price per Foot		
	Cast Steel	Crucible Steel	Plow Steel
2½	$0.75	$0.90	$1.07
2¼	0.61	0.73	0.86
2	0.47	0.57	0.67
1¾	0.39	0.49	0.58
1½	0.28	0.34	0.40
1¼	0.20	0.24	0.27
1	0.13	0.15	0.18
¾	0.08	0.09	0.11
⅝	0.06	0.07	0.08

Chain—Prices are steady and without change, as follows: These prices are per 100 lb., f.o.b., Pittsburgh:

3/16 in	$7.50	½ and 9/16 in	$3.00
¼ in	4.95	⅝ and 11/16 in	2.90
5/16 in	3.95	¾ and 13/16 in	2.80
⅜ in	3.40	⅞ and 15/16 in	2.70
7/16 in	3.20	1 to 1¼ in	2.60

EXTRAS TO ABOVE LIST PER 100 POUNDS

	For BB	For BBB
3/16-in. and ¼-in	$1.50	$2.00
5/16-in. and larger	1.25	1.75

Freight Rates—The freight rates on finished steel products from the Pittsburgh district, including plates, structural shapes, merchant steel and iron bar, pipe fittings, plain and galvanized wire, nails, rivets spikes, and bolts, black sheets (except planished) chains, etc., are as follows in cents per hundred pounds: Albany, 16; Buffalo, 11; Boston, 18; Baltimore, 14½; Canandaigua, 13½; Cleveland, 10; Columbus, 12; Cincinnati, 15; Chicago, 18; Denver, Colo., 85½; Harrisburg, 14½; Louisville, 18; New York, 16; Norfolk, 20; Philadelphia, 15; Rochester, 11½; Richmond, 20; Scranton, 15; St. Louis, 23; Washington, 14½.

Coke—The output shows a decided improvement compared with last month. For the week ending December 26 the output in the Upper and Lower Connellsville regions was 217,000 tons. Prices show practically no change. Blast furnace coke sells at $1.50 to $1.60 per net ton at oven for prompt shipment, and contracts for the first half, and in some cases throughout the year at $1.75 per net ton. For foundry coke prices are better, prompt shipments being held at $2 while $2.15 to $2.25 per net ton is demanded for contracts.

OILS AND PAINTS

Linseed Oil—Prices are lower. For city raw 50 to 51c. is asked in New York. The usual advance of 1c. per gal. is charged for boiled oil.

Petroleum Products—The year 1915 opened very differently from the previous one; this year there is a surplus of crude product, while last year the situation was entirely changed. For crude petroleum at the wells the following prices are charged: Pennsylvania, Second Sand and Tiona, 1.50; Mercer black and New Castle, $1.07; Kansas and Oklahoma, 55c. California oils, 40c. for 21 to 23.9 gravity; 42½c. for 24 to 26.9

gravity; 45c. for 27 to 28.9 gravity; 55c. for 29 to 30.9 gravity and 60c. for 31 to 32.9 gravity.

Spirits Turpentine—Prices are easier and spot turpentine can be had at 45½c. New York, and at 42¾c. Savannah.

REINFORCING MATERIALS

Bars, Concrete Reinforcing—Prices were advanced $1 per ton in the Pittsburgh market Dec. 29. The new quotation of 1.10c. Pittsburgh applies only to deliveries made during the first quarter. For later deliveries, 1.15c. Pittsburgh is asked. These quotations are the minimum. Prices are as follows:

Size	Cents per Pound		
	Mill Shipments Pittsburgh	*Warehouse Pittsburgh	Delivered from *Warehouse New York
¾-in. and larger	1.10	1.50	1.95 to 2.00
⅝-in.	1.15	1.65	2.00 to 2.05
½-in.	1.30	1.80	2.15 to 2.20
⅜-in.	1.40	1.90	2.25 to 2.30
¼-in.	1.70	2.20	2.60 to 2.65

*Bars from warehouse are cut to desired length without extra charge.

Triangle Mesh—Prices continue without change as follows:

PRICE PER 100 SQ.FT.

Style No.	Cross Sec. Area per Ft. Width	Plain Material		Galvanized	
		Carload Lots	Less Than Car Lots and Over 10,000 Sq.Ft.	Carload Lots	Less Than Car Lots and Over 10,000 Sq.Ft.
*4	$0.102	$1.00	$1.23	$1.12	$1.34
5	0.077	0.80	0.97	0.89	1.00
6	0.058	0.63	0.77	0.71	0.84
*7	0.041	0.49	0.60	0.55	0.66
*23	0.170	1.69	2.05	1.88	2.24

42	0.151	1.55	1.88	1.72	2.05
*43	0.101	1.10	1.34	1.23	1.46

*This material is made in regular widths of 18, 22, 26, 30, 34, 42, 46, 50, 54 and 58 in. Standard lengths in rolls are 150, 250, 300 and 600 ft.

METALS

Copper—The buying movement during December was large. Despite the fact that foreigners bought very little, exports for those two months were about half of normal, and the statistics show an unusual amount of metal going into Italy and Norway, which, on the face, looks suspicious, but may be accounted for by the fact that these countries have bought their electrical supplies and most of their copper wire from Germany, and will now have to make it themselves. This may account for part of the increase. The highest price was reached before Christmas, when 13.50c. was paid in New York. Since that time there has been very little business, not enough to establish quotations, but there is no doubt that a round tonnage could be placed at considerably less, whether as low as 13c. or not, is another question. There is still considerable business to go forward for Russia, and the buying is by no means over. Buying from Great Britain should commence again in a few months, and those in close touch with the copper trade believe the next few months will see much higher prices for the metal. Very little new domestic consumption has been developed in the last month.

Tin—The market has been almost lifeless. Domestic consumers bought sparingly, the tin plate business being small, but there is a prospect that there will be a much better demand for tin plate should the war continue. Prices have been near the 33.50c. level for the entire month. It is unusual for the tin market to fluctuate within such narrow limits. For the present there is sufficient supply on hand to meet any demands likely to occur.

Lead—The market has not maintained its full strength, and a decline of $2 per ton was announced. The price is now 3.80c. in New York, 3.67½c. St. Louis. The supply is more than ample for present demands.

Spelter—A marked improvement has been made both in the price and the demand. In New York spelter is quoted at 5.55 to 5.65c., and in St. Louis at 5.45c.

Miscellaneous Metals—Prices are higher due to the advance in the price of copper. The demand is small. Quotations are as follows for small lots in New York:

Bismuth	$3.75 to $4.00
Brass tubes, iron-pipe sizes:	
½-in.	.17
¾- to 3-in.	.16
3½-in.	.16
4-in.	.17
Brass rods	.14¾
Brass sheets	.15
Solder, half and half guaranteed	.22
Zinc sheets	9 to 9½
Copper sheets, base	.17½
Pig tin (five-ton lots, cash)	.34

Old Metals—While the demand shows no improvement, prices are higher. It is significant that the quotations for old metal have by no means fully shared in the advance of ingot copper. Dealers' buying quotations are as follows:

	Cents
Copper, heavy and crucible	11.00
Copper, heavy and wire	10.75
Copper, light and bottoms	9.75
Brass, heavy	8.00
Brass, light	6.25
Heavy machine composition	9.75
Composition turnings	8.50
Lead, heavy	3.30
Zinc scrap	3.90

Antimony—Prices of antimony are most irregular. There was a decline early in December, and later an advance, due to the report that Japanese interests had bought back the contract sold earlier. While the domestic demand is light, there is some buying from makers of munitions of war. For Cookson's, 15 cents is asked. For Hallett's, 14 cents, and for outside brands, 13 cents.

Aluminum—The market is steady. No. 1 ingots are quoted at 19 to 19.50c., New York. Sheet aluminum is quoted at 28c.

CLAY PRODUCTS

Quotations have been withdrawn and no new discounts issued.

MISCELLANEOUS

Rubber—It is evident that the British Government is endeavoring to pile up about 20,000 tons of high-grade rubber, before it will allow American manufacturers to accumulate stock. The market is in fairly good shape. Prices are firm but not high, and at the present quotation of 76c. for Up River Para Fine, there is plenty of margin left for manufacture. For Up River Para Coarse, 58c. is demanded. Ceylon rubber sells at 88c. for sheet and 90 cents for crepe.

Railroad Ties—Business is at a standstill. Prices are exceedingly low, 76c. being quoted for yellow pine ties, 7x9-in. by 8 ft. 6 in., and 64c., 6x8-in. by 8 ft. There is no doubt that a large order from one of the leading trunk lines would bring a certain advance, especially as present prices are 20c. below those current last year, and the ocean freight rates present a considerable problem.

Lighterage Limits—The free delivery or "Lighterage Limits" in New York City are as follows: In Manhattan, from a point opposite the Fort Lee ferry, south along the Hudson River around the Battery and north along the East and Harlem Rivers to the Jerome Ave. Bridge at 155th St. In New Jersey, south from Fort Lee ferry to Bayonne City, points on the north and east shores at Staten Island, between Bridge Creek (Arlington) and Clifton, both inclusive, and including Elm Park, Erastina and Shooters Island. In Brooklyn, from 69th St., Bay Ridge, north to Pot Cove, Astoria, Long Island City.

Explosives—Dynamite of the kind generally used by contractors is approximately 11@13c. per lb., f.o.b. factory, in ton lots. Blasting powder, classified as "soda" grade, is sold at $1.20@1.40 per keg of 25 lb. in lots of 10,000 lb.

Exploders, per hundred, are sold at the following prices: 4 ft., $3.60; 6 ft., $4.10; 8 ft., $4.60; 10 ft., $5.10; 12 ft., $5.60; 16 ft., $6.60; 20 ft., $7.50; 25 ft., $9.40; 30 ft., $12; 36 ft., $14.60.

Caps in lots of 10,000 are $7@8 per thousand.

Blasting machines for 10 holes are $12; 25 holes, $20; 50 holes, $40; 100 holes, $60.

A New High Record in Municipal Expenditure

Statistics compiled by the "Financial Chronicle" show that the sales of municipal bonds in 1914 aggregated $453,000,000. This establishes a new high record, being about 13 per cent. larger than the bond sales in 1913, which was practically a new record. The funds realized from the sales of these bonds were practically all expended in engineering construction and for municipal improvements. The following table shows the sales of bonds during the month of December and for 12 months of a number of recent years.

	Month of December	For the 12 Months
1914	$25,453,650	$453,256,950
1913	43,307,917	396,367,756
1912	27,657,909	386,551,828
1911	36,028,842	396,859,646
1910	36,621,581	320,036,181
1909	31,750,718	339,424,560
1908	28,050,299	313,797,549
1907	13,718,505	227,643,208
1906	21,260,174	201,743,346
1905	8,254,593	183,080,023
1904	9,935,785	250,754,946
1903	13,491,797	152,281,050
1902	11,567,812	152,846,335
1901	15,456,958	149,498,689
1900	22,160,751	145,733,062
1899	4,081,225	118,113,005
1898	7,306,343	103,084,793
1897	17,855,473	137,984,004
1896	10,664,287	106,496,060
1895	8,545,804	114,021,633
1894	13,486,374	117,176,225
1893	17,306,564	77,421,273
1892	3,297,249	83,823,510

The Erie Pump & Equipment Co., Erie, Penn., has recently been organized. This is a consolidation of the Erie Pump & Engine Works, Erie, and the Northern Equipment Co. John A. Dougherty, who for a number of years has been recognized as an unusual designer of centrifugal pumps, is to take charge of the designing. The officers of the company include E. W. Nick, Pres., D. H. Dumond, Vice-Pres., and G. B. Deenschoten, Secy.

RAILWAYS

Maine—Eastern Maine R.R.—This company has filed a petition with the Public Utilities Commission for the approval of the location of the route of its proposed railway from Houlton to Bangor, Maine, about 103 miles.

✚West Virginia—Horse Creek Land & Mining Co.—This company, it is reported, has awarded a contract to BOARD & DUFFIELD, Charleston, W. Va., to construct the first three miles of its railway on Peter Cave Fork, Lincoln County, W. Va. L. E. Poteet, Quarrier St. Bldg., Charleston, is Gen. Mgr. Noted Dec. 17.

Florida—See item under Miscellaneous—Harbor Improvements, Jacksonville, Fla.

✚Minnesota—Minnesota, Dakota & Western Ry.—The MINNESOTA & ONTARIO POWER CO., Minneapolis, Minn., has been awarded a contract by this company for constructing an extension from Littlefork to Craig, about 45 miles.

Kansas—Salina Northern R.R.—This company has been incorporated to construct and operate a railway from Salina to Osborne, Kan., about 80 miles. The incorporators include F. C. York, Saline, F. L. Brown, Sylvan Grove and Thomas F. Brann, Lincoln Center.

Arizonr—Mascot & Western Ry.—This company is preparing to start work soon on the construction of its proposed railway from the mines of the Mascot Copper Co., in the Dos Cabesas district to a point near Kelton, Ariz., about 35 miles. John A. Street, 1611 Harris Trust Bldg., Chicago, Ill., is interested. Noted July 23 and Nov. 26.

California—California Southern Ry.—This company has been incorporated to construct a railway from Blythe Junction through the Palo Verde Valley to Blythe, Calif., about 40 miles. J. M. Neeland, 1003 Los Angeles Investment Bldg., Los Angeles, Calif., is interested.

Quebec—Canadian Northern Quebec Ry.—Surveys are being made by this company for the extension of its railway from Huberdeau to St. Remi, Que., about eight miles. H. K. Wicksteed, Toronto, Ont., in Ch. Engr.

ELECTRIC RAILWAYS

Hartford, Conn.—The Hartford, New Britain & Meriden Ry. Co. has been incorporated to construct an electric railway from a connection with the Connecticut Co. in Hartford to Meriden, Berlin, Newington and Wethersfield. John C. Warnock, Meriden, is interested. Noted Apr. 10, 1913.

Norwich, Conn.—The Connecticut Co. is considering plans for the extension of five of its lines in Norwich. Samuel Anderson, Norwich, is Gen. Mgr.

Torrington, Conn.—The Torrington Traction Co. has been incorporated to construct and operate an electric railway from Torrington to Thomaston, about ten miles. The incorporators include Hosea Mann and George B. Goodwin, Torrington, and Howard Guernsey, Thomaston. Noted Dec. 24.

Haddonfield, N. J.—Plans are being prepared for the construction of an electric traction line from Haddonfield to Berlin, by Frank O. Stein, Berlin, N. J., and associates. A preliminary application for right of way has been made to the Haddonfield Commissioners.

Newark, N. J.—The Board of Works has granted a franchise to the Public Service Ry. Co. for the construction of a line on Roseville Ave., from Orange St. to Bloomfield Ave. R. E. Danforth, Newark, is Gen. Mgr.

Charleston, W. Va.—The Charleston-Dunbar Traction Co. plans to construct about 18 miles of new track this spring. E. W. Alexander, Charleston, is Gen. Mgr. and Pur. Agt.

Columbus, Ga.—The Columbus R.R. Co. has been petitioned to prepare plans for the extension of its lines to Riverdale. John S. Bleeker, Columbus, is Mgr.

New Orleans, La.—Plans are being prepared by the New Orleans Ry. & Light Co. for constructing about 11 miles of new track in New Orleans. M. S. Sloan, New Orleans, is Gen. Mgr.

Paxton, Ill.—Preliminary arrangements are being made by the Kankakee & Urbana Traction Co. for the extension of its line to Paxton. William I. Laffell, Urbana, is Vice-Pres., Gen. Mgr. and Pur. Agt.

Newport, Tenn.—According to press reports a company is being organized to construct an electric railway from Kingsport through Sullivan, Washington, Greene and Cook Counties, to Newport.

✚Almont, Mich.—The Detroit, Almont & Northern Ry. Co. has awarded a contract to FRANK BISHOP, Almont, for the extension to its line from Almont to Imlay City, about nine miles.

Mount Vernon, Ill.—The City Ry. Co. contemplates the construction of a two-mile extension to its line in Mount Vernon. Louis G. Pavey, Home National Bank Bldg., Mount Vernon, is Pres. and Gen. Mgr.

Peoria, Ill.—The Peoria Ry. Co. is preparing plans for double-tracking its line on Jackson St. to the city limits of Peoria. R. W. Bailey, Peoria, is Gen. Supt.

Rockford, Ill.—The Rockford City Traction Co. plans to construct about 50 miles of new track this spring. W. C. Sparks, Rockford, is Gen. Mgr. and Pur. Agt.

St. Louis, Mo.—John A. Robitch, F. Arnold and C. Brenner have applied to the City Council for a franchise to extend the electric railway on Bellfontaine St. from its present loop to the city limits.

Houston, Tex.—The Houston Electric Ry. Co. has applied to the City Council for a franchise to extend its line on San Felipe St. to the city limits. David Daly, Houston, is Local Mgr.

Boise, Idaho—The construction of an electric railway over Blue Mountain from Boise, Idaho, to La Grande, Ore., is contemplated by C. J. Franklin, Boise, E. A. Pack, Weiser, Idaho and J. G. Brown, Galion, Ohio.

Ogden, Utah—Plans are being prepared by the Ogden Rapid Transit Co. for the extension of its line to connect Wellsville, Mendon, Collinston, Deweyville, Honeyville, Garland, Tremonton and Brigham City. P. D. Kline, Ogden, is Gen. Mgr. and Pur. Agt.

Sausalito, Calif.—A. E. Roberts is preparing plans for construction of the proposed incline railway from Sausal to the summit of the heights, 1000 ft. above the city. Not Oct. 22.

London, Ont.—The Hydro-Electric Power Commission h prepared estimates for constructing a hydro-electric railw from London to Tillsonburg. Estimated cost, $892,000. W. Pope, Continental Life Bldg., Toronto, is Secy. of Comn.

Toronto, Ont.—The Toronto Suburban St. Ry. Co. plans construct about 40 miles of new track between Toronto a Guelph. George C. Royce, Toronto, is Secy. and Gen. Mgr.

LIGHT, HEAT AND POWER

✚Boston, Mass.—The Infirmary Trustees of the Public Works Department have awarded the contract for wiring the Long Island nurses' home and two ward buildings to CARLISLE & CONNER, 258 Washington St., Boston, at $10,900 Other bidders were: Edwin C. Lewis, Inc., $13,591; Lord Electric Co., $13,800, and the Clark & Mills Electric Co., $14,166. Thomas A. McQuade is Chn., Infirmary Trustees.

Hartford, Conn.—It is reported that the Billings & Spencer Co., manufacturer of drop forgings and tools, will equip a boiler plant at the factory on Laurel St., recently purchased from the Columbia Motor Vehicle Co.

New London, Conn.—The Trustees of the Connecticut College for Women have had plans prepared for the installation of a heating plant at the college, to cost about $20,000. It is expected that the contract will be awarded at the January meeting of the Board of Trustees. Ewing & Chappell, 101 Park Ave., New York, N. Y., prepared the plans.

Waterbury, Conn.—Bids will be received until Jan. 16, for a boiler house and steam heating plant, to be built on School St., in connection with the new Clark School. Robert C. Kimball, Boston, Mass., is the Engr. Louis A. Walsh, 51 Leavenworth St., Waterbury, is the Arch.

★Binghamton, N. Y.—(Official)—Bids will be received until 2:30 p.m., Jan. 21, by the State Hospital Commission, Capitol, Albany, for heating, plumbing and electric work, and new boiler and stack, for the new building for Chronic Patients at the Binghamton State Hospital. See advertisement under "Contracts To Be Let" in issue of Dec. 31.

★Collins, N. Y.—(Official)—Bids will be received until 2:30 p.m., Jan. 21, by the State Hospital Commission, Capitol, Albany, N. Y., for underground steam connections, etc., for the existing buildings of the Gowanda State Homeopathic Hospital, Collins. See advertisement under "Contracts To Be Let."

New York, N. Y.—(Borough of Manhattan)—(Official)—Bids will be received until 3 p.m., Jan. 13, by the Board of Trustees of Bellevue and Allied Hospitals, 415 East 26th St., Borough of Manhattan, for additions and alterations to plumbing and gas fitting in the present main building of the Harlem Hospital, 136th and 137th St. and Lenox Ave. Bids will be received at the same time for plumbing, heating and ventilating work for the alterations in the power house and ambulance station of the Harlem Hospital. John W. Brannan, M. D., is Pres., Bd. of Trustees.

New York, N. Y.—(Borough of Manhattan)—The United Electric Light & Power Co., 130 East 15th St., New York, has taken out a permit for the construction of a three-story, 25x100-ft. substation, at 354 West 45th St. It will cost $65,000. W. E. McCoy, 130 East 15th St., is Arch.

★Poughkeepsie, N. Y.—(Official)—Bids will be received until 2:30 p.m., Jan. 21, by the State Hospital Commission, Capitol, Albany, for a motor for laundry at the Hudson River State Hospital, Poughkeepsie. Lewis M. Farrington is Asst. Secy. of the Comn. See advertisement under "Contracts To Be Let."

★Yorktown Heights. N. Y.—(Official)—Bids will be received until noon, Jan. 12, by William B. Osgood Field, Pres., Bd. of Mgrs., New York State Training School for Boys, 2 West 45th St., New York, N. Y., for the heating, plumbing and electric work for seven cottages, and for the construction of a power house and coal pocket for the training school. See advertisement under "Contracts To Be Let" in issue of Dec. 31.

Camden, N. J.—The Victor Talking Machine Co. is receiving bids for the construction of a power plant, estimated to cost $150,000, as a unit of the group of new buildings costing about $1,000,000. The proposed power house will be located at Cooper and Front St.; it will be 100x220 ft., two stories, with a foundation of monolithic concrete. Ballinger & Perrot, Philadelphia, is Engr. in Charge.

Holmesburg, Penn.—Bids will be received until noon, Jan. 12, by R. H. Harte, M. D., Dir., Dept. Public Health and Charities, 584 City Hall, Philadelphia, for the construction of a power plant for the Home for the Indigent, Holmesburg. Philip H. Johnson, 1824 Land Title Bldg., Philadelphia, is Arch. Noted Dec. 3.

✚Lansford, Penn.—The Panther Valley Electric Light, Heat & Power Co., Lansford, has awarded the contract for the construction of a substation to cost about $10,000 to ANDREW BRESLIN, Summithill, Penn. Noted Oct. 29.

Rochester, Penn.—(Official)—Bids will be received until 8 p.m., Jan. 12, by the Board of Directors of the School District of Rochester, for steam heating and mechanical ventilating systems in the new High School building at Rochester. George F. Bauer is Pres. and George H. Karcher is Secy. of the Bd. of Dir.

✚Rockmart, Ga.—The City Council has awarded contracts for new boilers and generators for the municipal electric-light plant to the AMES IRON WORKS, Oswego, N. Y., and the ALLIS-CHALMERS CO., Milwaukee, Wis., respectively. Noted July 30 and Aug. 27.

Louisville, Ky.—Bids will be received until Jan. 14 by the Board of Education for the installation of heating and ventilating equipment in a school building at Sixth and Walnut St. J. Earl Henry is Arch. and Engr.

Louisville, Ky.—It is reported that the Louisville Bridge & Iron Co. has decided to change all of its motors from direct to alternating current, and will soon purchase new motors aggregating several hundred horsepower.

Salem, Ohio—It is reported that the City Council is considering the installation of a municipal electric-light plant to cost about $20,000.

Toledo, Ohio—(Official)—Bids will be received until 10 a.m., Jan. 29, by the Board of Commissioners of Lucas County, for the construction and equipment of a new lighting, heating and power plant for the Lucas County Childrens' Home. E. Bayer, 1530 Nicholas Bldg., Toledo, is Engr. Charles J. Sanzenbacher is Audr. of Lucas County. Noted Oct. 15, 1914.

Saginaw, Mich.—An election will be held, Jan. 11, at which the citizens will vote on the question of issuing $750,000 in bonds, to be used for the construction of a municipal light and power plant. Herman H. Eymer is City Engr. Noted Aug. 13 and Oct. 15, 1914.

Elgin, Ill.—It is reported that a special election will soon be held at which the citizens will vote on the question of issuing $25,000 in bonds to be used for the installation of a municipal electric-light plant. William F. Sylla is City Clk.

Ashland, Wis.—The Ashland Lighting Co. plans to construct an auxiliary steam plant in the west end of the city, and later to build a new gas plant and holder. It is reported that all of this work will be done within the next six months.

Lancaster, Wis.—The Wisconsin Railway Commission has authorized the Lancaster Electric Light & Power Co. to issue $34,700 in stock for the purchase of power and transmission lines between Platteville and Lancaster.

Lamberton, Minn.—The local electric-light plant has been purchased by R. F. Wherland, Redwood Falls, and H. L. Wherland, Faribault. It is reported that the new owners will extend and improve the plant.

Winfield, Kan.—The Electric Light and Water Commission has been authorized by the City Council to install an additional 500-kw. generating unit in the municipal electric-light plant. It is understood that bids will be asked within the next 30 days. W. J. Welfelt is Supt.

Madison, S. D.—The City Council will improve the municipal electric-light plant at a cost of about $20,000. A new engine and generator will be purchased. Edward Rafferty is Supt. of the plant.

Worland, Wyo.—It is reported that plans are being made to rebuild the plant of the Worland Electric Light Improvement Co., which was recently burned. E. G. Ditto, Worland, is Mgr. of the company.

Prairie Home, Mo.—The Town Board has granted a 20-year franchise to Kelly Simmons for the construction and operation of an electric light plant in Prairie Home. The building will be 30x40 ft., and the plant will be of the alternating current type, Fairbanks-Morse, 25-kv.-a., driven by a 25-hp. engine.

Fort Bidwell, Calif.—It is reported that R. R. Rice, H. Dunbar and J. McCosh Smith contemplate the installation of gas plants at Fort Bidwell and Eagleville, Modoc County, Calif.

Brockville, Ont.—The Provincial Hydro-Electric Commission contemplates the construction of an auxiliary power house at Brockville to cost about $4000. W. W. Pope, Continental Life Bldg., Toronto, is Secy. of the Comn.

Kamloops, B. C.—It is reported the city contemplates extensions and improvements to the municipal electric light plant at an estimated cost of $40,000. J. J. Carment is Secy. and Treas.

BRIDGES

+**Concord, N. H.**—The City Council has awarded the contract for the construction of the Pembroke Bridge over the Merrimack River, to the BERLIN CONSTRUCTION CO., Berlin, Conn., at $23,993. The bridge will be 470 ft. long. Noted Nov. 19, Dec. 3 and 10.

Northampton, Mass.—The Commissioners of Hampshire County have had tentative plans prepared for the proposed bridge over the Connecticut River, by John R. Worcester & Co., 79 Milk St., Boston. The cost is estimated at $200,000. Noted Dec. 18, 1913.

Middletown, Conn.—The Board of Selectmen plans to begin work in the early spring on a concrete bridge connecting Middletown with South Farms, to replace the present steel structure. It is reported that the piers of the old bridge will serve for the new one. The bridge will be 68 ft. long and 26 ft. wide. The cost is estimated at from $4000 to $5000. J. M. Lucey is City Engr.

Ballston Spa, N. Y.—The taxpayers of the Town of Ballston have voted in favor of appropriating $6800 for the construction of a new bridge over Mourning Kill. This bridge will be a part of the new state highway to be built from Dunning St. to V. Corners.

★**Wawarsing, N. Y.**—(Official)—Bids will be received until 11 a.m., Jan. 16, by the Town Board of the Town of Wawarsing, Ulster County, at the Town Hall, Ellenville, N. Y., for the construction of a steel highway bridge, 197 ft. long, across Rondout Creek. Silas S. Shurter is Town Supt. of Highways, Town of Wawarsing.

Jersey City, N. J.—The New Jersey & New York Bridge Co. has been incorporated for the purpose of building a bridge by private enterprise over the Hudson River between New York and New Jersey. Before arrangements can be made, however, Hudson, Essex and Bergen Counties, N. J., must cooperate in the plan, and at the present time, Bergen County only has announced itself as in favor of the project. The incorporators of the company are: J. Wilkes O'Neil, mayor of Bergenfield, W. M. Connell and Milton O. Jones, Bergenfield; John D. Holman, Malcolm Mackey, Tenafly; and Thomas Clendinnen, Fort Lee.

Leesport, Penn.—The Board of Commissioners of Berks County has submitted plans for a new reinforced-concrete bridge over the Schuylkill River, between Leesport and Ontelaunee Township, to the State Water Supply Commission for approval. Construction of the bridge will be begun as soon as permission is granted by the Commission. Charles F. Sanders, Reading, is County Engr. D. K. Hoch, Reading, is County Controller. Noted Dec. 17.

+**Morgantown, W. Va.**—(Official)—The County Court of Monongalia County has awarded the contract for the construction of a 150-ft. reinforced concrete bridge at South Morgantown to COLE BROS. INC., 16 St. Paul St., Baltimore, Md., at $53,331. Other bidders were: E. J. Landor, Canton, Ohio, $55,010; H. J. Zevely, Morgantown, $61,509; H. C. Brooks Co. Inc., Martinsburg, W. Va., $63,915; Keeley Bros. & Gilmore, Clarksburg, W. Va., $66,604; Dravo Contracting Co., Pittsburgh, Penn., $67,256; Concrete Steel Bridge Co., Clarksburg, W. Va., $70,913; Farris Bridge Co., Charleston, W. Va., $71,305; Luten Bridge Co., York, Penn., $71,487; John F. Casey Co., Pittsburgh, Penn., $73,457; I. N. Weaver & Co., Morgantown, $87,905. The Monongahela Valley Engineering Co., Morgantown, is Engr.-in-Charge. Noted May 21 and Dec. 17.

Atlanta, Ga.—See item under "Miscellaneous," Fair Buildings.

Knoxville, Tenn.—The Board of Commissioners of Knox County will, it is reported, make an appropriation of $4000 to be used for replacing the present wooden bridges on Straw Plains Pike with reinforced-concrete structures. The Board will also appropriate $4000 for reflooring and repainting the Holston River Bridge.

Columbus, Ohio—(Official)—The Board of Commissioners of Franklin County has rejected all bids received for constructing approaches to the Williams Bridge in Perry, Norwich and Franklin Townships, as being above the Engineer's estimate. John Scott is Clk. of Comrs. Noted Dec. 10.

Delaware, Ohio—Contracts will be awarded about June 1, by the Board of Commissioners of Delaware County, for the construction of five steel bridges with concrete abutments. The estimated total cost is $100,000. Plans are being prepared by F. C. Higley, County Engr.

Toledo, Ohio—The City Council, on Dec. 28, authorized the issue of bonds, and directed the City Engineer to prepare plans for repaving the Fassett St. Bridge with wood blocks, at an estimated cost of $45,000. Noted Dec. 10.

Youngstown, Ohio—Bids will be received until Jan. 14, by the Commissioners of Mahoning County, for the sale of $40,000 in bonds, the proceeds of which will be used for the construction of a bridge across the Mahoning River at West Ave., Youngstown. Frank H. Vogan is Clk. of Comrs.

Ecorse, Mich.—The lowest bid received for the construction of a Scherzer rolling lift bridge over Ecorse Creek was that of the Toledo Bridge & Crane Co., Toledo, Ohio, at about $30,000. Noted Oct. 1 and 22.

★**Chicago, Ill.**—(Official)—Bids will be received until noon, Jan. 14, by John McGillen, Clk. of the Sanitary District of Chicago, Room 700, 910 South Michigan Ave., for the construction of the steel superstructures of two highway bridges over the Calumet-Sag Channel. For further information, see advertisement under "Contracts To Be Let."

Green Bay, Wis.—It is reported that plans have been prepared by A. Braun, City Engr., for a new bascule bridge over the Fox River at Main St., to cost about $170,000. It will be 535 ft. long, steel superstructure and concrete substructure and approaches. The date for receiving bids has not yet been fixed.

Milwaukee, Wis.—The Department of Public Works has been unable as yet to call for bids for the construction of the State-Martin St. Bridge, estimated to cost about $175,000, as no agreement has been made with the property owners for condemning real estate on the east approach in order to straighten the line of the bridge. The necessary appropriation has been available since July 1, and plans have been completed by the City Engineer. F. G. Simmons is Comr. of Pub. Wks. Noted Apr. 9, 1914.

Racine, Wis.—It is reported that bids will be asked about Mar. 15 by the Commissioners of Racine County for the construction of a steel bridge on concrete abutments to be located at Mount Pleasant, Racine County. James Mutter is Highway Comr. of Racine County.

+**Melrose, Minn.**—The Commissioners of Stearns County, St. Cloud, Minn., have awarded the contract for the construction of State Bridge No. 1605 on State Road No. 1, to the M. ADAMS CO., Minneapolis, Minn. Noted Dec. 17.

Topeka, Kan.—Plans are being prepared by A. R. Young, City Engr., for a new reinforced-concrete bridge over Shunganunga Creek at Kansas Ave. The bridge will be about 100 ft. long and 30 ft. wide. The contract for its construction will be awarded soon after the first of the year, with the understanding that the Topeka Ry. Co. will pay one-half the cost, and in return will be permitted to use the bridge when its South Kansas Ave. extension is built.

+**David City, Neb.**—The Board of Commissioners of Butler County has awarded the contract for bridge construction during 1915, to the NEBRASKA CONSTRUCTION CO., Lincoln, Neb.

Kearney, Neb.—It is reported that bids will be received until Jan. 25 by the City Clerk for the construction of a 46-ft. steel arch.

BUILDINGS

(Continued from page 12.)

St. Johns, Newfoundland—Bids will soon be received for the construction of a building for the Cochrane St. Church, to cost $80,000. Ross & MacDonald, Montreal, Que. are Archs.

Tampico, Mexico—Plans are being prepared by W. E. Nelson, Arch., Brownsville, Tex., for the construction of a six-story, 130x130-ft., brick and concrete office building for the Urguta Estate. Estimated cost, $300,000.

The Buffalo Slag Co., Buffalo, N. Y., announces the removal of its offices to 217 Ellicott Sq.

Balcom & Darrow, Engrs., announce that they have moved from 70 East 45th St., and are now located at 10 East 47th St., New York, N. Y.

The Goulds Mfg. Co., Seneca Falls, N. Y., announces that a branch office was recently opened in the Third National Bank Building, Atlanta, Ga. This office will be in charge of A. B. Tanner.

The Concrete Mixing & Placing Co., 123 W. Madison St., Chicago, which has handled the pneumatic concrete mixer and conveyor in the West, announces that it has extended its business to include the eastern states. H. B. Kirkland is Pres.

Automobile Trade—According to Alfred Reeves, General Manager of the Automobile Chamber of Commerce, 515,000 motor vehicles, valued at $485,000,000, were manufactured in 1914. These were made by 450 companies. It is estimated that there were 1,500,000 automobiles registered in the various states at the end of 1911.

The Koehring Machine Co., Columbus, Ohio, announces that a new office will be opened Jan. 1 by W. W. Williams in the Provident Bank Bldg., Cincinnati, C. O. Owens will be in charge of this office, which will be a branch of the Columbus office, and will handle Koehring mixers, Howard traction rollers, Sternberg trucks, and other lines of allied equipment.

Municipal Improvements—The city of Philadelphia, Penn., will award contracts for municipal work during 1915, amounting to approximately $8,000,000. This is the sum provided for in the tax levy budget recently passed by the City Council. Two important undertakings will be finished next year—the sewer system and the extension of the water works, including a filtration plant. The city will not wait until spring to start the public improvement work. As much as possible will be done during January, February and March to provide work for laborers, inspectors, foremen and others.

Sullivan Drills in St. Louis—Although three separate contractors are driving the 1800-ft. section of the Hill Creek Intersecting Sewer, all of them are using Sullivan air compressors and drills. There are six belt-driven two-stage compressors in use, five having a pressure displacement of 1150 cu.ft. per min. and one of 628 cu.ft. per min. There are 46 rock drills in use, being the Sullivan "FF-12" type, a reciprocating piston machine with a hollow piston, a 1-in. tube and water jet discharging water through hollow steel drill to clear away the cuttings. The drill is 2⅝ in. and it is recalled that this is the size of drill and make which was used on the Mount Royal Tunnel of the Canadian Northern Ry. in Montreal.

The Galion Iron Works & Manufacturing Co., Galion, Ohio, manufacturer of culvert pipe, road makers' machinery, contractors' and municipal supplies, has made a Christmas presentation of a life insurance policy to each of its employees. These policies are issued through the Group Insurance Department of The Equitable Life Assurance Society of the U. S. and guarantee absolutely, in the event of death from any cause whatsoever, to pay the salaries of such employees to their families each month for an entire year. Mr. D. C. Boyd, Pres. and Gen. Mgr. of the company, when interviewed in connection with this group insurance transaction, said, "We regard every one in our service as an important integral part of our company and of distinct value in carrying our purposes into effect. The officers of the company have the keenest interest in the welfare of each individual connected with us and have taken every possible precaution to surround them with the most modern equipment for their safety and comfort. We know of no other way in which we could more efficiently manifest our concern for our employees than through the protection of their families and it is our hope that these life insurance policies will add something to their feeling of security."

The Composition Floor Manufacturers' Association has been formed to unite all reliable and experienced manufacturers of composition flooring using the "oxychloride of magnesia" process. The main objects are to be the establishment of standards in quality, the publication of specifications for foundations, a publicity campaign truthfully stating the qualities of the material and giving reliable directions for maintenance and care in use. For twenty years promoters have been selling formulas, under patents or trade secrets, for plastic cements which would give an elastic and sanitary flooring. Yet the process of manufacture and the chemical combination is an old one, having first been published by Sorel, a French chemist, in 1866. Calcined magnesite is combined with a solution of chloride of magnesia, giving a stone-like substance known as oxychloride of magnesia. Its peculiarity is that it will combine with organic substances to give a more elastic and resilient flooring than will lime cements. But composition floorings are being made by hundreds of inexperienced manufacturers without attempt at chemical control. Few understand that less than 20% of the material sold in the United States as powdered calcined magnesite is fit for making composition flooring, or that successful manufacturers must know the exact amounts of oxide of magnesium and lime in magnesite and the impurities in the chloride of magnesia. As a result of this situation many composition floorings installed have turned out generally unsatisfactory. The Composition Floor Manufacturers Association invites all manufacturers willing to help in eliminating the present unsatisfactory conditions to join. Applications should be sent to the secretary of the Association, M. J. Traub, 37 West Van Buren Street, Chicago, Ill.

Labor Unions Must Pay Damages

After years of litigation, the Supreme Court of the United States, Jan. 5, held that some two hundred Connecticut labor union members must pay $252,130.09 damages under the Sherman anti-trust law for a nation-wide boycott of D. E. Loewe & Co., Danbury, Conn., hat manufacturers, who refused to unionize their shops. The bank accounts and homes of many of the men already are under attachment to pay the judgment, and the next step probably will be foreclosure.

Leading lawyers of Congress disagreed today on whether this decision meant that union workmen would be liable in the future for damages on account of boycotts. Some hold that the Clayton anti-trust law, passed last year after this suit had been tried, would make another such prosecution impossible.

It was in the Danbury hatters' case that the Supreme Court decided in 1908 that labor unions were subject to the terms of the Sherman anti-trust law, and sent the suit back to the New York Federal courts for trial. The judgment, the largest ever before the court under the Sherman law, as well as the vigorous defense of the union men, attracted widespread attention to the litigation.

The decision of the court was unanimous. Justice Holmes, announcing the decision said:

"It requires more than the blindness of justice, not to see that many branches of the United Hatters and the Federation of Labor, in pursuance of a plan emanating from headquarters, made use of such lists (unfair dealers) and of the primary and secondary boycott in their efforts to subdue the plaintiffs to their demands. The union label was used and a strike of the plaintiffs' employees was ordered and carried out to the same end and the purpose to break up the plaintiffs' commerce affected by the quality of the acts."

This left the controversy, he added, narrowed down to the responsibility of the defendants for what was done by the labor organizations. The defendants were laboring men as a rule not employed by Loewe & Co., but living in nearby towns, and a few were national officials of the hatters' union. On the question of responsibility, the justice said:

"The court in substance instructed the jury that if these members paid their dues and continued to delegate authority to their officers unlawfully to interfere with the plaintiffs' interstate commerce in such circumstances that they knew or ought to have known, and such officers were warranted in the belief that they were acting in the matters within their delegated authority, then such members were jointly liable, and no others. It seems to us, that this instruction sufficiently guarded the defendants' rights, and that the defendants got all that they were entitled to ask in not being held chargeable with knowledge as matter of law."

The damages, which under the law were three-fold the injury suffered, were approved over the objection that some of them accrued since the action began.

Exporters Oppose Ship Purchase Bill

As a result of a canvass just completed by the "American Exporter" of 2447 leading exporters of the country, 559 replies were received, of which 85 expressed approval of the Government ship purchase bill, 20 were in favor under certain conditions, 229 were opposed, while the balance who answered excused themselves from expressing an opinion, because of unfamiliarity with the bill, a desire not to go on record, or because their export shipping is handled for them by others.

The canvass was made by mail beginning December 17, and ending January 4, thus being completed before the debate on the measure began in the Senate. Those asked to express their views were 1196 manufacturers known to be engaged in or seeking export trade, and 1257 export commission houses, manufacturers' export agents, New York buying offices for foreign freight forwarders, and included all members of the American Manufacturers' Export Association, the American Exporters & Importers' Association and a large portion of the Merchants' Association. It included firms in practically every State of the union, and, among manufacturers, makers of everything from toothpicks to locomotives.

None of those invited to express their views were ship owners. The terms shipping and exporting are often confused in discussing oversea trade, hence emphasis is laid on the fact that the views gathered are those of the men who pay the freight and depend on the shipping facilities offered and not those of the owners or agents of ships. Those who were asked to give their views were the very people who would supposedly benefit from the operation of the bill, and their indifference and actual opposition by a vote of more than two to one is considered significant.

As the vote shows, the experience of shippers is that the thirteen lines to South America and the numerous lines to Central America have provided and do provide ample facilities. Nevertheless many who testify to that fact state that they are in favor of the bill. In addition to those who favored the bill, there were those who gave qualified approval to Government competition with private capital and Government ownership. Those qualified answers were in several cases somewhat obscure, in some cases expressing approval purely as a war emergency measure, the Government to withdraw when the emergency was to pass, while others expressed approval provided subsidies cannot be paid.

CONTRACT PRICE

Sewage Collecting System—North Plainfield, N. J. — Bids were received, Dec. 8, by the Borough of North Plainfield for constructing a sewage collecting system (Contract No. 1) from (A) Engineer's Estimate (B) Harrison-Burton Co., New York, N. Y.; (C) John C. Shrade, Inc., Brooklyn, N. Y.; (D) H. C. Brooks Co., Martinsburg, W. Va.; (E) Frank Puglia, Paterson, N. J.; (F) D. Donnegan Co. and F. N. Lewis, Brooklyn, N. Y.; (G) Cantrell Construction Co., Philadelphia, Penn.; (H) Peekskill Construction Co., Peekskill, N. Y.; (I) Cauldwell-Wingate Co. and Atlantic Construction & Supply Co., New York, N. Y.; (J) Burke & Bonham, Inc., Plainfield, N. J.; (K) Joseph L. Sigretto & Co., Woodhaven, N. Y.; (L) Kelly-McFeeley Co., Camden, N. J.; (M) Bruno Pizzimenti, Seneca Falls, N. Y.; (N) Fusco Construction Co., Newark, N. J.; (O) Schneider Stelle & Co., New Brunswick, N. J.; (P) Joseph Johnson's Sons, West New Brighton, N. Y.; (Q) Weldon Contracting Co., Rahway, N. J.; (R) Cenedella & Co., Milford, Mass.; (S) Pasquale Mauriella, Orange, N. J., A. D. Ambrosio & Co., Hartford, Conn. The item bids were as follows:

Contracts to Be Let

Bids received until Jan. 21, 1915.

Building at State Hospital

Binghamton, N. Y.

Sealed proposals for Construction, Heating, Plumbing and Electric work for new building for Chronic Patients; for New Boiler, Stack, etc., at the Binghamton State Hospital, Binghamton, N. Y., will be received by the State Hospital Commission, Capitol, Albany, N. Y., until two-thirty p.m., Jan. 21st, 1915, when they will be publicly opened and read. Proposals shall be enclosed in an envelope furnished by the State Architect, sealed and endorsed, and shall be accompanied by a certified check in the sum of 5% of the amount of bid for Construction work; in the sum of $1250 for Heating work; in the sum of $500 for Plumbing work; in the sum of $250 for Electric work, and in the sum of 5% of the amount of bid for New Boiler, Stack, etc. The contractors to whom awards are made will be required to furnish surety company bond in the sum of 50% of the amount of contract within thirty (30) days after official notice of award of contract, and in accordance with the terms of Specifications Nos. 2100, 2114, 2115, 2116 and 2191. The right is reserved to reject any or all bids. Drawings and specifications may be consulted at the Binghamton State Hospital, at the New York Office of the Department of Architecture, Room 1224, Woolworth Building, and at the Department of Architecture, Capitol, Albany, N. Y. Drawings and specifications and blank forms of proposal may be obtained at the Department of Architecture, Capitol, Albany, N. Y., upon reasonable notice, and upon the desposit of certified check in the sum of $10.00 made payable to the State of New York, for each division of the work, which check will be returned if plans and specifications are sent back in good condition to the State Architect, Lewis F. Pilcher.

Dated Albany, N. Y., December 23, 1914.

LEWIS M. FARRINGTON,
Assistant Secretary.

⁂

Bids received until Jan. 20, 1915.

Dredging in the Harbor of Baltimore

DEPARTMENT OF PUBLIC IMPROVEMENTS,
SUB-DEPARTMENT: HARBOR BOARD.

Baltimore, Md.

PROPOSALS FOR DREDGING THE MAIN CHANNEL NORTH FROM LAZARETTO LIGHT TO THE PIERS OF THE TRANSATLANTIC LINERS, all as shown on plans, will be received until 11 o'clock forenoon of Wednesday, January 20th, 1915.

Proposals must be addressed to the Board of Awards and sent to the City Register's Office, City Hall, accompanied by a certified check of the bidder for $2,000.00 drawn on a Clearing House Bank and payable to the Mayor and City Council of Baltimore.

The right is reserved to reject any or all proposals. Bond in the amount of the contract price will be required for the proper performance of the contract.

Approximate quantity of material to be dredged is 2,000,000 cubic yards.

Approved: O. F. LACKEY,
JOHN HUBERT, Harbor Engineer.
Acting President, Board of Awards.

Plans and specifications can be obtained at the office of the Harbor Engineer, City Hall, Baltimore, Md.

⁂

DEPARTMENT OF THE INTERIOR, U. S. RECLAMATION SERVICE, Washington, D. C., December 31, 1914.—Sealed proposals will be received at the office of the U. S. Reclamation Service at Provo, Utah, until 2 o'clock P. M., February 3, 1915, for construction involving 158,000 yards of excavation, 7,000 yards of concrete and other items. The work is located near Payson City, Utah, near the San Pedro, Los Angeles and Salt Lake R.R. and the Tintic Branch of the Denver and Rio Grande R.R. For particulars, address United States Reclamation Service, Provo, Utah, or Washington, D. C. A. P. DAVIS, Director and Chief Engineer.

Bids received until Jan. 12, 1915.

Cottages, etc. at Training School

Yorktown Heights, N. Y.

Sealed proposals for Construction, Heating, Plumbing and Electric work for Seven Cottages; for Construction work of Power House and Coal Pocket (this does not include boiler plant, plumbing or electric work) and for Water Supply System, for the New York State Training School for Boys, Yorktown Heights, N. Y., will be received by Mr. William B. Osgood Field, President of the Board of Managers of the New York State Training School for Boys, at the Department of Architecture, Room 1224, Woolworth Bldg., New York City, until Tuesday, January 12, 1915, at noon, when they will be publicly opened and read. Proposals shall be enclosed in an envelope furnished by the State Architect, sealed and endorsed, and shall be accompanied by certified check in the sum of 5% of the amount of bid for Construction, Heating and Plumbing work; in the sum of $150 for Electric work; in the sum of $1500 for Power House and Coal Pocket, and in the sum of $450 for Water Supply System. The contractors to whom awards are made will be required to furnish surety company bond in the sum of 50% of the amount of contract within thirty (30) days after official notice of award of contract, and in accordance with the terms of specifications Nos. 2098, 2192, 2193, 2194, 2099 and 2107. The right is reserved to reject any or all bids. Drawings and specifications may be consulted at the New York office of the Department of Architecture, Room No. 1224, Woolworth Building; at the Department of Architecture, Capitol, Albany, N. Y. Drawings and specifications and blank forms of proposal may be obtained at the Department of Architecture, Capitol, Albany, upon reasonable notice and upon the deposit of certified check in the sum of $10 made payable to the State of New York, for each division of the work, which check will be returned if plans and specifications are sent back in good condition to the State Architect, Lewis F. Pilcher.

Bids received until Jan. 19, 1915.

Earth Levee

Augusta, Ga.

SEALED PROPOSALS, addressed to the City Council of Augusta, Georgia, will be received by the River and Canal Commission at its office, 747 Broad Street, Augusta, Georgia, at 12 o'clock Tuesday, January 19th, for furnishing all labor and outfit and constructing section No. 4 of the earth levee at Augusta, Georgia, requiring 250,000 cubic yards of earth fill and 30,000 cubic yards of excavation. This will be scraper or wagon work.

Also at the same time and place bids will be received for the construction of:

960 lineal feet of reinforced concrete box sewer 7 feet by four and one-half feet.
420 lineal feet of 48-inch brick sewer.
530 lineal feet of 42-inch brick sewer.
760 lineal feet of 36-inch brick sewer.
330 lineal feet of 24-inch pipe sewer.

Certified check for $300.00 will be required with each bid.

The City reserves the right to reject any and all bids.

A bond will be required from the successful bidder.

Plans and specifications can be had on application to the undersigned.

NISBET WINGFIELD, Chief Engineer,
747 Broad St., Augusta, Ga.

⁂

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C., January 2, 1915.—SEALED PROPOSALS will be opened in this office at 3 p.m., March 6, 1915, for the construction complete (including mechanical equipment, except elevator and approaches) of the United States Post Office and Court House at Lawton, Oklahoma, Three story and basement building; ground-area, 6,700 square feet; fireproof construction; stone and brick facing; tin roof. Drawings and specifications may be obtained after January 23, 1915, from the Custodian of site at Lawton, Oklahoma, or at this office, in the discretion of the Supervising Architect. O. WENDEROTH, Supervising Architect.

The Record of Building Operations

Returns from 154 cities in the United States have been received and compiled regarding their building operations for 1914, and the previous year. The figures show that building is much better than generally supposed, especially in the Central States, where it is considered that in 154 cities having a population of 24,664,539, about half the total urban population of the country, plans were filed for buildings estimated to cost $771,017,852 in 1914, while operations calculated to cost $838,945,302 were planned in 1913.

In the Eastern States, 59 cities, the plans filed in 1914 called for $326,957,204, compared with $366,084,621 in 1913.

In 46 cities in the Central States the operations in 1914 were estimated at $290,281,422, compared with $292,128,028 in the previous year.

In 30 cities in the Southern States, the operation last year called for $57,532,371, compared with $66,572,691 in 1913.

On the Pacific Coast a heavy loss is noted, made up chiefly in one city. In 19 cities in the Western States the building returns in 1914 were $96,246,855, and in 1913 $114,159,962.

Building Operations in December

Comparison of building returns from plans filed are most misleading; in fact, they indicate a falling off, which is untrue. In the Eastern States a decrease of $16,000,000 is shown, but December, 1913, was abnormally large, both in Newark and the Borough of Manhattan, New York. The indicated loss in these two cities would about make up for the total loss in all of the Eastern cities from which returns are available. The operations are larger than in November, both 1914 and 1913.

In the Central States there is a loss of slightly more than $3,000,000, while in the Southern cities the loss amounts to a little more than $100,000. In the Western States returns in 1914 were practically the same as last year despite a falling off of $1,500,000 in Los Angeles.

RAILWAYS

West Virginia—Baltimore & Ohio R.R.—According to press reports this company plans to extend its Palatine branch on the east side of Fairmont, W. Va. F. L. Stuart, Baltimore, Md., is Ch. Engr.

Florida—Atlantic Harbor R.R.—This company has been incorporated to construct a railway from Jacksonville to Fort George Island, Fla., about 30 miles. George J. Percival, Atlantic City, N. J., is Pres.

Louisiana—Monroe & Texas R.R.—This company has been incorporated to construct a railway from Monroe, La., through Ouachita, Jackson, Winn., Natchitoches and Sabine parishes to the Sabine River. The officers are F. R. Pierce, Pres., L. Brandt, Vice-Pres., C. L. Chesboro, Secy. and A. B. Pierce, Treas.

+Kentucky—Paducah & Illinois R.R.—According to press reports this company has awarded a contract to MORSE, SHEPHERD & DOUGHERTY, St. Paul, Minn., for double-tracking its railway from Paducah, Ky., to the Ohio River, about 12 miles.

Ohio—Cleveland, Cincinnati, Chicago & St. Louis Ry.—According to press reports, this company is arranging for the construction of extensive railway yards about two miles north of Galion, Ohio. George P. Smith, Cincinnati, Ohio, is Ch. Engr.

Wisconsin—Chicago, Milwaukee & St. Paul Ry.—The Wisconsin Railway Commission recently ordered this company to make various improvements to its line in Milwaukee, Wis. These include grade separation work from 38th St. to Fond du Lac Ave., about 2¼ miles. C. F. Loweth, Chicago, Ill., is Ch. Engr.

Montana—Butte, Boise & San Francisco Ry.—This company plans to start work in the spring on the construction of its proposed railway to connect Butte, Mont., Boise, Idaho and San Francisco, Calif., about 1020 miles. This line will cross the continental divide three times but with no grades exceeding 2% and these for short distances only. The estimated cost of the line from Butte to Boise is about $55,000 per mile. L. O. Leonard, Boise, Idaho, is Pres. Noted May 28.

Idaho—Butte, Boise & San Francisco Ry.—See item under Montana.

+Washington—Chicago, Milwaukee & Puget Sound R.R.—A contract has been awarded by this company, according to press reports, to HANS PEDERSON, Madison Blk., Seattle, for grading its line near Hoquiam, Wash.

Oregon—Valley & Sibletz R.R.—This company which operates a 20-mile railway from Airlie, Ore., plans to construct an additional 10 miles of track in the spring. R. L. Donald, Northwestern Bank Bldg., Portland, Ore., is Mgr.

California—Butte, Boise & San Francisco Ry.—See item under Montana.

ELECTRIC RAILWAYS

Monticello, N. Y.—The Monticello & Middletown Ry. Co. is making surveys and plans to start work soon on the construction of its proposed electric railway to connect Middletown, Wurtsboro, Rock Hill, Bridgeville, Monticello, White Lake and Methel, about 45 miles. Blake A. Mapledoram, Monticello, is Gen. Mgr. and Ch. Engr. Noted Dec. 31.

West Orange, N. J.—The town has granted permission to the Public Service Ry. Co. to construct and operate a street railway extension from the boundary line of West Orange and Orange to Valley St., West Orange. R. E. Danforth, Newark, is Gen. Mgr.

Easton, Penn.—The Council has granted permission to the Easton Transit Co. to reconstruct all its lines on the South Side. Harrison R. Fehr, Allentown, is Pres., Gen. Mgr. and Pur. Agt.

Norristown, Penn.—(Official)—The Reading Transit & Light Co. was recently granted permission to lay a grooved rail on DeKalb, Airy, Brown, Powell and Swede St. The work will be done under the direction of S. Cameron Corson, Borough Engr.

Warren, Penn.—According to press reports a syndicate of Cleveland, Ohio, capitalists plans the construction of an electric railway from Warren to Sharon, to connect with the Cleveland-Youngstown line.

New Castle, Del.—The Wilmington, New Castle & Delaware Ry. Co. is preparing to install about 5½ miles of new road bed on its line. W. E. Meyers, New Castle, is Gen. Supt.

Girard, Ga.—The Columbus R.R. Co. contemplates the construction of an electric railway in Lower Girard to complete the loop in Columbus. John S. Bleeker, Columbus. John S. Bleeker, Columbus, is Mgr.

Macon, Ga.—The Macon Ry. & Light Co. has applied to the City Council for a franchise to extend and relocate its lines in Macon. L. S. Boggs, Macon, is Gen. Mgr.

Rochester, Ind.—The United Public Service Co. has been incorporated to construct an electric railway in Rochester. The incorporators include John E. Beyer, Earl E. Deyer and Charles A. Davis.

Peoria, Ill.—The Illinois Traction System is preparing to double-track its Prospect Heights line in East Bluff. H. J. Vance, Peoria, is Pur. Agt.

Colfax, Iowa—The Des Moines Ry. Co. contemplates the extension of its line from Colfax to Newton. F. M. Harris, Des Moines, is Treas. and Pur. Agt.

Cannon Falls, Minn.—The St. Paul Southern Electric Co. proposes to construct an electric railway to connect Cannon Falls, Zumbrota, Pine Island and White Rock, about 30 miles. W. L. Sonntag, St. Paul, Minn., is Gen. Mgr.

Winsted, Minn.—Plans are being made by the Electric Short Line Ry. Co. for the completion of its electric railway to Winsted. DeKoven Hunter, Minneapolis, is Gen. Mgr.

Omaha, Neb.—The Omaha & Council Bluffs St. Ry. Co. is considering plans for the extension of its Harney line south from the Sixth St. terminus to Gibson. W. A. Smith, Omaha, is Vice-Pres. and Gen. Mgr.

Waco, Tex.—Plans are being prepared by the Southern Traction Co. to construct a one-mile extension south from Elm St. B. B. Stitcher, Dallas, is Gen. Mgr.

Nowata, Okla.—Plans are being considered by the Farmers' St. Car Association, Lincoln, Neb., for the construction of an electric interurban railway from Nowata to Vinita.

Provo, Utah—Plans are being prepared by the Salt Lake & Utah R.R. Co. for the construction of an electric railway to connect Provo, Springville and Payson, about 18 miles. W. C. Orem, Salt Lake City, is Pres. and Gen. Mgr.

Vancouver, Wash.—The Portland, Vancouver & Northern Ry. Co. has been incorporated to construct and operate an electric railway from Vancouver, Wash., to Portland, Ore. Henry Crass, Vancouver is Pres. and George W. Ford, Secy.

San Francisco, Calif.—Plans are being prepared by M. M. O'Shaughnessy, City Engr., for the construction of a municipal electric railway on Church St.

Montreal, Que.—The Montreal & Southern Counties Ry. Co. plans to extend its line to Youville St. in Montreal. W. B. Powell, Montreal, is Vice-Pres. and Gen. Mgr.

Regina, Sask.—The Regina Municipal Ry. Co. plans to construct a 1½-mile extension to its line this spring. D. W. Houston, Regina, is Supt.

LIGHT, HEAT AND POWER

Manchester, N. H.—It is reported that the Manchester Traction, Light & Power Co. is preparing to place its wires underground in the business section of the city. J. Brodie Smith is Vice-Pres. and Gen. Mgr.

✚Lyndonville, Vt. — (Official) — The Village Board has awarded contracts for the hydro-electric equipment for its new power station to: The S. MORGAN SMITH CO., York, Penn., for two 450-hp. Francis type turbines in cast-iron spiral cases, each turbine to be regulated by Woodward oil pressure governor; GENERAL ELECTRIC CO., Schenectady, N. Y., for the complete electrical equipment.

Salem, Mass.—Press reports state that the Salem Electric Lighting Co. will construct an addition to its plant on Peabody St., Salem. S. F. Smith is Mgr. of the company.

New Britain, Conn.—Bids will be received until noon, Jan. 20, by Walter P. Crabtree, Arch., 272 Main St., New Britain, for the construction of a heating plant for the new vocational High School on Bassett St. It will be of brick, one story, 47x79 ft., with a 125-ft. chimney of either radial brick or reinforced concrete. Bids are to be received at the same time for the construction of the school building. Noted Nov. 12 and 26.

★Bath, N. Y.—(Official)—Bids will be received until 11 a.m., Feb. 2, by Joseph A. Goulden, Pres. Bd. of Trustees, New York State Soldiers & Sailors Home, Bath, for alterations to the electric plant at the Home. See advertisement under "Contracts to Be Let."

Buffalo, N. Y.—Press reports state that the Water Committee of the Board of Alderman has recommended awarding the contract for the electrical apparatus in the Porter Ave. pumping station to the Buffalo Electric Construction Co. at $48,900. The estimated cost of the complete plant is $95,000. Noted Dec. 24.

La Salle, N. Y.—The Village Board is considering the establishment of a municipal electric-light plant.

★Letchworth Village (Thiells post office), **N. Y.**—(Official) —Bids will be received until 11 a.m. Jan. 30, by Frank A. Vanderlip, Pres. Bd. of Mgrs., Letchworth Village, for heating, plumbing and electric work for the laundry building, and for the construction heating plant and underground piping, plumbing, drainage and electric work for a power house at the Letchworth Village. See advertisement under "Contracts to Be Let."

Atlantic City, N. J.—(Official)—Bids will be received until 2:30 p.m. Jan. 14, by the Board of City Commissioners for electrical conduits, including approximately the following: 4600 lin.ft. electrical conduit consisting of four "pump log" ducts with top board complete; 35 lin.ft. 2½-in. wrought-iron galvanized pipe; three 2½-in. brass check valves, and eight standard manholes complete. William H. Bartlett is Dir. of Pub. Safety. Frank Shinnen is Ch. of Electrical Bureau.

Branchville, N. J.—The Board of Chosen Freeholders of Sussex County, Newton, is considering the installation of an electric-lighting plant at the almshouse. Equipment with gasoline engine operation is being investigated.

Newark, N. J.—(Official)—The Public Service Electric Co. will establish a power plant to consist of four buildings at Point-no-Point on the Passaic River. The plans include a turbine room, 100x160 ft., a switchhouse, 70x110 ft., and a boiler house 120x160 ft., each to be 100 ft. high. Coal bunkers will be installed in a separate building. The estimated cost of the plant is $200,000. Noted July 2.

Winchester, Va.—It is reported that the Northern Virginia Power Co., Winchester, is considering plans for raising the concrete dam across the Shenandoah River at Millville, to increase the output of its hydro-electric plant at that point. D. M. Swink, Winchester, is Mgr. of the company.

Chester, W. Va.—It is reported that the City Clerk has been authorized to advertise for bids for the construction of a municipal electric-light plant.

✚Wadley, Ga.—The City Council has awarded the contract for the construction of a municipal electric-light plant for which bonds were recently voted, to the SINGLETON SMITH CO., 405 Mulberry St., Macon, Ga.

Adairville, Ky.—It is reported that the village is considering the installation of an electric-light plant, replacing the acetylene-gas plant which was recently burned.

Cleveland, Ohio—Bids will be received until noon, Jan. 22, by the Commissioner of Purchases and Supplies, City Hall, for furnishing electric meters and paper insulated lead covered cable for the municipal light department. F. W. Ballard is Comr. of Heat and Light Dept., 1443 East Third St.

Lorain, Ohio—It is reported that plans for the installation of a municipal electric-light plant, to cost about $125,000, have been completed, and bids will soon be asked. D. D. Lewis is Dir. Bd. of Pub. Serv. Noted Nov. 19.

Lorain, Ohio—(Official)—Bids will be received until noon, Jan. 18, by the Board of Education for installing a heating and ventilating system in the high school building, Washington Ave. and Sixth St. E. Bruell is Clk. of the Bd.

Milford, Ind.—Emil Stroh has been granted a franchise for the installation and operation of an electric-light plant, and will purchase the necessary equipment.

✚Bay City, Mich.—The Electric Light Committee of the City Council has awarded the contract for a new 1200-kw. electrical generator for the municipal electric-light plant to the WESTINGHOUSE ELECTRIC & MFG. CO., Pittsburgh, Penn. William H. Fitzhugh is Secy., Mgr. and Supt. of the plant.

Stevens Point, Wis.—The State Normal School will construct a 150x150x264-ft. dormitory on Main. Fremont St. and East Normal Ave. The estimated cost is $100,000. George B. Nelson is Regent.

Superior, Wis.—The Wisconsin Telephone Co., 185 Fifth St., Milwaukee, recently purchased a site 50x140 ft., for the construction of an exchange building. Estimated cost, $50,000.

Superior, Wis.—G. G. Newton & Co. have purchased a site at 11th and Tower St. for the construction of a $250,000 hotel. J. C. Crowley, Pres. of Rotary Club, is interested.

Brooklyn, Iowa—Plans have been prepared by Reimer & Herdin, Archs., Marshalltown, for construction of a three-story, 74x120-ft. hotel for F. Dewey. Estimated cost, $50,000.

Iowa City, Iowa—Plans are being prepared by Proudfoot, Bird & Rawson, Archs., Hubbell Bldg., Des Moines, for the construction of the Hall of Dentistry, at the Iowa University. Estimated cost, $100,000. Noted Dec. 10.

Sioux City, Iowa—The Elks Lodge plans the construction of a club house, estimated to cost $150,000.

Sioux City, Iowa—Plans are being prepared by W. L. Steel Arch., for the construction of a court house to cost abou $500,000. Noted Dec. 25, 1913.

Sioux City, Iowa—The Directors of the St. Vincent Hospital plan to construct a $100,000 building.

Sioux City, Iowa—George C. Call will construct a $60,000 addition to the Jackson Hotel, at Sioux City.

Duluth, Minn.—Bids will be received about Jan. 20 by Kelly & Williams, Archs., 402 First National Bank Bldg., for the construction of a four-story, 145x200-ft. fireproof armory on London Rd. and 13th Ave. East. Noted Dec. 31.

Kenyon, Minn.—Bonds will soon be voted for the construction of a high and grade school, estimated to cost $50,000. C. J. E. Holmen is Clk.

Ortonville, Minn.—Plans are being prepared by Alban & Lockhart, Archs., Endicott Bldg., St. Paul, for the construction of a fireproof high and grade school. The estimated cost is $50,000. Robert Hunter is Clk.

+St. Paul, Minn.—The construction of the five-story, 75x112-ft. fireproof Emporium department store on Seventh and Robert St., will begin about Apr. 1. Estimated cost, $200,000. The steel contract was awarded to the ST. PAUL FOUNDRY CO., and the contract for the terra cotta work to the AMERICAN TERRA COTTA CO. Angus McLeod is Pres. of the Emporium Co.

Kearney, Neb.—The State Normal Board is having plans prepared for the construction of an auditorium and a gymnasium. The estimated cost is $85,000.

Castlewood, S. D.—The county contemplates the issuing of $60,000 in bonds for the construction of a county court house and jail. Guy Osborn is County Audr.

+Helena, Mont.—The contract for the construction of the Masonic Temple has been awarded to GAGNON & CO., Billings. Estimated cost, $82,000. C. S. Haire is Arch.

Columbus, Mo.—The Board of Curators will petition the State Legislature for a biennial budget of $1,500,000. The amount will be used for the improvement of school buildings and extensions to the University of Missouri. Some of the expenditures for the university are as follows: A building and gymnasium for women, to be constructed at $85,000; the Horticultural Building, to be enlarged, $40,000; the Mechanics-Arts Hall Building, recently destroyed by fire, will be rebuilt, $50,000; Missouri School of Mines and Metallurgy, Rolla, Mo., improvements, $225,000. A. Ross Hill is Pres. of University of Missouri.

Little Rock, Ark.—The city plans the construction of a hospital to cost about $150,000. Charles E. Taylor is Mayor and F. M. Oliver is Clk.

Tucson, Ariz.—Bonds have been voted by the city for the construction of a $50,000 city hall. L. O. Cowan is City Clk.

Olympia, Wash.—Plans are being prepared by V. W. Voorhees, Arch., Eitel Bldg., Seattle, for the construction of a seven-story hotel at Sixth and Franklin St., for the Olympia Hotel Co. Estimated cost, $100,000.

Seattle, Wash.—Bids are being received by the Sound Construction & Engineering Co., Lowman Bldg., for the mill and ornamental iron work on the $350,000 Ballard High School. Noted Feb. 12 and Sept. 17.

Spokane, Wash.—Bids for the construction of the county tuberculosis sanatorium at Edgecliffe were received as follows: J. E. Cunningham, $45,187; J. M. Yeaman, $54,000; Guthrie-McDougal Co., $46,935; John T. Huteter, $64,000; Hartness & Norris, $51,848; Carl W. Anderson, $50,990; N. Norman, $57,937; F. E. Paterson, $53,150; Alloway & George, $57,000; George Groschoft, $51,680; J. B. Sweat & Co., $52,433; Charles Jasper, $60,500. The lowest bidder for heating was the Blair-Meagher Co., at $10,075. Noted Dec. 31.

Walla Walla, Wash.—A. W. Eiler, Mgr. of the Bijou Theater, plans the construction of a building to cost $60,000.

Walla Walla, Wash.—Plans have been prepared by George H. Purvis, Seattle, for the construction of a building for Clarence Crews, Mgr. of the Dime Theater. Estimated cost, $50,000.

Montreal, Que.—Bids will be received about Jan. 30 by E. Payette, Arch., 163 St. Francois Xavier St., for the construction of a public library on Sherbrooke and Montcalm St. Estimated cost, $200,000. Noted Oct. 29.

Guelph, Ont.—The citizens have voted against the proposition to construct a $125,000 addition to the Collegiate Institute. Noted Dec. 17.

Vancouver, B. C.—Plans are being prepared by Thomas Kerner and M. Matocks for the construction of the proposed civic center. The estimated cost is $2,500,000. Noted Sept. 17.

Vancouver, B. C.—Plans are being prepared by A. A. Cox, Carter Cotton Bldg., for the construction of an addition to the Vancouver General Hospital at 12th and Willow St. The estimated cost $85,000.

CONTRACT PRICE

INTERCEPTING SEWER, NEWARK, N. J.

Section 18—Central Portion

Bids were received Jan. 5 by the Passaic Valley Sewerage Commissioners for constructing Section 18, central portion, of the Main Intercepting Sewer, from (A) Fusco Construction Co., Newark; (B) Harrison & Craig Co., Newark; (C) New York & New Jersey Construction Co., Newark; (D) Mason Hilton & Co., New York, N. Y. The item bids were as follows:

	A	B	C	D
5000 lin.ft. earth excavation and refilling, in trench for 65-in. concrete sewer......	$37.00	$27.80	$26.00	$23.20
9000 cu.yd. rock excavation.	0.01	3.00	0.01	1.00
3800 cu.yd. concrete masonry	8.50	8.50	9.00	8.00
150 cu.yd. brick masonry and appurtenant work in manholes	20.00	15.00	15.00	20.00
1000 lb. steel for concrete reinforcement	0.05	0.05	0.03	0.05
Extended totals	$220,440	$200,600	$166,570	$158,450

Construction News

★Denotes work advertised in ENGINEERING NEWS.
✚Denotes contract awarded. The names of bidders awarded contracts are set in CAPITALS.

New York Central Operating Officials—Under the reorganization plan of the New York Central two grand divisions will be established—the Eastern, under the supervision of William J. Fripp as general manager, with headquarters at Albany, and the Western, under D. C. Moon, general manager of the Western division, with headquarters at Cleveland. Under Mr. Moon there will be two general superintendents: Albert S. Ingalls, who will have charge of the line between Buffalo and Toledo, with headquarters at Cleveland, and Frank H. Wilson, who will be in charge of the line between Toledo and Chicago, with headquarters in the last named city. Under Mr. Fripp there will be three general superintendents: T. W. Evans, who will have charge of the line between Buffalo and Syracuse and from Montreal to Clearfield, Penn.; E. J. Wright, in charge of the line between Syracuse and the electric zone in New York, including the line into the Adirondacks and the Harlem division, and Miles Bronson, who will have immediate charge of the electrical division.

Electricity on The Farm—In an address presented at a Commonwealth Conference at Eugene, Ore., on "Electricity in Rural Districts," J. L. White, Mgr. of the Albany Division of the Oregon Power Co. said: "It is a fact that it will not pay to make long and costly transmission line extensions solely for the purpose of serving a scattered farm load, although it is equally true that a farming load will pay as a byproduct when such extensions already exist or are being made to take care of other classes of business. Before a great many years the country will be covered by a network of transmission and distribution lines reaching out from a central point to small communities, and incidentally furnishing power for many other purposes along the way. It has been demonstrated time and again that the electric method of doing things tends for greater efficiency. Starting with water power converted to electric power we can go on producing forever any mechanical operation. We can re-fertilize our lands, cultivate them, harvest and transport the crops to market, cook our meals, light and heat our homes, etc., and do it efficiently. The great problem of all ages has always been to connect the producer and the consumer. If we could produce, distribute, and consume all other products as efficiently and as simply as we can electricity, this great loss between production and consumption would be reduced 80 to 90%."

The Corrugated Bar Co., Buffalo, recently secured through its St. Louis office a contract for 6,400,000 lb. of bars, for the new cotton warehouse at New Orleans. When it is recalled that this cotton warehouse is one of the largest structures of its kind in existence, and as it is probably the forerunner of many similar structures in the South, due to a new warehousing plan, it means more than the initial order. The cotton warehouse in New Orleans is to be owned by the municipality, the same as the dock system and railways adjacent to the docks. The contract for the warehouse was awarded to the Jefferson Construction Co., New Orleans.

James Milne & Co., 11th Regent St., London, and 30 Church St., New York, N. Y., wants an agency for gas engines and allied machinery.

Thomas W. Golding, Assoc. Mem., Am. Soc. C. E., Structural Engr., has removed his office to the Central Bldg., 25 West 42d St., New York, N. Y.

Cost of Cast-Iron Pipe

The accompanying table shows the cost of cast-iron pipe purchased by the Metropolitan Water and Sewage Board of Massachusetts from 1895 to the end of 1914, and previous to that date from 1868, by the Boston Water Department. The figures are computed from a table prepared by Dexter Brackett, Chief Engineer of Water-Works. Some explanation is necessary for their proper understanding. Prior to 1894, pipe was bought in tons of 2240 lb., and since that date in tons of 2000 lb. The table, however, has been computed for tons of 2000 lb. In a number of years, several lots of pipe were purchased, and for the purpose of this table an average was computed of the various lots. In the table four columns are given, one showing the number of tons of pipe larger than 20 in., purchased, and adjacent, the cost; in another column the number of tons purchased from 10 to 20 in. with the cost. These figures do not represent the cost of pipe at the foundry, nor the selling price at the foundry, but simply what one purchasing department paid for its pipe for a number of years.

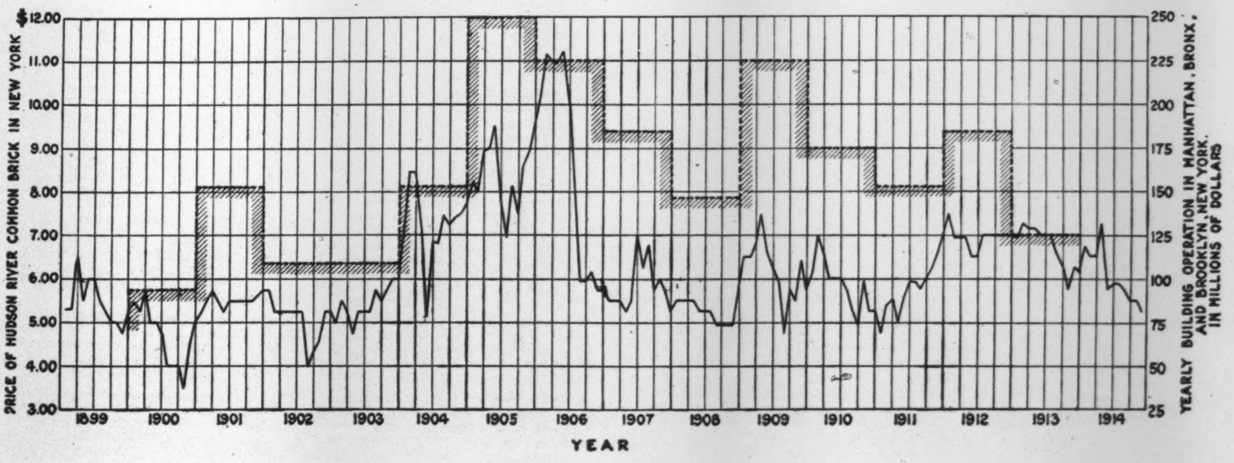
Brick Prices and Building Operations

Remarkable for the slight change in price rather than any other one thing has been the course of the brick market in New York for the last few years. Figures recently compiled by the "Record and Guide," New York, have been used in the accompanying chart. The only real advance was during the building of the Rapid Transit System and during the building boom which followed. The price of $7 per thousand has only been exceeded on a few occasions since the culmination of that boom in the early months of 1907. The building operations in the three principal boroughs of New York City expressed in millions of dollars are also shown. There is no apparent relation between the two.

BUILDING OPERATIONS AND THE PRICE OF BRICK IN NEW YORK



RAILWAYS

Massachusetts—The Walworth Mfg. Co. has applied for permission to construct a two-mile railway along the water front at South Boston, Mass., from the freight yards of the New York, New Haven & Hartford R.R. to Marine Park.

Pennsylvania—Pennsylvania Lines West of Pittsburgh—According to press reports, this company contemplates an expenditure of $500,000 for doubling the capacity of its yards at Midland, Penn. Thomas Rodd, Pittsburgh, is Ch. Engr.

Virginia—Southern Ry.—This company, it is reported, is receiving bids for the construction of a second track from Orange to Charlottesville, Va., about 28 miles. W. H. Wells, Washington, D. C., is Ch. Engr. Constr.

Florida—Palm Beach & Everglades Ry.—This company has applied for a charter to construct a 40-mile railway from Palm Beach to Lake Okeechobee. James A. Moore, Hotel Halcyon, Miami, is Gen. Mgr.

Florida—According to press reports, the Dowling-Shands Lumber Co. is interested in the construction of a railway from Green Cove Springs to Starke, Fla., about 25 miles.

✚Mississippi—Meridian & Memphis Ry.—This company has awarded a contract to the PURDUE CONSTRUCTION CO. for the extension of its railway from Union to Sebastopol, Miss., about 15 miles. S. A. Neville, Meridian, Miss., is Vice-Pres.

Wisconsin—Waushara County R.R.—This company has been incorporated to construct a railway from Poysippi and Red Granite, Wis., about 8½ miles. The incorporators are Richard Frank, J. E. Wendt, O. W. Strapp and O. L. Christofferson.

Wisconsin—Montana-Waumandee Ry.—This company, recently organized, is making surveys for its proposed railway which will extend from a point on the Chicago, Burlington & Quincy R.R. through Waumandee to Montana, Wis. H. G. Hawley, Waumandee, Wis., is Ch. Engr. Noted Dec. 17.

Kansas—Kansas & Oklahoma Southern Ry.—This company is making financial arrangements for the completion of its 61-mile extension from Caney, Kan., to Vinita, Okla.

South Dakota—Chicago & Northwestern Ry.—Plans are being made by this company to start work in the spring on the extension of its line from Winner, S. D., through Tripp County into Mellette County. W. H. Finley, Chicago, Ill., is Ch. Engr.

Oklahoma—Kansas & Oklahoma Southern Ry.—See item under Kansas.

Arizona—Magma-Arizona R.R.—This company is being organized for the purpose of constructing a railway from the works of the Magma Copper Co., Superior, Ariz., to Queen Creek and Webster Siding.

Washington—Vancouver Northern R.R.—Henry Grass and O. W. Ford, Vancouver, Wash., are interested in this company, which was recently organized for constructing an electric railway from Vancouver, Wash., to Portland, Ore.

Ontario—The Canadian Northern Ry. and the Canadian Northern Ontario Ry. have applied for an extension of time in which to extend and construct branch lines. The proposed lines are as follows: From Strathcona, Alta., to Calgary, from near Swan River to the Saskatchewan River, from Regina, Sask., to Red Deer River, from Regina to Elbow, from Winnipeg, Man., to the eastern and southern boundaries of Manitoba; in Ontario, from Washago to Kincardine, Armprior to Gananoque, Pembroke to Cobourg, Frenchman's Bay to Owen Sound, Niagara River to Goderich, Hawkesbury to Leeds or Lanary County, Parry Sound to North Bay, Berlin to Toronto, Berlin to Woodstock, Sarnia to Chatham and Orillia to Goderich. M. H. McLeod, Winnipeg, Man., is Ch. Eng. of the Canadian Northern and A. F. Stewart, Toronto, Ont., is Ch. Engr. of Canadian Northern Ontario.

ELECTRIC RAILWAYS

Penacook, N. H.—(Concord post office)—The citizens of Penacook and Boscawen are considering the extension of an electric railway from Penacook to Boscawen Plains.

Newbury, Mass.—(Newburyport post office)—The Massachusetts Northwestern St. Ry. Co. has applied to the City Council for a franchise to construct an electric railway in Newbury to Parker River pavilion.

Worcester, Mass.—The Worcester Consolidated St. Ry. plans to double track its line on Pleasant St., from Richmond to Moore Ave., with a possible view of extending the double tracks to Tatnuk Sq.

Hartford, Conn.—The Norwich, Colchester & Hartford Traction Co. has been incorporated to construct an electric railway to connect Norwich, Bozah, Lebanon, Colchester, Marlborough, Glastonbury and East Hartford. The incorporators include Frank Cronin, Arthur Manning and Wells Strickland.

Thompsonville, Conn.—The Hartford & Springfield St. Ry., Hartford, Conn., intends to introduce into the incoming legislature a bill to amend its charter as to secure the privilege of building a branch line to connect Thompsonville and Suffield. The plan is to build a line from the local wating station through Main St., Thompsonville, and across the Connecticut River to unite with the present Suffield railway at a point on Mapleton Ave., about three miles.

Morristown, N. J.—Bondholders of the New Jersey & Pennsylvania R.R., represented by Benjamin Paskus, plan to purchase the road, running from Whitehouse to Watnong. About $10,000 will be expended to place the line in operation. An extension of the line into Morristown is contemplated.

Leisenring, Penn.—The West Penn Traction Co. contemplates extending its electric railway from Leisenring to Uniontown.

Newport News, Va.—The City Council has granted a franchise to the Newport News & Hampton Ry., Gas & Electric Co., to extend its line down Jefferson Ave. to the municipal boat harbor.

Parkersburg, W. Va.—The Marietta-Parkersburg Interurban Co. has been incorporated to construct a ten-mile electric railway from Parkersburg, W. Va., to Marietta, Ohio. The incorporators are John Kaiser, C. C. Middleswart and M. M. Rose, Marietta, Ohio, and H. H. Archer, Kenner B. Stephenson, Parkersburg.

Charleston, S. C.—The Charleston Consolidated Ry. & Lighting Co. is considering plans for the construction of a electric railway from the United States Navy Yard to Nort Charleston. George H. Waring, Charleston, is Vice-Pres. an Gen. Mgr.

Lula, Ga.—The Lula-Homer Ry. Co. has completed plans for the construction of a railway from Lula to Homer, abou 14 miles. D. G. Zeigler & Sons, Lula, are interested. Note Oct. 15.

Birmingham, Ala.—The Birmingham Ry., Light & Powe Co. has applied to the City Council for a franchise to construct an electric railway from the intersection of Fifteenth Ave., S., and 20th St., S., to Key Circle in the Milner Land Co.'s new division in Birmingham. J. P. H. de Windt, Birmingham, is Gen. Mgr.

Louisville, Ky.—The Louisville Ry. plans to reconstruct its West Chestnut St. line, crossing over to Madison St. and extending west to Shawnee Park, a distance of about one mile.

Columbus, Ohio—The East Linden Electric Ry. Co. contemplates the construction of an electric railway from Leonard Ave., Columbus, to East Linden, about four miles.

Evansville, Ind.—The Public Utilities Co. contemplates the Bell St. extension for a distance of about two miles.

Coffeyville, Kan.—The Union Traction Co. plans to extend its lines.

Salina, Kan.—The Salina St. Ry. plans to build a double track line to the New Union Station.

Beaumont, Tex.—The Houston & Beaumont Interurban Ry. Co. is considering plans for the construction of an electric railway to connect Beaumont, Houston and Anahuac. Anson Miller, G. L. Tufts and L. W. Schwartz, Anahuac, are interested.

Marshall, Tex.—A. B. Blivens and assoicates have applied to the City Council for a franchise to construct an electric railway through Marshall. This is part of a proposed line to connect Marshall, Tex., and Shreveport, La.

Medford, Ore.—Plans are being prepared by the Southern Oregon Traction Co., for the extension of its electric railway in Medford. C. G. Bullis, Medford, is Secy. and Gen. Mgr.

Montreal, Que.—The Montreal Tramways Co. has applied for a franchise to construct an electric railway in Mount Royal. J. E. Hutcheson, Montreal, is Gen. Mgr.

LIGHT, HEAT AND POWER

South Hadley Falls, Mass.—At a recent special meeting, the Board of Selectmen voted to appropriate $40,000 for the purpose of equipping the municipal electric-light plant to generate its own energy, which has heretofore been purchased from the Amherst Power Co.

New York, N. Y.—(Borough of Brooklyn)—Bids will be received until Jan. 25, by C. B. J. Snyder, Supt. of School Buildings, Park Ave. and 59th St., for electrical equipment for new Public School 95, Van Sicklen St. and Neck Rd., Brooklyn.

New York, N. Y.—(Borough of Manhattan—(Official)—Bids will be received until noon, Jan. 29, by the Board of Trustees, Bellevue and Allied Hospitals, 26th St. and First Ave., for reconstructing the existing branch circuits of the electric lighting systems, additional gas piping and gas and electric fixtures for the main building of the Harlem Hospital, 136th and 137th St. and Lenox Ave., Borough of Manhattan. John W. Brannan, M. D., is Pres., Bd. of Trustees.

New York, N. Y.—(Borough of Brooklyn)—(Official)—Bids will be received until 3 p.m., Jan. 25, by C. B. J. Snyder, Supt. of School Buildings, Park Ave. and 59th St., for heating and ventilating apparatus and temperature regulation in additions to and alterations in Public School 36, on Stagg and Ten Eyck St., between Bushwick Ave. and Waterbury St., Borough of Brooklyn.

Allenhurst, N. J.—Press reports state that Joseph B. Rider, 29 Broadway, New York, N. Y., is preparing plans for an electric-light plant to be built in Allenhurst.

Perth Amboy, N. J.—The Board of Alderman has passed an ordinance for issuing $150,000 in bonds to be used for the construction of a municipal electric-light plant, for which the citizens voted at the November election. S. J. Mason is City Engr. Noted Nov. 19.

Bath, Penn.—It is reported that the Borough Council is considering plans for the establishment of a municipal electric-light plant.

Holmesburg, Penn.—The lowest bid received by the Department of Public Health and Charities, Philadelphia, for the construction of a power plant at the Home for the Indigent, Holmesburg, was that of W. W. Austin at $56,537. Bids were opened Jan. 12. Noted Dec. 3 and Jan. 7.

Philadelphia, Penn.—The Philadelphia Dye Works has had plans prepared by W. E. S. Dyer, Land Title Bldg., for the construction of a one-story brick power plant and boiler house at Hancock and Berks St. The equipment will include boilers, generators, motors, stacks, etc.

Grundy, Va.—The City Council contemplates the installation of a municipal electric-light plant. It is further reported that an ice factory will be built in connection with the electric plant.

Fremont, Mich.—At a recent special election, the citizens voted to grant a franchise to the Grand Rapids-Muskegon Power Co., Grand Rapids, to supply electricity in Fremont. It is reported that this company will take over the municipal plant of Fremont at $13,000. S. A. Freshney, Grand Rapids, is Mgr. of the Grand Rapids-Muskegon Co.

Hillsdale, Mich.—The City Council has authorized the Board of Public Works to install a new 350-hp. water-tube boiler with stoker and equipment in the municipal electric-light plant, replacing the present 80-hp. boiler. The estimated cost of the new boiler is $7500. J. C. Hanson is Mgr., Cont. Agt. and Supt. of the plant.

Saginaw, Mich.—The City Council has been petitioned to call a special election for Feb. 23, to vote on the question of issuing $750,000 in bonds to be used in constructing a municipal electric-light plant. Noted Aug. 13, Oct. 15 and Jan. 7.

Rochester, Ill.—It is reported that the R. Haas Electric & Mfg. Co., Springfield, Ill., has applied to the Village Board for a franchise to build and operate an electric-light plant in Rochester for a period of 20 years.

Oregon, Wis.—It is reported that the installation of a municipal electric-light plant for Oregon is being considered.

Rushmore, Minn.—An electric lighting system is being installed in Rushmore, for which the energy will be obtained from the municipal power plant at Worthington, ten miles distant. A 6600-volt transmission line is now being constructed to supply the service.

Alliance, Neb.—It is reported that the Gas Construction Co. will build a gas plant at Alliance, to cost about $40,000. J. C. Martin, Omaha, is representative of the company.

Trent, S. D.—At a recent special election, the citizens voted in favor of granting a 25-year franchise to the Flandreau Light & Power Co., Flandreau, to furnish electric lights for the town.

Vermilion, S. D.—It is reported that the City Commissioners are considering the matter of purchasing the electric-light plant owned by the Vermilion Milling & Electric Co., to be owned and operated as a municipal plant.

Lusk, Wyo.—At a recent special election, the citizens voted in favor of issuing $8000 in bonds to be used for the installation of a municipal electric-light plant.

University Station, Mo.—(St. Louis post office)—It is reported that a special election will soon be held to vote on the question of issuing $100,000 in bonds to be used for the construction of a municipal electric-light plant with underground conduits. August Henman is Mayor.

San Angelo, Tex.—It is reported that the San Angelo Car Co. will build a new power station, and construct extensions to its lines. J. D. Sugg is owner.

Yale, Okla.—See item under "Water Supply—Irrigation."

Pueblo, Colo.—It is reported that the question of issuing $80,000 in bonds, the proceeds to be used for the construction of a municipal electric-light plant, will be submitted to the voters at the spring election.

Alturas, Calif.—The Union Gas Co., recently organized with a capital of $75,000, plans to build a gas plant at Alturas, and another one at Susanville, Calif. R. R. Rice and J. McCosh Smith are interested.

+Longbeach, Calif.—The City Trustees have awarded the contract for the installation of an electric-lighting system in the district bounded by Broadway, Alamitos, Golden and Ocean Ave. to the WOODILL & HULSE ELECTRIC CO., 111 East Third St., Los Angeles, at $25,415.

Dundalk, Ont.—It is reported that plans will be prepared and bids asked soon for the construction of a new municipal electric-light and power plant. M. W. Ridley, Dundalk, is in charge of the work.

Shelburne, Ont.—The ratepayers have voted in favor of an appropriation to purchase plant and equipment for distributing electric power. The estimated cost of the work is $14,920. Thomas Whalley is Town Clk.

BRIDGES

Greenfield, Mass.—Plans have been prepared for a reinforced-concrete bridge, to cost about $6500, over the Green River, at the site of the present Wiley and Russell Bridge. Eugene B. Blake, William A. Davenport and Frederick E. Hawks form the Committee in Charge.

Central Falls, R. I.—(Official)—Plans submitted by Howard F. Esten, Consult. Engr., 18 East Ave., Pawtucket, R. I., for the construction of a bridge over the Blackstone River between the City of Central Falls and the Town of Cumberland, were accepted by the Bridge Commission. Bids will be advertised for the construction of the bridge within the next ten days. Noted June 18 and 25, Oct. 1.

Waterbury, Conn.—Plans are being prepared by Robert A. Cairns, City Engr., for a bridge over the Naugatuck River at Bank St. The bridge will be 54 ft. wide and 180 ft. long, one span of 60 ft. and two of 50 ft. each. Reinforced concrete, stone masonry and steel spans are being considered. The estimated cost is $75,000.

Harrisburg, Penn.—Press reports state that the Cumberland Valley R.R., a part of the Pennsylvania system, will shortly begin construction of a reinforced-concrete bridge to replace its present steel bridge over the Susquehanna River at Harrisburg. T. B. Kennedy, Chambersburg, Penn., is Ch. Engr. Noted Jan. 1 and 15, Apr. 16, 1914.

+★Pittsburgh, Penn.—The Department of Public Works has awarded the contract for the construction of the steel superstructure of the Sylvan Ave. Bridge to the McCLINTIC-MARSHALL CONSTRUCTION CO., Pittsburgh, at $44,725. Robert Swan is Dir. of Pub. Wks. Noted Dec. 10.

Covington, Va.—The Circuit Court of Alleghany County has rejected all bids received Jan. 4 for the construction of a 100-ft. steel or reinforced concrete bridge over Dunlaps Creek about 5½ miles from Alleghany. The contract will probably be readvertised. Noted Dec. 24.

Richmond, Va.—(Official)—Bids will be received until 11 a.m., Jan. 28, by the State Highway Commission for the construction of a reinforced concrete bridge over the Chickahominy River about three-quarters of a mile from Ellerson, between Henrico and Hanover Counties. G. P. Coleman is State Highway Comr.

Bradentown, Fla.—Bids will be received until 7 p.m., Jan. 22, by W. H. Tracy, Comr. of Pub. Wks., for the construction of a Scherzer rolling lift bridge. Bids will also be received on alternate plans prepared by the bidder. All bids received, Dec. 11, for this work were rejected. Noted Dec. 10 and 24.

+Fort Lauderdale, Fla.—The Board of Commissioners of Dade County has awarded the contract for the construction of a bridge across the New River at Fort Lauderdale to the CHAMPION BRIDGE CO., Wilmington, Ohio, at $22,000. Noted July 23, Aug. 20, Oct. 22, Nov. 19 and Dec. 24.

Cordova, Ala.—It is reported that the Board of Commissioners of Walker County, Jasper, has decided, in connection with the improvement of the Birmingham-Jasper Highway, to build a steel bridge over the Warrior River at Cordova, to cost from $25,000 to $40,000. Noted May 19, 1914.

Montgomery, Ala.—The Commissioners of Montgomery County, Montgomery, and of Elmere County, Wetumpka, plan to build a bridge across the Tallapoosa River, to cost about $50,000. The cost will be shared equally by the two counties.

+Lake Charles, La.—The Police Jury of Calcasieu Parish has awarded the contract for the construction of 60 bridges and culverts on various highways to HARRISON & BALM, Memphis, Tenn., at about $40,000. F. H. Frankland is Bridge Engr. Noted Dec. 24.

Clinton, Tenn.—The Anderson County Court has voted to build three bridges over the Clinch River, two to be located at Clinton and the other at Edgemoor.

Harriman, Tenn.—The Commissioners of Roane County, Kingston, are considering the construction of a bridge over the Emory River to connect Harriman and South Harriman.

Memphis, Tenn.—The Memphis & Arkansas Railway Bridge & Terminal Co. announces that financial arrangements for resuming work on the superstructure of its bridge over the Mississippi River have been completed, and it hoped that the structure may be completed by the end of this year. Noted Aug. 15 and 29, 1912; June 26, 1913, and Mar. 19, 1914.

+Nashville, Tenn.—The Louisville & Nashville R.R. has awarded the contract for the construction of a 150-ft. reinforced-concrete bridge over the Franklin Pike south of Nashville, to the MEACHAM CONTRACTING CO., Nashville.

★Chicago, Ill.—(Official)—The following bids were received, Jan. 14, by the Sanitary District of Chicago for the steel superstructures of two highway bridges over the Calumet Sag Channel, (a) West 82nd St. Bridge, (b) Burr Oak Ave. Bridge: Central States Bridge Co., Indianapolis, Ind., (a) $4574, (b) $15,950; Lackawanna Bridge Co., Buffalo, N. Y., (a) $4306, (b) $14,467; Milwaukee Bridge Co., Milwaukee, Wis., (a) $4180, (b) $12,744; Chicago Bridge & Iron Co., (a) $3780, (b) $11,550, (probably awarded contract): Toledo Bridge & Crane Co., Toledo, Ohio, (a) $3898, (b) $13,400; Penn Bridge Co., Beaver Falls, Penn., (a) $4785, (b) $14,985; Fort Pitt Bridge Works, Pittsburgh, Penn., (a) $4190, (b) $13,100; Klemp, Simpson & Co., (a) $4879, (b) $15,275; Wisconsin Bridge & Iron Co., (a) $4495, (b) $13,760; McClintic-Marshall Co., Pittsburgh, (a) $4500, (b) $14,030; King Bridge Co., Cleveland, Ohio, (a) $4400, (b) $12,950; Strobel Steel Construction Co., (a) $4950, (b) $14,646; Hansell Elcock Co., (a) $3970, (b) $12,450; Kenwood Bridge Co., (a) $4004, (b) $14,004; Morava Construction Co., (a) $4253, (b) $13,445; American Bridge Co., (a) $4697, (b) $14,493. All bidders of Chicago unless otherwise stated. Noted Jan. 7.

Colona, Ill.—Plans have been completed for the construction of a bridge over the Rock River at Colona, to cost approximately $60,000, of which Rock Island and Henry Counties will each pay one-half. The bridge will be of the deck girder type, 20 ft. wide and about 760 ft. long. It is said that the plans will be finally approved at the March meeting of the county boards, after which bids will be asked for the construction of the bridge. Wallace Treichler, County Supt. of Highways, Rock Island, is Engr.-in-Charge.

Greenville, Ill.—Bids will be received until 11 a.m., Jan. 26, by the Town Clerk for a reinforced concrete bridge in Central Township, Bond County. The estimated cost is $6450. R. O. Young, Sorento, is Supt. of Highways of Bond County.

Pontiac, Ill.—It is reported that the Commissioners of Livingston County plan to build a new concrete bridge over the Vermillion River about three miles from Pontiac. The estimated cost is $10,000. R. W. Osborn is County Supt. of Highways.

Superior, Wis.—The Board of Public Works is receiving bids for repairs to the Lamborn Ave. Bridge. R. E. McKeogue is City Clk.

Superior, Wis.—Tentative plans have been prepared by E. B. Banks, City Engr., for the construction of a viaduct over the railway tracks at 21st Ave. The estimated cost of the structure is $89,000. It is expected that construction work wil begin in the early summer.

Mason City, Iowa—According to press reports, bids will be received in February by the Board of Supervisors of Cerro Gordo County for the construction of a concrete deck girder bridge over Calmus Creek on North Main St., to cost about $4500; bids will also be received for a number of small bridges, estimated total cost, $20,000. R. E. Robertson is County Engr.

Salina, Kan.—(Official)—Bids will be received until Feb. 2, by the Board of Commissioners of Saline County for the construction of a concrete bridge over the Smoky Hill River at Iron Ave., Salina. The estimated cost is $30,000. A. C. Anderson is County Clk. Wilmarth & Zerbe, Salina, are Engrs.-in-Charge. Noted Aug. 27, Nov. 12 and 26, Dec. 31.

Ayr, Neb.—It is reported that the Commissioners of Adams County, Hastings, have decided to build a bridge over the Little Blue River, south of Ayr. It will be about 250 ft. long.

Omaha, Neb.—The Boards of Commissioners of Douglas and Saunders Counties, acting jointly, have filed a request with the State Engineer for a state aid bridge over the Platte River about 1½ miles south of Yutan, Saunders County. The request is for a steel bridge. The estimated cost is $50,000.

Miller, S. D.—(Official)—The Board of Commissioners of Hand County has rejected all bids received, Jan. 8, for the construction and repair of county bridges during 1915. D. A. Lewis is County Audr. Noted Nov. 26.

+Livingston, Mont.—The Board of Commissioners of Park County has awarded the contract for the construction of a steel bridge at H St. to the MINNEAPOLIS STEEL & MACHINERY CO., Minneapolis, Minn., at $6500.

Austin, Tex.—Press reports state that the city has had plans prepared by G. S. Iredell, Engr., for a reinforced concrete bridge over Shoal Creek at 10th St. It will be 28 ft. wide with two spans of 36 ft. each. The estimated cost is $4000.

Tucumcari, N. M.—The Board of Commissioners of Quay County has requested Junius W. Johnson, Asst. State Engr., to prepare plans for a pile bridge across Tucumcari Creek, about 18 miles from Tucumcari. These plans will be considered at the next meeting of the Board.

✚Twin Falls, Idaho—The Board of Commissioners of Twin Falls County has awarded the contract for the construction of a bridge over the Snake River near Murtaugh, to J. H. FORBES & CO., Caldwell, Idaho, at $5946. Noted Oct. 15.

✚Hoquiam, Wash.—The Northern Pacific Ry. has awarded the contract for the superstructure of a bridge over the Hoquiam River to McCREARY & WILLARD, Spokane, Wash. The work includes a 256-ft. steel draw span, a 70-ft. truss span and 90-ft. decking. Noted Dec. 24.

Seattle, Wash.—Bids will be received until 10 a.m., Jan. 25, by N. M. Wardell, Clk. Bd. of Comrs. of King County, for the construction of a bridge at 14th Ave. South.

Seattle, Wash.—(Official)—The approximate quantities required for the 15th Ave. Bridge over the Lake Washington Canal include 7000 cu.yd. concrete masonry, 1500 tons structural steel, 100 tons machinery, 3000 lin.ft. pile and timber trestle. The cost is estimated at $465,000.

From another source we learn that the Supreme Court of the State of Washington has recently decided that the bond issue of $829,000 for the construction of the Lake Washington Canal bridges was invalid, so it is improbable that bids for the work can be asked for some time. Noted Dec. 3 and 10, Jan. 7.

Tacoma, Wash.—The Chicago, Milwaukee & St. Paul Ry. has filed its application with the City Council for the permanent vacation of East T St., where the company will build a steel bridge about 150 ft. long, to cost about $50,000. E. O. Reeder, Seattle, is Asst. Ch. Engr.

✚Fredericton, N. B.—The Minister of Public Works has awarded contracts for the construction of two bridges in Queens County to W. R. FAWCETT, Temperance Vale, N. B., and ROBERT FORBES, Gibson, N. B., at approximately $3000 each.

London, Ont. — The ratepayers of the city have voted against a bylaw providing for the construction of a $40,000 bridge across Richmond St.

Regina, Sask.—The Board of Railway Commissioners has authorized the Works Department of the City Council to have plans prepared for the construction of a bridge over the Canadian Pacific Ry. tracks at Hamilton St. The plans are to be approved by the Bridge Engineer of the Canadian Pacific Ry. and the Railway Commissioners. F. McArthur is Engr. Noted July 30, 1914.

Vancouver, B. C.—The Railway Board of Commissioners has authorized the Kettle Valley Ry. to build three new bridges over the Coquihalla River. A. McCulloch, Penticton, B. C., is Ch. Engr.

Vancouver, B. C.—The Great Northern Ry. has filed plans with the City Engineers for the Clark Drive and Woodland Drive bridges over the Grandview cut, and for approach to the Commercial Drive Bridge from Eighth Ave. The estimated cost of this work is $350,000.

The Asbestos Protected Metal Co. announces that on Feb. 1 1915, the general offices of company, including the executive, accounting, sales and engineering staffs, will be moved from Beaver Falls to the First National Bank Bldg., Pittsburgh. The manufacturing operations of the company will continue as heretofore, at Beaver Falls, Penn. and at Waltham, Mass.

The Socorro Mining & Milling Co. has been granted an extension until Jan. 25, 1917, by James A. French, State Engr., Santa Fé, N. M., for the completion of the hydro-electric plant to supply power to mines and mills in the Mogollon district, Socorro County, N. M. Work upon this plant has already been in progress almost three years, and about $90,000 has been spent. About $90,000 more will be required to complete the plant. It is planned to develop about 1000-hp. at the beginning, of which the larger part will be required by the Socorro Mining & Milling Co. Oil engines are now being used to develop power, and the operating expenses are high, due to the great expense of transporting oil from Silver City, 90 miles distant.

A Contract has been placed with the S. Morgan Smith Co., York, Penn., for two 45-in. vertical wicket gate wheels for the Bangor Water Works, Bangor, Maine. The power developed by these wheels is to be used to run motors in connection with the water system. The electrical equipment will be furnished by the General Electric Co.

CONTRACT PRICE

State Highways—California—Bids were received by the State Highway Commission, Sacramento, Calif., for constructing highways in Sutter, Los Angeles, Siskiyou and Orange Counties, from (A) Tyler & Berliner, Los Angeles; (B) Chico Construction Co., Chico; (C) P. L. Burr, San Francisco; (D) Tieslau Bros., San Francisco; (E) L. F. Gerdetz, San Francisco; (F) C. H. & A. W. Gorrill, San Francisco; (G) Bates, Borland & Ayer, Oakland; (H) Whitlock & Gorrill, San Francisco; (I) E. T. Johnson, Portland, Ore.; (J) Forest City Paving & Construction Co., San Francisco; (K) F. A. Keasal, San Francisco; (L) Robert Sherer, Los Angeles; (M) Chadwick & Sykes, Inc., San Francisco; (N) Lynn S. Atkinson, Los Angeles; (O) De Moor Construction Co., Los Angeles; (P) A. C. Construction News

★Denotes work advertised in ENGINEERING NEWS.
✚Denotes contract awarded. The names of bidders awarded contracts are set in CAPITALS.

RAILWAYS

New York—Grasse River R.R.—This company has obtained a new charter to construct a railway to connect its present line at Cranberry Lake with the St. Lawrence and Adirondack divisions of the New York Central R. R. William T. Turner, Utica, Evan T. Jones, Bradford, Penn., and Walter P. Coaker, Buffalo, are Dirs.

Pennsylvania—Unity Rys.—This company has been incorporated to construct a railway in Allegheny and Westmoreland Counties. Boyer, Jones & Morton, Pittsburgh, Penn., are Attorneys for the company.

✚Virginia—Southern Ry.—Contracts for second track work have been awarded by this company to the MORROW CONSTRUCTION CO., Atlanta, Ga., from Orange to Burnley, Va., about 15 miles, and to C. W. LANE & CO., Atlanta, Ga., from Burnley to Charlottesville, about 13 miles. Noted Jan. 21.

Louisiana—Arkansas, Louisiana & Gulf Ry.—This company is being organized to construct a railway from Monroe, La., to Monticello, Ark.

Tennessee—Jellico, Capachins & Western R.R.—This company is being organized to construct a railway, about 30 miles long, in eastern Tennessee, west of Jellico, Tenn.

Illinois—Burlington, Mississippi River & Northern R.R.—This company is being organized for the purpose of constructing a railway from a point near Arpee to Milan, Ill., to connect with the Chicago, Rock Island & Pacific Ry. Wentworth Holmes, Joy, Ill., is interested.

✚Wisconsin—Wisconsin & Northern R.R.—This company has awarded a contract to PETER NELSON & CO., Temple Court, Minneapolis, Minn., for grading its proposed line, from a point about five miles north of Van Ostrand, to Crandon, Wis.

Arkansas—Arkansas, Louisiana & Gulf Ry.—See item under Louisiana.

✚Utah—Union Pacific R.R.—The CHRISTENSEN CONSTRUCTION CO., Salt Lake City, Utah, has been awarded a contract by this company for double-tracking its line from Ogden to Gateway Bridge in Weber Cañon. Noted Nov. 26.

Utah—Union Pacific R.R.—Press reports state that this company is making preliminary surveys for the construction of a railway from a point on the main line in Wyoming to Park City, Utah. R. L. Huntley, Omaha, Neb., is Ch. Engr.

ELECTRIC RAILWAYS

Meriden, Conn.—The Connecticut Co. contemplates the construction of an electric railway on Capitol Ave., from Main to Lockwood St., in Meriden. Robert P. Lee, Meriden, is Supt.

New Haven, Conn.—The Connecticut Co. has applied to the City Council for a franchise to construct an electric railway on Whaley Ave. to the New Haven County property. F. P. Harlan, New Haven, is Mgr.

Monaca, Penn.—A company is being organized to construct an electric railway from Monaca to Coraopolis. John W. Reid, John J. Allen, D. J. Mitchell, Edward Thomas and H. L. Grimmell are interested.

✚Andrews, N. C.—According to press reports the Hiawassee Valley Ry. Co. has awarded a contract to R. L. HERBERT, for constructing an electric railway from Andrews, N. C., to Hiawassee, Ga., about 35 miles. Noted Mar. 5 and Aug. 6.

Columbia, S. C.—Plans are being prepared by the Columbia Ry., Gas & Electric Co., for the reconstruction of its line on Elmwood Ave. Alfred Wallace, Columbia, is Gen. Mgr. and Pur. Agt.

Birmingham, Ala.—The Milner Land Co. has applied to the City Council for a franchise to construct an electric railway from 15th Ave. and 20th St. to Key Circle, in the company's new division. Henry Key Milner is Pres.

Gadsden, Ala.—The Alabama City, Gadsden & Attala Ry. is considering plans to lay new track and build a loop in Gadsden. C. J. Zell, Gadsden, is Gen. Mgr. and Supt.

Shreveport, La.—The Texas-Louisiana Traction Co. contemplates constructing a line from Shreveport to Marshall. A. B. Blevins, Jefferson, is Pres.

Chattanooga, Tenn.—The Chattanooga Traction Co. plans to construct about 20 miles of new track in Chattanooga, during 1915. W. T. Jones, Chattanooga, is Vice-Pres. and Gen. Mgr.

Akron, Ohio—The Northern Ohio Traction & Light Co. plans to construct 2.67 miles of new track this year. Charles Currie, Akron, is Vice-Pres. and Gen. Mgr.

Hobart, Ind.—The Gary, Hobart & Eastern Traction Co. contemplates the construction of 12 miles of new track to connect Glen Park, New Chicago and Hobart. B. J. Schramm, Hobart, is Gen. Supt. and Pur. Agt.

Carbondale, Ill.—The Murphysboro & Southern Illinois Ry. Co. has been granted a franchise to construct an electric railway through Carbondale. This is part of a proposed line to connect Carbondale and Murphysboro, about 12 miles. A. B. Minton, Murphysboro, is Pres. Noted Nov. 19.

Cedar Rapids, Iowa—The Cedar Rapids & Marion City Ry. Co. is preparing plans for the construction of about four miles of new track in Cedar Rapids. E. C. Allen, Cedar Rapids, is Secy. and Gen. Mgr.

Iowa City, Iowa—The Mississippi Valley Electric Co. plans to construct 1½ miles of new track this year. J. O. Schulze is Pres. and Gen. Mgr.

Moberly, Mo.—The Moberly, Huntsville & Randolph Springs Ry. Co. plans to start shortly the construction of its line connecting Randolph - Springs, Moberly and Huntsville. Charles H. Dameron, Huntsville, is Pres.

St. Louis, Mo.—The United Rys. Co. of St. Louis contemplates extending its Lee St. line on Taylor Ave. to the city limits. Robert McCulloch, St. Louis, is Pres. and Gen. Mgr.

Dallas, Tex.—L. C. Bradley, representative of the Stone & Webster Engineering Corporation, Boston, Mass., has announced that the company will construct an interurban electric railway from Dallas to Terrell.

Guthrie, Okla.—The Oklahoma Ry. Co. is making preliminary arrangements for the construction of an extension from Edmond to Guthrie, about 17 miles. George W. Knox, Oklahoma, is Vice.-Pres. and Gen. Mgr.

Twin Falls, Idaho—Plans are being prepared by the Sandpoint & Interurban Ry. Co. for the construction of an electric railway from Shoshone Falls to Twin Falls, about five miles. A. Filson, Sandpoint, is Pres., Gen. Mgr. and Pur. Agt.

Los Angeles, Calif.—Plans are being prepared by the Pacific Electric Ry. Co. for the extension of its lines on the East Side, Los Angeles, to Eighth St., Riverside. J. McMillan, Los Angeles, is Gen. Mgr.

Riverside, Calif.—The Riverside, Rialto & Pacific Ry. Co. has been incorporated to construct an electric railway to connect Riverside, Bloomington and Rialto, about ten miles. W. G. Henshaw, William Lees, William H. Metcalf and Henry Chickering are the incorporators.

San Jose, Calif.—The San Jose Terminal Ry. Co. has applied to the City Council for an extension of time on its franchise to construct an electric railway in the northern section of San Jose.

LIGHT, HEAT AND POWER

Greenville, Maine—The Public Utilities Commission has granted the Greenville Light & Power Co. permission to purchase the properties and franchises of the Sangerville Improvement Co., the Sebec Power Co., and the Dover & Foxcroft Light, Heat & Power Co. Louis M. Galusha, Greenville, is Mgr. of the Greenville Light & Power Co.

Waltham, Mass.—It is reported that the Trustees of the Waltham Hospital have recommended the installation of a power plant to furnish light, heat and power for the hospital buildings.

✚★New Britain, Conn.—(Official)—The following contracts were awarded, from bids opened Jan. 20, in connection with the construction of the new vocational High School on Bassett St.: Plumbing and electrical work, HANLON & MURPHY, Hartford, at $6000 and $2032, respectively; heating and ventilating, LIBBY & BLINN, Hartford, $11,725. Walter P. Crabtree, 272 Main St., New Britain, is Arch. Noted Nov. 12 and 26, Jan. 14.

Rockville, Conn.—Press reports state that the Rockville Gas & Electric Co. is considering the extension of its transmission lines from Rockville to Vernon Center to furnish electricity to that section. M. J. Cullen, Rockville, is Cont. Agt.

★Binghamton, N. Y.—(Official)—Bids were opened Jan. 21, by the State Hospital Commission, Albany, for heating, plumbing and drainage, electrical work, and boiler and stack for the new building for chronic patients at the Binghamton State Hospital. The following are the three lowest bids for each division of the work. Heating: Gaylord Engineering & Construction Co., Binghamton, $19,823; R. T. Ford Co., Rochester, $19,737; George H. Drake, Buffalo, $19,836. Plumbing and drainage: Burns Bros., Syracuse, $13,426; Peter Keeler Building Co., Albany, $13,122; P. J. Sullivan Co., Inc., Syracuse, $14,866. Electrical work: Watson-Flagg Engineering Co., New York, $6428; S. G. Waterman, 817 Broadway, New York, $6643; New York Construction Co., New York, $6315. Boiler and stack: Flood & Van Wirt Co., Hudson Falls, $19,500; R. T. Ford Co., $19,800; Peter Keeler Building Co., $19,922. Noted Jan. 7.

✚★Lockport, N. Y.—(Official)—The Board of Education has awarded the contract for plumbing, heating and ventilating systems in the Lockport Union School, recently enlarged and improved, to MAPES & PAYNE, Lockport, at $5700 for the plumbing, and $12,640 for the heating and ventilating work.

New York, N. Y.—(Borough of Brooklyn)—(Official)—Bids will be received until 3 p.m., Feb. 1, by C. B. J. Snyder, Supt. of School Bldgs., Park Ave. and 59th St., Borough of Manhattan, for electrical equipment in new Public School 50, Driggs Ave. and South Third St., Borough of Brooklyn.

New York, N. Y.—(Borough of Brooklyn)—(Official)—Bids will be received until 10:30 a.m., Feb. 8, by the Department of Public Charities, Room 1091, Municipal Bldg., Borough of Manhattan, for installing new steam lines for carrying exhaust steam from the Kings County Hospital, Borough of Brooklyn. John A. Kingsbury is Comr. of Pub. Charities.

New York, N. Y.—(Borough of Queens)—(Official)—Bids will be received until 3 p.m., Feb. 1, by C. B. J. Snyder, Supt. of School Bldgs., Park Ave. and 59th St., Borough of Manhattan, for electrical equipment in new Public School 91, Central Ave., between Folsom and Fosdick Ave., Glendale, Borough of Queens.

New York, N. Y.—(Borough of Queens)—(Official)—Bids will be received until 3 p.m., Feb. 4, by the Park Board, Municipal Bldg., Borough of Manhattan, for heating system for the Administration Building, Forest Park, Borough of Queens. Cabot Ward is Pres. of the Park Bd.

Watertown, N. Y.—Horace Sweet, Consult. Engr., Utica, N. Y., has submitted a report estimating the cost of installing a municipal plant for street lighting at $109,756. Plans provide for setting the water wheels in the power house, and constructing a new distributing system to maintain the same number of lamps now used. The existing contract between the city and the Watertown Light & Power Co. allows the city to take over the present street-lighting system for $63,892

Hackettstown, N. J.—Bids for heating and ventilating systems in the new school were opened by the Board of Education, Jan. 21, as follows: E. C Woolfolk & Co., New York, N. Y., $8269; John H. Cooney, Harrison, N. J., $8287; M. J. Salaban, $8555; Alvard & Smith, New York, $8652; Osmun & Co., $10,292; R. A. Cook, $12,059 for "Monarch" system.

Newark, N. J.—It is reported that the Public Service Electric Co. will build a new sub-station for transformer service at Ave. R and Haynes Ave.

Allentown, Penn.—Bids will be received until Feb. 10, by the Board of Education, for the construction and equipment of a power plant, electrical equipment, heating and ventilating systems for the new High School building now under construction. Runyon & Carey, 843 Broad St., Newark, N. J., is Engr. in Charge. Ruhe & Lange, 12 North Sixth St., Allentown, is Arch.

+Holmesburg, Penn.—The Department of Public Health and Charities, Philadelphia, has awarded the contract for the construction of a power plant at the Home for the Indigent, Holmesburg, to the W. W. ANSTINE CO., 1214 Filbert Bldg., Philadelphia, at $56,537. Noted Dec. 3, Jan. 7 and 21.

Yardley, Penn.—Press reports state that the New Jersey & Pennsylvania Traction Co., Trenton, N. J., will erect a 125-ft. stack at its power station at Yardley. Gaylord Thompson, Trenton, is Vice-Pres. and Gen. Mgr.

Quitman, Ga.—See item under "Water Supply—Irrigation."

Lanett, Ala.—The Lanett Cotton Mills, owner of the local electric light plant, will, it is reported, purchase within the next three months, one 200-kv.-a., three-phase, 60-cycle, 600-volt generator, with exciter, switchboard equipment and 25 watt-hour meters. It will also install about 40 additional 100-cp. street lamps. W. Oscar Orr, Lanett, is Electrical Supt.

Winnfield, La.—The Johnson Ice & Light Co. is reported to be considering the establishment of an electric light system, ice factory and refrigerating plant in Winnfield.

Rockport, Ky.—Press reports state that the Town Board has granted a franchise to the Rockport Coal Co. for the installation of an electric light plant at its works in Rockport.

Cedarville, Ohio—The plant of the Cedarville Light & Power Co. will be remodeled and enlarged. It is reported that negotiations are under way for the purchase of this plant by the Dayton Power & Light Co., Dayton, Ohio.

St. Clairsville, Ohio—The Board of Public Affairs has decided to improve the municipal electric light plant. It is reported that several private companies have made offers to furnish power to the town. H. A. Norris is Supt. of the municipal plant.

Youngstown, Ohio—It is reported that bids will be received until Jan. 29, by Beeler Heasley, Dir. of Pub. Ser., for furnishing power and equipment for the new street-lighting system.

Hillsdale, Mich.—Bids will be received until Feb. 24, by the Board of Public Works, for one 300-hp. and one 350-hp. water tube boiler, and stokers for the same. J. C. Hanson is Mgr., Cont. Agt. and Supt. of the municipal electric light plant. Noted Jan. 21.

Monroe, Mich.—The River Raisin Electric Co., Monroe, which recently secured a franchise to furnish electrical power in Carleton, plans also to build power plants in Raisinville and Petersburg. W. H. Knapp, Monroe, is Engr. in Charge.

Sullivan, Ill.—At a recent special election, the citizens voted in favor of a bond issue of $35,000 for the purpose of constructing a municipal electric-light plant.

Des Moines, Iowa—It is reported that the Des Moines Electric Co. has planned to spend more than $500,000 for improvements during this year. The larger part of it will be used for additions to the power plant. New turbo-generators with boilers and auxiliary apparatus will be installed.

+Natoma, Kan.—It is reported that the contract for the construction of a municipal electric light plant has been awarded to the F. D. MARTIN CONSTRUCTION CO., Kansas City, Mo. W. B. Collins & Co., Kansas City, Mo., is Engr.

Blair, Neb. —Press reports state that the Martz Engineering Co., 416 First National Bank Bldg., Lincoln, Neb., is preparing plans for a municipal light plant for Blair to cost about $35,000. Bids will probably be asked in about 90 days.

Madison, S. D.—It is reported that the city will soon call for bids for a directly connected generating unit for the municipal electric light plant, consisting of a 450- to 500-hp. engine and a 350- or 400-kw. alternating current generator. William Rae is City Audr. Noted Jan. 7.

Fairview, Mont.—C. W. Jenison, Fairview, has applied to the City Council for a 30-year franchise to construct and operate an electric light and power plant in Fairview.

Snyder, Tex.—E. F. Renken, who recently purchased the local electric light and power plant, will install some new equipment, including an oil engine. The estimated cost of the improvements is $15,000.

Temple, Tex.—The Temple Gas Light Co. has been granted permission by the Commissioners Court of Bell County to lay its gas mains along the public roads. The company plans to extend its distributing system from Temple to Belton.

+Green River, Utah—The City Council has awarded the contract for the construction of a municipal electric-light and power plant to the GREEN CONSTRUCTION CO., Tooele, Utah, at about $20,000.

Marblemount, Wash.—It is reported that the Stone & Webster interests, Boston, Mass., with offices at Seattle, will shortly begin the construction of a power plant on the Skagit River, 22 miles above Marblemount. Two sites have been secured, and plans are being prepared for the work.

Salem, Ore.—The City Council is considering the question of installing a municipal electric light plant. Preliminary plans estimate the cost at from $200,000 to $250,000. Walter Skelton is City Engr.

BRIDGES

Hartford, Conn.—The Board of Aldermen has requested the Mayor to call a special election for the purpose of voting on an appropriation of $35,000 to be used for rebuilding the Capitol Ave. Bridge over the Park River. Louis R. Cheney is Mayor.

Buffalo, N. Y.—See item under "Buildings."

Hightstown, N. J.—The Board of Chosen Freeholders of Mercer County, Trenton, is considering the construction of a new county bridge near Hightstown to replace the present structure. Theodore Tobish is County Engr.

New Brunswick, N. J.—The Board of Chosen Freeholders of Middlesex County is considering rebuilding the bridge and culvert at Station No. 33, Woodbridge Ave., Woodbridge Township.

+Perth Amboy, N. J.—The Board of Chosen Freeholders of Middlesex County has formally awarded the contract, pending for the last few months (see "Engineering News," of July 30, 1914) for a bridge at Convery Place, over the tracks of the Lehigh Valley R.R., to HENRY W. SCHRIMPF, at $33,679. It is understood that a sub-contract will be awarded for the masonry work.

+Baltimore, Md.—The State Roads Commission has awarded the contract for the construction of Sections 7 and 8, 500 and 100 ft. long respectively, of the Hanover St. Bridge to the RAYMOND CONCRETE PILE CO., Munsey Bldg., Baltimore, at $104,058. The contract for sheet asphalt paving, 50 ft. wide, on a part of the bridge, was awarded to P. FLANIGAN & SONS, 14 East Lexington St., Baltimore, at $72,781.

Richmond, Va.—The Administrative Board has authorized T. Crawford Redd to prepare preliminary plans for a reinforced-concrete viaduct over Shockoe Creek Valley between Richmond and Barton Heights. Charles E. Bolling is City Engr.

Elkins, W. Va.—Bids will be received until Mar. 1, by the Randolph County Court, Elkins, for the construction of a number of bridges on several county turnpikes. All bridges will be of either concrete or reinforced-concrete.

Rome, Ga.—(Official)—The date has not yet been fixed for receiving bids for the construction of three bridges. There will be two 300-ft. bridges over the Etowah River, and a 300-ft. drawbridge over the Oostanaula River. Concrete arches will be used wherever possible. J. E. Greiner, Baltimore, Md., and W. C. Spiker, Atlanta, Ga., are Consult. Engrs. Kieffer Lindsey is County Engr. of Floyd County, Ga. Noted Dec. 3 and Jan. 14.

Okolona, Miss.—(Official)—Bids will be received until noon, Feb. 1, by the Board of Supervisors of Chickasaw County, for the construction of nine steel or concrete bridges in District No. 3. H. E. Brannon, Houston, Miss., is Chancery Clk. J. D. Williams, Okolona, is Deputy Clk.

Fayetteville, Tenn.—It is reported that the Tennessee & Alabama R.R. Co. will build a 100-ft. bridge in connection with a railway, 34 miles, to be built between Fayetteville, Tenn., and Huntsville, Ala. J. E. Hurd is Ch. Engr.

Zanesville, Ohio—Bids will be received until Feb. 1 by the Board of Commissioners of Muskingum County for the steel superstructure of a 51-ft. bridge. Fred C. Werner is Clk. of Comrs.

East Gary, Ind.—The Commissioners of Lake County, Crown Point, have, it is reported, voted an appropriation of $25,000 for the construction of a bridge over the Deep River at East Gary. Noted Sept. 24, 1914, under Crown Point.

Hammond, Ind.—The Board of Commissioners of Lake County, Crown Point, has made an appropriation for the construction of a steel bridge over the Calumet River at Calumet Ave., Hammond.

+Laporte, Ind.—(Official)—The Board of Commissioners of La Porte County has awarded the contract for the construction of 12 steel bridges, ranging from 24 to 46 ft. long, to the ROCHESTER BRIDGE CO., Rochester, Ind. Fred A. Hausheer is County Audr. Noted Jan. 14.

+Portland, Mich.—The Township Board has awarded the contract for the construction of a single-span girder bridge over the Lookingglass River near the plant of the Portland Milling Co. to the WYNKOOP-McGORMLEY CO., Toledo, Ohio, at $7998.

Atkinson, Ill.—(Official)—Bids will be received until 2 p.m., Feb. 1, at the Town Hall, Atkinson, for the construction of the Jerome Black and Lewis Bridges, Cornwall Township, Henry County. They will be 22 ft. and 60 ft. long respectively, with 16-ft. roadways, both of reinforced-concrete. James H. Reed, Cambridge, Ill., is County Supt. of Highways.

Cairo, Ill.—The Mobile & Ohio R.R. is preparing to begin work on its bridge over the Ohio River at Cairo. The estimated cost is $2,500,000. W. H. Wells, Washington, D. C., Ch. Engr. of Const. for the Southern Ry., will be in charge of the work. Noted July 30 and Sept. 3, 1914.

+**Lebanon, Ill.**—(Official)—The County Superintendent of Highways of Christian County has awarded the contract for the construction of three reinforced-concrete bridges, two in O'Fallon Township, and one in Shiloh Valley Township, to the EAST ST. LOUIS BRIDGE CO., East St. Louis, Ill., at $8812 for the three. D. O. Thomas is County Supt. of Highways. Noted Dec. 17.

Princeton, Ill.—(Official)—Bids will be received until 2 p.m., Feb. 9, by F. R. Bryant, County Supt. of Highways of Bureau County, for the construction of the Captain Swift Bridge, Princeton Township. It will have a 120-ft. steel span with an 18-ft. roadway. The estimated cost, including retaining wall and back fill, is $8530. Bids will be received at the same time for two small reinforced-concrete bridges, No. 1, Gold Township, and No. 6, Manlius Township.

Sorento, Ill.—(Official)—Bids will be received until 11 a.m., Jan. 30, by R. O. Young, County Supt. of Highways of Bond County, Central Hotel, Sorento, for the construction of the Mount Moriah Church Bridge, between La Grange Township, Bond County, and East Fork Township, Montgomery County, and for the Pence Bridge, between Shoal Creek Township, Bond County, and Walshville Township, Montgomery County.

Appleton, Wis.—(Official)—We are advised that the matter of a new bridge over the Wolf River at Lawe St. has been dropped for the present. E. L. Williams is City Clk. Noted Sept. 17.

Corning, Iowa—(Official)—Bids will be received until noon, Feb. 1, by the Board of Supervisors of Adams County for bridge and culvert supplies and construction material, and for the construction of one or more concrete culverts. F. W. Yeadon is County Audr.

Fraser, Iowa—It is reported that the Fort Dodge, Des Moines & Southern R.R. Co., Boone, Iowa, will soon replace its wooden bridge over the Des Moines River at Fraser with a rainforced-concrete structure about 800 ft. long, estimated to cost $40,000. C. H. Crooks, Boone, is Gen. Mgr. of the company.

Nevada, Iowa—Bids will be received until Jan. 29, by the Auditor of Story County, for the construction of 191 reinforced-concrete bridges and culverts, and a steel bridge with concrete floor.

+**Spencer, Iowa**—The Board of Supervisors of Clay County has awarded the contract for the construction of a bridge over the Little Sioux River at the south end of Main St., to the THOR CONSTRUCTION CO., Cedar Falls, Iowa, at $30,121. Noted Nov. 26.

Austin, Minn.—(Official)—Bids will be received until 2 p.m., Feb. 5, by the County Board of Commissioners of Mower County, for bridge material to be delivered between Apr. 1 and Nov. 1, 1915, at any station in Mower County most convenient to proposed bridges as ordered by the District Engineer. W. H. Goodsell is Chn. of County Bd. O. J. Simmons is County Audr.

Ivanhoe, Minn.—Bids will be received until 1 p.m., Feb. 10, by Karl A. Hansen, Audr., of Lincoln County, for the construction of Bridge No. 1275. It will have a concrete floor on reinforced-concrete foundation.

+**Anthony, Kan.**—(Official)—The Board of Commissioners of Harper County has awarded the contract for the construction of five reinforced-concrete bridges, from 23 to 299 ft. long, to W. N. McELROY, Fort Scott, Kan., at $11,750. The contract for the construction of seven low-water bridges was awarded to the STAMEY-MACKEY CO., Hutchinson, Kan., at about $5000. Noted Dec. 17 and 31.

+**Geneva, Neb.**—(Official)—The Board of Commissioners of Fillmore County has awarded the contract for the construction of all steel bridges in the county during 1915 to FRANK CRAVEN, Exeter, Neb. The contract for all concrete bridges for the same period was awarded to J. W. KEMP, Shickley, Neb. Bert A. Lynn is County Clk. Noted Dec. 24.

Seward, Neb.—Bids will be received until 1 p.m., Feb. 3, by J. R. Roberts, Clk. of Seward County, for all county bridge work during 1915. About 25 bridges will be built or repaired.

+**York, Neb.**—(Official)—The Board of Commissioners of York County has awarded the contract for bridge work in the county during 1915 to the WESTERN BRIDGE & CONSTRUCTION CO., Bee Bldg., Omaha, Neb. Noted Dec. 31.

+**Warrensburg, Mo.**—The County Court of Johnson County has awarded the contract for the construction of about 30 steel bridges in the county during 1915 to the EAST ST. LOUIS BRIDGE CO., East St. Louis, Ill., at $10,993. Other bidders were: Decatur Bridge Co., $11,450; Leavenworth Bridge Co., $11,885; Illinois Steel Bridge Co., $13,433; Midland Bridge Co., $11,991; Western Bridge Co., $11,354; Kansas City Bridge Co., $12,100; Vincennes Bridge Co., $11,643.

Palo Pinto, Tex.—Bids will be received until Feb. 8, by the Commissioners Court of Palo Pinto County, for the construction of bridges and culverts on the roads of District No. 1. J. W. Brock, Palo Pinto, is County Clk. James C. Travilla, Mineral Wells, Tex., is Engr.-in-Charge.

+**Pueblo, Colo.**—(Official)—The City Council has awarded the contract for repairing the First St. Bridge over the Fountain River, to the PUEBLO BRIDGE CO., Pueblo. John M. Jackson is City Clk. Noted Jan. 14.

Kooskia, Idaho—It is reported that the Commissioners of Idaho County, Grangeville, are considering an appropriation of $18,000. This sum will be used for building a bridge over the Middle Fork of the Clearwater River near Kooskia.

Mounds, Utah—E. R. Morgan, Salt Lake City, State Road Engr., has recommended to the State Board of Examiners the building of a steel bridge, to cost about $5700, over the Price River at Mounds, Emery County.

Pima, Ariz.—It is reported that bids will be received until Feb. 1, by the Commissioners of Graham County, Solomonsville, for the construction of a bridge over the Gila River, one mile from Pima. The bridge will be 425 ft. long with a 16-ft. roadway, and approaches of 100 and 150 ft. Benjamin Blake is County Clk.

Mayfield, Wash.—Plans have been completed by John S. Ward, Engr. of Lewis County, Chehalis, for a new steel bridge over the Cowlitz River at Mayfield. The estimated cost is $30,000. The bridge will be 200 ft. long, and about 100 ft. above the water level.

Seattle, Wash.—It is reported that the City Council contemplates holding a special election Mar. 2, and submitting to the voters the question of building bridges over Lake Washington Canal. The previous issue of bonds for this purpose has recently been declared invalid by the Supreme Court of Washington. Noted Dec. 3 and 10, 1914, Jan. 7 and 21, 1915.

Bakersfield, Calif.—The lowest bid received by the Board of Supervisors of Kern County for the construction of pile bridges, culverts, reinforced-concrete headwalls, etc., on the Bakersfield-McKittrick Rd., was that of Castro & Blaisdell, Bakersfield, at $12,987.

Red Bluff, Calif.—Plans have been prepared for the construction of three bridges on the route of the state highway leading from Red Bluff to the Shasta County line. The bridges will span Dibble, Blue Tent and Return Creeks, and the total cost will be about $16,000. Bids for their construction will not be asked until work is begun on this section of the highway.

Redwood City, Calif.—Bids will be received until Feb. 1, by the Board of Supervisors of San Mateo County, for the construction of a timber trestle over Tobin Creek on the Colma-Edgemar Rd. James V. Neuman is County Surv.

+**Sacramento, Calif.**—(Official)—The Board of Supervisors of Sacramento County has awarded the contract for the construction of a reinforced-concrete bridge on the Orangevale-Folsom Rd. to the W. N. CONCANNON CO., Underwood Bldg., San Francisco, Calif., at $5800. Noted Dec. 31.

WATER SUPPLY—IRRIGATION

Boston, Mass.—Bids will be received until Jan. 30, by the Public Works Department, for 825 tons of iron castings for the water- and sewer-systems. L. K. Rourke is Comr. Noted Jan. 14.

Indiana, Penn.—(Official)—Plans are being prepared by Robert H. Wilson, Saltsburg, Penn., for the improvement of the water-system for the Clymer Water Co. The work will include additional apparatus for softening, improvements to the filtration plant and new buildings. Noted Jan. 21.

Lynchburg, Va.—A resolution has been adopted by the Council providing for the purchase of an additional pump for the water-system. An appropriation of $22,000 has been made. H. L. Shaner is City Engr.

Shepherdstown, W. Va.—According to press reports, R. C. Ringgoli, R. Stalnaker and W. Howard Hamilton have applied for a franchise for the installation of a water system.

+**Hartwell, Ga.**—(Official)—The contract for constructing water and sewer systems has been awarded to the J. B. McCRARY CO., Atlanta, at about $46,000. Noted Aug. 20 and Sept. 17.

Quitman, Ga.—Press reports state that there were 86 bidders for the construction of a water system and electric light plant. Bonds for $40,000 were voted for this purpose. Noted July 2 and Sept. 24.

New Smyrna, Fla.—On Jan. 12 the citizens voted bonds for $47,000, the proceeds of which will be used for the construction of a water system. Noted Oct. 8 and Nov. 26.

Bowling Green, Ky.—The city contemplates constructing a sedimentation basin. F. J. Nolan is City Clk.

Barberton, Ohio—The City Council contemplates issuing bonds for $17,000, the proceeds of which will be used for making extensions to the water system.

Bridgeport, Ohio—Bonds for $23,500 have been voted, according to press reports. The proceeds will be used for the installation of water and sewer systems.

Chillicothe, Ohio—H. M. Redd, City Engr., has been authorized to prepare plans for the installation of a municipal water system.

Columbus, Ohio—Bids will be received until Feb. 12, by the Director of Public Service, for 25 4-in., 300 6-in., 50 8-in., 10 12-in., 6 16-in. (horizontal) and 4 20-in. (vertical) valves.

+**Columbus, Ohio**—The contract for c.-i. pipe for the water-system has been awarded by the city to the AMERICAN CAST IRON PIPE CO., at $45,850.

Dayton, Ohio—Plans have been prepared by Pollard & Ellms, Cincinnati, for making extensions to the water system. The estimated cost is $580,500. Noted Aug. 13.

Euclid, Ohio—The citizens plan to spend $7000 for the construction of a water system.

Mingo, Ohio—An election will soon be held to vote on the question of issuing bonds for $39,000, the proceeds of which will be used for the purchase and improvement of the water-system.

+**New Boston, Ohio**—Contracts have been awarded to STANDARD SUPPLY CO., Portsmouth, at $16,468 for material and to PHILLIPS & WATKINS, at $7882 for labor, for completing the water system. Bids were opened Jan. 11. Thomas S. O'Neal is City Clk. Noted Dec. 31.

Shaker Heights, Ohio—(Cleveland post office)—Bids will be received until noon, Feb. 16, by Carl A. Palmer, Village Clk., First National Bank, Cleveland, for constructing an 8-in. water-main in South Moreland Blvd. Noted Dec. 31.

South Newburg, Ohio—(Newburg post office)—Bids will be received until noon, Feb. 6, by H. H. Bohning, Village Clk., for laying water mains in Granger and Turney Rd. Plans are on file with R. Hecker, Leader-News Bldg., Cleveland. Noted Dec. 31.

Wellington, Ohio—(Official)—The W. J. Sherman Co., Nasby Bldg., Toledo, Ohio, has been retained by the city of Wellington, to prepare plans for the improvement of the water-system and for the installation of a filtration plant.

Wooster, Ohio—The Council has authorized the expenditure of $125,000 for the construction of a water-system. Noted Dec. 3.

Michigan City, Ind.—Bids will soon be received, according to press reports, for the completion of the force main from the waterworks to Second and Wabash St. The Krehbiel Co., 140 S. Dearborn St., Chicago, Ill., is Engr. Noted June 4 and July 2.

Orion, Mich.—Press reports state that bids will be received until Feb. 15, by the city, for laying 27,000-ft. of c.-i. water pipe; two 8-in. wells, a pumping station, triplex pumps, belt driven motor and a 75,000-gal. steel tank on a 110-ft. tower. The estimated cost is $35,000. Patrick W. Keating, Detroit, is Consult. Engr. Noted Oct. 8.

Schoolcraft, Mich.—The citizens will soon vote on the question of issuing bonds for $22,000, the proceeds of which will be used for the construction of a water system.

✚Area, Ill.—(Official)—Contracts have been awarded to the CHICAGO BRIDGE & IRON CO., 105th and Troop St., Chicago, at $3285, for tank and tower; AMERICAN WELL WORKS, Aurora, at $880, for power pumping plant and to R. H. LUEBBE, Area, at $730, for pumping station. Bids were opened Jan. 4. Noted Dec. 17.

East Peoria, Ill.—(Peoria post office)—(Official)—Bids will be received by the Village Board until 7:30 p.m., Feb. 8, for constructing a water system, including a storage reservoir, tubular wells, pumping plant, and pumping station. Plans are on file with B. H. Reichelderfer, Village Clk., and Arthur Marshall Morgan, Harris Trust Bldg., Chicago. Noted July 30 and Aug. 13.

Ipava, Ill.—Bids will be received until 1 p.m., Feb. 5, by the Village Clerk, for making improvements and extensions to the water system. The Fuller Coult Co., Chemical Bldg., St. Louis, Mo., is Engr. Noted Jan. 14.

Lewistown, Ill.—Bids will be received until **Feb. 4** by the City Council, for installing a water-system. About 7115 ft. of class B, c.-i. pipe, 2100 lb. of special castings, gate valves, an 80,000-gal. steel tank, and a steam pump will be required.

Paris, Ill.—Fleming & Babbitt, Consult. Engr., Champaign, has been retained by the city, for the construction of a reservoir and a filtration plant. Bonds for $90,000 were voted by the citizens, the proceeds of which will be used for the water-works improvement. J. C. Riedel is City Clk. Noted Nov. 12.

✚Elliott, Iowa—The contract has been awarded to E. J. HECKEL, Kansas City, at $6002, for laying water mains.

Pella, Iowa—Bonds for $10,000 have been voted by the citizens, the proceeds of which will be used for the extension of the water system. A. C. Kuyper is City Clk.

Kinney, Minn.—Plans have been prepared and submitted to the Council for the construction of a new water-system.

Hutchinson, Kan.—The United Water, Gas & Electric Co. plans to build an addition to its plant and install a 600-hp. boiler. The estimated cost is about $15,000.

St. Paul, Neb.—The citizens contemplate spending $23,000 for the improvement of the municipal pumping station and for the construction of an electric-light plant.

Billings, Mont.—Bids will probably be received until Feb. 20, for constructing an extension to the water-system. The estimated cost is $110,000. Six mechanical filters and one reservoir will be constructed. Burns & McDonnell, Scarritt Bldg., Kansas City, Mo., is Engr. Noted Nov. 12, Dec. 10 and Jan. 14.

Glasgow, Mo.—The installation of a centrifugal pump, directly connected to an electric motor of 432,000 gal. per 24 hr. against a head of 50 ft., is contemplated by the city. R. L. Blacet is Waterworks Supt.

Rison, Ark.—A. C. Moore, Engr., Bartlett Bldg., Joplin, Mo., has prepared plans for the installation of a water-system and electric-light plant. The estimated cost is $40,000. A. B. Robertson, Rison, is in charge. Noted July 23.

Austin, Tex.—An appropriation of $10,000 has been made by the City Council for making extensions and improvements to the water system. M. C. Welborn is City Engr.

Coleman, Tex.—The citizens contemplate constructing a new reservoir. Jerry Lewis is Waterworks Supt.

Cuero, Tex.—The City Council has authorized the expenditure of $5000 for making improvements and extensions to the water-system.

Donna, Tex.—The irrigation system of La Donna Canal Co. has been purchased by the Donna Irrigation District. Improvements, estimated to cost $457,000, are contemplated. Noted Sept. 17.

✚Eagle Pass, Tex.—The contract for installing a pumping plant to irrigate about 7000 acres has been awarded to the HUMPHREY GAS PUMP CO., Syracuse, N. Y., at about $60,000, by the G. Bedell Moore estate. Alexander Potter, New York, N. Y., is Engr.

Temple, Tex.—The construction of a concrete dam and spillway over the Leon River at the pumping station is contemplated by the city. R. D. Morgan is City Engr. The estimated cost is $25,000.

Guthrie, Okla.—(Official)—At an election held Jan. 14, the question of issuing bonds for $50,000 was defeated by the citizens. The proceeds was to have been used for the extension of the municipal water system. J. E. Nissley is Mayor. Noted Jan. 7.

Oklahoma, Okla.—At an election held Jan. 15, the citizens defeated the bond issue for $240,000, the proceeds of which was to have been used for the construction of reservoirs for the water-supply. Guy V. McClure is City Engr. Noted Nov. 5 and Jan. 7.

✚Aguilar, Colo.—The contract for constructing a water-system has been awarded to O'BRIEN & SON CO., Denver, at $12,000.

✚Denver, Colo.—According to press reports the contract has been awarded to WILLIAM O'GARA and PHILLIPS CONSTRUCTION CO., at about $300,000, by the Union Water Co. for constructing a six-mile conduit.

Williams, Ariz.—The Williams Water & Electric Co., Trust & Savings Bldg., Los Angeles, Calif., plans to build a 250,000,000-gal. dam. The estimated cost is $75,000. B. R. Ells is Gen. Mgr.

Anacortes, Wash.—An election will be held Mar. 16, to vote on the question of issuing bonds for $350,000. The proceeds will be used for the purchase of the water-system and for making improvements. Noted Dec. 3.

Raymond, Wash.—An election will be held Jan. 30, to vote on the question of issuing $117,000 in bonds, the proceeds of which will be used to purchase the water-system of the Raymond Light & Water Co. About $22,000 will be spent for the improvement of the system. Noted Dec. 24.

Wenatchee, Wash.—The water users of the Highland canal system voted in favor of forming an irrigation district to include all the territory under the canal system. Conrad Rose is a Dir.

Echo, Ore.—Plans will soon be filed with State Engineer Lewis, Salem, for the construction of a reservoir and irrigation ditches in Umatilla County. The estimated cost is $250,000.

Pendleton, Ore.—The Western Land & Irrigation Co. has had surveys made for the construction of a reservoir in the Alkali Cañon and for a canal system. The estimated cost is $250,000. W. R. Hinkle is Engr.

Corning, Calif.—According to press reports bonds for $30,000 were voted by the citizens, the proceeds of which will be used for making extensions to the water and the sewer systems. E. L. Randall is City Clk. Noted Nov. 26.

Dunsmuir, Calif.—The California-Oregon Power Co. plans to lay about 5000 ft. of mains with service taps, specials and gate valves. The estimated cost is $10,000. H. S. Walther, Medford, Ore., is Gen. Supt.

Alexandria, Ont.—An expenditure of $5000 is contemplated for the improvement of the water plant.

Dunnville, Ont.—A by-law has been passed by the ratepayers authorizing the construction of a water system. The estimated cost is $12,000.

Hespeler, Ont.—A bond issue for $35,000 has been authorized by the ratepayers. The proceeds will be used for the construction of a stand pipe and reservoir for the water system.

Newmarket, Ont.—The Town Council plans to construct a water-system, estimated to cost $15,000. P. J. Anderson is Clk.

Victoria, B. C.—(A correction)—In the issue of Jan. 7, under the heading "Victoria, B. C.," it was stated that the city of Victoria had raised $130,000 to commence the Sooke Lake Water Project, with DuCane, Dutcher & Co., Consult. Engr. This was incorrect, the facts being that the Sooke Water System, which cost about $1,500,000, is nearly completed. Wynn Meredith, of the firm of Sanderson & Porter, is the Consult. Engr. of the city, and H. B. Ferguson, who is a partner of the firm of DuCane, Dutcher & Co., has merely been employed by the city for the past month as an expert witness in a lawsuit between the city and the contractors. In some way, several papers have misconstrued the position held by H. B. Ferguson, and have assumed wrongly that he has been appointed consulting engineer in lieu of Wynn Meredith. H. B. Ferguson is sure that Wynn Meredith's work has been most satisfactory to the city. This correction has been made at the request of H. B. Ferguson. Noted Jan. 7.

SEWERS

Boston, Mass.—Bids will be received until Jan. 29, by the Public Works Department, for constructing pipe sewers and drains in Marcella and Sheridan St., Roxbury District. L. K. Rourke is Comr.

Boston, Mass.—Bids will be received until Feb. 1, by the Public Works Department, for work at the Orleans St. outlet, East Boston District. L. K. Rourke is Comr.

Cambridge, Mass.—Bids will be received until Jan. 29, by the Engineering Department, for sewer brick, pipe, cement, broken stone and iron castings for the year 1915. Lewis M. Hastings is City Engr.

New Haven, Conn.—Bids will be received until Feb. 11, by Frederick L. Ford, City Engr., for constructing a storm water sewer in Edgewood Ave.

Buffalo, N. Y.—The City Council has authorized the construction of tile sewers in Leslie and Zenner St. Francis G. Ward is Dir. of Pub. Serv.

Kenmore, N. Y.—According to press reports plans have been approved by the State Board of Health for the installation of a sewer system. Matthew D. Young is Village Pres.

Burk, Smith & Nelson, Muskegon, Mich., $25,280; Greiling Bro. Co., Green Bay, Wis., $29,870; Robert A. Love & Son, Muskegon, Mich., $25,658; Great Lakes Dredge & Dock Co., Chicago, Ill., $27,614; Fitz Simons & Connell Dredge & Dock Co., Chicago, $29,584; Byrne Bros. Dredge & Engineering Co., Chicago, $36,928. Noted Dec. 24.

Hospital—Red Lake, Minn.—Bids will be received by Cato Sells, Comr., Indian Affairs, Washington, D. C., until 2 p.m., Feb. 15, for constructing a frame hospital at the Red Lake Agency.

Remodeling Building—St. Louis, Mo.—The following are the bids received for remodeling the Custom House: North St. Louis Building & Material Co., Mermod Jaccard Bldg., St. Louis, Mo., $25,772; Wharton Building & Supply Co., 2424 Oriole Ave., St. Louis, Mo., $26,457; Southern Construction Co., Overland, Mo., $27,795; General Construction Co., Milwaukee, Wis., $36,860; Duffmer & Stecker Construction Co., 722 Chestnut St., St. Louis, Mo., $37,500; Cudmore Construction Co., 722 Chestnut St., St. Louis, Mo., $38,949; Newport Contracting & Engineering Co., Newport News, Va., $39,271; Kremer & Voirol Construction Co., 810 Olive St., St. Louis, Mo., $40,664; Daniel Evans Construction Co., St. Louis, Mo., $42,665; Hiram Lloyd Building & Construction Co., Odd Fellows' Bldg., St. Louis, Mo., $43,167; V. E. Taylor, Huntington, W. Va., $43,950; Kellerman Construction Co., 510 Pine St., St. Louis, Mo., $46,920; Herman Construction Co., Title Guaranty Bldg., St. Louis, Mo., $47,475; E. A. Steininger, Victoria Bldg., St. Louis, Mo., $47,925; S. L. Jones Building Co., 717 Locust St., St. Louis, Mo., $54,580; Gellick Bros., St. Louis, Mo., $73,988. Noted Dec. 17.

★Motor Dredge Tender—Galveston, Tex. — Bids will be received until noon, Feb. 23, by Lieut.-Col. C. S. Riche, Trust Co. Bldg., Galveston, for constructing motor dredge tender "La Porte."

Post Office—Uvalde, Tex.—Bids were received as follows for the construction of a post office at Uvalde, (a) limestone; (b) sandstone: George Hinchliff & Co., Chicago, Ill., (a) $51,110, Reveron Construction Co., Uniontown, Ala., (a) $38,493; (b) $38,691; Dieter & Wenzel Construction Co., Wichita, Kan., (a) $54,587; W. R. Weston, San Antonio, Tex., (a) $52,332; (b) $53,300. Noted Dec. 17.

+Post Office—El Reno, Okla.—The contract for the construction of a post office at El Reno has been awarded to the GEORGE W. STILES CONSTRUCTION CO., Rookery Bldg., Chicago, Ill., at $66,126. Noted Oct. 22 and Dec. 3.

Canal Work—Payson City, Utah—Bids will be received by the U. S. Reclamation Service, Provo, Utah, until 2 p.m., Feb. 3, for the construction of the High Line Canal, Division Four, and appurtenant structures, Strawberry Valley Project, Utah. The work involves about 155,000 cu.yd. of excavation for canals; 2600 cu.yd. of excavation for structures; 1250 cu.yd. of reinforced-concrete; 467,000 sq.ft. of concrete canal lining. It is located near Payson City, Utah County, Utah, on the San Pedro, Los Angeles & Salt Lake R.R. and the Tintic Branch of the Denver & Rio Grande R.R.

★Canal Work—Payson City, Utah—Bids will be received by the U. S. Reclamation Service, Provo, Utah, until 2 p.m., Feb. 24, for the construction, involving 49,000 yd. of canal excavation and 3670 yd. of reinforced concrete. For particulars see advertisement under "Contracts To Be Let."

Cofferdam—Seattle, Wash.—Bids will be received by Maj. J. B. Cavanaugh, Burke Bldg., Seattle, until noon, Feb. 17, for excavating and removing an existing cofferdam and constructing a new cofferdam at the Puget Sound-Lake Washington lock site, Seattle.

★Jetty Construction—Lone Tree, Wash.—Bids will be received by Maj. J. B. Cavanaugh, Burke Bldg., Seattle, Wash., until noon, Feb. 10, for delivering stone for jetty construction at Lone Tree.

Bungalows—Mare Island, Calif.—(Vallejo post office)—Bids will be received by the Bureau of Yards and Docks, Navy Dept., Washington, D. C., until 11 a.m., Feb. 20, for constructing two bungalows at Mare Island. H. R. Stanford is Chief, Bureau of Yards and Docks.

+Dredging—Oakland, Calif.—Contracts for dredging in Oakland Harbor, have been awarded to THOMAS CARLIN SONS CO., Pittsburgh, Penn., at $3530 and R. A. PERRY, Oakland, Calif., at $45,520. Noted Dec. 12.

Foundations—San Diego, Calif.—Bids will be received by the Bureau of Yards and Docks, Navy Dept., Washington, D. C., until 11 a.m., Feb. 27, for the construction of nine foundations for radio towers at Chollas Heights, San Diego, three at Pearl Harbor, H. T., and three at Cavite, P. I.

Foundations—Pearl Harbor, H. T.—See item under San Diego, Calif.

Locomotive Cranes—Pearl Harbor, H. T.—Bids were received for furnishing and erecting two 15-ton locomotive cranes at the Naval Station, Pearl Harbor, Hawaii, as follows: Brown Hoisting Machinery Co., Cleveland, Ohio, $16,750; Industrial Works, Bay City, Mich., $17,385; American Hoist & Derrick Co., St. Paul, Minn., $18,785, alternate, $14,385; Link-Belt Co., Chicago, Ill., $17,336; Browning Engineering Co., Cleveland, Ohio, $15,910. Noted Dec. 24.

Structural Steel—Panama—Bids were received Jan. 23 by Maj. F. C. Boggs, General Purchasing Officer, the Panama Canal, Washington, D. C., for furnishing the structural steel framing and accessory parts for a steel and concrete deck for Pier No. 7, forming a part of the Atlantic Terminal Piers of the Panama R.R. The work included: 10,755,000 lb. structural steel for pedestals, including anchor bolts and nuts; erecting bolts, etc., exclusive of pedestals; 245,000 lb. structural steel for pedestals, including anchor bolts and nuts; 4300 lb. steel crossties; 57,200 lb. soft-steel forgings for rail chairs; 208,500 lb. open-hearth steel rails, tie-rods, and low-carbon steel splice bars; 13,900 lb. soft-steel castings for gratings; 24,600 lb. standard wrought-iron or steel pipe, black; 36,250 lb. gray iron castings for mooring bitts; 34,000 lb. drift pins, bolts, nuts and washers for securing wooden fenders and mooring bitts and two Ellis patent freight car bumping posts: Bids were asked as follows: (A) Material fabricated and delivered at Colon, (A1) same, cost of carriage from New York to Colon, being paid by the Government; (B) Material fabricated, delivered and erected on foundations furnished by the Panama Canal; (B1) same, cost of carriage New York to Colon being paid by the Government. Bids were as follows: McClintic-Marshall Construction Co., Pittsburgh, Penn., $261,251; (A1) $208,883; (B) $310,508; (B1) $258,141. J. B. Kendal Co., Washington, D. C. (for Jones & Laughlin Co.), (A1) $224,161. Riter-Conley Co., Leetsdale, Penn., (A1) $204,029. Pennsylvania Steel Co., Steelton, Penn., (A) $233,032; (A1) $185,241. United States Steel Products Export Co., 30 Church St., New York, N. Y., (A) $225,254; (B) $258,437.

Foundations—Phillipine Islands—See item under San Diego, Calif.

MISCELLANEOUS

Station Improvements—Boston, Mass.—Bids will be received until Jan. 28 by the Transit Commission, 15 Beacon St., for furnishing and laying 4100 sq.yd. of concrete platform in the Washington Station, Dorchester Tunnel. E. S. Davis is Ch. Engr.

+Dredging—New York, N. Y.—(Boroughs of Manhattan, Brooklyn, Queens, the Bronx and Richmond)—(Official)—The Commissioner of Docks has awarded the contract for dredging 80,000 cu.yd. in the East and Harlem Rivers to WILLIAM BEARD, at 18.7c. per cu.yd. The contract for dredging in the North River was awarded to MORRIS & CUMMINGS, at 11.83c. per cu.yd. Noted Jan. 14 and 21.

Roofing—New York, N. Y.—(Borough of Manhattan)—(Official)—Bids were received by the Department of Charities, Jan. 20, for roofing work on the children's hospital and schools, Randalls Island, as follows: Newman & Siegler, $10,595; M. D. Lundin, $10,778; Spuyten Duyvil Construction Co., $10,826; Neptune B. Smith, $10,883; Morris Krumholz, $11,500; J. Langner, $11,610; Anchor Corrugating Construction Co., Inc., $11,628. Noted Jan. 14.

Paving Supplies—New York, N. Y.—(Borough of Manhattan)—(Official)—Bids will be received by Marcus M. Marks, Borough Pres., until 2 p.m., Feb. 1, for furnishing 12,000 bags of portland cement, 3500 tons of refined asphalt, 3000 tons of limestone dust, 8000 cu.yd. of binder stone, 1000 tons of portland cement. Specifications may be had at the offices of the Commissioner of Public Works, Room 2124, Municipal Bldg.

Dredging—Baltimore, Md.—(Official)—The following bids were received Jan. 20 by the Board of Awards for dredging the main channel from Lazaretto Light to the piers of the transatlantic liners: Coastwise Dredging Co., $142,400; Maryland Dredging & Contracting Co., $149,000; Morris & Cummings Dredging Co., $156,600; Sanford & Brooks Co., $165,225; American Dredging Co., $191,875; Atlantic, Gulf & Pacific Co., $214,600; P. Sanford Ross, Inc., $224,600. Noted Jan. 7.

Swimming Pool—Baltimore, Md.—Local press reports state that Frederick Olmsted, Boston, Mass., has been commissioned to prepare plans for the conversion of Mt. Royal Reservoir, in Druid Hill Park, into a swimming pool.

Crushing, Elevating and Screening Machinery—Petersburg, Va.—The Wakefield Granite Quarries, A. B. Cook, Pres., will receive bids for repairing No. 2 Climax crusher, for furnishing elevating and screening machinery and for installing a gravel and stone-washing plant.

Motor Fire Apparatus—Newbern, N. C.—F. T. Patterson, City Clk., will receive bids until Feb. 1 for furnishing the city with a triple combination, motor-driven fire engine, having not less than 800 gal. per min. capacity.

Drainage—Parish, Fla.—The Drainage Committee has engaged Charles S. Hill, Engr., Palmetto, Fla., to make a survey for the construction of the Gamble Creek drain. This will result in the reclamation of about 30,000 acres. The estimated cost is $100,000.

Seawall—West Palm Beach, Fla.—The Council has rejected all bids received on Jan. 5, for the construction of the proposed seawall. The work will be readvertised. L. T. Lockwood is Pres. of the Council. J. B. McCrary Co., Atlanta, Ga., are Engrs. Noted Oct. 8 and Dec. 24.

Drainage—Oberlin, La.—The Oberlin Drainage District No. 3, S. J. Iles, Pres., plans to construct a canal into the Bayou Blue, draining the marshes north and east of Oberlin and the swamp to the south.

Dump Cars, Locomotives and Derrick—Cincinnati, Ohio—Thaw & Williams, Bell Blk., will receive bids for 30 six-yard, two-way, dump cars, 36-in. or standard gage; one stiff-leg, or guy derrick, 50-ft. boom; and four 18- to 20-ton saddle-tank locomotives, 36-in. or standard gage.

Levees and Flood Protection—Vincennes, Ind.—(Official)—A report will be made shortly on flood protection for the district south of Vincennes, comprising 60,000 acres. The report was completed about two years ago, but the flood of March, 1913, made it necessary to revise the plans and include new territory. The estimated cost of the project is $430,000. J. S. Spiker, Vincennes, is Engr.

Motor Police Patrol and Ambulance—Oshkosh, Wis.—Bids will be received until 2 p.m., Jan. 28, by R. A. Hollister, Chmn., Bd. Pub. Wks., for furnishing combination motor-driven ambulance and patrol. Bids will also be received for a motor service truck with ladders.

Drainage—Wapello, Iowa—According to press reports, bids will be received by the supervisors of Muscatine and Louisa Counties on Feb. 5 for the purchase of $278,127 drainage bonds.

+Ditch—Ada, Minn.—The following contracts have been awarded for the construction of Judicial Ditch No. 42: Excavating 470,000 cu.yd., UNION DRAINAGE CO., Stephen, Minn., at 9c. per cu.yd.; erecting 27 steel bridges, SECURITY BRIDGE CO., Minneapolis, at $1175 each; concrete culverts, M. R. HUSSEY, Crookston, at $336 each. C. D. Simpson is Dep. County Audr. Noted Dec. 24.

Ditch—Bemidji, Minn.—Bids will be received until Feb. 8 by J. L. George, County Audr., for the construction of Judicial Ditch No. 27, 30 miles in length. Specifications call for 231,182 cu.yd. of earth excavation and the construction of a highway. The estimated cost is $52,214.

Ditches—Jackson, Minn.—Press reports state that bids will be received until Feb. 3 by P. O. McKellar, County Audr., for the construction of Judicial Ditches 32, 33 and 36, all tile. They are estimated to cost $29,578, $54,002 and $5842, respectively.

Dock—St. Paul, Minn.—An ordinance has been introduced in the City Council providing for the construction of a municipal dock.

+★Drainage — Talmage, Neb. — (Official) — The following bids were received Jan. 11 for the construction of ditches in Drainage District No. 1, Johnson and Otoe Counties: FREDERICK M. CRANE, Omaha, Neb., $115,090 (awarded contract); R. B. Gordon & Co., Salina, Ohio, $125,502; Inter-Mountain Bridge & Construction Co., Tecumseh, Neb., $126,840; W. M. Lana, Council Bluffs, Iowa, $131,792; Edward Peterson Co., Omaha, Neb., $121,907; O. P. Herrick, Des Moines, Iowa, $136,212; Yale & Ragean, Chicago, Ill., $149,919; Sternberg Bros., Pine Bluff, Ark., $132,491; Munn-Raise Construction Co., Kansas City, Kan., $125,552; W. E. Callahan Construction Co., Omaha, Neb., $152,711; C. D. Campbell, Lincoln, Neb., $110,590; Winston Bros., Minneapolis, Minn., $147,918; D. C. Stephens, Buffalo, N. Y., $143,493. Schwaderer & Shannon is Engr. Noted Dec. 10.

Drainage District—Atchison, Kan.—A bond issue of $60,000 will soon be offered, the proceeds to be used in improving the Delaware River drainage district. The entire enterprise, which includes the straightening of the Delaware River south of Muscotah to the county line, will cost about $100,000.

★Drainage—Edina, Mo.—(Official)—Bids will be received until 11 a.m., Feb. 18, by the Supervisors of Fabius Drainage District No. 3, at the office of F. H. McCullough, Edina, for the construction of channels. The specifications call for 50[illegible]000 cu.yd. of channel excavation, divided into two sections. For details see advertisement under "Contracts to Be Let."

+Ditch—Maryville, Mo.—Press reports state that the Board of County Supervisors Jan. 8 awarded the contract for the construction of the Frayne, Stratford and Larson drainage ditches to JENS JENSEN, Williams, at $24,555. The contract for tile was awarded to the NATIONAL SEWER PIPE CO., Maryville, at $9033.

Mausoleum—St. Louis, Mo.—The Valhalla Mausoleum Co., 718 Boatmen's Bank Bldg., will construct a one-story granite mausoleum. The estimated cost is $240,000.

Grandstand—Little Rock, Ark.—The city contemplates the construction of a reinforced-concrete grandstand at the West End Park Athletic Field. The seating capacity will be 3000.

Dredging and Filling—Seattle, Wash.—The City Council has under consideration a petition for dredging Oxbow Bend of the Duwamish River and filling the lowland with the material excavated. The estimated cost is $30,000.

Cement—Seattle, Wash.—Bids will be received by the Port of Seattle Commission until Feb. 10 for furnishing 20,000 bbl. of portland cement. O. E. Remsberg is Secy.

+Drainage—Walla Walla, Wash.—The Commissioners of the Attalia Drainage District have awarded the contract for the construction of a system serving 2500 acres to JAMES C. BROAD, Spokane, at about $48,000. Noted Jan. 7.

Pier — Richmond, Calif. — The statement published in the issue of Jan. 21 was an error. All bids for the construction of the municipal wharf have been rejected. P. A. Haviland, Consult Engr., 310 Sansome St., San Francisco, will revise plans. A. C. Faris is City Clk.

Fire Station—San Francisco, Calif.—(Official)—Plans for the proposed fire station at Post and Polk St. have not been prepared yet, nor the architect chosen. The contract will not be let for about five months. Noted Jan. 14.

+Waterfront Improvements—San Francisco, Calif.—The Panama-Pacific International Exposition Co. has awarded a contract for the construction of a waterfront entrance on Webster St., to the WESTERN BUILDING & ENGINEERING CO., at $19,755.

+Pier—San Francisco, Calif.—The State Board of Harbor Commissioners has awarded a contract for the construction of pier No. 24, at the foot of Harrison St., to the HEALY-TIBBITTS CONSTRUCTION CO., at $98,300. Noted Jan. 7.

Elimination of Grade Crossings—Brantford, Ont.—(Official)—T. Harry Jones, City Engr., writes that work for the elimination of the grade crossing at St. Paul Ave. will include the construction of a subway, 42 ft. wide, and the approaches at St. Paul Ave. The estimated cost is $40,000. Application for apportionment of the cost has not been made yet. Noted Jan. 14.

BUILDINGS

Other items relative to Building Construction will be found under the following headings: "Industrial Works;" "Federal Government Work" and "Miscellaneous"

+Boston, Mass.—The contract for the construction of Police Station No. 19 has been awarded to JOHN BOWEN at $55,333.

+Boston, Mass.—(Official)—The contract for the construction of a six-story, 92x154-ft. fireproof building on School St. has been awarded to the NATIONAL FIRE PROOFING CO., 120 Franklin St. C. Howard Walker is Arch.

Holyoke, Mass.—Plans are being prepared by G. P. Alderman & Co. for the construction of the Lawrence School. It will be two stories, 180x260 ft. Estimated cost, $225,000. Francis McSherry is Supt. of Schools.

+Plymouth, Mass.—The contract for the construction of a three-story, 48x116-ft. theater, for Arthur Emond, has been awarded to PAYSON & CONNOLLY. Estimated cost $40,000. R. T. C. Jackson, 29 Oak St., Boston, is Arch.

+New Britain, Conn.—(Official)—The contract for the construction of a two-story high school has been awarded to THOMAS W. CROWE, at $105,401. Walter P. Crabtree is Arch. Noted Jan. 14.

+Waterbury, Conn.—(Official)—The contract for the construction of a two-story, 87x120-ft. school has been awarded to the GEORGE S. CHATFIELD CO., Canal St., at $67,537. Louis A. Walsh is Arch.

Albany, N. Y.—The State of New York contemplates the construction of an 11-story, 80x200-ft. office building for the state department. The estimated cost is $1,250,000. Lewis F. Pilcher is State Arch.

★Binghamton, N. Y.—(Official)—Bids were received Jan. 21 by the State Hospital Commission, Capitol, Albany, for the construction of a building for chronic patients at the Binghamton State Hospital, as follows: William F. Fulton, Buffalo, N. Y., $168,987; George B. Long, Worcester, Mass., $161,800; Emerson Building Co., New York, N. Y., $164,500; R. T. Ford Co., Rochester, N. Y., $171,372; Durolithic Co., Buffalo, N. Y., $159,700; Lathrop, Shea & Henwood Co., Scranton, Penn., $178,395; Dekimpe Construction Co., Hoboken, N. J., $174,600; Maurice Mead, Albany, N. Y., $207,000; Oscawana Building Co., New York, N. Y., $169,970; Peter Keeler Building Co., Albany, N. Y., $181,322; J. F. Growe Construction Co., Albany, N. Y., $176,975; Carleton Co., Inc., New York, N. Y., $179,525; Aroldo Barbaresi, Mt. Vernon, N. Y., $171,932; A. E. Stephens Co., New York, N. Y., $172,000; Feeney & Sheehan Building Co., Albany, N. Y., $180,000; O'Brien Construction Co., Syracuse, N. Y., $192,244. Lewis M. Farrington is Asst. Secy., Comn. Noted Jan. 7.

Buffalo, N. Y.—The City of Buffalo has approved plans prepared by the Lehigh Valley R.R. for the construction of terminals at Main and Scott St.; also for freight terminals, viaducts and approaches at Washington St. Bids will soon be received. Estimated cost is $5,000,000.

Construction News

★Denotes work advertised in ENGINEERING NEWS.
✚Denotes contract awarded. The names of bidders awarded contracts are set in CAPITALS.

PRICE CHANGES AND THE BUSINESS OUTLOOK

Conditions have steadily improved during the month, although not rapidly. No brisk increase in the volume of orders, or in the amount of business, was to be expected in the month, and it is doubtful if there will be any large increase until spring opens; but business is more than holding its own; some factories are reopening after being closed a long time. Contractors are finishing work, but there is a noticeable tendency to push forward some new projects, both on account of the low cost and the ability to do the work with dispatch.

Financial conditions have improved more than any other, and form the basis for an excellent business later on. Although capital is difficult to obtain, money is easy, and American bankers, for the first time in history, practically, are dealing in acceptances from foreign cities; doing a general foreign exchange business irrespective of London, and are also lending vast sums to foreign cities. This credit will be used to buy American goods. The heavy drain on the life insurance companies has been stopped, and a very appreciable amount is now available for investment.

Agricultural returns are highly satisfactory to the farmer, but prices for foodstuffs have gone to such levels as to be distinctly abnormal; in many cases burdensome to American consumers. The highly satisfactory way cotton is moving out of the country will clear up the problem of finance in the ten Southern States far more rapidly than was thought possible.

Railroads are looking forward to doing considerable work this coming year. Some construction work which was postponed on account of the war has been resumed; the railways in the Northwest will make numerous improvements and some of the Eastern roads have laid out a fair program of new construction which, while not large, is a beginning. The Pennsylvania has showed its intention to resume operations on several dormant projects. A 4½% bond issue by the Pennsylvania was eagerly sought by bankers. The security is undoubtedly of the highest grade, but that such security would find a welcome at all is to be remarked. The rate of interest is not unusual, considering the high prices paid for capital in recent years.

Dullness has characterized the iron trade, principally because December business in pig iron was so satisfactory. Mills are operating more actively, a fair amount of rail orders has been taken, and the tube mills have been in receipt of some very large orders. Steel prices continue on an attractive level, which induces new construction. Foreign demands, while large in point of dollars, have not been large from the standpoint of tonnage involved, but some rail orders for foreign delivery are already in sight, and there is no doubt that considerable business will be taken in this line before the end of the year.

Prices of metals have advanced rapidly, copper selling at 15c., compared with 11c. in August, due entirely to the foreign demand; lead is higher and spelter has advanced even more rapidly than copper. The outlook for metals is highly satisfactory, and there is no doubt that prices will be maintained at a fairly high level for some time, at least until the insistent foreign demand has subsided. The prices of most manufactured commodities are at low levels, and the cement situation is still unsatisfactory to the producer. In New York crushed stone is at a low level, rubber is cheaper than before in years, and lumber prices are lower.

Shipbuilding work is not at all active, but there is every prospect of an activity in this line which has not been seen before in this country for more than a generation.

Foreign orders are large and continue to increase. Buyers for foreign governments and domestic consumers in European countries are in New York in large numbers and buying freely. Much of their purchases partake of war supplies and food but there have also been inquiries for supplies which could scarcely be made in Great Britain or France, owing to the lack of labor available for such uses. This business will undoubtedly continue.

Orders for war materials are going forward at the rate of more than a million dollars daily. Every shop in the United States that wishes to, is manufacturing as much ammunition and guns as it is possible to make, and new additions are being rapidly constructed at the leading plants.

Machine tool buying in the last eight weeks has been larger than ever before. The country is practically cleaned out of lathes. Milling machines have been in excellent demand, and foreign buyers are now taking automatic machines and almost any kind of machinery that can be used on iron or steel. This business has been of the most profitable nature.

The determination on the part of steel manufacturers to secure more remunerative prices led to a peculiar advance on Feb. 1. The bace price, which included plates, bars, and shapes, was left unchanged at $1.10 for February delivery, but this will be advanced to $1.15 for March, and $1.20 for April.

CEMENT, LIME AND BRICK

Portland Cement—Leading makers of cement have not revised their quotations, as compared with last month, but some of the small dealers selling in the New York market are taking orders at $1.37 New York, compared with the usual quotation of $1.42 New York. Not much business has been taken, even at these figures. A fair increase and more railroad business is in sight than for some time. Western business is reported to be fairly satisfactory, but by no means so rosy as some recent statements would seem to indicate. The quotations that follow do not include the price of 40c. made for bags returned, but are for barrels of cement delivered at the points named, less the charge for the bags.

Chicago	$1.02	Boston	$1.66
Detroit,	1.14	Cleveland	1.23
Jersey City	0.94	Duluth	1.33
New York	1.02	Minneapolis	1.25
St. Paul	1.25	Pittsburgh	1.00

Brick—Prices are higher as a result of the unfavorable weather, which makes difficult handling. In New York, Hudson River common brick sell at $5.87½ to $6 per M.

Lime—Business continues quiet and prices are unchanged; 97c. per bbl. for state common, 200 lb. net; $1.37 for 300 lb. bbl.; $1.55 for 300 lb. finishing; $1.10 for 200 lb. finishing, and $1.72 for 350 lb.

Crushed Stone—It is difficult to name any price at which business may be taken for spring shipments. Some sellers are asking 85c. for stone delivered alongside of dock, New York.

IRON AND STEEL

Pig Iron—Business is dull, with only a few transactions of note. The tone of the market, however, is better now than for a few weeks past. Prices remain about the same for most grades, with slight concessions for large sized orders. Inquiries from abroad, particularly from Italy and France, indicate inability of consumers to get supplies from their usual sources. American producers have not been able to take advantage of the foreign demand because of the excessive freight charges, but expect to benefit indirectly. Furnaces are being asked to ship orders under contract anticipating the advance in freight rates. It is reported that recent inquiries from New Jersey consumers for 3200 tons have been closed. Chicago has had considerable increase of inquiries for gray and malleable foundry iron, and additional sales of low-grade iron are reported from the Birmingham district. Quotations for pig iron in lots of 100 tons or over at the points named are as follows: Cincinnati, Southern Foundry No. 2, $12.50 to $13; Northern Foundry No. 2, $14 to $14.50; Northern Foundry No. 3, $13.50 to $14. In New York iron is quoted as follows: No. 2X Northern Foundry, $14.25 to $14.50; No. 2 plain Northern Foundry, $14 to $14.50; No. 2 Southern Foundry, delivered tidewater, $14 to $14.25. In Birmingham, Southern Foundry No. 2 is $9.50 to $10. In Chicago, Northern Foundry No. 2 is $12.75 to $13.25. In Pittsburgh, bessemer iron is $14.55 and basic $13.45, including the 95c. freight from the valley to the Pittsburgh district.

Steel Rails—Orders for more than 325,000 tons of rails were placed with the mills in January and there are pending perhaps 400,000 tons. Foreign inquiries total approximately 100,000 tons, but American mills have little hope of getting this business on account of unfavorable freight rates. All of the railroads are buying more material, and those in the corn and wheat belt have a prospect of excellent business throughout the summer, although the gross earnings of railways continue to decrease. The Pennsylvania order for 10,000 tons may be characterized as a trial order. It is divided between the Steel Corporation, the Bethlehem Steel Co., the Pennsylvania Steel Co., the Cambria Co. and Lackawanna Co. Each of these makers will roll a thousand tons under the new specifications, and a thousand tons under the old specifications, and it is expected that the results obtained from these experiments will be taken as a guide for the award of the contract for 1915. This is assumed to be around 175,000 tons. An incident of the unfavorable freight situation is an inquiry from Portugal for approximately 30,000 tons, but, with a freight rate of $19 per ton, it is impossible to close any business. Quotations for standard lots of 1000 tons or over are unchanged, as follows: Standard sections of bessemer, $28; open hearth, $30; f.o.b. Pittsburgh, per net ton. Girder rails in 30-ft. lengths are $36.40 per gross ton, and in 60-ft. lengths, $38.40, both f.o.b. New York. Other quotations, f.o.b. Pittsburgh, for large lots, the prices being given in cents per pound, are as follows: Standard sections, 1.25c.; 25- to 35-lb. 1.15c.; 15 to 20 lb. 1.20c.; 12 to 14 lb. 1.25c.; 8 to 12 lb. 1.30c. Relaying rails, New York, are $19; Pittsburgh and Chicago are quoted at $23 to $24.

Structural Shapes—The volume of business during January was only a little more satisfactory to the mills than that booked in December, but February opens with quite a little work in prospect, some of it large work, which includes 20,000 tons for grade crossing elimination in Indianapolis, and about 13,000 tons for elevated railway extension in Brooklyn. There is also a building in Cleveland which will require 2000 tons, and a Camden structure calling for 1000 tons. Keen competition is the rule on all new structural contracts. The Standard Arcade in New York, 600 tons, went at a low figure. Prices were revised Feb. 1 and are $1 higher than last month as follows: I-beams, 3 to 15 in.; channels, 3 to 15 in.; angles 3 to 6 in.; and T's 3 in. and over, 1.15c. Pittsburgh. Other quotations include I-beams over 18 in., H-beams over 18 in., channels over 15 in., and angles over 4 in., 1.30c.; T's, 1.25c.; deck beams and bulb angles, 1.50c.; handrail T's, 1.95c. Cutting into specified lengths is charged at the following rates: Under 3 ft. to 2 ft. inclusive, 25c. per 100 lb.; 2 ft. to 1 ft. inclusive, 50c.; less than 1 ft. $1.55. No charge is made for cutting to specified lengths over 3 ft. In Chicago the base price is 1.29c., in Philadelphia, 1.25 to 1.30c., in New York, 1.26 to 1.31c., and in San Francisco, 2 to 2.05c.

Cast Iron Pipe—Business shows some improvement. There are many municipal lettings in prospect. Business may be said to be fairly active, and prices unusually low. The American Cast Iron Pipe & Foundry Co. was the low bidder, on 3600 tons of large pipe in Chicago at $22.95. Cities and private consumers on the Atlantic Seaboard have purchased freely, many of them, not only for 1915 requirements, but for next year. The following quotations are named on cast-iron pipe in dollars per net ton at the points named:

Birmingham, Ala., $19.50.
New York, N. Y., 6-in., $20 to $20.50.
Chicago, 4-in., $26; 6- to 12-in., $24; over 12-in., $23.
Cleveland, 4- to 20-in., $21.50; larger than 4-in., $21.
Gas pipe is held at $1 per ton higher in all markets.

Plates—The shipbuilding industry is looking up. The American-Hawaiian Steamship Co. has ordered two additional 10,000-ton steamers from the Maryland Steel Co. Each of these boats will require about 3500 tons of steel. The New York Shipbuilding Co. will build a steel barge for the Panama Canal, which will require about 500 tons, and one of the oil companies will build a tanker calling for 3000 tons of plates and 1000 tons of shapes. Those conversant with the situation express the view that the shipbuilding industry in the United States will show a decided improvement within the next few months. Prices for immediate delivery are unchanged at 1.10c. Pittsburgh, but for March shipments are 1.15c. and April shipments 1.20c. The base price of 1.10c. includes all sizes above ¼ in. In Philadelphia, plates are 1.25 to 1.30c., in New York, 1.26 to 1.31c. and in Chicago, 1.25 to 1.29c.

Pipe—Business shows considerable activity. This line is the one bright spot in the steel trade as far as domestic business is concerned. An order was recently placed for one thousand miles of line pipe. The smaller sizes are not in active demand. Discounts continue without change, being repeated from last month as follows:

	Black	Galvanized
¾- to 2-in. steel, butt welded	81%	72½%
2½- to 6-in. steel, lap welded	80%	72½%
7- to 12-in. steel, lap welded	77%	66½%

At these discounts, the net prices of pipe per foot, in large lots, at Pittsburgh are as follows:

	Cents			Cents	
Diameter	Black	Galvanized	Diameter	Black	Galvanized
¾-in.	2.20	3.15	5-in.	29.60	42.20
1-in	3.24	4.67	6-in.	38.40	54.60
1¼-in	4.38	6.30	7-in.	55.00	80.00
1½-in	5.25	7.55	8-in.	57.50	84.00
2-in.	7.05	10.15	9-in.	79.50	$1.16
2½-in.	11.70	16.70	10-in.	95.00	$1.38
3-in.	15.25	21.80	11-in.	$1.06	$1.55
4-in.	21.80	31.00	12-in.	$1.17	$1.70

Sheets—The rapid advance in spelter has caused some uneasiness about deliveries, but this chiefly concerns consumers in the Middle West. In the East, there is a sufficient supply for present needs. Operations at the mills are not so active as a month ago, being less than 60% of capacity.

The following quotations are for large lots of sheets in Pittsburgh, and small lots from store, New York.

	Cents per Pound			
	Large lots Pittsburgh		Warehouse delivery New York	
	Black	Galv.	Black	Galv
No. 10	1.55	1.90	....	....
No. 12	1.55	2.00	....	....

No. 27	1.85	2.75	2.55	3.35
No. 28	1.90	2.90	2.60	3.50

Steel Shapes—While prices are without change, there is little doubt that somewhat higher figures will be demanded before the end of the month. This will be due to the advance at the mill anounced Feb. 1. In New York small lots are quoted as follows:

	Cents Per Pound
Refined iron:	
1 to 1⅞ in., round and square	1.85
1½ to 4 in. x ⅜ to 1 in	1.85
1½ to 4 in. x ¼ to 5/16 in	2.05
Norway bars	3.20
Burdens bar iron	3.15
Soft steel:	
¾ to 3 in., round and square	1.85
1 to 6 in. x ⅜ to 1 in	1.85
1 to 6 in. x ¼ and 5/16	2.00
Rods—⅝ and 11/16 in	1.95
Bands—1½ to 6x3/16 in. to No. 8	2.15
Beams and channels—3 to 15 in	1.90
Angles:	
3 in. x ¼ in. and larger	1.90
3 in. x 3/16 in. and ⅛ in	2.35
1½ to 2¾ in. x 3/16 in. and thicker	2.00
11½ to 2½ in. x ⅛ in	2.10
1 to 1¼ in. x 3/16 in	2.10
1 to 1¼ in. x ⅛ in	2.15
Tees:	
1½ to 2½x¼ in	2.05
1½ to 2½x3/16 in	2.15
3 in. and larger	1.95

Steel Sheet Piling—Business is not active, but prices are steady and firm at 1.55 to 1.60c. in Pittsburgh.

Freight Rates—The freight rates on finished steel products from the Pittsburgh district, including plates, structural shapes, merchant steel and iron bar, pipe fittings, plain and galvanized wire, nails, rivets spikes, and bolts, black sheets (except planished) chains, etc., are as follows in cents per hundred pounds: Albany, 16; Buffalo, 11; Boston, 18; Baltimore, 14½; Canandaigua, 13½; Cleveland, 10; Columbus, 12; Cincinnati, 15; Chicago, 18; Denver, Colo., 85½; Harrisburg, 14½; Louisville, 18; New York, 16; Norfolk, 20; Philadelphia, 15; Rochester, 11½; Richmond, 20; Scranton, 15; St. Louis, 23; Washington, 14½.

Freight Rates via Panama—The ocean freight market is very uncertain. It is difficult to secure enough vessels to carry the cargoes offered. An advance of 5c. per 100 lb. is now demanded for shipments from New York and Philadelphia bringing the quotation to 30c. For large lots of steel, such as shapes, reinforcing bars, plates wire and similar products, the rates to Pacific Coast points are as follows: From Bethlehem, 37.5c.; Chicago, 55c.; Cleveland, 44c.; Coatesville, 40c.; Johnstown, 39.5c.; New York, 30c.; Niles, 43c.; Philadelphia, 30c.; Pittsburgh, 46c.; Steubenville, 41c.; Wheeling, 41c.; Youngstown, 43c.

Wire Products—The insistent foreign demand continues, but inability to secure freight room, and high freight rates, may have some influence on this trade later in the year. Prices are steady. Plan wire to retailers Pittsburgh is quoted at $1.40; galvanized wire to retailers Pittsburgh, $1.75 to $1.80; painted barbed wire, $1.55 to $1.60, and galvanized barbed wire $1.95 to $2. Polished staples are $1.50 to $1.55, and galvanized staples $1.90 to $1.95. Wire nails are quoted at $1.63 Pittsburgh. All of these quotations are per 100 lb. in large lots|

Old Material—Prices are well maintained, and, in some cases, are higher than a month ago. There is a fair inquiry, but only a part of this has been turned into orders. In New York quotations are as follows:

	Per Gross Ton
Heavy-melting steel scrap	$8.00 to $9.15
Pipes and flues	7.25 to 7.50
No. 1 railroad wrought	9.50 to 10.00
Stove plate	8.00 to 8.50
No. 1 machinery cast	11.00 to 11.50
Wrought turnings	5.50 to 6.00

In Chicago prices are higher, but business is not especially active. Quotations are as follows:

	Per Gross Ton
Heavy-melting steel scrap	$9.75 to $10.00
	Per Net Ton
No. 1 railroad wrought	$8.75 to $9.00
No. 2 railroad wrought	8.25 to 8.50
No. 1 cast scrap	9.00 to 9.25
Pipes and flues	7.00 to 7.25
Agricultural malleable	7.50 to 7.75
Railroad malleable	7.75 to 8.25

The Pittsburgh market shows more life following the lead of heavy-melting steel scrap, which moved up 25c. a ton. Quotations are as follows:

	Per Gross Ton
Heavy-melting steel scrap	$11.00 to $11.75
Re-rolling rails	11.50 to 12.00
No. 1 foundry cast	11.25 to 11.75
Old car wheels	11.50 to 12.00
Machine shop turnings	7.75 to 8.00
Railroad malleable	.... 10.00

Wire Rope—Prices are lower and the new discounts are 47 and 5% from list for galvanized and 55 and 5% for bright. At these discounts the net price of wire rope at the mill is as follows:

Diameter in Inches	Price per Foot		
	Cast Steel	Crucible Steel	Plow Steel
2½	$0.75	$0.90	$1.07
2¼	0.61	0.73	0.86
2	0.47	0.57	0.67
1¾	0.39	0.49	0.58
1½	0.28	0.34	0.40
1¼	0.20	0.24	0.27
1	0.13	0.15	0.18
¾	0.08	0.09	0.11
⅝	0.06	0.07	0.08

Chain—Prices are steady and without change, as follows: These prices are per 100 lb., f.o.b., Pittsburgh:

3/16 in.........	$7.50	½ and 9/16 in.........	$3.00
¼ in.........	4.95	⅝ and 11/16 in.........	2.90
5/16 in.........	3.95	¾ and 13/16 in.........	2.80
⅜ in.........	3.40	⅞ and 15/16 in.........	2.70
7/16 in.........	3.20	1 to 1¼ in..........	2.60

EXTRAS TO ABOVE LIST PER 100 LB.

	For BB	For BBB
3/16-in. and ¼-in............	$1.50	$2.00
5/16-in. and larger..........	1.25	1.75

Coke—The financial difficulties of the Tower Hill-Connellsville Coke Co., together with those of J. V. Thompson, have resulted in an unsettled condition of the coke industry. Besides, the demand appears to be less than normal and lower prices are reported. Cosumers appear to have supplied their needs for the first part of the present year and producers are not expecting an active demand for some time. Standard makes of blast-furnace coke for immediate shipment are quoted at $1.50 to $1.60, and on contracts for future delivery at $1.65 to $1.75 per net ton at oven, and best grades of 72-hr. foundry coke are $2 for prompt shipment and $2.15 to $2.25 per ton net at oven on contracts for delivery to July 1.

REINFORCING MATERIALS

Bars, Concrete Reinforcing—No change was made in the price of bars for February delivery, which was expected in view of the higher prices for other steel products. For later deliveries, higher prices are demanded, 1.15c. being the base price for March and 1.20c. for April. Prices for other sizes are as follows:

	Cents per Pound		
Size	Mill Shipments Pittsburgh	*Warehouse Pittsburgh	Delivered from *Warehouse New York
¾-in. and larger...	1.10	1.50	1.95 to 2.00
⅝-in.	1.15	1.65	2.00 to 2.05
½-in.	1.30	1.80	2.15 to 2.20
⅜-in.	1.40	1.90	2.25 to 2.30
¼-in.	1.70	2.20	2.60 to 2.65

*Bars from warehouse are cut to desired length without extra charge.

Triangle Mesh—Prices continue without change as follows:

PRICE PER 100 SQ.FT.

		Plain Material		Galvanized	
Style No.	Cross Sec. Area per Ft. Width	Carload Lots	Less Than Car Lots and Over 10,000 Sq.Ft.	Carload Lots	Less Than Car Lots and Over 10,000 Sq.Ft.

†43	0.101	1.10	1.34	1.23	1.46

†This material is made in regular widths of 18, 22, 26, 30, 34, 42, 46, 50, 54 and 58 in. Standard lengths in rolls are 150, 250, 300 and 600 ft.

CLAY PRODUCTS

Sewer Pipe—Business during the month has been very quiet. Discounts are as follows: 3- to 24-in., 78%; 27- to 30-in., 70%; 33- to 36-in., 65%. At these discounts, net prices are as follows:

PRICE OF SEWER PIPE PER FOOT

Size		Size	
3-in	$0.055	18-in.	$0.418
4-in.	0.055	20-in.	0.495
5-in.	0.088	22-in.	0.66
6-in.	0.088	24-in.	0.715
8-in.	0.1265	27-in.	1.35
10-in.	0.184	30-in.	1.65

8½x13-in	28	0.13			

METALS

Copper—Orders for copper for export continue large, Russia being the heaviest buyer for shipment, via Japan. The export demand, together with the local activity, has resulted in a marked advance in prices. It is thought by those in the trade that the demand for foreign consumption will result in a larger output by the mines in spite of the large supplies in warehouses. Indications point to exports amounting to at least 60,000,000 lb. for January. For American consumption, deliveries this month have been larger than during December, although there has been little increase in consumption on domestic account. Local manufacturers' melting has increased, due to export orders for finished materials. Buying of wire bars and electrolytic copper by manufacturers is likely to continue, as important orders are being received daily. Lake copper is strong, the ruling price being 15c., while electrolytic is quoted at 14.75c. The general condition of the trade is considered to be much better than for any time since the summer months, and while the recent advance may be partially the result of speculation, there is no doubt that there is a large genuine demand.

Tin—The market has developed strength and prices have advanced materially. Spot tin sold at 35.75c. in lots of 25 tons, while five-ton lots were dealt in at 36.25c. January arrivals amounted to about 3500 tons and there are afloat 2900 tons. The interest, however, is confined to spot tin and not to the future position, consumers being inclined to take chances on being able to buy to better advantage as time advances. Lack of shipping facilities from the Far East is one of the controlling factors in the situation which is not likely to improve until conditions become more settled.

Lead—The market for lead has been strong. Prices are higher, spot being quoted at 3.65c. to 3.70c., New York, and 3.55c. to 3.60c., East St. Louis.

Spelter—Prices are much higher, due to an insistent demand from domestic consumers. While lower prices have been predicted, they have not yet materialized. Spot in the open market sold for 7.37½c., New York, and 7.12½c., East St. Louis.

Antimony—Prices for antimony have advanced materially, special brands being in a much stronger position. Cookson's is quoted at 20c. per lb., Hallett's 19c., while ordinary brands sold at from 16c. to 17c. per lb.

Miscellaneous Metals—Prices are generally higher, mainly due to the advance in copper, together with a more lively demand. Quotations for small lots are as follows:

	Per Pound
Bismuth	$3.80 to $4.10
Brass tubes, iron-pipe sizes:	
½ in.	17.25c.
¾ in. to 3 in.	16.25c.
3½ in.	16.25c.
4 in.	17.25c.
Brass rods	15.25c.
Brass sheets	15.50c.
Solder	22.50c.
Copper tubes	21.25c.
Zinc sheets	9.50c. to 10c.
Copper sheets	19.75c.
Pig tin (five-ton lots, cash)	35c.

Old Metals—The market for old metals has been narrow, the demand being extremely small. Dealers' buying quotations are as follows:

	Cents per Pound
Copper, heavy and crucible	12.10
Copper, heavy and wire	11.75
Copper, light and bottoms	10.50
Brass, heavy	8.25
Brass, light	6.75
Heavy machine composition	10.25
Composition turnings	8.75
Lead, heavy	3.20
Zinc scrap	4.50

MISCELLANEOUS

Rubber—The price of rubber is lower than at any time in the last five years. The leading American manufacturers have secured the consent of the British Government to export rubber from Great Britain to the United States under certain restrictions. Stocks in Great Britain and the United States are sufficient for the present demand, and it is significant to note that manufactured supplies have had a sharp fall in prices. Quotations are as follows: Up River Para fine, 58 to 60c.; Up River Para coarse, 44 to 46c.; Island fine, 55 to 58c.; Island coarse, 29 to 30c.; Balata sheet, 50 to 52c.; Ceylon sheet, 62c.; Ceylon pale crepe, 61½ to 63c.

Machine Tools—Activity among certain classes of the machine tool manufacturers has probably never been more pronounced than in the last six weeks. Foreign buyers have purchased lathes in unusual numbers, and milling machines have lately been in good requisition. Foreign buyers have not only taken new tools, but have made serious inroads on the stock of second-hand machines, of which there was an enormous supply. Most of the machinery taken has been of the smaller types, but, owever, a few automatic machines have been purchased, and some boring mills. Turret lathes have been in exceptionally good demand. This machinery goes not only to Great Britain, but to France, Italy, and a large amount to Russia.

Railway Ties—With the exception of a few inquiries from foreign markets for special sizes in railway ties, there has been no noticeable improvement during the month. Standard first-class ties are quoted as follows: 7x9 in. x 8 ft. 6 in., 72c.; 6x8 in. x 8 ft., 63c. These prices are f.o.b. New York.

Lighterage Limits—The free delivery or "Lighterage Limits" in New York are as follows: In Manhattan, from a point opposite the Fort Lee ferry, south along the Hudson River around the Battery and north along the East and Harlem Rivers to the Jerome Ave. Bridge at 155th St. In New Jersey, south from Fort Lee ferry to Bayonne City, points on the north and east shores at Staten Island, between Bridge Creek (Arlington) and Clifton, both inclusive, and including Elm Park, Erastina and Shooters Island. In Brooklyn, from 69th St., Bay Ridge, north to Pot Cove, Astoria, Borough of Queens.

Immigration—The monthly bulletin of the Bureau of Immigration shows that 26,298 aliens were admitted in November, the smallest number in any month in recent years. The immigration of aliens, for a series of months, is compared with previous years as follows:

	1914	1913	1912	1911
January	44,708	46,441	38,453	36,361
February	46,873	59,156	45,380	42,82[illegible]
March	92,621	96,859	91,185	81,687
April	119,885	136,271	99,839	98,936
May	107,796	137,262	113,635	95,361
June	71,728	176,261	92,425	71,019
July	60,377	138,244	78,101	57,737
August	37,706	126,180	82,377	50,110
September	29,143	136,347	105,611	62,599
October	30,416	135,140	108,300	69,418
November	26,298	104,671	94,739	61,765
December	.....	95,387	76,315	59,841

RAILWAYS

Virginia—Southern Ry.—Surveys are being completed by this company for the construction of a second track on its line from Arrowhead to Elma, Va. W. H. Wells, Washington, D. C., is Ch. Engr. Const.

North Carolina—Carolina & Yadkin River Ry.—This company contemplates the extension of its line from Denton to Troy, N. C., about 25 miles. E. C. Deal, Greensboro, N. C., is Vice-Pres. and Ch. Engr.

South Carolina—Carolina, Atlantic & Western Ry.—Plans are being considered by this company for the construction of an extension from Charleston, S. C. to Savannah, Ga. William Moncure, Raleigh, N. C., is Ch. Engr.

South Carolina—According to press reports J. C. Brewerton, Fayetteville, N. C., has secured the right-of-way for his proposed railway from the timber land on the Congaree River to his cooperage plant near Columbia, S. C.

Georgia—Carolina, Atlantic & Western Ry. — See item under South Carolina.

Louisiana—It is reported that surveys are being made for the construction of a logging road for the Chess & Wymond Co., from Rayville, La., to Calvert, where a connection with the Memphis, Helena & Louisiana R.R. will be made.

Kentucky—Chesapeake & Ohio Ry.—According to press reports this company contemplates the extension of its Beaver Creek branch from Beaver, Ky., to Wayland, Ky. C. W. Johns, Richmond, Va., is Engr. Branch Lines.

Missouri—Ozarks Ry.—Plans are being considered by this company for the construction of a 215-mile railway to connect Springfield, Mo., and Little Rock, Ark. K. V. Loba, Mountain Home, Ark., is Pres.

Arkansas—Ozarks Ry.—See item under Missouri.

Arkansas—Black Mountain & Eastern R.R.—This company has been incorporated to construct a railway from Combs to Gass, Ark., about 20 miles. The directors are Edward E. Jeter, Combs, J. H. Phipps, J. M. Williams and W. J. Reynolds, Fayetteville.

Arkansas—Memphis, Dallas & Gulf R.R.—This company contemplates the construction of a railway from Shawmut to Arkadelphia, Ark., about 50 miles. W. P. Hart, Nashville, Ark., is Ch. Engr.

Arkansas—De Queen & Eastern R.R. — See item under Oklahoma.

Texas—San Antonio, Fredericksburg & Northern Ry.—The construction of a 125-mile extension from Fredericksburg to Brownwood, Tex., will soon be started by this company. R. A. Love, San Antonio, is Pres.

Oklahoma—De Queen & Eastern R.R.—The construction of a railway from Broken Bow, Okla., to De Queen, Ark., about 26 miles, is contemplated by this company. J. C. Leeper, Broken Bow, is Ch. Engr.

New Mexico—Atchison, Topeka & Santa Fé Ry.—Surveys are being made by this company for the extension of its line from Des Moines, N. M. to Clovis, N. M. F. M. Bisbee, Amerillo, Tex., is Ch. Engr. Western Lines.

Idaho—Western Pacific Ry.—B. F. Bush, Pres., announces that funds for construction of the Boise-Winnemucca branch of the road, have been secured, and construction will soon be started. T. J. Wyche, San Francisco, Calif., is Ch. Engr.

ELECTRIC RAILWAYS

Lynchburg, Va.—The Lynchburg Traction & Light Co. contemplates building extension to Madison Heights over the proposed viaduct from Seventh and Commerce St. across the James River. J. W. Hancock, Lynchburg, is Gen. Ggr. and Pur. Agt.

Radford, Va.—Plans are being considered for the construction of an electric railway to connect Radford and Willis, about 28 miles. A. J. McClung, Secy. Bd. of Trade, Radford, is interested.

Princeton, W. Va. — Plans are being prepared by the Princeton Power Co. for the construction of 13 miles of new track. S. J. Evans, Princeton, is Pres. and Gen. Mgr.

Tarpon Springs, Fla.—According to press reports the construction of an electric railway from Tarpon Springs to Fivay, about 12 miles, is under consideration. W. L. Sontag, Alabama Hotel, St. Petersburg, and M. L. Waggoner, Third Ave. South, St. Petersburg, are interested.

Gadsden, Ala.—Preliminary arrangements are being made to start work in the spring on the construction of an electric railway to connect Gadsden and Center. Louis Hart, Gadsden, is interested. Noted Nov. 12.

Mobile, Ala.—The Mobile Light & R.R. Co. proposes to construct two loop lines in Mobile to connect its present tracks. P. P. Crafts, Mobile, is Mgr.

New Iberia, La.—The Southwestern Traction & Power Co. is preparing plans for the construction of an electric railway to connect New Iberia and St. Martinville, about ten miles. The company is also considering the construction of a line from Jeanerette to Berwich, about 50 miles. W. S. Heming, New Iberia, is Ch. Engr.

Shreveport, La.—Plans are being considered by the Shreveport Traction Co. for the extension of its electric railway from Waverly to South Highlands. W. A. Sullivan, Shreveport, is Gen, Mgr. and Pur. Agt.

Newport, Tenn.—The Carolina, Greenville & Northern R.R. Co. is making preliminary arrangements for the construction of its proposed electric railway from Kingsport to Newport. H. S. Reed, Los Angeles, Calif., is Pres. Noted Dec. 31.

Cleveland, Ohio—The Cleveland, Southwestern & Columbus Ry. Co. contemplates the construction of an electric railway to connect Berlin Heights, Wakeman, New London, Plymouth, New Washington and Bucyrus. E. F. Schneider, Cleveland, is Gen. Mgr. and Pur. Agt.

Cleveland, Ohio — The Cleveland Ry. Co. has submitted plans to the Madison Ave. Civic Association for the construction of an electric railway on Madison Ave. from West 117th St. to Rocky River. George L. Radcliffe, Cleveland, is Gen. Mgr.

Chicago, Ill.—The city contemplates an expenditure of $3,000,000 for a motorbus transportation system. John Ericson is City Engr.

Kankakee, Ill.—According to press reports the right-of-way from Lafayette to Rensselaer has been secured for the construction of the proposed electric railway from Lafayette to Kankakee.

Ludlow, Ill.—The Kankakee & Urbana Traction Co. contemplates the extension of its line north from Ludlow. T. W. Shelton, Urbana, Ill., is Ch. Engr.

Columbus, Kan.—The Oklahoma & Interstate Ry. Co. is making preliminary arrangements to start work in the spring on the construction of its proposed electric railway to connect Columbus, Galena and Baxter Springs, Kan., and Commerce and Miami, Okla. Noted July 16.

Galina, Mo.—The Southwest Missouri R.R. Co. contemplates the extension of its line from Galena to Commerce. E. J. Pratt, Webb City, is Supt. and Pur. Agt.

St. Louis, Mo.—The United Ry. Co. of St. Louis contemplates the extension of its Fourth St. line through the Lafayette Park district. Robert McCulloch, St. Louis, is Pres., Gen. Mgr. and Pur. Agt.

Brenham, Tex.—Surveys are being made for the construction of an electric railway to connect Brenham, Independence and Washington. L. M. Hewitt, Bryan, is interested. Noted Nov. 12.

San Angelo, Tex.—Plans are being considered by the San Angelo St. Ry. Co. for the construction of an extension to its line. R. S. Grimes, San Angelo, is Supt.

Brigham City, Utah.—The Ogden Rapid Transit Co. is preparing plans for the extension of its line from Wellsville to Brigham City. P. D. Kline, Ogden, is Gen. Mgr.

Santa Barbara, Calif.—The City Council has granted a franchise to Richard Hamilton Gaud to construct and operate an electric railway on certain streets in the city.

LIGHT, HEAT AND POWER

Auburn, Maine—The City Council is considering the installation of a municipal electric-light plant. It has been suggested that a vacant school building be used for the installation of a steam-driven electric generating plant. The estimated cost of such a plant is $50,000. R. A. Swift is City Engr.

Framingham, Mass.—Bids will be received until Feb. 6 by the State Board of Education for the wiring and electrical and boiler work in a dormitory building for the State Normal School. David Snedden is Chn. of Bd. Grey Lowell, 12 West St., Boston, is Arch.

✚Lynn, Mass.—(Official)—The Lynn Gas & Electric Co. has awarded the contract for the foundation of its new gas holder to the MacARTHUR CONCRETE PILE & FOUNDATION CO., 11 Pine St., New York. The contract for the tank was awarded to the BARTLETT-HAYWARD CO., Baltimore, Md. The holder will have a capacity of 5,000,000 cu.ft.

Providence, R. I.—The Providence Gas Co. plans to lay 7000 ft. of new gas pipe, and will build a new gas holder at Hartford and Petteys Ave. John W. Ellis is Pres. and Mgr.

New Haven, Conn.—The Winchester Repeating Arms Co. has taken out a permit for the construction of an addition to its gas plant on Newhall St. It will cost $6200.

New York, N. Y.—(Borough of Brooklyn)—(Official)—Bids were opened Jan. 25 for electrical equipment in new Public School 95, Van Sicklen St. and Neck Rd., Borough of Brooklyn, as follows: New York Construction Co., $7796; Jandous Electrical Equipment Co., $7900; Wimpie Electric Co. Inc., $9250; Peet & Powers, $7570 (approximately); T. Frederick Jackson Inc., $7564. Noted Jan. 21.

New York, N. Y.—(Borough of Brooklyn)—(Official)—Bids were opened Jan. 25 for installing heating and ventilating apparatus in Public School 36, Stagg and Ten Eyck St., between Bushwick Ave. and Waterbury St., Borough of Brooklyn, from the following: Blake & Williams, $18,214; Grimshaw & Sturges, $17,841; William J. Olvany, $17,535; Osborn, Rea & Co., $18,556; Daniel J. Rice, $18,992; Raisler Heating Co., $19,600; James Curran Mfg. Co. Inc., $17,778; George E. Gibson Co. Inc., $20,300; Philip & Paul, $18,583. Noted Jan. 21.

New York, N. Y.—(Borough of Manhattan)—(Official)—Bids were received Jan. 29 by the Board of Trustees, Bellevue and Allied Hospitals, for reconstructing the existing branch circuits of the electric lighting system, additional gas piping, and gas and electric fixtures for the main building of the Harlem Hospital from: E. J. Electric Installation Co., New York, $3310; Reis & O'Donovan Inc., $7980; Lewis H. Woods, $6475; Frank Neheling, $4713; C. J. McCullough, $4788. Noted Jan. 21.

Butler, N. J.—(Official)—Bids will be received until 8 p.m., Feb. 15, by the Lighting Committee of the Borough Council of Butler for the construction of a municipal electric-light plant, including building for power station, oil engines, generators, switchboards, distributing system, etc. Runyon & Carey, 845 Broad St., Newark, N. J., is Engr.-in-Charge.

✚Wilkes-Barre, Penn.—The Board of Directors of the Wilkes-Barre Private Ward Hospital has awarded the contract for electrical work in the new hospital building to SHEPHERD & RUST, 42 West Market St., Wilkes-Barre. The plans provide for an indirect lighting system throughout, power installation for motors, heating apparatus, vacuum cleaning, ventilating and signaling systems, passenger and freight elevators, and for electro-therapeutic work and X-ray apparatus.

Cleveland, Ohio—Bids will be received until Feb. 5 by the Commissioner of Purchases and Supplies, City Hall, for storage battery set to operate electric switches and signals for substation, for the municipal electric-light plant.

Cleveland, Ohio—Bids will be received until noon, Feb. 10, by the Commissioner of Purchases and Supplies for piping and valves in connection with a 100-kw. turbine. Bids will be received until noon, Feb. 12, for fiber conduit for the municipal electric light department. F. W. Ballard, 1443 East Third St., is Comr. of Light and Heat Dept.

Columbus, Ohio—The Board of Commissioners of Franklin County is reported to be considering plans for an electric-power plant to light the Court House, the county morgue, the infirmary buildings and Memorial Hall.

Findlay, Ohio—It is reported that the Modern Light & Power Co., recently incorporated with a capital of $10,000, will build an electric-light plant for local service. R. C. Bishop, P. D. Elsea and E. B. Newman are interested.

Detroit, Mich.—Press reports state that the Edison Illuminating Co. of Detroit will soon begin the construction of a $125,000 substation on Congress St. near Cass Ave. The building will cost about $40,000, and the equipment $85,000. About 5000-kw. will be generated at first, but eventually it will be increased to 10,000-kw. Alexander Dow is Pres. and Gen. Mgr. of the company.

Lansing, Mich.—F. W. Blackmar, Chn. of the Prison Commission, has recommended, in a recent report to the Governor, the installation of a new power plant at the Lansing State Penitentiary. The probable cost of the plant will be $50,000.

West Branch, Mich.—It is reported that Francis E. Hatch, Detroit, Mich., has purchased an electric-light plant at West Branch, and will spend about $30,000 in enlarging and improving it.

Medford, Wis.—The Medford Light & Heating Co. contemplates, so it is reported, the construction of a new power house and the installation of sufficient new equipment to furnish a 24-hr. service. William Ungrodt, Medford, is Supt. and Ch. Engr.

Hibbing, Minn.—According to press reports, the Water and Light Commission is considering the purchase of a new site, and constructing an entire new municipal power plant, including a condensing system, which will appreciably reduce the amount of fuel required. John Curran is Chn. of Water and Light Comn. Noted May 14 and June 11.

Imogene, Iowa—The City Council is considering the establishment of a municipal electric-light plant. It is reported that energy for its operation will be obtained from the Shenandoah plant.

Schleswig, Iowa—It is reported that the City Council has made an appropriation of $16,000 to be used for the construction of a municipal electric-light plant.

Edgar, Neb.—Plans are being prepared for remodeling the municipal electric-light plant. John Kaminske is Pur. Agt.

Knobnoster, Mo.—The Standard Engineering Co., Republic Bldg., Kansas City, Mo., is preparing plans for the construction of an electric-light plant in Knobnoster, to cost about $15,000. It is reported that bids will be asked for the equipment about Feb. 15.

Casa Grande, Ariz.—F. H. Brackett, Colin Cameron and Frank H. Hitchcock have applied to the City Council for a franchise to construct and operate an electric-light plant in Casa Grande. The estimated cost of the improvement is $100,000. An ice factory and water-works system will possibly be built.

Prescott, Ariz.—It is reported that the Arizona Power Co. plans to construct three miles of 45,000-volt transmission line, and install a substation at Carlisle with an output of 2000 hp. M. V. Watson is Mgr.

Castella, Calif.—The California-Oregon Power Co., San Francisco, contemplates extending its transmission lines from Castella, Shasta County, to the Coffee Creek mining district, a distance of 25 miles. A. L. Rosborough, San Francisco, is Secy. and Gen. Mgr.

BRIDGES

+Van Buren, Maine—(Official)—A contract has been awarded to the MacARTHUR CONCRETE PILE & FOUNDATION CO., 11 Pine St., New York, N. Y., for the concrete pile foundation of the bridge to be built over the St. John River between Van Buren, Maine, and St. Leonard, N. B. Noted Jan. 30, 1913, and Oct. 29, 1914.

+★Wawarsing, N. Y.—(Official)—The Town Board of Wawarsing has awarded the contract for the construction of a 197-ft. bridge over Rondout Creek to the LACKAWANNA BRIDGE CO., Buffalo, N. Y., at $8490. S. S. Shurter is Town Supt. Noted Jan. 7.

Camden, N. J.—In accordance with an ordinance recently adopted by the City Council, the Pennsylvania R.R. plans to build a new reinforced-concrete bridge over its tracks at 27th St. The estimated cost is $100,0000. A. C. Shand, Philadelphia, Penn., is Ch. Engr.

Freehold, N. J.—Press reports state that the Board of Chosen Freeholders of Monmouth County and the Jersey Central Traction Co. will build a $40,000 drawbridge at the mouth of Matawan Creek on the Keyport and South Amboy Rd. The bridge will be 30 ft. wide.

Harrisburg, Penn.—(Official)—Plans are not yet ready for bids for the new double track railway bridge to be built by the Cumberland Valley R.R., over the Susquehanna River at Harrisburg. It will consist of 21 74½-ft. and 24 77-ft. concrete arches, and one 70-ft. steel, half-through plate girder for double track. About 75,000 cu.yd. of concrete will be required. The estimated cost is $750,000. Thomas B. Kennedy, Chambersburg, Penn., is Engr.-in-Charge. Noted Jan. 1 and 15, Apr. 16, 1914, Jan. 21, 1915.

Bedford City, Va.—(Official)—Bids will be received until noon, Feb. 16, by the Clerk of the Circuit Court of Bedford County, for the construction of a 209-ft. bridge over Elk Creek, about three miles from Forest. The Childrey Co., Richmond, Va., is Engr.-in-Charge.

+Richmond, Va.—(Official)—The State Highway Commission has awarded the contract for the construction of a reinforced-concrete bridge over the Chickahominy River between Henrico and Hanover Counties, to SHIRLEY CARTER, Ashland, Va. Six other bids were received. Noted Jan. 21.

Eastern Building Operations Gain

More favorable than was to be expected were the building returns for January. Important gains were made in Albany, Boston, New York, Springfield, Syracuse and St. Louis. The large falling off in San Francisco, Calif. was unimportant, the large operations there last year were unusual. In 23 cities in the Eastern States there was a gain of 12%. This is an important increase and the fact that it began in the East is taken to mean that a gradual improvement through the country may soon be expected; recession in business is usually first felt on the Atlantic seaboard and the first improvement in trade is likewise shown there. The falling off in 14 Southern cities was far less than expected.

+Madison, Wis.—(Official)—M. E. McCaffrey, Secy. of University of Wisconsin, informs us that the contract for the construction of the Soils Building has been awarded to T. C. McCARTHY, Madison, at $49,249. Other bids were received as follows: George R. K[illegible]chie, $52,873; Zenith Construction Co., $51,500; General Construction Co., $52,924; Appleton Construction Co., $54,616, Gray Construction Co., $53,580; A. D. and J. V. Frederickson, $54,655; Fleisher-Rose Construction Co., $52,246; Wisconsin Construction Co., $52,000; Gust Holm, $54,358. Noted Dec. 24 and Jan. 28.

Madison, Wis.—Bids are being received by Fred L. Kronenberg, Arch., for the construction of a school in the Elmside District. The estimated cost is $75,000.

+Milwaukee, Wis.—Frank M. Harbach, Secy., of Bd. of School Dir., awarded sub-contracts Jan. 28, for the construction of the Washington High School, as follows: RIESEN & RIESEN, University Bldg., masonry, $74,370; CONSOLIDATED STONE CO., cut stone, $31,886; ANTON J. RECHLIZ, sheet metal, $5763; AUGUST HOLSTEIN, carpentry, $45,290; WISCONSIN MANTLE & TILE CO., tile and marble, $36,900. The estimated cost is $365,000.

Missouri Valley, Iowa—Bids will be received about Mar. 1 by F. E. Colby, Arch., Sioux City, for the construction of a three-story, 90x140-ft. high school. The estimated cost is $80,000.

St. Paul, Minn.—(Official)—The Association of Commerce advises us that no action will be taken this year for the construction of a $500,000 home for working girls on Minnesota St. between 11th and 12th St. Noted Jan. 21.

St. Paul, Minn.—The Masonic Lodges of Minnesota will construct a home for old people. The estimated cost is $100,000.

Boston, Tex.—The Christian Endeavor Societies of the United States will begin construction, about Sept. 1, on the construction of an office building. The estimated cost is $500,000. Karl Lehmann, Boston, is Field Secy. and Francis E. Clark, Portland, Maine, is Pres.

+Temple, Tex.—The contract for the construction of a wing to the Atchison, Topeka & Santa Fé Ry. Employees Hospital has been awarded to H. D. McCOY, Cleburne. The estimated cost is $50,000. Noted Aug. 6 and Dec. 24.

+Seattle, Wash.—The contract for the construction of a two-story, 60x111-ft. building on Fourth Ave. and Seneca St. for the Northern Life Insurance Co. has been awarded to NEIL MacDONALD, Central Bldg. Estimated cost, $50,000.

Intercepting Sewer, Newark, N. J., Section 17—Central Portion

Bids were received Dec. 29, by the Passaic Valley Sewerage Commissioners, Newark, for construction Section 17, central portion, of the Main Intercepting Sewer from (A) Arthur McMullen, 149 Broadway, New York, N. Y.; (B) Cauldwell-Wingate Co., 381 Fourth Ave., New York, N. Y.; (C) Culp Co., Inc., Paterson, N. J.; (D) Fusco Construction Co., Newark, N. J.; (E) Merrill-Ruckgaber Co., 50 Church St., New York, N. Y.; (F) Harrison & Craig Co., Newark, N. J.; (G) Litchfield Construction Co., Newark, N. J.; (H) New York & New Jersey Construction Co., Newark, N. J. The item bids were as follows:

	A	B	C	D	E	F	G	H
2265 lin.ft. earth excavation and refilling, in trench, for 69-in. sewer	$41.00	$27.27	$32.03	$16.50	$22.00	$26.00	$16.30	$21.00
3307 lin.ft. earth excavation and refilling, in trench, for 65-in. sewer	32.50	22.75	32.03	17.00	22.00	16.30	16.30	18.00
390 lin.ft. excavation in earth, rock or earth and rock, in tunnel for 69-in. sewer	60.00	78.75	32.50	50.00	50.00	32.00	47.00	60.00

Extended totals	**$1,065,047**	**$973,234**	**$1,047,825**	**$972,544**	**$1,192,080**

Portland, Ore.—The Portland Lodge, No. 291, Loyal Order of Moose, will construct a six-story, 68x100-ft. building at Fourth and Taylor St. The estimated cost is $125,000. George R. Funk is Chn. of Bldg. Com.

Berkeley, Calif.—Plans are being prepared by John Galen Howard, Arch, Architectural Bldg., University of California Grounds, for the construction of a four-story building near the University Library. The estimated cost is $800,000.

San Diego, Calif—The Cabrillo Club contemplates the construction of a seven-story building. The estimated cost is $150,000. W. H. A. Johnston is interested.

Susanville, Calif.—The County Supervisors plan to construct a courthouse. Estimated cost, $100,000. George McGow is Chn. of Bd.

Toronto, Ont.—The Masonic Lodge of Toronto plans to construct a Masonic Temple on Spadina Rd. The estimated cost is $400,000. W. D. McPherson is Grand Master.

INTERCEPTING SEWER, NEWARK, N. J. SECTION 18—SOUTHERLY PORTION

Bids were received Feb. 2 by the Passaic Valley Sewerage Commissioners, for construction Section 18, southerly portion, of the Main Intercepting Sewer, in open trench and tunnel, from (A) James Ferry & Sons, Inc., Baltimore, Md.; (B) Booth & Flinn, Ltd., New York, N. Y.; (C) New York & New Jersey Construction Co., Newark, N. J.; (D) Mason & Hanger Co., Inc., New York, N. Y.; (E) Charles A. Haskin, Boston, Mass. The item bids were as follows:

River Bank Route

	A	C	D
2308 lin.ft. earth excavation and refilling in trench for 65-in. sewer	$67.00	$38.00	$42.00
1040 lin.ft. excavation in earth, rock or earth and rock in tunnel for 65-in. sewer	115.00	51.00	55.00
100 cu.yd. rock excavation in trench	5.00	3.00	3.00
2000 cu.yd. concrete masonry in trench	12.00	10.25	10.50
1200 cu.yd. concrete masonry in tunnel	15.00	14.00	13.50
100 cu.yd. brick masonry in manholes	20.00	15.00	16.00
1000 lb. steel for concrete reinforcement	0.05	0.05	0.05
2000 ton rip-rap	4.00	1.00	2.50
Special steel and timber sheeting and shoring betweens tation 17+25 and station 18+05 (lump sum)	9100.00	10,000.00	6000.00
Extended totals	$335,886	$191,894	$204,286

Tunnel Route

	A	B	C	D	E
695 lin.ft. earth excavation and refilling in trench for 65-in. sewer	$82.00	$60.00	$40.00	$42.00	$27.50
2700 lin.ft. excavation in earth, rock or earth and rock in tunnel for 65-in. sewer	82.00	70.00	48.00	45.00	48.00
100 cu.yd. rock excavation in trench	0.01	3.00	3.00	3.00	5.00
600 cu.yd. concrete masonry in trench	15.00	12.00	11.00	9.50	8.50
3100 cu.yd. concrete masonry in tunnel	15.00	15.00	15.00	12.00	10.00
100 cu.yd. brick masonry in manholes	20.00	18.00	15.00	16.00	20.00
2000 lb. steel for concrete reinforcement	0.05	0.05	0.05	0.05	0.04
Extended totals	$335,991	$286,600	$212,400	$195,590	$187,392

Wallace Supplies Mfg. Co., with offices at 412 Orleans St., Chicago, Ill., and a branch at 233 Broadway, New York. N. Y., is the new name of the Wallace Supply Co. The reason for this change is to better acquaint customers of the firm with the fact that in addition to manufacturing a line of ring benders, bar benders, eye benders, pipe benders, etc., the company is in a position to manufacture specialties of all kinds.

The New England Foundation Co., Inc., has moved to 70 Kilby St., Boston.

The Koehring Machine Co., Columbus, Ohio, announces that a new office was opened early in January by W. W. Williams, in the Provident Bank Bldg., Cincinnati. C. O. Irwin will be in charge of this office.

House Numbers—The Baltimore Enamel & Novelty Co., Baltimore, Md., was low bidder at $509.75 for enameled house numbers. This called for 10,000 plates, size 3x2-in., and 139 gross of screws.

WATER TUNNEL, CHICAGO, ILL.

Section No. 1

✚Bids were received Dec. 2 by the city for constructing Section No. 1 of the Wilson Ave. water tunnel from (A) Great Lakes Dredge & Dock Co., (B) FITZSIMMONS & CONNELL DREDGE & DOCK CO. (awarded contract), (C) Nash Dowdle Co., (D) Byrnes Bros. Dredging & Engineering Co. The item bids were as follows:

	A	B	C	D
1,312,000 lb. steel	$0.07¾	$0.06	$0.12	$0.09
24 6-in. sea valves	50.00	25.00	45.00	25.00
8 12-in. sea valves	75.00	75.00	55.00	45.00
5500 cu.yd. concrete below top of shell	11.90	8.00	8.50	12.00
465 cu.yd. granite	60.00	60.00	71.50	67.00
450 cu.yd. concrete above top of shell	16.00	15.00	12.00	12.00
20,000 lb. reinforcing steel	0.05	0.02½	0.05	0.06
Superstructure complete (lump sum)	59,900.00	42,000.00	71,500.00	49,500.00
Landing structure, complete (lump sum)	20,000.00	17,818.00	35,000.00	24,360.00
40 cu.yd. concrete in floor of well	16.00	15.00	9.50	17.50
37.5 ft. earth excavation in shaft	190.00	78.00	149.00	325.00
62.2 ft. rock excavation in shaft	280.00	50.00	178.00	350.00
54 ft. c.-i. lining	295.00	210.00	260.00	250.00
205 cu.yd. concrete lining of shaft	20.00	12.00	15.00	15.00
2128 ft. 13-ft. tunnel complete	105.00	77.00	99.50	95.00
Extended totals	$553,581	$403,179	$597,710	$550,047

Engineering Work on the Pacific Coast

Many engineers from the East and Central West contemplate visiting the Exposition on the Pacific Coast this year, and some of them have already formed a half-hearted idea to locate there permanently if conditions are propitious.

Knowing this, a series of letters has recently been sent out to well informed engineers in Washington, Oregon and California, in an endeavor to secure an idea of the contemplated municipal work for the year. The results, which are highly satisfactory, are given below in an abbreviated form. Regarding work on the Coast, especially work for engineers, the statement, by a prominent contracting firm, will bear repeating as follows:

"You will be doing a great favor, not only to engineers here but to all engineers in the East, by informing them that the engineering profession in this country is greatly overcrowded now, and that they should not come out here with the idea of staying and following their line of work. They are much better off in the East, where conditions are more stable the year round."

There is a great deal of work outside of the strictly municipal projects, such as hydro-electric plants, bridges, Columbia Highway, and other roads of like importance. Many of these will not be completed for several years, but the preliminary plans are now being prepared.

Aberdeen, Wash.—The improvement most needed is a permanent water supply, but there is little likelihood of the work being done this year.

Albany, Ore.—The public improvements most needed are a city hall, and a municipal gas plant. Little prospect of their construction this year.

Anaheim, Calif.—Improvement most needed is a new city hall. There is a prospect that a block of ground will be purchased, and a $40,000 city hall built, as the nucleus of a Civic Center.

Ashland, Ore.—The greatest need is for the extension of the municipal water and lighting systems. Improbable that any work will be done this year.

Astoria, Ore.—No special need, except for work now under way. Private improvements and industries are most wanted. Small amount of street improvement and sewer construction planned for this year, but most of the contracts for city improvement work have been awarded.

Bakersfield, Calif.—Ornamental street lights, storm sewers, and a garbage disposal plant are badly needed. Will probably not be done this year, but it is possible, as a new city charter is now before the Legislature.

Berkeley, Calif.—The city needs an improved water supply. Little prospect of any work this year.

Bremerton, Wash.—The city is most in need of grading and sidewalk improvements. About one mile of paving is contemplated during the year. The city also contemplates the purchase of the water and light plants.

Burns, Ore.—The city needs a new water supply and sewer construction. Little likelihood of their construction this year.

Coalinga, Calif.—Good roads and water supply are most needed. No improvements contemplated for this year.

Colfax, Wash.—A municipal park and playgrounds, and surfacing of country roads in the vicinity are needed. The work will probably be done this year.

Centralia, Wash.—There is need of pavements, sewers, city hall and other improvements. No funds to do the work at present.

Corona, Calif.—Street paving, sewage disposal plant and ornamental street lights are needed. About four miles of street paving will probably be done this year.

Emeryville, Calif.—The city's greatest need is for additional asphalt paving. Some of the work will probably be done this year.

Eugene, Ore.—The city needs more paved streets. About a mile of pavement will probably be laid this year. The Water Board also contemplates building several auxiliary reservoirs.

Glendale, Calif.—The city has no sewer system as yet. Preliminary investigations to this end are now beginning.

Hoquiam, Wash.—No special need of any improvements at present. Small amount of street work will probably be done this year.

Los Angeles, Calif.—Street tunnels and subways are much needed in Los Angeles. The work will probably not be done this year.

Marshfield, Ore.—Street paving is needed, of which a small amount may possibly be done this year.

Marysville, Calif.—The city needs improved streets, and a system of storm sewers. It is probable that the work may be begun this year.

Medford, Ore.—The county needs good roads and irrigation districts more than anything else. That portion of the Pacific Highway through Jackson County (50 miles) will be completed this year. It is also proposed to form an irrigation district covering about 5500 acres of the Rogue River Valley.

Mill Valley, Calif.—This city needs improved streets, but there is little likelihood that the work will be done this year.

Modesto, Calif.—Good roads throughout the county are greatly needed. Some street work is now being done, and more may follow.

Monrovia, Calif.—Macadam or concrete roads are needed, but the work will not be done this year.

Nevada City, Calif.—Better residence streets are needed by this city. A considerable amount of work will be done this year.

North Bend, Ore.—New city, so the great need is for improved streets. About $100,000 worth of grading done last summer, and the main business street will be hard surfaced for a distance of one-half mile this year.

Oakland, Calif. — A new district, recently annexed, needs improved streets and sewers. A part of the work will be done this year.

Olympia, Wash.—The city needs a new source of water supply. The city authorities contemplate the construction of a municipal water system, but the plan is opposed by the taxpayers, so no bonds can be sold for the purpose.

Ontario, Calif.—Better streets and a public park are most needed in this city. A site of 40 acres belonging to the city will be eventually laid out as a park. Some trees will probably be planted this year as a beginning. Plans are being prepared for the improvement of eight miles of streets, mostly concrete base, with asphaltic oil wearing surface, and some of macadam, concrete gutters and culverts.

Oregon City, Ore.—Main St. in need of repaving. The work will be done this year. A pipe line, 25 miles long, will be constructed from the head waters of the Clackamas.

Oroville, Calif.—Street pavements and good roads are most needed in the vicinity. Contracts will be let during the year for two miles of pavement on asphaltic concrete base.

Oxnard, Calif.—Additional paved streets are much needed. Ten blocks of waterbound macadam at present under construction.

Pasadena, Calif.—Better transportation facilities are greatly needed in Pasadena. Nothing will be done this year, unless financial conditions improve.

Pendleton, Ore.—Septic tanks are needed. It is expected that the work will be done this year.

Pomona, Calif.—The public improvements needed include roads, street lights, outfall sewer, etc. Contracts have been let for nine miles of concrete roads, to cost about $150,000. Plans have been prepared for an ornamental street-lighting system. Pomona is also in need of a first class hotel.

Porterville, Calif.—Street paving is needed. Contracts for 475,000 sq.ft. of pavement will be awarded in February, and completed as soon as possible.

Portland, Ore.—Water front improvements are needed. It is quite unlikely that the work will be done this year. Some street and sewer improvements will be made this year. It is also planned to build a new diversion dam at the intake of the water supply.

Pullman, Wash.—Street paving is much needed. Contracts have been awarded for some bitulithic and bituminous macadam paving.

Redondo Beach, Calif.—Street improvement is the principal need of the city. Probably no work will be done this year.

Roseburg, Ore.—The city is much in need of a trunk line intercepting sewer. Little probability of its being built this year.

Salem, Ore.—Only minor improvements are needed by this city. They will probably be made this year.

San Francisco, Calif.—Among the municipal improvements planned for the year are: Extensions of railways, perfecting the garbage incinerating system, extension of sewers and water supply.

San Rafael, Calif.—Bridges are needed, also storm sewers and additional street paving. Some of the work will be done this year. The city spent over $200,000 during 1914 for municipal improvements.

Santa Clara, Calif.—Street improvements are most needed by this city. About five miles of street pavement, sidewalks, curbs and gutters will be constructed this year.

Santa Monica, Calif.—This city needs a system of storm sewers, and the street paving consistent with the improvement of property. The storm sewers will be constructed this year, providing the election for the issue of the necessary bonds carries.

Seattle, Wash.—Bridges are most needed in Seattle. An election will be held in March for the purpose of voting a bond issue for the construction of bridges over Lake Washington Canal. Some general improvements are also needed.

Snohomish, Wash.—No special improvements are needed in Snohomish and vicinity.

South Bend, Wash.—Reclamation of the tide lands is needed. One concrete dike will be constructed this summer. The estimated cost is $60,000.

Spokane, Wash.—No public improvements needed at this time. Grade separation work by various railways has either been recently completed, or is now under way.

Stockton, Calif.—Sewer extensions are needed in the city, but it has not yet been decided whether the work will be undertaken this year or not. An irrigation system is being planned to develop about 40,000 acres of land in Shasta County. The main canal will be 40 miles long, with about 55 miles of laterals.

Tacoma, Wash.—Hard surfaced trunk highways are needed in the vicinity. The city needs a trunk sanitary sewer, and intercepting storm and sanitary sewers. The work will not be done this year.

Tulare, Calif.—Street paving, an additional school building and a new city hall are the principal needs of this city. Some paving of the city streets, and of the State Highway through Tulare County will probably be done this year.

Vallejo, Calif.—An improved system of garbage disposal, and filling of the water front are needed in Vallejo. It is improbable that the improvements can be made this year.

Ventura, Calif.—Storm sewers, costing from $20,000 to $24,000, are much needed. On account of the already heavy indebtedness of the city, the work will probably not be undertaken this year.

Visalia, Calif.—Street improvements and sewer extensions are needed. No work contemplated in the near future. An election will be held shortly to vote on the question of a new city charter, including a City Manager plan.

Watsonville, Calif.—No improvements contemplated. This city is the center of a fruit raising country, so there is little engineering work of importance.

Whittier, Calif.—Street paving and improvement of the water supply are most needed in this city. Proceedings are under way for laying about 300,000 sq.ft. of asphalt pavement, and more work of the same class is contemplated. Improvements and extensions to the water system, to cost about $10,000 are also under consideration. A new grammar school, to cost $30,000 will soon be built.

RAILWAYS

Virginia—Norfolk & Western Ry.—Surveys are being made by this company for the construction of a railway from Pamplin to Burkeville, Va. J. E. Crawford, Roanoke, Va., is Ch. Engr.

West Virginia—Buckhannon & Northern R. R.—This company has completed surveys and is arranging to start work about Apr. 1 on the extension of its line from Fairmont to Clarksburg, W. Va., about 17 miles. S. D. Brady, Fairmont, W. Va., is Ch. Engr. Noted Feb. 11.

Kentucky—The Continental Coal Co. contemplates an expenditure of $12,000 for the construction of a spur to its mine at Straight Creek, Ky. L. E. Yoder is Ch. Engr.

Kentucky—Illinois Central R.R.—Surveys are being made by this company for double-tracking its line from Central City to Paducah, Ky. A. S. Baldwin, Chicago, Ill., is Ch. Engr.

Indiana—Vandalia R.R.—This company has completed surveys for the construction of a four-mile spur from the White Rose mine in Linton, Ind., to the Southwest mine. F. T. Hatch, St. Louis, Mo., is Ch. Engr.

Kansas—Union Pacific R.R.—This company contemplates ballasting its line from Ellis to Oakley, Kan., about 71 miles. R. L. Huntley, Omaha, Neb., is Ch. Engr.

South Dakota—Chicago, Milwaukee & St. Paul Ry.—According to press reports this company contemplates taking over the Crouch line, from Rapid City to Mystic, S. D. It is reported also that the company has made surveys for an extension from Silver City to Nahant, S. D. C. F. Loweth, Chicago, Ill., is Ch. Engr.

Texas—Chicago, Rock Island & Gulf Ry.—This company contemplates the construction of an extension from Graham to Albany, Tex., about 50 miles. A. B. Warner, Fort Worth, Tex., is Gen. Supt. and Ch. Engr.

Texas—Missouri, Kansas & Texas Ry.—Plans are being considered by this company for the extension of its line from Newcastle to Cisco, Tex., about 50 miles. F. Ringer, Parsons, Kan., is Engr. Maintenance of Way.

Oklahoma—Atchison, Topeka & Santa Fe Ry.—According to press reports this company is making surveys for the construction of a railway from Maramec to Jennings, Okla., about 10 miles. F. M. Bisbee, Amarillo, Tex., is Ch. Engr. Western Lines.

Oregon—It is reported that Porter Bros., Portland, Ore., will construct a railway up South Santiam Valley, from Albany to Lebanoux.

Ontario—Canadian Northern Ontario Ry.—Surveys have been completed by this company for the construction of a railway from Toronto to Niagara Falls, about 79 miles. R. A. Baldwin, Toronto, Ont., is Engr.

ELECTRIC RAILWAYS

New Britain, Conn.—The New Britain St. Ry. Co. has applied for a charter to build an electric railway in New Britain. At present the capital stock is $50,000 but is to be increased to $500,000. Among the incorporators are Mayor George A. Quigley and George M. Landers.

Thompsonville, Conn.—The Hartford & Springfield St. Ry. Co., Warehouse Point, Conn., is having plans prepared for extending its line from the waiting station at Thompsonville through Main St., across the Connecticut River, and connecting on Mapleton Ave., in Suffield, with the present Suffield St. Ry. Joseph S. Goodwin is Supt. and Pur. Agt.

Watertown, N. Y.—The Black River Traction Co. contemplates re-tracking its line on the Public Square. Work will start sometime during the summer. L. Schwerzmann is Gen. Mgr. and Supt.

Chambersburg, Penn.—An application for a charter will soon be made for the purpose of building a railway to connect McConnellsburg and Fort Loudon. Edward J. Post and D. H. Patterson are interested.

Monaca, Penn.—Press reports state that a company will be organized in Monaca to build a line from Monaca, south to Coraopolis, about 20 miles. J. W. Reid and J. J. Allen are interested.

South Bethlehem, Penn.—The Lehigh Valley Transit Co. is considering plans for double-tracking its line from South Bethlehem to Hellertown, and for the construction of a new line from Hellertown to Richlandtown. W. W. Wysor, Allentown, is Ch. Engr.

Atlanta, Ga.—The Georgia Ry. & Power Co., having made preliminary surveys, is considering extending its line to Oglethorpe University, about 1½ miles north of the terminus at the DeKalb County Line. W. H. Glenn is Mgr.

Augusta, Ga.—The Augusta-Aiken Ry. & Electric Corporation plans to improve its lines. John H. Adams is Ch. Engr. and Master Mechanic.

Waycross, Ga.—The Waycross St. & Suburban Ry. Co. is having plans prepared for extending its line through the southern section of Waycross. N. B. Rhoads is Gen. Mgr. and Pur. Agt.

Cleveland, Ohio—The Cleveland Ry. Co. has been requested to consider plans for an extension of the West Madison Ave. line from West 117th St. to Riverside Ave., Lakewood. Other improvements and extensions in Cleveland are also contemplated. George L. Radcliffe is Gen. Mgr.

Conneaut, Ohio—The Conneaut, Kingsville & Ashtabula Ry. Co. has completed surveys on its 14-mile line between Conneaut and Ashtabula. No definite time for starting construction has yet been fixed. W. E. Hawley, Kingsville, Ohio, is Pres.

Portsmouth, Ohio—Plans are being prepared by the Portsmouth St. Ry. & Light Co. to build an extension in Portsmouth. W. A. Martin is Ch. Engr.

Evansville, Ind.—The Board of Public Works has granted a franchise to the Evansville Ry. Co. to extend its Bell St. line from Kentucky Ave. to the city limits. William A. Carson is Gen. Mgr. and Pur. Agt.

East St. Louis, Ill.—The East St. Louis & Suburban Ry. has been requested to consider plans for building its tracks along Main St. from Broadway to Missouri Ave. C. A. Pearson, Jr., is Secy.

Lincoln, Ill.—The Lincoln Ry. & Heating Co. has been recently incorporated with a capital of $15,000. This company is believed to have been organized as a successor to the Lincoln Ry. & Light Co. for the purpose of building electric railways in Lincoln. Among the incorporators are J. R. Patton and John A. Hoblit.

Coffeyville, Kan.—Press reports state that plans are being considered by the Union Traction Co. to extend the line from Coffeyville to Collinsville, Okla. This line will finally run to Tulsa via Collinsville. Roy Kennedy is Supt.

Dunkirk, Kan.—The Joplin & Pittsburg Ry. Co., Pittsburg, Kan., is considering plans for extending its line from Dunkirk to Arcadia, via Hazen and other coal camps. William A. Satterlee is Gen. Mgr. and Pur. Agt.

St. Louis, Mo.—The United Rys. Co. of St. Louis has been requested to consider plans for extending its lines along Tamm Ave. to Art Hill in Forest Park. Robert McCulloch is Supt.

Phoenix, Ariz.—The City Council has granted a franchise to the Phoenix Ry. Co. to build an extension along Monroe St. between First St. and Second Ave. J. P. Gould is Ch. Engr.

Klamath Falls, Ore.—Press reports state that a line is being planned from Eureka, Calif., north to Requa and from there along the Klamath River to Klamath Falls. D. W. Hanson, Pres., Eureka Development Association, is interested.

Hamilton, Ont.—The City Council has selected a committee to request the Hamilton St. Ry. Co. to build two cross-town lines and also relay new tracks on several streets in Hamilton. C. K. Green is Supt. of Construction.

Ottawa, Ont.—The Ottawa & St. Lawrence Electric Ry. Co. will start work during the spring on the section from Perth to Smith Falls, which will make a belt line of 300 miles. E. Malone is Ch. Engr.

Toronto, Ont.—At the next session of the Legislature, the Toronto & York Radial Ry. Co. will make an application to construct a double track line on Yonge St., from the Canadian Pacific R.R. tracks to the north city limits of Toronto. E. W. Oliver is Ch. Engr.

LIGHT, HEAT AND POWER

Bar Harbor, Maine—It is reported that the town is considering the installation of a municipal electric-light plant.

+Bridgeport, Conn.—The American Graphophone Co. has awarded a contract to J. W. DAVIS, 510 Security Bldg., Bridgeport, for the construction of a brick and steel transformer house at its plant on Railroad Ave.

Bridgeport, Conn.—Press reports state that the United Illuminating Co. will shortly begin the construction of an addition to its plant on Congress St. The building will be 50x150 ft., and 35 ft. high. Charles A. Paul is Mgr.

+Bridgeport, Conn.—The contract for the heating and mechanical equipment for the group of almshouse buildings has been awarded to the W. P. KIRK CO., 360 Fairfield Ave., Bridgeport, at $49,980. The work includes heating and ventilating, hospital equipment, vacuum cleaning system, laundry machinery and plumbing. Other bidders were: C. H. Darnstade, New York, $67,400; W. G. Cornell, New York, $65,196; Files Engineering Co., Providence, $62,727; Merrill Co., Boston, $58,439; G. E. Gibson Co., New York, $56,960; E. G. Woolfolk & Co., New York, $56,863; E. S. Eames & Co., $54,480; Walker & Chambers, New York, $53,215; Fentzlaff Heating & Plumbing Co., New York, $51,500. Skinner & Walker, 1188 Main St., Bridgeport, is Arch.

+Quinebaug, Conn.—The Fabyan Woolen Co., Quinebaug, has awarded the contract for the construction of a 50x80-ft. power house with a 125-ft. chimney to the EASTERN CONSTRUCTION CO., Woonsocket, R. I.

Elba, N. Y.—The Elba Food Products Co. will build a one-story, 52x75-ft. power house in connection with its new canning and preserving plant. Raymond M. Decker, Batavia, N. Y,. is Pres.

New York, N. Y.—(Borough of Manhattan)—(Official)—All bids received Jan. 29 by the Board of Trustees, Bellevue and Allied Hospitals, for reconstructing the existing branch circuits of the electric lighting system, additional gas piping and gas and electric fixtures for the main building of the Harlem Hospital, were rejected. New bids for the work will be received until noon, Feb. 24. John W. Brannan, M. D., is Pres. Bd. of Trustees. Noted Jan. 21 and Feb. 4.

✚**New York, N. Y.**—(Borough of Brooklyn)—(Official)—The contract for installing heating and ventilating apparatus in Public School 36, Stagg and Ten Eyck St., Borough of Brooklyn, has been awarded to WILLIAM J. OLVANY, 177 Christopher St., New York, at $17,535. Noted Jan. 21 and Feb. 4.

✚**New York, N. Y.**—(Borough of Brooklyn)—(Official)—The contract for installing electrical equipment in new Public School 95, Van Sicklen St. and Neck Rd., Borough of Brooklyn, has been awarded to PEET & POWERS, 45 West 34th St., New York, at about $7570. Noted Jan. 21 and Feb. 4.

Utica, N. Y.—James F. Leahy, 411 John St., will equip a power house in connection with a new laundry plant. The total cost will be $50,000. The power building will be one story, 50x70 ft.

Fairmont, W. Va.—(Official)—Bids will be received until noon, Mar. 15, by the State Board of Control, Charleston, for heating, plumbing and electrical work for the main building of the Fairmont State Normal School. Paul A. Davis, 3d, Presser Bldg., Philadelphia, Penn., is Arch. J. S. Lakin, Charleston, is Pres. State. Bd. of Control.

Lakeland, Fla.—See item under "Water Supply-Irrigation."

New Orleans, La.—It is reported that an offer has been made to the Commission Council by George T. Bishop, Baltimore, Md., Pres. of the Washington, Baltimore & Annapolis Electric R.R. Co., to construct an electric-light plant, to be eventually taken over by the city. Mr. Bishop represents a syndicate having about $40,000,000 to invest in civic development ventures. E. E. Lafaye, Comr. of Pub. Property, is considering the proposal.

Chattanooga, Tenn.—It is reported that the Duck River Power Co., Shelbyville, has sold its electric-light plants at Shelbyville, Manchester and Wartrace, Tenn., to the Tennessee Ry., Light & Power Co., Chattanooga. The new owners will improve these plants.

Irvine, Ky.—It is reported that H. E. Hay, Corbin, Ky., has secured a franchise, and will establish an electric-light plant, to cost about $5000, in Irvine. Noted Dec. 25, 1913, Jan. 22 and Sept. 3, 1914.

Bucyrus, Ohio—The Bucyrus Light & Power Co., a subsidiary of the National Gas, Electric Light & Power Co., Detroit, Mich., is having plans prepared for the construction of a new power plant. It will be operated by steam instead of gas, now used, and the present plant will be dismantled. The estimated cost of the new plant is $40,000. D. F. Burritt, Detroit, Gen. Supt. of the National Gas, Electric Light & Power Co., will supervise the work.

Butler, Ohio—Bonds to the amount of $4000 have been issued, the proceeds of which will be used for improving the municipal electric-light plant. The purchase of a gas engine is also under consideration.

Chillicothe, Ohio—It is reported that the Mead Pulp & Paper Co., Dayton, contemplates enlarging its local pulp mill and power plant at a cost of about $100,000.

Cleveland, Ohio—The River Furnace Co., West Third St., has taken out a permit for the construction of a two-story, 122x400-ft. power house. It will contain 16 boilers and 16 generators and blowing engines. The estimated cost is $125,000.

Franklin, Ohio—Press reports state that the village is considering the installation of a municipal electric-light plant. The present contract with the Franklin Electric Light Co. for street lighting expires next August.

✚**Youngstown, Ohio**—The City Council has authorized the Director of Public Service to enter into a contract with the YOUNGSTOWN & SHARON ST. RY. CO. to light the streets of the city for a period of ten years, beginning Apr. 1, 1915. Noted Jan. 28.

Marquette, Mich.—It is reported that Charles Retallic, Supt. and Mgr. of the municipal light and power plant, has recommended the construction of a new power house and penstock.

Muskegon, Mich.—According to press reports, the Muskegon Lighting Co. has decided to construct a new gas tank in Muskegon, with a capacity of 500,000 cu.ft. The estimated cost is $50,000.

Milwaukee, Wis.—The Board of School Directors has retained Van Ryn & De Gelleke, Arch., Caswell Block, to prepare plans for a one-story 28x56-ft. boiler house for the 16th Ave. School. It will cost about $15,000, to be of brick and concrete, fireproof. Frank M. Harbach is Secy. of the Bd.

Buffalo Center, Iowa—The City Council is reported to be considering the installation of a municipal electric-light plant. The estimated cost is $10,000.

Sloan, Iowa—Over $11,000 has been subscribed in Sloan for the purpose of installing an electric-lighting system. The money has been raised by selling stock at $100 per share.

Powhattan, Kan.—Press reports state that an election will soon be held to vote on the question of issuing $10,000 in bonds to be used for the installation of a municipal electric-light plant.

Mexia, Tex.—The City Council has granted a franchise to the Co-operative Gas Co. to lay a system of natural gas distributing mains in various streets of Mexia.

Yorktown, Tex.—It is reported that the Texas Southern Electric Co., Victoria, is negotiating for the purchase of the plant of the Yorktown Light & Ice Co. If the transaction is completed, the plant will be improved. W. A. Leland, Victoria, is Pres. of the Texas Southern Co.

Boise, Idaho—The City Council is considering the installation of a lighting system on the South Side. The estimated cost is $5000. C. C. Stevenson is City Engr.

Elberton, Wash.—The Elberton Building & Power Co., Elberton, contemplates the construction of a 1500-hp. power plant on a site near the city. The company has petitioned the City Council of Colfax, Wash., to grant a 50-year franchise to furnish energy to that city also. Charles N. Hinchcliff, owner of a flouring mill near Elberton, is interested.

Baker, Ore.—It is reported that the Oregon Lumber Co. will install an electric-light plant to serve its own mills, the Sumpter Valley Ry. and the Sumpter Valley machine shops.

Fresno, Calif.—(Official)—Bids were opened Feb. 1 by the State Engineer for the boiler plant equipment, gymnasium and boiler house at the Fresno State Normal School as follows: Thomas Haverty Co., $10,750; F. P. Walsh, $10,787; Scott Co., $11,080; Robert Dalziel, Jr., $11,217; Pacific Fire Extinguisher Co., $11,300; Seibert Co., $11,931; Frederick W. Snook Co., $12,200; Latourrette-Fical Co., $12,400; Grant Fee, $13,000; Arthur Hess, $15,340.

Parlier, Calif.—The Parlier Winery will install a gas plant to serve Parlier, Reedley, Sanger and Kingsburg. P. N. Madsen and W. Parlier, Parlier, are interested.

Cordova, Alaska—Harry H. Knox, Pres. and Mgr. of the Alaska Electric Consolidated Co., Cordova, announces that financial arrangements for the construction of its proposed power plant have been completed, and that construction work will probably begin in the spring. Noted Mar. 19, 1914.

Dutton, Ont.—It is reported that bids will be asked in the spring by the Town Council for electrical equipment to cost about $15,000. It will include transformers, switches, wire, etc.

Thamesville, Ont.—The Town Council has ordered estimates to be prepared for the construction of a new hydroelectric system to furnish light and power for the town.

BRIDGES

Northampton, Mass.—The Board of Commissioners of Hampshire County has petitioned the State Legislature to confirm its acts relative to the proposed bridge over the Connecticut River between Northampton and Hadley. Noted Dec. 18, 1913, and Jan. 7, 1915.

★**Central Falls, R. I.**—(Official)—Bids will be received until noon, Mar. 15, by Esten & Black, Engr., 18 East Ave., Pawtucket, for the construction of a three-span reinforced-concrete bridge across the Blackstone River between the City of Central Falls and the Town of Cumberland. The estimated cost is $65,000. Noted June 18 and 25, Oct. 1, 1914 and Jan. 21, 1915.

Ansonia, Conn.—The Board of Public Works has instructed V. B. Clarke, City Engr., to prepare plans for the construction of a concrete bridge at Beaver Brook in connection with the extension of Central St. Bids will be asked early in the spring.

Canton, N. Y.—Plans have been prepared by the Concrete-Steel Engineering Co., Park Row Bldg., New York, for a reinforced-concrete bridge over De Grasse River in Canton. The estimated cost of the structure is $30,000. The voters will be asked to authorize, at the next town meeting, the construction of this and two smaller bridges.

Greenwich, N. Y.—A special town meeting will be held Feb. 23 to vote on the question of building four new bridges over Battenkill as follows: A concrete bridge at Bridge St. in the village of Greenwich, to cost not over $15,000; a concrete bridge at Clark's Mills, cost not to exceed $24,000, a concrete bridge at Middle Falls, cost not to exceed $18,000, and a bridge at Battenville, cost not to exceed $16,000, of which the village of Greenwich is asked to pay one-half.

Camden, N. J.—The Philadelphia & Camden Bridge & Terminal Co. has been incorporated by J. Disbrow Baker and Joseph P. Murray, with a capital stock of $125,000. The purpose of the company is to build a bridge over the Delaware River between Camden and Philadelphia.

Elizabeth, N. J.—The Boards of Chosen Freeholders of Union and Somerset Counties have approved plans for a county line bridge over the Green River at Plainfield. The estimated cost is $10,000. It is reported that Union County will also build a new bridge across the Rahway River at Cranford, to cost about $13,000. Jacob L. Bauer, Elizabeth, is Engr. of Union County.

★**Mount Holly, N. J.**—Bids will be received util noon, Mar. 3, by the Boards of Chosen Freeholders of Atlantic and Burlington Counties, Burlington County Court House, Mount Holly, for repairs to the Chestnut Neck Bridge. A. H. Nelson, Atlantic City, is Engr. of Atlantic County. James Logan is Engr. of Burlington County. For further information, see advertisement under "Contracts to Be Let."

✚**New Brunswick, N. J.**—The Board of Freeholders has awarded a contract for the construction of a wooden bridge over Manalapan Creek, Madison Township, to A. H. SCOTT & SON.

Chalfont, Penn.—The Commissioners of Bucks County, Doylestown, have decided to build a new concrete bridge over North Branch Creek at Chalfont, to replace the present wooden structure inadequate for the increased traffic. A walk will be built along the outside of the covered bridge over Neshaminy Creek at Chalfont. A. Oscar Martin, County Engr., has been directed to prepare plans for these improvements.

Huntington, W. Va.—A. B. Maupin, City Engr., has submitted to the City Commissioners plans for the Fifth Ave. and 29th St. overhead railway crossings. The estimated cost is $43,562 and $30,325 respectively.

Palatka, Fla.—The Commissioners of Putnam County are asking for estimates of the cost of rebuilding a 4000-ft. concrete bridge over the St. Johns River. J. H. Millican is Chn. Bd. of Comrs.

Mobile, Ala.—The County Board of Revenue and the Road Commissioners of Mobile County have ordered plans prepared for repairing the Dog River Bridge, or placing a new concrete foundation. The estimated cost of the new foundation is $8640.

✚Laurel, Miss.—The Highway Commissioners of the Second District, Jones County, have awarded the contract for the construction of a steel bridge over Horse Creek to the VINCENNES BRIDGE CO., Vincennes, Ind. Noted Nov. 26, 1914.

Natchez, Miss.—The Board of Supervisors of Adams County has ordered that bids be advertised for the construction of an inter-county bridge to be built between Adams and Jefferson County over Fairchild's Creek at Hermitage Ford.

✚Shreveport, La.—The Vicksburg, Shreveport & Pacific Ry. has awarded a contract for rebuilding its bridge over the Red River to the BLODGETT CONSTRUCTION CO., Kansas City, Mo. The work includes the removal of the present structure, and replacing with three 242-ft. truss spans, one 295-ft. draw span, and one 60-ft. deck girder span. H. B. Hearn, Shreveport, is Supt.

Clinton, Tenn.—It is reported that the three bridges to be built over the Clinch River by Anderson County will be of steel or reinforced concrete, each 300 ft. long and 18 ft. wide. The estimated cost is $20,000 each. C. J. Sawyer is Chn. of the Bridge Com. Noted Jan. 21.

Louisville, Ky.—Bids will be received until Feb. 19 by the Board of Public Works for the construction of a concrete culvert over Drescher St. between Letterle Ave. and Deemont St. The estimated cost is $6500. D. R. Lyman is City Engr.

✚Laporte, Ind.—The Board of Commissioners of LaPorte County has awarded bridge contracts as follows: Ham Hofer Bridge, Kankakee Township, to WILLIAM B. HUTCHINSON at $12,450; A. C. Johnson Bridge, New Durham Township, to LOUIS MARTINE at $23,000; repairing two bridges to C. D. ANDREAS at $1770.

Stinesville, Ind.—Bids will be received until Mar. 2 by the Board of Commissioners of Monroe County, Bloomington, for the construction of a bridge over Bean Blossom Creek near Stinesville. W. F. Kinser, Bloomington, is Audr.

✚Princeton, Ill.—(Official)—The County Superintendent of Highways of Bureau County has awarded the contract for the construction of the Captain Swift Bridge, Princeton Township, to the VINCENNES BRIDGE CO.; Vincennes, Ind., at $6095 for the superstructure, substructure and retaining wall, and 35c. per cu.yd. for earth fill and grade construction. The contract for two small bridges in Gold and Manlius Townships was awarded to the WHITEWATER BRIDGE CO., Whitewater, Wis., at $785 and $1095 respectively. Noted Jan. 28.

La Crosse, Wis.—The County Highway Commissioner of La Crosse County is making surveys for the location of a new reinforced-concrete bridge over the Black River near Campbell, La Crosse County. It will be about 5400 ft. long. Plans will be prepared by M. W. Torkelson, State Highway Engr., Madison.

Winona, Minn.—Bids will be received until Mar. 1 by the City Council for the construction of a new approach to the High Wagon Bridge over the Mississippi River. It will cost approximately $100,000. H. B. Walling is City Engr. Noted Dec. 17.

Mason City, Iowa—(Official)—Bids will be received until Mar. 2 by the Auditor of Cerro Gordo County for the construction of 20 bridges in the county, two to be of steel, the remainder of concrete. The estimated total cost is $25,000. R. E. Robertson is County Engr. Noted Jan. 21.

Salina, Kan.—The Commissioners of Saline County opened bids Feb. 2 for the construction of a concrete bridge over the Smoky Hill River at Iron Ave. from the following: Leavenworth Bridge Co., Leavenworth, Kan., $28,990; Concrete Construction Co., Kansas City, Mo., $26,200; Missouri Valley Bridge Co., Leavenworth, $27,423; March Construction Co., Des Moines, Iowa, $28,346; Haeney Construction Co., Enid, Okla., $27,000; Staley & Mackey, Hutchinson, Kan., $26,772; Buchanan & Stack, Salina, $32,000. Noted Aug. 27, Nov. 12 and 26, Dec. 31, 1914 and Jan. 21, 1915.

North Platte, Neb.—(Official)—Bids will be received until noon, Mar. 17, by C. W. Yost, Clk. of Lincoln County, for the construction of a bridge over the North Platte River, about two miles east of the town of North Platte. Alternate bids will be accepted for a reinforced-concrete bridge, balanced arch type, or for a high truss steel bridge. Noted July 23 and Sept. 24, 1914.

Seward, Neb. — (Official) — All bids received Feb. 3 for county bridge work during 1915 were rejected by the Board of Commissioners of Seward County. J. R. Roberts is County Clk. Noted Jan. 28.

Kansas City, Mo.—The Park Board has approved plans for a bridge to be built over Brush Creek to connect with the extension of Benton Blvd. into Swope Parkway. The estimated cost including the approaches, is $40,000. The expense will be borne by a benefit district bounded by Linwood Blvd., Brush Creek, Prospect Ave. and Cleveland Ave.

✚Little Rock, Ark.—(Official)—The City Council has awarded the contract for the completion of the Third St. Viaduct to the N. PEAY CONSTRUCTION CO., Little Rock, at $8054. Other bidders were: McEicher & McEicher, $9250; Joseph McCoppin, $8076; J. B. Bateman, $8383, and M. J. Cole & Co., $8560. Noted Feb. 11.

✚Orange, Tex.—The contract for the construction of a bridge over the intercoastal canal, nine miles east of Orange, has been awarded to PERRY & BONNER, Lake Charles, La.

Uvalde, Tex.—It is reported that the Commissioners Court of Uvalde County will shortly ask bids for the construction of a concrete bridge on the San Antonio-El Paso Rd.

+Vancouver, B. C.—The Canadian Bank of Commerce has awarded the contract for the construction of its bank and office building at Main and Pender St., to BAYNES & HORIE, 836 Howe St., at about $100,000. The building will be of reinforced-concrete, three stories.

Contracts to Be Let

Bids received until Mar. 3, 1915.

Repairs to Mullica River Bridge

Mt. Holly, N. J.

Sealed proposals for repairs to bridge at Chestnut Neck, New Jersey, will be received by the Boards of Chosen Freeholders of Atlantic and Burlington counties on Wednesday, March 3rd, 1915, at 12:00 noon, at the Burlington county court house in Mount Holly, New Jersey, and opened immediately thereafter.

All bids must be accompanied by a certified check in a sum equal to ten per cent. of the total amount of the bid, payable to the order of the county collector of either Atlantic or Burlington county, to insure that a bidder will enter into a contract, if so ordered by the counties, as a result of the bidding.

Plans and specifications are on file in the office of the Atlantic County Board, Real Estate & Law Building, Atlantic City, New Jersey, and in the office of the Burlington County Board, No. 11 Main street, Mount Holly, New Jersey, and may be obtained from A. H. Nelson, county engineer for Atlantic county, No. 636 Guarantee Trust Building, Atlantic City, New Jersey, or from James Logan, county engineer for Burlington county, New Jersey, Mount Holly, New Jersey, by depositing $5.00 as a guarantee for the return of same. Such deposit will be refunded provided the plans are returned in good condition by noon March 4th, 1915, otherwise such deposit will be forfeited.

The committees reserve the right to reject any or all bids.

The successful bidder will be required to furnish a bond approved by the solicitors of the Boards of Chosen Freeholders of the counties of Atlantic and Burlington, in an amount equal to twice the contract price, for the faithful performance of the work, which bond will remain in force and effect for a period of one year and will be held to guarantee that the completed work will remain safe and sound from defects of workmanship or material for a period of one year. Should the contractor fail or neglect to promptly remedy any defects that may appear, after notice has been given him of any such defect, the counties reserve the right to do such work in any way that may seem to them best and to charge the contractor with any and all costs of same.

Bidders must acquaint themselves with the plans and specifications for the work and, by personal examination, satisfy themselves of the nature, character and location of the proposed work, that no misunderstanding may arise in regard to the character and quantity of the work to be performed by the contractor.

The blank form of proposal attached to these specifications must be used in making out the bid. The prices must be written as well as stated in figures in the proposal, and any proposal not in accordance with the instructions, or not on the blank furnished, will be rejected. If any discrepancies occur between the written and figured prices, those most favorable to the counties will be taken as the intention of the bidder.

Proposals will be entertained only from parties who have at their command the necessary capital, plant and experience for properly doing the work. Each bidder shall file with his bid a sworn statement setting forth his experience and the location of some work of similar character and magnitude that he has built elsewhere, as an evidence of his ability.

The bidder to whom the contract may be awarded will be required to execute the contract with surety, within ten (10) days from the date of service of notice to that effect; and in case of failure or neglect to do so, he will be considered as having abandoned it.

Each bid must state the full name and address of the maker and each bid must be presented by the maker or by a properly authorized representative at the hour provided for the receiving and opening of the bids. Mailed bids will not be accepted.

Envelopes containing proposals must have endorsed thereon: "Proposals for repairs to Mullica River Bridge."

By order of the Boards of Chosen Freeholders.

A. H. NELSON,
Atlantic County Engineer.
JAMES LOGAN,
Burlington County Engineer.

Bids received until Feb. 24, 1915.

Intercepting Sewers

OFFICIAL NOTICE NO. 9.

PUBLISHED BY AUTHORITY OF THE SEWERAGE COMMISSION OF THE CITY OF MILWAUKEE.

Milwaukee, Wis., January 15, 1915.

Sealed proposals for constructing intercepting sewers and connections on both sides of the Milwaukee River in the City of Milwaukee will be received by the Sewerage Commission at its office in the City Hall until 2:00 P.M. on the 24th day of February, A.D. 1915, at which place and time the proposals will be publicly opened and read.

The work to be done is divided into two separate contracts numbered 9 and 10.

Number 9 embraces the construction of an intercepting sewer and branches on the east side of Milwaukee River from a point below the Dam to the intersection of Broadway and Detroit Streets, and requires the construction of approximately:

7927 ft. brick and concrete sewer in open cut from 30″ to 51″ diameter.
3992 ft. brick and concrete sewer in tunnel from 30″ to 51″ diameter.
3844 feet terra cotta pipe sewer from 10″ to 24″ diameter.
1762 feet of manholes and pile and timber foundations.

Number 10 embraces the construction of an intercepting sewer and branches on the west side of Milwaukee River from the Holton Street viaduct to the intersection of West Water and Fowler Streets and requires the construction of approximately:

8480 ft. brick and concrete sewer in open cut from 30″ to 48″ diameter.
2340 feet terra cotta pipe sewer in open cut from 10″ to 18″ diameter.
1105 feet of manholes and pile and timber foundations.

All as shown upon the plans and described in the specifications now on file in the office of the Sewerage Commission.

The time allowed for completing each contract shall be two hundred and fifty (250) working days. (Working days meaning such as are particularly described in the contract.)

The liquidated damages for not completing the work within the time agreed shall, for each day's delay, be an amount equal to one-half of one percentum of the aggregate cost of the work embraced in the contract.

Each proposal must be accompanied by a cash deposit of, or, in lieu thereof, by a certified check drawn upon a national or state bank doing business in the City of Milwaukee, to the order of the "Sewerage Commission of the City of Milwaukee," for the following sums; failing in which the bid will be rejected:

For proposals Number 9, $38,500.00.
For proposal Number 10, $25,000.00.

Specifications and blank forms of proposals can be obtained, and details plans examined, at the office of the Sewerage Commission in the City Hall.

The prices must be written in the proposal and also stated in figures. In case of variation the written prices will prevail.

All cash deposits or certified checks deposited by bidders to whom the contract is not awarded will be returned upon application to the Secretary of the Commission after the contract has been awarded or after the rejection of all bids. The cash deposit or certified check which may be deposited by the successful bidder will be returned to him as soon as the contract is properly executed and approved by the City Attorney and Sewerage Commission.

Full sets of detail plans will be sent to any contractor desiring to bid upon receipt of ten dollars ($10.00).

The Sewerage Commission of the City of Milwaukee reserves the right to reject any and all bids submitted.

J. H. FOWLES, Secretary.

Countersigned:
LOUIS M. KOTECKI, Comptroller.

⁂

U. S. ENGINEER OFFICE, 405 Customhouse, Cincinnati, O., January 30, 1915.—Sealed proposals for constructing and delivering two steel Fuel Flats Nos. 18 and 19, and one steel Barge No. 15, will be received at this office until 2 p.m., March 2, 1915, and then publicly opened. Information on application. H. JERVEY, Lt. Col., Engrs.

✚Fresno, Calif.—The contract for the construction of the Washington School has been awarded to TREWHITT & SHIELDS, Rowell Bldg., at $103,998. W. D. Coates, Jr., Rowell Bldg., is Advisory Arch. Noted Sept. 10 and Jan. 21.

Redondo Beach, Calif.—Louis J. Baumbeck will construct a three-story brick building at Diamond and Pacific Ave. The estimated cost is $50,000. L. B. Pemberton, 807 Auditorium Bldg., Los Angeles, is Arch.

San Diego, Calif.—Plans have been prepared by A. H. Stibolt for the construction of a seven-story reinforced-concrete apartment house at 24th and B St. for the Oregon Improvement Co. The estimated cost is $300,000. T. J. Newell is Pres.

San Francisco, Calif.—The lowest bid for the construction of an academic building at the Polytechnic High School was submitted by P. F. Reilly Co., Western Planing Mills, Berry near Sixth St., at $86,906. Noted Aug. 13.

San Francisco, Calif.—Marcus Loew, 1493 Broadway, New York, N. Y., will construct a theater to cost about $1,000,000. This is one of the many theaters Mr. Loew plans to build in the West.

San Francisco, Calif.—Bliss & Faville, Arch., Balboa Bldg., is preparing plans for the construction of a two-story gymnasium on Sutter St. for the San Francisco Women's Club. Estimated cost, $40,000

London, Ont.—The Board of Education plans to construct a number of schools to cost about $200,000. R. W. Shaw is Chn. of Bd of Education.

Contracts to Be Let

Bids received until Mar. 12, 1915.

Proposals for Street Paving

Wilkes-Barre, Pa.

SEALED PROPOSALS will be received at the City Clerk's Office, Wilkes-Barre, Pennsylvania, until Friday, March 12th, 1915, at 12 o'clock Noon, for curbing and paving streets in the City of Wilkes-Barre, Pennsylvania. Bids to be submitted in accordance with specifications, copies of which may be had upon application to B. K. Finch, City Engineer, upon the payment to him of the sum of Five Dollars ($5.00), which will be refunded to bidders, provided specifications are returned to the City Engineer on or before March 15th, 1915. Bids to be submitted as follows:—For sheet asphalt in two sections, totaling about 40,000 square yards; For vitrified brick in four sections totaling about 46,000 square yards; For cobblestone in one section of 600 square yards; For vitrified brick and macadam in one section of 7,500 square yards, together with the necessary red stone, blue stone or concrete curbing. Certified bank check for Five Hundred Dollars ($500.00) to accompany each bid except for cobblestone, which will be for One Hundred Dollars ($100.00). Proposals to be endorsed "Proposals for curbing or paving" and addressed to Fred H. Gates, City Clerk. The City Council reserves the right to reject any or all bids received.

CHARLES N. LOVELAND, Superintendent,
Department of Streets and Public Improvements.

Bids received until Mar. 2, 1915.

Building Extension at State Hospital

Trenton, N. J.

Sealed proposals will be received at the office of the Governor, Trenton, N. J., until twelve o'clock noon on Tuesday, March 2nd, 1915, for furnishing all labor and material necessary for the further extension of the House of Detention for Convict and Criminal Insane at the State Hospital, Trenton, N. J., in accordance with plans and specifications on file in the office of the Commissioner of Charities and Corrections, State House, Trenton, N. J.

Each bidder must accompany his proposal with a certified check for ten per centum of the amount of his proposal, payable to his order, properly endorsed, which will be returned to the unsuccessful bidder immediately following the award of the contract.

Proposals must be enclosed in envelopes sealed and marked "Proposals for the further extension of the House of Detention for Convict and Criminal Insane at the State Hospital, Trenton."

E. I. EDWARDS,
Secretary State House Commission.

* * *

Bids received until Mar. 5, 1915.

Concrete Pavement and Bituminous Surface

Roselle Park, N. J.

Sealed proposals will be received by the Mayor and Council of the Borough of Roselle Park, N. J., for concrete pavements and appurtenances at eight thirty P.M. Friday, March fifth, 1915.

Plans and specifications may be obtained at the office of the undersigned between the hours of eight thirty A.M. and 12 M. upon payment of a deposit of $10.00, which will be refunded upon return of same.

A certified check for $500.00 must accompany each proposal.

The Council reserves the right to reject any or all proposals as may be deemed best for the interests of the Borough.

W. H. LUSTER, Borough Engineer,
286 N. Broad St., Elizabeth, N. J.

Bids received until Apr. 13, 1915.

Automatic Valves and Check Valves

DEPARTMENT OF WORKS.

Toronto, Ont.

Tenders will be received by registered post only, addressed to the Chairman of the Board of Control, City Hall, Toronto, Canada, up to noon on Tuesday, April 13th, 1915,

For the Supply of
Automatic Valves and Check Valves.

Specifications and Tender Form for the foregoing may be obtained upon application at Room 12, Purchasing and Accounting Section, of the Department of Works, City Hall, Toronto.

Envelopes containing tenders must be plainly marked on the outside as to contents.

The usual conditions relating to tendering as prescribed by City By-law must be strictly complied with, or the tenders may be declared informal.

Tenderers shall submit with their tenders the names of two personal sureties, approved by the City Treasurer, or in lieu thereof, the bond of a guarantee company, approved as aforesaid.

The lowest or any tender not necessarily accepted.

T. L. CHURCH (Mayor),
Chairman, Board of Control.

Toronto, February 8th, 1915.

* * *

Bids received until Mar. 10, 1915.

Canal and Conduit. Electrical Pumping Machinery

SALEM AND BEVERLY WATER SUPPLY BOARD

Sealed bids will be received at City Hall, Salem, Massachusetts, at ten o'clock, March 10, 1915, for the construction of additional works for water supply from the Ipswich River. Plans may be seen, and the form of proposal, specifications, contract and bond may be obtained after February 17, 1915, at the City Hall, Salem, and at the office of Hazen, Whipple & Fuller, consulting engineers, 30 East 42nd Street, New York City.

The work will be divided into two parts: The first contract includes the construction of a dredge, 120,000 cubic yards of excavation, 2870 feet of conduit and accessories. The second contract covers an electric motor driven centrifugal pump, a steam turbine driven generator, transmission line, transformers, switchboard, and wiring.

N. MATTHEWS.
P. J. KELLEY.
J. W. BLACKMER.

Salem, February 10, 1915.

Bids received until Mar. 2, 1915.

Paving and Sewer

Pittsburgh, Pa., Feb. 16, 1915.

SEALED PROPOSALS for grading, paving and curbing West Liberty Avenue, from Warrington Avenue to the City Line, and the construction of a storm sewer for the drainage thereof, will be received at the office of the City Controller, Municipal Hall, Pittsburgh, Pa., until 10:00 o'clock A.M. March 2nd, 1915. Estimated cost $382,000.00. Bids shall be made from the contract plans and specifications to be obtained at the office of the Department of Public Works, Room 432 Henry W. Oliver Bldg., upon making deposits of $5.00 and $15.00 respectively for same. Proposals must be accompanied by a bond on the form furnished by the City in the amount of $191,000.00, duly and legally executed by the bidder with a satisfactory surety or trust company which has complied with the City ordinances relating thereto.

JOSEPH G. ARMSTRONG, Mayor,
ROBERT SWAN, Director,
Department of Public Works.

Construction News

★Denotes work advertised in ENGINEERING NEWS.
✚Denotes contract awarded. The names of bidders awarded contracts are set in CAPITALS.

PRICE CHANGES AND THE BUSINESS OUTLOOK

Improvement in business during February did not take as much of a stride forward as it did in January, but practically all the gain that was recorded the first month of the year was sustained during the second, and in some lines of trade was even exceeded. It is regrettable, but true, that most of the business in the metal line goes to make up munitions of war or the like.

Construction work promises to open more actively this year. Highway work will go forward actively, and a great deal of municipal improvement already projected will be put through.

Railroad work is not active. Some of the stronger lines are making improvements, but a great many railroad companies are still in a weak position financially and are unable to make any special headway in the matter of financiering.

The financial position is peculiar. Money is plentiful; credit is available for temporary needs; but capital to be put into permanent construction is extremely difficult to obtain. There is so much floating indebtedness that banks and other financial institutions, as well an individuals, are insisting on the funding or payment of temporary obligations before any new projects can be put forward.

The iron trade shows a slight improvement, chiefly in the matter of output, and some fair orders have been taken for rails. Structural business is extremely light, though pipe and sheets are in good, active demand.

The phenomenal rise of spelter—the price advanced to nearly 10c. at the end of February, compared with a quotation of slightly over 5c. in August—is upsetting many established traditions of trade. For example, galvanized sheets have advanced out of all proportion to the increase in the cost of black sheets, due entirely to the cost of spelter. Galvanized pipe, too, is much dearer in proportion. Brass sheets are very much higher, and all kinds of brass goods are bound to feel the increase in the cost of spelter. The high price of spelter is an entirely legitimate one, as most of the spelter furnished to Europe has come from Germany, and this supply is now entirely cut off.

The wonderful exports of products of American farms and American manufacturing establishments are turning the balance of trade strongly in our favor, and where it was with extreme difficulty that foreign government payments were financed in August, now that exchange has moved so strongly against foreign countries, gold is likely to come here in quantity unless (which is most probable) large credits are established. There is a prospect that the large agricultural shipments will be cut off by supplies from eastern Europe, but the American farmer is endeavoring to put in the largest crop of grain that he has ever done, and with good weather this should make for better business all over the country.

The Court of Appeals of the State of New York, late in February, declared the Alien Labor Clause constitutional. This means that much of the subway work in New York must halt at least temporarily, it being generally felt that no further penalty will be required of contractors. It is a question whether this decision will be carried to the United States Supreme Court, but it is certainly to the interests of contractors to secure definite information on so important a subject.

Municipal bond sales during February totaled $38,127,000 compared with $34,606,894 in the corresponding month last year.

Prices of portland cement have declined 15c. per bbl. and now are down to the lowest figure in years, especially in the New York market.

LABOR

A great many employers are likely to be disappointed if they think labor is going to be phenomenally cheap this year. Such will not be the case. The shrewdest judges of the situation believe that the prevailing rates of labor are here to stay, and there are more likely to be increases than decreases. Of course, on the New York subways, where a number of alien laborers were thrown out on account of the Labor Law, there is a great rush of unemployed to do the work. These, however, cannot stand such work. The steel mills are already taking account of conditions, and the opinion is voiced that should activities be resumed on the old accustomed scale, it will be extremely difficult to secure enough foreign laborers to do the work. In the winter season there was not the unemployment such as was generally expected.

CEMENT, LIME AND BRICK

Portland Cement—The New York market is almost nonexistent. Some of the largest dealers here are filling every available part of their yards with cement, which nets them $1.22. There is not much danger in buying as they do, for the bags will undoubtedly be paid for, as the sellers are financially strong. Some of the weaker companies have made contracts for future delivery at these prices. The quotation means a price of 58 to 60c. in bulk at the mill. These are the lowest prices recorded in a dozen years. In the West prices are higher in spite of the fear that a number of independent mills may be gathered into a compact organization. Prices, which are for barrels of cement less the charge of 40c. made for bags, are as follows:

Chicago	$1.11	Boston	$1.46
Detroit	1.19	Cleveland	1.16
Jersey City	0.74	Duluth	1.32
New York	0.82	Minneapolis	1.30
St. Paul	1.30	Pittsburgh	1.00

Brick—Storage room at the yards of material men is especially valuable just now for the storage of cement, and brick prices are nominal at $5 to $5.50. There seems little likelihood that any high prices will be current this year.

Crushed Stone—Some contracts have been made for future delivery at slight concessions from the ruling price, but for the most part 1½-in. stone is selling at 80 to 85c. and ¾-in. stone at 90 to 95c. These quotations are per cu.yd. in large loads of 500 cu.yd. delivered alongside of dock, New York.

Gravel—The prices of gravel are unchanged at 85c., but subway gravel is held at $1.15 by the largest distributor, while some sales have been made at $1.10.

Lime—Little business is current. For what business is doing, prices remain unchanged at 97c. per bbl. for state common, 200 lb. net; $1.37 for 30 lb. barrel; $1.55 for 300 lb. finishing; $1.10 for 200 lb. finishing; and $1.72 for 350 lb.

IRON AND STEEL

Pig Iron—Cast iron pipe foundries in the Philadelphia district have purchased about 40,000 tons of pig iron and 40,000 tons of Southern iron have been ordered by buyers in England. The market conditions at various points show improvement especially at Cincinnati and Chicago. Throughout the Central West there is an increasing disposition to sound the market for requirements for the last half of the year and sellers expect large sales could be made at present prices. As furnaces are not willing to sell at those prices negotiations have not taken definite form.

Inquiries for export are being broached and the fact that freight rates may be more favorable increases the probability of sales in addition to those already reported.

Domestic business continues light in nearly all sections. The principal recent sale reported from Pittsburgh was 3500 tons of cold blast charcoal iron. In the Ohio Valley there are several inquiries for both malleable and gray foundry iron amounting to about 4000 tons for consumption in Ohio and Indiana. Prices remain about stationary. Quotations for pig iron in lots of 100 tons or over at the points named are as follows: Cincinnati, Southern Foundry No. 2, $13@13.25; Northern Foundry No. 2, $14@14.50; Northern Foundry No. 3, $13.50@14. In New York iron is quoted as follows: No. 2-X Northern Foundry, $14.25@14.70; No. 2 plain Northern Foundry, $14@14.50; No. 2 Southern Foundry, delivered tidewater, $14@14.25. In Birmingham, Southern Foundry No. 2 is $9.50@10. In Chicago, Southern Foundry No. 2 is $13@13.75. In Pittsburgh, bessemer iron is $14.55 and basic $13.45, including the 95c. freight rate from the valley to the Pittsburgh district.

Steel Rails—While business was not so large as during the first month of the year, and it is evident that the replacement this year will be small, and perhaps as limited as during 1913. It is known, that the railroads have been allowing their equipment and roadbeds to seriously deteriorate, probably more so in the case of equipment than in roadbeds. The railroads have not kept pace with the growth of the country in the last five years, nor have they kept pace with the growth of business in the last decade, but it is evident that some day business will have to come in on a much larger scale. There are foreign inquiries in the market, but the high freight rates at present preclude the closing of any of these contracts. Quotations for standard lots of 1000 tons or over are unchanged as follows: Standard sections of bessemer, $28; open-hearth, $30, f.o.b. Pittsburgh, per net ton; girder rails in 30-ft. lengths are $36.40 per gross ton, and in 60-ft. lengths, $38.40, both f.o.b. New York. Other quotations, f.o.b. Pittsburgh, for large lots, the price being given in cents per lb., are as follows: Standard sections, 1.25c.; 25 to 35 lb., 1.15c.; 15 to 20 lb., 1.20c.; 12 to 14 lb., 1.25c.; 8 to 12 lb., 1.30c. Relaying rails, New York, are $19, and Pittsburgh and Chicago are quoted $23 to $24.

Structural Shapes—Business is not at all active, although a few structures have been advanced from the purely prospective stages. Most of these are for New York. There is a new building at 8th Ave. and 33d St. which will require 8000 tons, and a Broadway structure near 42d St. will call for 2000 tons. A bridge for export will amount to only 500 tons, but it is important. A pier at 47th St. calls for 300 tons. In general, construction work is light, and the railroads are not doing the bridge work that was expected. Prices are unchanged, as follows: I-beams 3 to 15 in., channels 3 to 15 in., angles, 3 to 6 in., T's 2 in. and over, 1.15c. Pittsburgh. Other quotations include I-beams over 18 in., H-beams over 18 in., channels over 15 in., and angles over 4 in., 1.30c.; T's 1.25c.; deck beams and bulb angles, 1.50c.; handrail T's, 1.95c. Cutting to specified lengths is charged at the following rates: Under 3 ft. to 2 ft. inclusive, 25c. per 100 lb.; 2 ft. to 1 ft. inclusive, 50c.; less than 1 ft., $1.55. No charge is made for cutting to lengths over 3 ft. In Chicago, the base price is 1.34c.; in New York, 1.26 to 1.31c.; in Philadelphia, 1.25 to 1.30c.; in San Francisco, 2. to 2.05c.

Cast-Iron Pipe—Business in the East is not so active as it was a month ago. It seems that most of the business that was going to be placed at low prices has already been let, and consumers are in an easy position; having contracted for most of the material they will use this year, they are disposed to wait and see if still lower prices may not be made.

No especially large orders have been placed, although the Hawthorne, N. J., job went to the R. D. Wood Co. In the West it seems that business is more active than for some time. The following quotations are made on cast-iron pipe in dollars per net ton at the points named: Birmingham, Ala., 4-in. and larger, $19.50; New York, N. Y., 6-in., $20 to $20.50; Chicago, 4-in., $26, 6- to 12-in., $24, over 12-in., $23. Cleveland, 3- to 20-in., $21.50, 24- to 48-in., $21.

Gas pipe is held $1 per ton higher in all markets.

Plates—Activity in the shipbuilding line is responsible for fairly active operations at the plate mills. Contracts have recently been taken for more boats to be built at the Atlantic Shipyard, and there are now eighteen freight and passenger boats which have been contracted for since Dec. 1. Some of these boats are barges, and there is one ferryboat, but it looks as though the shipbuilding yards would have more business in the next few years than before in a number of years. Plate mills in the Pittsburgh district are operating at about 60% of capacity, although some mills are operating as high as 93%. Prices for plates for immediate delivery are higher at 1.15c. Pittsburgh. This includes all sizes above ¼-in. In Philadelphia plates are 1.30 to 1.35c., in New York 1.31 to 1.36c., and in Chicago 1.30 to 1.34c.

Pipe—Discounts for pipe were changed, bringing about higher net prices for all sizes of pipe below 7-in. The increase in black pipe was about 5%, but in galvanized it amounted to fully 10%, and it is doubtful if these quotations will hold for any length of time, considering the abnormal spelter market. As it is, prices are unusually low, in consideration of the cost of raw materials. Discounts, revised about Feb. 20, for large orders amounting to carloads and more are as follows:

	Black	Galvanized
¾- to 2-in. steel, butt welded	80%	69½%
2½- to 6-in. steel, lap welded	79%	68½%
7- to 12-in. steel, lap welded	77%	66½%

At these discounts, the net prices of pipe per foot, in large lots, at Pittsburgh are as follows:

	Cents			Cents	
Diameter	Black	Galvanized	Diameter	Black	Galvanized
¾-in.	2.20	3.50	5-in.	31.00	47.00
1-in.	3.40	5.20	6-in.	40.40	61.00
1¼-in.	4.60	7.00	7-in.	55.00	80.00
1½-in.	5.50	8.40	8-in.	57.50	84.00
2-in.	7.40	11.15	9-in.	79.50	$1.16
2½-in.	12.20	18.60	10-in.	95.00	$1.38
3-in	16.10	24.20	11-in.	$1.06	$1.55
4-in.	22.90	34.50	12-in.	$1.17	$1.70

Sheets—Prices of galvanized sheets have advanced more rapidly than ever before. In the aggregate this amounts to $8 per ton, and is due entirely to the phenomenal advance in spelter. No. 28 galvanized sheets at the mill now sell at $3.40 per 100 lb., and should the mills be obliged to purchase spelter in the open market it is doubtful if they can come out whole on this quotation. The demand is large, but the trade fears further advance, as stocks at the mills and in the hands of distributors have been unusually low.

The following quotations are for large lots of sheets in Pittsburgh, and small lots from store, New York.

	Cents per Pound			
	Large lots Pittsburgh		Warehouse delivery New York	
	Black	Galv.	Black	Galv
No. 10	1.55	2.40	....	....
No. 12	1.55	2.50	....	....
No. 14	1.60	2.50	....	....
No. 16	1.65	2.60	2.35	3.25
Nos. 18 and 20	1.70	2.80	2.40	3.40
Nos. 22 and 24	1.75	2.90	2.45	3.55
No. 26	1.80	3.05	2.50	3.70
No. 27	1.85	3.25	2.55	3.85
No. 28	1.90	3.40	2.60	4.00

Steel Shapes—Prices are steady and without change; there is more of a demand due to higher prices at the mill but it is still far below normal. From jobbers' warehouse New York, prices are as follows:

	Cents Per Pound
Refined iron:	
1 to 1⅞ in., round and square	1.85
1½ to 4 in. x ⅜ to 1 in	1.85
1½ to 4 in. x ¼ to 5/16 in	2.05
Norway bars	3.20
Burdens bar iron	3.15
Soft steel:	
¾ to 3 in., round and square	1.85
1 to 6 in. x ⅜ to 1 in	1.85
1 to 6 in. x ¼ and 5/16	2.00
Rods—⅝ and 11/16 in	1.95
Bands—1½ to 6x3/16 in. to No. 8	2.15
Beams and channels—3 to 15 in	1.90
Angles:	
3 in. x ¼ in. and larger	1.90
3 in. x 3/16 in. and ⅛ in	2.35
1½ to 2¾ in. x 3/16 in. and thicker	2.00
11½ to 2½ in. x ⅛ in	2.10
1 to 1¼ in. x 3/16 in	2.10
1 to 1¼ in. x ⅛ in	2.15
Tees:	
1½ to 2½x¼ in	2.05
1½ to 2½x3/16 in	2.15
3 in. and larger	1.95

Steel Sheet Piling—Prices are without change at 1.55c. to 1.60c. per lb. f.o.b. Pittsburgh.

Freight Rates—The freight rates on finished steel products from the Pittsburgh district, including plates, structural shapes, merchant steel and iron bar, pipe fittings, plain and galvarized wire, nails, rivets spikes, and bolts, black sheets (except planished) chains, etc., are as follows in cents per hundred pounds: Albany, 16; Buffalo, 11; Boston, 18; Baltimore, 14½; Canandaigua, 13½; Cleveland, 10; Columbus, 12; Cincinnati, 15; Chicago, 18; Denver, Colo., 85½; Harrisburg, 14½; Louisville, 18; New York, 16; Norfolk, 20; Philadelphia, 15; Rochester, 11½; Richmond, 20; Scranton, 15; St. Louis, 23; Washington, 14½.

Old Materials—The prices of scrap have advanced slightly, but the chief interest in the market lies in the fact that it is being closely watched, and while sales are more numerous they are not meant to make any great difference in price, but they show that the scrap market has apparently touched bottom. There have been several small purchases, but enough to indicate the trend of events. Heavy melting steel scrap, which is perhaps the index to the steel scrap, is higher in New York at 25c.; in Chicago the outside price is slightly higher; while in Pittsburgh the old minimum of $11 has given way, and there is nothing under $11.75. Such gains as this are not to be found throughout the market, but this represents conditions in the trade. A feature of interest in addition to this is the reported negotiations for a 5000- to 10,000-ton contract for Italy. It is probable that Italy will have to buy quite a little scrap from this county. The prices of old materials in New York are as follows:

	Per Gross Ton
Heavy-melting steel scrap	$8.25 to $8.50
Pipes and flues	8.00 to 8.25
No. 1 railroad wrought	9.50 to 10.00
Stove plate	9.00 to 9.25
No. 1 machinery cast	11.00 to 11.50
Wrought turnings	5.75 to 6.25

In Chicago the market is steady with not much change. The following prices are quoted.

	Per Gross Ton
Heavy-melting steel scrap	$9.75 to $10.25
	Per Net Ton
No. 1 railroad wrought	$9.00 to $9.50
No. 2 railroad wrought	8.50 to 9.00
No. 1 cast scrap	9.00 to 9.25
Pipes and flues	7.00 to 7.50
Agricultural malleable	7.50 to 7.75
Railroad malleable	7.75 to 8.25

The Pittsburgh market shows little change except in foundry cast, which is offered at 50c. a ton less, and a drop in the price of heavy melting steel scrap.

	Per Gross Ton
Heavy-melting steel scrap	$11.75
Re-rolling rails	12.00
No. 1 foundry cast	$11.75 to 12.00
Old car wheels	11.50 to 12.00
Machine shop turnings	7.75 to 8.00
Railroad malleable	9.75 to 10.00

Wire Rope—The revised quotations of a month ago did not stimulate any large business but manufacturers report a little better inquiry. Discounts are unchanged at 47 and 5% from list for galvanized, and 55 and 5% for bright. At these discounts the net price of wire rope at the mill is as follows:

Diameter in Inches	Price per Foot		
	Cast Steel	Crucible Steel	Plow Steel
2½	$0.75	$0.90	$1.07
2¼	0.61	0.73	0.86
2	0.47	0.57	0.67
1¾	0.39	0.49	0.58
1½	0.28	0.34	0.40
1¼	0.20	0.24	0.27
1	0.13	0.15	0.18
¾	0.08	0.09	0.11
⅝	0.06	0.07	0.08

Chain—Prices are steady and without change, as follows: These prices are per 100 lb., f.o.b., Pittsburgh:

3/16 in	$7.50	½ and 9/16 in	$3.00
¼ in	4.95	⅝ and 11/16 in	2.90
5/16 in	3.95	¾ and 13/16 in	2.80
⅜ in	3.40	⅞ and 15/16 in	2.70
7/16 in	3.20	1 to 1¼ in	2.60

EXTRAS TO ABOVE LIST PER 100 LB.

	For BB	For BBB
3/16-in. and ¼-in	$1.50	$2.00
5/16-in. and larger	1.25	1.75

Freight Rates via Panama—The ocean freight market is very uncertain. It is difficult to secure enough vessels to carry the cargoes offered. An advance of 5c. per 100 lb. is now demanded for shipments from New York and Philadelphia bringing the quotation to 30c. For large lots of steel, such as shapes, reinforcing bars, plates wire and similar products, the rates to Pacific Coast points are as follows: From Bethlehem, 37.5c.; Chicago, 55c.; Cleveland, 44c.; Coatesville, 40c.; Johnstown, 39.5c.; New York, 30c.; Niles, 43c.; Philadelphia, 30c.; Pittsburgh, 46c.; Steubenville, 41c.; Wheeling, 41c.; Youngstown, 43c.

Coke—The market is extremely dull and prices are lower than a month ago. Production is larger, the output being 250,000 tons weekly. Prompt shipment of furnace coke can be had at $1.55 to $1.65 and contracts are made at $1.65 to $1.75. For foundry coke $2 to $2.50 is paid for prompt and $2.25 to $2.50 for shipments. All these prices are per net ton.

Wire—Business is fair but there is no especial snap. Some believe the difference between plain wire and galvanized should be more than 40c. per 100 lb. Prices are steady. Plain wire to retailers Pittsburgh is quoted at $1.40; galvanized wire to retailers Pittsburgh, $1.80 to $1.85; painted barbed wire, $1.55 to $1.60, and galvanized barbed wire $1.95 to $2. Polished staples are $1.50 to $1.55, and galvanized staples

$1.90 to 1.95. Wire nails are quoted at $1.63 Pittsburgh. All of these quotations are per 100 lb. in large lots.

REINFORCING MATERIALS

Bars, Concrete Reinforcing—The advance of $1 per ton went in effect Mar. 1 as scheduled; but there was no rush to place contracts. For April delivery a quotation of 1.15c. is promised. Prices are as follows:

	Cents per Pound		
Size	Mill Shipments Pittsburgh	*Warehouse Pittsburgh	Delivered from *Warehouse New York
¾-in and larger...	1.15	1.50	1.95 to 2.00
⅝-in.	1.20	1.65	2.00 to 2.05
½-in.	1.35	1.80	2.15 to 2.20
⅜-in.	1.45	1.90	2.25 to 2.30
¼-in.	1.75	2.20	2.60 to 2.65

*Bars from warehouse are cut to desired length without extra charge.

Triangle Mesh—Business is quiet but the tonnage booked during February was equal to that booked in the corresponding month in other years. Prices are without change as follows:

PRICE PER 100 SQ.FT.

		Plain Material		Galvanized	
Style No.	Cross Sec. Area per Ft. Width	Carload Lots	Less Than Car Lots and Over 10,000 Sq.Ft.	Carload Lots	Less Than Car Lots and Over 10,000 Sq.Ft.

†This material is made in regular widths of 18, 22, 26, 30, 34, 42, 46, 50, 54 and 58 in. Standard lengths in rolls are 150, 250, 300 and 600 ft.

METALS

Copper—The market in copper, while quiet, has maintained the high prices reported a month ago, electrolytic being held at 14¾c. and Lake at 15¼c. per pound. Orders for export appear to have fallen off but the continuance of the war will no doubt bring larger demands from abroad. Production is being maintained at about 50% of capacity. In some quarters the opinion is expressed that any considerable movement in exports will have the effect of increasing the output at the mines. The trade realizes that it required a large amount of buying to carry the price from 11⅛c. to nearly 15c. in about ninety days and consumers would like to know how great the inroad into refiners' stocks has been as the result of the manufacture of war material to say nothing of the use of metal in the arts. The general condition of the trade appears to be improving and sentiment is hopeful for a continuance of a lively market for some time to come with prices around the level recently attained.

Tin—A temporary scarcity of spot tin together with a fair demand for small lots had the effect of advancing prices to 38c. Tin from the steamer "City of Bristol" was available on March 1 which relieved the scarcity for quick shipment tin in the New York market. There is also a good demand for March and April positions. March being quoted at 37¼c. and April at 38c. Arrivals at ports of the United States during February aggregated 3110 tons and the cargoes afloat amounted to 2510 tons.

Lead—The market for lead was firm but quiet, with prices generally higher. Spot is held at 3.90c. New York and 3.80c. East St. Louis.

Spelter—Prices for spelter are much higher owing to a genuine shortage in the supply. Spot is quoted at 10¼c. New York and 10c. East St. Louis.

Antimony—The advance in all grades of antimony reported last has been maintained. Ordinary brands are quoted at 18@19½c. for spot while Cookson's is quoted at 22c. and Hallet's 20c.

Old Metals—The market for old metals has been quiet; the demand being on a small scale. Dealers buying quotations are only approximate.

	Cents
Copper, heavy and crucible	13.10
Copper, heavy and wire	12.75
Copper, light and bottoms	11.50
Brass, heavy	9.25
Brass, light	7.00
Heavy machine composition	10.50
Composition turnings	9.00
Lead, heavy	3.75
Zinc, scrap	5.00

Miscellaneous Metals—The prices of various metals from jobbers' warehouse, New York, are as follows:

	Per Pound
Bismuth	$3.75 to $4.00
Brass tubes, iron-pipe sizes:	
½ in.	19.00c.
¾ in. to 3 in.	18.00c.
3½ in.	18.00c.
4 in.	19.00c.
Brass rods	17.00c.
Brass sheets	17.25c.
Solder	24.00c.
Copper tubes	21.50c.
Zinc sheets	13.00 to 13.50c.
Copper sheets	19.75c.
Pig tin (five-ton lots, cash)	40.00c.

CLAY PRODUCTS

Sewer Pipe—Only a very slight improvement has been shown in the market during the past month. Discounts remain the same, as follows: 3 to 24-in., 78%; 27 to 30-in., 70%; 33- to 36-in., 55%. At these discounts, net prices are as follows:

PRICE OF SEWER PIPE PER FOOT

Size		Size	
3-in	$0.055	18-in.	$0.418
4-in.	0.055	20-in.	0.495
5-in.	0.088	22-in.	0.66
6-in.	0.088	24-in.	0.715
8-in.	0.1265	27-in.	1.35
10-in.	0.184	30-in.	1.65
12-in.	0.22	33-in.	2.20
15-in.	0.297	36-in.	2.45
18-in.	0.418		

Flue Lining—Business has been very dull during the month and the market remains unchanged, the discounts being 80% from list. At this rate, prices are as follows:

FLUE LINING PRICE PER FOOT

Size	Weight in Lb.	Price per Ft.	Size	Weight in Lb.	Price per Ft.
4½x8½-in	14	$0.07	8½x18-in	45	$0.18
4½x13-in	20	0.09	13x13-in	45	0.17

8½x8½-in	18	0.09	18x18-in	75	0.40
8½x13-in	28	0.13			

MISCELLANEOUS

Lumber—The market is much confused, but prices are only slightly lower than in the summer. This is in spite of a marked falling off in the domestic demand and no corresponding increase in the export situation. The whole reason may be summed up in the inability to secure low freight rates. Coastwise rates have advanced, and the withdrawal of a number of steam vessels for service to Europe has put correspondingly heavy demands on sailing vessels. Shipments through the Panama Canal, from which great things were expected, have, it is true, fully materialized, and 40,000,000 ft. of lumber has come from the Pacific Coast to the New York market by that route. Recently some of the leading shippers have refused to make any further contracts for lumber through the Canal. This is because shipping may be more profitably employed in doing other work. Great Britain has been a buyer of hardwood from the South, owing to the activity in its shipbuilding yards, and there seems to be no doubt that owing to the great destruction of merchant shipping, also fishing vessels, there will be a widespread demand for lumber some day. At present, however, there is absolutely no way of foretelling when conditions will improve. Prices show but little change in New York. Frames are quoted at $24, and hemlock boards at $20 to $22, in yards; spruce boards at $20 to $23. Clapboards are quoted at $52 to $54 for spruce.

Hardwood—The prices of hardwood show little change, the demand being exceedingly light. Ash boards are quoted at $60 to $64; bass wood $42 to $45; birch $54 to $56; maple boards $38 to $42; quartered oak $85 to $90; plain oak $55 to $60.

Lath—Quotations for lath are steady at $4 to $4.25 for 1⅝ in. and $3.65 to $3.75 for 1½ in.

Draft Animals—The havoc the Boer war created in the mule market in America is being duplicated by the large purchases of horses by representatives of Great Britain, France, and Italy. Although there were in the United States about 22,000,000 horses the first of the year, the purchases are variously estimated at from 100,000 to 500,000. However, the official figures of the Department of Commerce show exports numbering 30,000 for December. For the year 1914 the exports were 92,923 head compared with 29,352 in the previous year. Prices have advanced rapidly, as the result of these small exports even, and although these horses are not such as contractors use, they will make a difference in the cost of all kinds of horses. The buyers are desirous of obtaining rather light horses, weighing from 1000 to 1150 lb., and 15 to 15½ hands high. When the purchasing first began, there was paid $155 to $165, delivered at points of inspection, usually county seats, but this price has advanced, and cavalry horses are now bringing $175 to $180. A larger horse, used for artillery, must weigh to meet specifications 1200 to 1400 lb., and these are paid for at $185 to $195.

Lighterage Limits—The free delivery or "Lighterage Limits" in New York are as follows: In Manhattan, from a point opposite the Fort Lee ferry, south along the Hudson River around the Battery and north along the East and Harlem Rivers to the Jerome Ave. Bridge at 155th St. In New Jersey, south from Fort Lee ferry to Bayonne City, points on the north and east shores at Staten Island, between Bridge Creek (Arlington) and Clifton, both inclusive, and including Elm Park, Erastina and Shooters Island. In Brooklyn, from 69th St., Bay Ridge, north to Pot Cove, Astoria, Borough of Queens.

Rubber—Prices are slightly stronger than last month, most of the advance coming in the last few days of February. Up-river Para fine is now squarely at 60c., while up-river Para coarse cannot be had at less than 48c. Island fine is slightly easier, at 53 to 55c., while Island coarse is considerably cheaper at 29c. Balata sheet is 50 to 52c.; Ceylon sheet 62 to 64c., while Ceylon Crepe is higher at 63 to 65c. All of these prices are per pound.

Railway Ties—Conditions remain about the same as they were a month ago. However, should inquiries come from any of the ocean-going ports for a supply, there might be a rapid advance, due to the shipping conditions. We quote standard first-class ties as follows: 7x9 in. by 8 ft. 6 in., 72c.; 6x8 in. by 8 ft., 63c. These prices are f.o.b. New York.

Offering of National Forest Timber—The United States Forest Service is offering for sale 382,000,000 ft. of timber on the Crater and Paulina forest in Oregon. This is the largest body of timber ever placed on the market in Oregon by the Forest Service, and it stands among the largest of national forest timber offerings. The timber is in two blocks, one of 7120 acres, just east of the Crater Lake National Park; the other of 17,560 acres on the watershed of Bear Creek, near Upper Klamath Lake, in the Paulina forest. Both tracts are tributary to Klamath Falls, Ore. All but 10,000,000 ft. is Western yellow pine of good quality, the best being sugar, lodgepole and Western white pine. The location and topography of the larger area are described as excellent for logging and that of the smaller as fair. A cutting period of nine years will be allowed a purchaser of the smaller tract, twelve years for the larger, and a maximum of sixteen years to a purchaser of both tracts. It is estimated that an investment of $340,000 will be necessary for an operation on the larger tract.

The minimum price at which bids will be accepted is $3 per 1000 ft. for the yellow and other pines on the smaller tract, $3.25 on the larger tract, and 50c. per 1000 ft for the less important species, which may be removed at the option of the purchaser. Sealed bids will be received by the District Forester at Portland, Ore., until Apr. 10, 1915.

The Whiting Foundry Equipment Co., Harvey, Ill., recently made a wonderful record for prompt shipment on an order for a three-motor electric traveling crane, 10 tons capacity, 30 ft. span. Telegraphic order was received at its plant Jan. 23, calling for delivery of crane complete on purchaser's runway at New Bridge, Del., Feb. 10, 1915. Drawings were made, crane constructed, and shipment made Jan. 29, 1915. Crane reached New Bridge, Feb. 4, and was erected, complete, ready for service Feb. 6, or four days ahead of schedule time.

The Compressed Gas Manufacturers' Association, 25 Madison Ave., New York, desires that manufacturers of valves, cylinders, recording gages, filling and weighing stands, and materials and appliances which enter into the manufacture, transportation, and sale of compressed gases, send such printed matter as they may have to this Association.

The Troy Wagon Works Co., Troy, Ohio, announces that construction has been started on a new motor truck trailer works. The new building will be 120x140 ft., having a ground area of 1680 sq.ft. The company expects to turn out sixty trailers a week. Trailers are now made in three sizes: 1½ tons, 2½ tons, and 5 tons. All except the 1½ tons are reversible, while the 1½ tons is nonreversible.

Wood, Bancroft & Doty, railroad and grading contractors, has recently opened an office at 740 Reserve Bank Building, Kansas City, Mo., L. I. Viall being in charge. The home office of this firm is First National Bank Bldg., Omaha, Neb. This firm has the contract for the drainage work on the Delaware River in Atchison County, Kan., and work will be begun soon on this project. Some concrete bridge work at Lexington, Neb., is also under contract.

The Keasbey & Mattison Co., Ambler, Penn., announces that Howe Bros. has recently been appointed agent at 1198 San Pedro St., Los Angeles, Calif. This firm will carry and sell coverings and textile goods for the State of California south of Fresno, and also for the States of Arizona, New Mexico, and Utah.

The Troy Wagon Works Co., Troy, Ohio, announces the selection of J. L. Keir as the company's representative in Philadelphia. His office will be in the Abbott Bldg., Broad and Race St. He will sell Troy Trailers, Reversible Traction-Drawn Wagons, and Dump Wagons.

The Chapin Construction Co., paving contractors, formerly of Kansas City, Mo., is now located at 229 Monroe Bldg., San Antonio, Tex.

Activity of Manufacturers Commended—With the revival of business now seen from many points of view, it is interesting to note that the Mayor of St. Louis and the President of the St. Louis Business Men's League late in December wrote to all the St. Louis manufacturers urging them to follow the example of Broderick & Bascom Rope Co. That was to keep all their employees working, even if they had to be on part time. The particular work done by the Broderick & Bascom Rope Co. was that they so arranged their working force so that every employee on the payroll had work some of the time, and fortunately the company was able to keep its men better employed than most of the iron and steel manufacturers. In December the entire St. Louis plant was run full time, giving both day and night forces work. While this necessitated piling up some surplus stock, it kept the organization intact, so the manufacturing efficiency might be fully maintained when the demand became more lively.

The MacArthur Concrete Pile & Foundation Co., 11 Pine St., New York, N. Y., has appointed Waldo Bros., 45 Batterymarch St., Boston, Mass., sales agent for New England. This company has done a large amount of foundation work in New England, and is prepared to take contracts for all kinds of foundations.

IMMIGRANTS ADMITTED INTO THE UNITED STATES

The reports of the Department of Commerce and Labor show that the immigrants admitted into the United States in December were 20,944, the smallest of any month on record, in the last decade. The total immigrants for the year 1914 numbered 688,495, which was likewise the smallest of any year since 1902. While the falling off is not all accounted for in the last five months of the year, it is well to note that for the six months ending Dec. 31, 204,884 were admitted, compared with 734,869 in the corresponding half year in 1913. The greater part of the falling off was naturally of the Polish and Hebrew races and those from the south of Italy. In the accompanying table is shown the monthly total of immigrants arriving at ports of the United States, as reported by the Department of Commerce and Labor. From figures compiled for the last sixty years, the smallest immigration is shown in 1862, when only 72,183 aliens came to America, but immigration rapidly became normal, and by 1866 the tide was coming in nearly as strong as in the early '50's. The greatest number of immigrants admitted in any one year was in 1907, when 1,285,000 foreigners, classed as immigrants, came to these shores.

RAILWAYS

North Carolina—W. W. Barber, Edgemont, and J. Robert Campbell, Newland, are interested in the construction of a railway from Edgemont to Newland, N. C., about 20 miles.

Georgia—It is reported that surveys are now being made for a line to be built from Jacksonville, Ga., northeast to Lumber City, about 20 miles. An old lumber line extending about half the distance between these two places is to form part of the new line. C. F. Smith, Pres., Ocmulgee River Lumber Co., is interested.

Florida—See item under "Miscellaneous"—Track Material, Jacksonville, Fla.

Mississippi—Mississippi Eastern Ry.—Plans are being considered by this company for the extension of its line from Quitman, Miss. P. Bowles, Quitman, is Ch. Engr.

Tennessee—Cincinnati, New Orleans & Texas Pacific Ry.—This company contemplates the extension of its line to North Chattanooga, Tenn. C. Dougherty, Cincinnati, Ohio, is Ch. Engr.

Kentucky—The Brodhead-Garrett Co., Clay City, Ky., contemplates the extension of its railway from the Nada Mill at Lombard, Ky., for a distance of five or six miles.

Kentucky—Lexington & Eastern R.R.—This company has authorized a bond issue of $7,500,000 for the purpose of financing the construction of extensions in eastern Kentucky, for which surveys have been made. Contracts for the work will soon be awarded. H. C. Williams, Louisville, Ky., is Ch. Engr. Constr.

Illinois—Burlington, Mississippi River & Eastern Ry.—This company is considering plans for the extension of its line from Keithsburg, Ill., to a point opposite Muscatine, Ia., then in an easterly direction to Cambridge and Kewanee, Ill., connecting with the Chicago division of the Chicago, Burlington & Quincy. It is estimated that 1,600,000 cu.yd. of earth excavation will be required, for which contracts will be let about May 1. There will be four bridges, varying in length from 50 to 250 ft. These will be concrete arches. M. J. Healy, Joy, Ill., is Pres. and Ch. Engr.

Wisconsin—Balsam Lake & Eastern R.R.—This company has applied to the Wisconsin Railroad Commission for permission to construct a six-mile railway in Polk County, Wis.

Kansas—St. Louis & San Francisco Ry.—Plans, it is reported, have been prepared by this company for the construction of a 15-mile branch from a point three miles north of Baxter Springs, Kan., to Miami, Okla. E. G. Jonah, St. Louis, Mo., is Ch. Engr.

Texas—Sulphur Springs, Quitman & Great Northern R.R.—This company has been organized for the purpose of constructing a railway from Sulphur Springs to Quitman, Tex., about 35 miles. The principal office of the company is at Sulphur Springs, Tex.

Oklahoma—St. Louis & San Francisco Ry.—See item under Kansas.

Oregon—Valley & Silez R.R.—This company will award contracts some time in May for the construction of its proposed ten-mile extension from Independence to Newport, Ore. R. L. Donald, Northwestern Bank Bldg., Portland, Ore., is Mgr.

California—Tidewater Southern Ry.—It is reported that this company will construct a railway from Turlock to Fresno, Calif., about 97 miles. J. H. Wallace, Stockton, Calif., is Ch. Engr.

California—Atchison, Topeka & Santa Fé Ry.—According to press reports this company is receiving bids for the construction of an extension to its line from Exeter to Lindsay, Calif., about ten miles. F. M. Bisbee, Amarillo, Tex., is Ch. Engr. Western Lines.

ELECTRIC RAILWAYS

New Britain, Conn.—The New Britain St. Ry. Co. is being organized to construct an electric railway to connect New Britain and Hartford and New Britain and Plainville. Mortimer H. Camp, New Britain, is interested.

Trenton, N. J.—The Trenton & Mercer County Traction Corporation contemplates an extension of the Warren and Fair St. line in Trenton to make a belt line to parallel the municipal docks. William H. Hitchcock, Trenton, is Gen. Mgr.

Jacksonville, Fla.—The Jacksonville-Middleburg Electric Ry. Co. is making preliminary arrangements for the construction of its line from Jacksonville to Middleburg, about 24 miles. The first ten miles have been financed. A. W. Mackinlay is Gen. Mgr.

Birmingham, Ala.—Surveys have been made and work will soon be started by the Pratt Consolidated Coal & Iron Co. for the construction of an electric railway from its Maxime mine to a point near the Warrior River.

Chicago, Ill.—The Chicago & Northern Interurban Ry. Co. has applied to the State Public Utilities Commission for permission to construct an electric railway from the city limits of Chicago to Wheeling, about 12 miles. Jordan E. Van Natta, Chicago, is Atty. for the company.

Pekin, Ill.—The Pekin & St. Petersburg Interurban Ry. Co. will soon award contracts for the reconstruction and extension of its lines in Pekin. G. W. McIntire, Pekin, is Gen. Mgr., Pur. Agt. and Ch. Engr.

Peoria, Ill.—The Peoria & Chillicothe Electric Ry. Co. will start work about Mar. 15 on the construction of its proposed electric railway to connect Peoria and Chillicothe, Ill.

Peoria, Ill.—The Chicago, Peoria & Quincy Traction Co. will soon start preliminary surveys for the construction of its proposed electric railway from Peoria to Quincy. J. L. Soebbing is Pres.

Quincy, Ill.—The Quincy Ry. Co. is considering plans for the reconstruction and improvement of its lines in Quincy. W. L. Peters, Quincy, is Ch. Engr.

Elkhart Lake, Wis.—Plans are being considered by the Sheboygan-Elkhart Lake Interurban Co. for the construction of an extension from Elkhart Lake to Chilton. Edward Hammett, Sheboygan, is Mgr.

Milwaukee, Wis.—The City Council has been petitioned by the residents on Green Bay Ave. and on 27th St. for an extension of the electric railway on the Third and 27th St. lines to the city limits of Milwaukee. Under the blanket franchise the Milwaukee Electric Ry. & Light Co. is obliged to develop its tracks as directed by the City Council.

Argenta, Ark.—The Argenta Ry. Co. contemplates the extension of its Washington Ave. line to the Rock Island station. E. W. Jackson, Little Rock, Ark., is Vice-Pres. and Ch. Engr.

Calico Rock, Ark.—J. M. Myers, Calico Rock, is interested in the construction of an electric railway from Calico Rock to Hoxie. Work will be started as soon as financial arrangements can be made.

Dallas, Tex.—The Dallas Southwestern Traction Co. is preparing to start work soon on the extension of its line from Dallas to Brownwood via Mansfield, Venus, Alvarado, Cleburne, Glen Rose, Hico and other towns. Eventually it will be extended west from Brownwood to San Angelo. E. P. Turner is Pres., S. P. Cockran, Vice-Pres., George Williams, Secy. and Treas., and John T. Witt, Ch. Engr.

McKinney, Tex.—The McKinney, Bonham & Paris Interurban Ry. Co. is making preliminary arrangements for the construction of its proposed electric railway to connect Bonham, McKinney, Paris and Blue Ridge. L. A. Scott is Pres.

Tulsa, Okla.—The Oklahoma Union Traction Co. is preparing plans for the general improvement of its lines in Tulsa. A. A. Small, Tulsa, is Pres. and Gen. Mgr.

Lewiston, Idaho—The Lewiston-Clarkston Transit Co. is preparing to start work about Mar. 15 on the construction of its proposed electric railway from Lewiston to Clarkston. W. N. Nortz, Devil's Lake, N. D., and R. C. Dahlhjelm, Lewiston, are interested. Noted Oct. 29 and Nov. 26, 1914.

Sausalito, Calif.—Bids will soon be received for the construction of the proposed incline railway from Sausalito to the summit of the heights, 1000 ft. above the city. A. E. Roberts, Sausalito, is Ch. Engr. Noted Oct. 22 and Jan. 7.

Stockton, Calif.—The Central California Traction Co. has applied to the City Council for a franchise to extend its lines on North Sacramento St. in Stockton. C. H. Robertson, Stockton, is Gen. Mgr.

London, Ont.—Plans are being considered by the London St. Ry. Co. to extend, double-track and install switches on some of its lines in London. C. B. King, London, is Gen. Mgr. and Pur. Agt.

Toronto, Ont.—Representatives of Whitechurch Township have petitioned the Hydro-Electric Power Commission of Ontario to survey and prepare estimates of constructing a radial railway from Whitechurch to Georgian Bay.

LIGHT, HEAT AND POWER

+Boston, Mass.—The contract for heating and ventilating equipment in the new building of the Consumptives' Hospital on River St., Dorchester District, was awarded to PIERCE & COX at $7897, $7215 and $7247 for Items 1, 2 and 3 respectively. Edward F. McSweeney is Chn. of the Com.

+Providence, R. I.—The following contracts have been awarded in connection with the remodeling of the Dexter Insane Asylum; Plumbing, to the GUARANTEE PLUMBING CO. at $5900; heating and ventilating, to the ALLEN FIRE DEPARTMENT SUPPLY CO. at $5614; electrical work to SCANNEVIN & POTTER, Providence, at $1450.

New London, Conn.—Bids are being received by Dudley St. Clair Donnelly, Arch., 98 State St., for the heating, plumbing and mechanical equipment of the Y. M. C. A. building, now in course of construction on Meridian St.

New York, N. Y.—(Borough of Brooklyn)—(Official)—Bids will be received until 10:30 a.m., Mar. 11, by George W. Wingate, Pres. of Pub. Recreation Comn., Municipal Bldg., Borough of Manhattan, for electrical work and gas piping, with all incidental work connected therewith, for the proposed Betsey Head Memorial Playground and Recreation Center located at Brownsville, Borough of Brooklyn.

New York, N. Y.—(Borough of Manhattan)—(Official)—Bids will be received until 10:30 a.m., Mar. 8, by Robert Adamson, Fire Comr., Municipal Bldg., for a new steam-heating plant for the quarters of Engine Co. 15, 269 Henry St., Borough of Manhattan; for engine-heating systems at quarters of Hook and Ladder Co. 2, Lexington Ave. and 50th St., Manhattan, and Hook and Ladder Co. 146, 79 Richardson St., Brooklyn, and for additions and alterations to the heating systems at quarters of Engine Co. Nos. 25 and 54 and Hook and Ladder Co. Nos. 17, 28 and 35.

New York, N. Y.—(Borough of Richmond)—(Official)—Bids will be received until 10:30 a.m., Mar. 11, by John A. Kingsbury, Comr. of Pub. Charities, Room 1091, Municipal Bldg., Borough of Manhattan, for installing plumbing and water-supply, and heating apparatus in a new cottage for the agel and infirm at the New York City Farm Colony, Borough of Richmond. Charles B. Meyers, 1 Union Sq. W., New York, is Arch.

New York, N. Y.—(Borough of Queens)—Bids will be received until Mar. 8 by C. B. J. Snyder, Supt. of School Bldgs., Park Ave. and 59th St., Borough of Manhattan, for electrical work in Public School 85, Debevoise Ave., Long Island City, Borough of Queens.

+Allentown, Penn.—The Board of Education has awarded contracts for equipment in the new High School as follows: Heating, power and ventilating plant to J. H. COONEY & CO., Harrisburg, at $58,787; complete electrical work to the WATSON-FLAGG ENGINEERING CO., 27 Thames St., New York, at $37,580; plumbing to WILLIAM H. TAYLOR & CO., Allentown, at $21,266. Bids were opened Feb. 10. Noted Jan. 28.

Baltimore, Md.—It is reported that plans are being considered for the installation of a new turbine in the high-pressure power station on South St., for the purpose of supplying additional power for lighting the city hall and court house, and for operating the elevators in the city hall. The estimated cost of the engine is $15,000.

Dayton, Va.—See item under "Water Supply—Irrigation."

South Boston, Va.—It is reported that the South Boston Electric Light & Power Co. plans improvements to its plant estimated to cost $10,000. J. A. Mebane is Cont. Agt., Mgr. and Supt.

Wilson, N. C.—The Board of Aldermen has asked the State Legislature for permission to issue $80,000 in bonds, the proceeds to be used for reconstructing the municipal electric-light plant. R. J. Grantham is Supt. of the plant.

Cordele, Ga.—The City Council is considering a special election for the purpose of voting on the question of issuing bonds for the construction of a municipal electric-light plant.

Miami, Fla.—Press reports state that the Miami Gas Co. has decided to extend its mains into a number of the suburbs of the city at a cost of about $100,000. The same amount will be spent in enlarging the plant and making other improvements.

Guntersville, Ala.—(Official) — The town of Guntersville contemplates the installation of an electric-lighting system within the next few months, and will consider offers for putting in the lights. D. Isbell is Mayor.

Hattiesburg, Miss.—The Board of City Commissioners is considering the installation of a municipal electric-light plant, although the city's contract with the Hattiesburg Traction Co. for furnishing light does not expire until April, 1917. Tentative estimates show that a plant of sufficient size can be installed at a cost of from $30,000 to $35,000. A. Fairley is City Clk.

Dayton, Ohio—The lowest bid received by the Board of Education for the heating and ventilating equipment of the new Dayton View School was that of M. J. Gibbon, Dayton, at $27,307. The lowest bid for plumbing and gasfitting was that of the Case, Ringelspaugh, Wilson Co., Dayton, at $10,626.

Ripley, Ohio—Bonds to the amount of $12,000 have been sold, the proceeds of which will be used for the installation of a municipal electric-light plant.

Toledo, Ohio—Bids were opened Feb. 14 by the Board of Education for the construction of the Detroit Ave. School. The lowest bids for several contracts follow: Plumbing, Eagan Bros. Co., $19,058; boilers, McNaull Boiler Mfg. Co., $5700; heating, Eagan Bros. Co., $15,351; electric wiring, R. H. Winters Electric Co., $2275; temperature regulation, Johnson Service Co., Milwaukee, Wis., $3400.

Ft. Wayne, Ind.—The Board of Works will soon advertise for bids for an 800-hp. high-pressure boiler to replace two 300-hp. boilers in the municipal electric-light plant. John Wessel, Jr., is Secy. and Mgr. of the plant.

Croswell, Mich.—The City Council has passed an ordinance for 24-hr. service from the municipal electric-light plant. J. Stark, Detroit, has been engaged to oversee the installation of the necessary additional equipment. G. C. Hanson, Croswell, is Mgr. and Supt. of the municipal plant.

Detroit, Mich.—The Ford Motor Co. is making improvements at its power plant at the Detroit factory, including the installation of four direct-current generators, 3800 kw. each, 230 volts.

Engadine, Mich.—The Edwin Bell Co., manufacturer of kegs, staves, etc., contemplates the installation of a power plant in its factory. The plant will have sufficient output to furnish lights for the streets and residences of the village.

Portage, Mich.—The Town Board has decided to submit to the voters the question of a bond issue of $100,000 to be used for the construction of a municipal electric-light plant. It has not yet been decided whether the matter will come up at the April election, or later at a special election.

Brookston, Minn.—The City Council has granted a franchise to L. P. Runkle for the installation and operation of an electric-light and power plant.

Windom, Minn.—(Official)—Bids will be received until 7 p.m., Mar. 16, by W. M. Hale, Village Recdr., for the installation of a municipal electric-light plant and distribution system for the village. Earle D. Jackson, St. Paul, Minn., is Consult. Engr.

Gridley, Kan.—Plans are under consideration for the installation of an electric-lighting system in Gridley. It is reported that energy to operate it will be obtained from the Burlington Light, Power & Mfg. Co., Burlington, Kan.

Osawatomie, Kan.—It is reported that bids will soon be asked for remodeling the municipal electric-light plant. B. L. Prier is Supt.

Salina, Kan.—The Salina Light, Power & Gas Co. is reported to be considering improvements to its plant during the year, at an estimated cost of $40,000. Tentative plans include an addition to the power station, new boilers and generators. W. E. McFadden, Salina, is Gen. Mgr.

✚Wellington, Kan.—The City Commissioners have awarded the contract for equipment for the new municipal electric-light plant to the WESTINGHOUSE ELECTRIC & MFG. CO., Pittsburgh, Penn., at $30,700. Noted Dec. 3.

Adams, Neb.—(Official)—Bids will be received until 8 p.m., Mar. 12, by Charles Putney, Village Clk., for one oil engine, one generator, poles and material for the construction of an electric-light plant. Estimated cost, $4000. Johnson & Johnson, Falls City, Neb., is Engr.-in-Charge.

Deepwater, Mo.—(Official)—Bids will be received until Mar. 16 by the City Council for the construction of a municipal electric-light plant and for furnishing one 50-hp. oil engine. J. P. Davis & Co., Windsor, Mo., is Consult. Engr. Noted Feb. 25.

Marshall, Mo.—For the third time within 15 months, the citizens, at an election held Feb. 23, defeated the question of issuing bonds for $70,000 to be used in constructing a municipal electric-light plant.

Cabot, Ark.—The Cabot Light & Power Co. has been organized for the purpose of constructing an electric-light plant in Cabot. M. Young is Pres., D. Jenkins, Vice-Pres. and J. H. Hagan, Secy.

Gurdon, Ark.—(Official)—See item under "Water Supply—Irrigation."

Houston, Tex.—It is reported that the City Commissioners have decided to construct two municipal power plants. The first one, for which bids will shortly be asked, will provide power for lighting several bridges and the municipal buildings, and for operating some of the machinery of the waterworks system. The second and larger plant will be located on the ship channel, and is designed to operate the wharf machinery on the municipal piers. The two plants will cost approximately $75,000. E. E. Sands is City Engr.

Tombstone, Ariz.—The City Council is preparing to secure estimates of the probable cost of establishing a municipal electric-light plant in Tombstone.

Albion, Wash.—It is reported that the City Council has appointed a special committee to investigate the feasibility of installing a municipal electric-light plant. Charles Huff is a member of the Com.

BRIDGES

Butler, Penn.—(Official)—Bids will be received until noon, Mar. 9, by the Commissioners of Butler County for the construction of five county bridges, one each in Worth, Clay, Adams, Middlesex and Jefferson Townships. W. B. Scott is Clk, of Comrs.

Harrisburg, Penn.—Bids will be received until Mar. 17 for the construction of a double-track railway bridge over the Susquehanna River at Harrisburg for the Cumberland Valley R.R. It will be about 4000 ft. long, and will have 46 spans. The estimated cost is $750,000. Thomas B. Kennedy, Chambersburg, Penn., is Engr. of the Cumberland Valley R.R. Noted Jan. 1 and 15, Apr. 16, 1914; Jan. 21 and Feb. 4, 1915.

✚★Philadelphia, Penn.—(Official)—The Department of Public Works opened bids Feb. 25 for the construction of a bridge to carry Broad St. over the railway tracks, South Philadelphia track extension. All bidders of Philadelphia, unless otherwise noted. The bids follow: MacArthur Bros. Co. and Mason & Hanger Co., 11 Pine St., New York, N. Y., $306,000; Charles P. Bower, Wayne and Roberts Ave., $339,000; Robert Grace Contracting Co., 514 Smithfield St., Pittsburgh, $293,800; American Paving & Construction Co., 211 South Ninth St., $314,500; M. & J. B. McHugh, 714 Commercial Trust Bldg., $339,000; Snare & Triest Co., 233 Broadway, New York, $258,800; Carl R. Camp, Crozer Bldg., $292,800; E. E. Smith Contracting Co., 101 Park Ave., New York, $355,000; William H. Millard, 12th St. and City Line, $255,900; A. L. Guidone & Co., 131 East 23d St., New York, $357,500; McHarg-Barton Co., 171 Madison Ave., New York, $287,400; Francis J. Boas, 201 North Broad St., $322,000; Thomas F. Reilly, 50th St. and City Ave., $287,157; Kelley-McFeeley Co., 432 Market St., Camden, N. J., $301,900; ARTHUR McMULLEN CO., 149 Broadway, New York, $237,600 (awarded contract); Edwin H. Vare, 1120 Race St., $250,000. Noted Feb. 11.

Pottstown, Penn.—Plans are being discussed for the construction of a bridge over the Schuylkill River to replace the present structure which is reported to be in a dangerous condition. Montgomery County will be asked to pay a part of the cost of building the bridge.

West Chester, Penn.—Bids will be received until 11 a.m., Mar. 8, by the Commissioners of Chester County for repairs to two bridges over Brandywine Creek south of Chadds Ford.

York, Penn.—(Official)—Bids will be received until 10 a.m., Mar. 18, by the Board of Commissioners and the Controller of York County for the construction of a reinforced-concrete or steel bridge over the south branch of Muddy Creek on the road between Muddy Creek and Gatchelville, between East Hopewell and Fawn Townships. The bridge will be about 55 ft. long, with a 14-ft. roadway. F. S. Bartenschlager is County Controller.

✚Lawrenceville, Va.—(Official)—The Board of Supervisors of Brunswick County has awarded the contract for the construction of a steel bridge over the Meherrin River, about two miles from Lawrenceville, to the ROANOKE BRIDGE & IRON CO., Roanoke, Va. Noted Feb. 11.

Suffolk, Va.—The City Council and the Commissioners of Nansemond County contemplate the construction of a steel bridge across the Nansemond River.

✚Germanton, N. C.—The Board of Commissioners of Stokes County, Danbury, has awarded the contract for the construction of a bridge over Buffalo Creek at Germanton, to the VIRGINIA BRIDGE & IRON CO., Roanoke, Va., at $5423. The bridge will be about 280 ft. long.

Atlanta, Ga.—The City Council has decided to repair the bridge and tracks of the Whitehall St. Viaduct at a cost of approximately $8150. Samuel Freeman is Chn. of the Bridge Comn.

Jacksonville, Fla.—The Board of Commissioners of Duval County will submit to the voters the question of a bond issue for the construction of three reinforced-concrete bridges as follows: A bridge over Trout Creek at Main St.; a bridge over McGirts Creek at Ortega, and a bridge over Six-Mile Creek on the Moncrief Rd. John H. Patterson is Chn. of Bd. of Comrs.

Jacksonville, Fla.—(Official)—Bids will be received until Mar. 8 by Frank Brown, Clk. of Comrs. of Duval County, for repairing the Trout Creek Bridge on Fernandina Rd. at Panama. E. A. Ricker is Chn. Bd. of County Comrs.

Jasper, Ala.—(Official)—Bids will be received until Mar. 15 by Charles M. Sartain, Chn. Bd. of Comrs. of Walker County, for the construction of four steel bridges over the Black Warrior River at Cordova, Sipsey Fork, Mulberry and Town Creek.

Lake Charles, La.—(Official)—In the issue of Feb. 18, an item was published under Orange, Tex., announcing the award of the contract for a bridge over the Intercoastal Canal to Perry & Bonner, Lake Charles. This improvement should be credited to Calcasieu Parish, La., as a part of the work done under the $900,000 bond issue for bridges and highways. The contract was awarded to the firm in question last summer for two bridges, located 12 miles east of Orange, Tex. The first bridge was completed last October, and piers and abutments for the second are finished, and a part of the steel erected.

+**Louisville, Ky.**—The Board of Public Works has awarded the contract for the construction of a concrete culvert over Drescher St. to the L. W. HANCOCK CO., Louisville, at approximately $5000. Noted Feb. 18.

Jackson, Mich.—The City Council contemplates the construction of a reinforced-concrete or steel bridge over the Grand River at Mechanic St. The estimated cost is $10,000. A. W. D. Hall is City Engr.

Chicago, Ill.—It is reported that the Chicago & Northwestern Ry. is making preliminary surveys at Sheboygan, Oshkosh, Manitowoc and Green Bay, Wis., for replacing its stationary and draw bridges at those points with new structures. The total cost is estimated at $200,000. W. H. Finley, Chicago, is Ch. Engr. of the Chicago & Northwestern Ry.

Dixon, Ill.—Press reports state that, at the spring election, the citizens will be asked to vote on the question of a bond issue for the construction of a new bridge over the Rock River at Peoria Ave. Tentative plans call for a reinforced-concrete structure, 55 ft. wide. The estimated cost is $80,000. H. L. Fordham is Chn. of a special committee appointed to promote the plan.

Murphysboro, Ill.—Plans have been completed by William W. Marr, County Engr., for the construction of the Rattlesnake Ferry Bridge, between Tower and Pomona Townships, Jackson County. It will have one 180-ft. steel span, reinforced-concrete piers and abutments, creosote block floor. The estimated cost is $10,000. Thomas G. Duncan is County Supt. of Highways.

Green Bay, Wis.—(Official)—We are advised by A. Brauns, City Engr., that the question of a bond issue, to be used for the construction of a bascule bridge across the East River at Main St., will be submitted to the voters at the April election. If the issue carries, bids will be asked at once. Noted Feb. 11.

Madison, Wis.—The Wisconsin Railroad Commission has ordered the Chicago, Milwaukee & St. Paul Ry. to build a reinforced-concrete bridge over its Sauk Rd. crossing, Mendota Beach, near Madison. The estimated cost is $15,000. The bridge is to be completed in nine months. C. F. Loweth, Chicago, Ill., is Ch. Engr. of the railway company.

+**Ft. Madison, Iowa**—The Supervisors of Lee County, Fort Madison, and Des Moines County, Burlington, have awarded the contract for furnishing lumber to repair three bridges over the Skunk River, between the two counties, to FRANK SALLEN, Ft. Madison, at $35 per M ft.

+**Knoxville, Iowa**—(Official)—The Board of Supervisors of Marion County has awarded the following contracts for bridge construction: L. B. CHILD, Nevada, Iowa, five truss spans, $24,200; 21 culverts, $7758; THOR CONSTRUCTION CO., Cedar Falls, Iowa, four beam spans, $5240, 28 culverts, $10,760; WESTERN BRIDGE & CONSTRUCTION CO., Omaha, Neb., 21 culverts, $8800. W. O. Price is County Engr. Noted Feb. 4.

Primghar, Iowa—The Board of Supervisors of O'Brien County has passed a resolution of necessity for the construction of 25 bridges and culverts at an estimated total cost of $17,471.

Waterloo, Iowa—Bids for the construction of 14 county bridges during 1915 were received by the Supervisors of Blackhawk County from the following: H. S. Bougon, Waterloo, $18,982; Waterloo Construction Co., $21,990; Iowa Bridge Co., Des Moines, $22,300; Western Bridge & Construction Co., Harrisonville, Mo., $22,90; Boone Construction Co., Boone, Iowa, $27,000.

Caledonia, Minn.—(Official)—Bids will be received until 1 p.m., Mar. 16, by E. N. Newhouse, Audr. of Houston County, for building state bridges in the Towns of Winnebago, Brownsville, Houston and Mayville, Houston County.

East Grand Forks, Minn.—The City Council opened bids Feb. 23 for building an approach to the De Mers Ave. Bridge and for repairing the bridge, made necessary by a recent fire. The following are the bids: Jardine & Anderson, Fargo, N. D., $13,771; M. A. Adams & Co., Minneapolis, $14,397; Great Northern Bridge Co., Minneapolis, $13,878; Iowa Bridge Co., Minneapolis, $14,000.

+**Mora, Minn.**—The contract for State Bridges Nos. 1607, 1608 and 1632 has been awarded to the WAUSAU IRON WORKS, Wausau, Wis., at $10,759. Other bidders were: M. A. Adams & Co., Minneapolis, $10,994; Minneapolis Bridge Co., Minneapolis, $11,900; Hewitt Bridge & Steel Co., Minneapolis, $11,950; Hennepin Bridge Co., Minneapolis, $11,054; Minneapolis Steel & Machinery Co., Minneapolis, $11,395.

Owatonna, Minn.—It is reported that bids will be received until Mar. 9 by M. J. Parcher, Audr. of Steele County, for the construction of a reinforced-concrete bridge, Summit Township. The superstructure will have three 14-ft. spans and an 18-ft. roadway.

+**Liberal, Kan.**—(Official)—The Board of Commissioners of Seward County has awarded the contract for the construction of two wooden pile bridges over the Cimarron River to the WESTERN BRIDGE CO., Harrisonville, Mo. Seven other bids were received. A. K. Stoufer is County Clk. Noted Feb. 11.

Red Cloud, Neb.—Bids will be received until noon, Mar. 23, by J. J. Garber, County Clk. of Webster County, for culvert and bridge construction during 1915, and for furnishing steel I-beams and reinforcing rods.

+**Vermilion, S. D.**—The Board of Commissioners of Clay County has awarded the contract for the construction of wood and steel bridges during 1915 to the FEDERAL BRIDGE CO., Des Moines, Iowa. The contract for all concrete bridges was awarded to WARD & WEIGHTON, Sioux City, Iowa.

★**Billings, Mont.**—(Official)—Bids will be received until noon, Mar. 20, by the Board of Commissioners of Yellowstone County, for the construction of two highway bridges over the Yellowstone River, one near the mouth of Pompey's Pillar Creek, and the other near the mouth of Duck Creek. F. E. Williams is County Clk. Noted Oct. 15 and 29, Nov. 19, Dec. 17, 1914 and Feb. 11, 1915.

Texarkana, Ark.—Press reports state that plans are being considered for the construction of a steel bridge across the Red River near Fulton to connect Miller and Hempstead Counties. If built, the bridge will accommodate railway traffic, and it is hoped the railways entering Texarkana wil pay a part of the cost of construction.

Floresville, Tex.—It is reported that the Commissioners of Wilson County will receive bids early in March for the construction of two bridges.

Houston, Tex.—The lowest bid received by the City Council for the construction of the Milam St. Bridge was that of J. H. Richardson, at $37,397. The bids were referred to the City Engr for tabulation. Bids were opened Feb. 10. Noted Feb. 4.

Blackwell, Okla.—Press reports state that the Atchison, Topeka & Santa Fé Ry. is preparing to replace its wooden trestle just north of Blackwell with a new steel bridge.

Oklahoma, Okla.—(Official)—Bids will be received until Mar. 8 by M. Cornelius, Clk. of Oklahoma County, for the construction of a concrete bridge.

Bellingham, Wash.—(Official)—Bids will be received until 2 p.m., Mar. 18, by W. D. Wallace, Audr. of Whatcom County, for the construction of a 380-ft. steel bridge on reinforced-concrete piers over the Nooksack River on the Guide Meridian Rd. C. M. Adams is County Engr.

Bellingham, Wash.—(Official)—We are advised by Charles Lindbery, City Engr., that the construction of new bridges at Grant, Sylvan, Prospect, James and Elk St. has been postponed for another year, on account of lack of funds. The bridges, if of concrete, will cost about $100,000, or $30,000, if of timber. Noted Dec. 10 and 24, 1914.

Tumwater, Wash.—The Town Council and the Board of Commissioners of Thurston County, Olympia, will build a reinforced-concrete bridge on the Pacific Highway over Des Chutes River. The new bridge will replace the present structure which has been declared unsafe. The estimated cost is $10,000.

Portland, Ore.—The lowest bid received by the Board of Commissioners of Multnomah County for the construction of three reinforced-concrete bridges on the Columbia Highway between Warrendale and Bonneville was that of the Ferch, Goss, Scott, Hicks Co., Seattle, at $36,477. Noted Jan. 14 and Feb. 4.

+**Portland, Ore.**—(Official)—The Bridge Department of the State Highway Commission has awarded contracts for the construction of three reinforced-concrete bridges on the Columbia Highway, Multnomah County, as follows: Bridges Nos. 9 and 11, to ROBERT WAKEFIELD, Portland, at $16,904 and $3979 respectively; Bridge No. 10, A. GUTHRIE & CO., Portland, $14,364. C. H. Purcell is Bridge Engr. of the Comn. Noted Jan. 14 and Feb. 4.

Vale, Ore.—It is reported that the Commissioners of Malheur County will shortly advertise the sale of bonds for $30,000, the proceeds of which will be used for the construction of the Big Bend Bridge over the Snake River.

Riverside, Calif.—It is reported that the City Trustees have decided to build a reinforced-concrete bridge over Tequesquite Arroyo. The structure will be 70 ft. high, and is estimated to cost from $50,000 to $60,000. A. P. Campbell is City Engr.

Remodeling Toilet Rooms—Washington, D. C.—Bids were received Feb. 15 by the Superintendent of the State, War and Navy Bldg., Washington, D. C., for remodeling the toilet rooms in the above building, (a) using Riverside, Vt., marble, (b) using Mar-villa, Beaver Dam marble, (c) using Italian marble, as follows: Standard Engineering Co., Washington, D. C., (a) $82,825, (b) $80,065, (c) $88,425; Eberly Bros., Washington, D. C., (a) $90,000, (b) $87,600, (c) $95,070; Bullman Bros., Philadelphia, Penn., (a) $104,774, (b) $99,274, (c) $106,674; Richardson & Burgess, Washington, D. C., (a) $105,370, (b) $105,370, (c) $110,110; Newport Contracting & Engineering Co., Newport News, Va., (a) $84,490, (b) $82,220, (c) $90,000; W. G. Cornell Co., Washington, D. C., (a) $84,985, (b) $82,780, (c) $89,800; P. F. Gormley Co., Washington, D. C., (a) $95,254, (b) $92,984, (c) $99,211; Hanley-Casey Mechanical Equipment Co., Chicago, Ill., (a) $83,890, (b) $82,700, (c) $89,920; W. E. Mooney, Washington, D. C., (a) $91,695, (b) $89,295, (c) $96,785; Boyle-Robertson Construction Co., Washington, D. C., (a) $92,981, (b) $91,941, (c) $96,981; Frank L. Wagner, Washington, D. C., (a) and (b) $115,175, (c) $120,294.

Wharves—Washington, D. C.—Bids were received as follows on Feb. 11, by the Commissioners of the District of Columbia for constructing three new wharves with reinforced-concrete decks, to take the place of three old wharves on Water St., between 11th and 12th St., S. W., the work to include the necessary excavation, dredging and the construction of a concrete revetment wall supported on timber piles. (a) ordinary excavation, 2050 cu.yd.; (b) dredging, 16,600 cu.yd.; (c) revetment wall, 546 lin.ft., comprising 411 bearing piles, 39,600 ft. b.m., lumber, 685 Class "B" concrete; (d) bid A, wharves with reinforced-concrete decks supported directly on timber pile bents; (e) bid B, wharves with reinforced-concrete decks supported by concrete arched walls, the arched walls being supported by timber piles; (f) bid C, upon bidder's design, wharves with reinforced-concrete decks supported on concrete piles: Bid A comprises the following quantities: 536 bearing piles, 69 oak fender piles, 39 oak cluster piles, 94,600 ft. b.m., lumber, 725 cu.yd., Class A concrete, 68,800 lb. reinforcing steel, 19,280 lb. structural steel channels, 26 c.-i. mooring cleats, 24,000 lb. hardware. Bid B comprises the following quantities: 411 bearing piles, the same amount as above of oak fender and cluster piles, 43,200 ft. b.m., lumber, 965 cu.yd., Class A concrete, 95,000 lb. reinforcing steel, 965 lin.ft., curb protector, 26 c.-i. mooring cleats, and 8200 lb. hardware. James L. Marshall, McLachlen Bldg., Washington, D. C., (a) 68c.; (b) 68c.; (c) no bid; (d) $52,462; (e) $53,313; Penn Bridge Co., Washington, D. C., (a) 49c.; (b) 48c.; (c) $24; (d) no bid; (e) $22,593; Interstate Construction Co., 1170 Broadway, New York, (a) 80c.; (b) 80c.; (c) $17.50; (d) $30,297; (e) $27,653; (f) $29,300; Dorsey & Miller, Corcoran Bldg., Washington, D. C., (a) 54c.; (b) 54c.; (c) $18.42; (d) $21,900; (e) $25,000; (f) $39,000; Arthur L. Smith & Co., Woodward Bldg., Washington, D. C., (a) 75c.; (b) $1.50; (c)

$19.90; (d) $48,375; (e) $49,100; W. D. Murray & Co., Inc., Norfolk, Va., (a) 49½c.; (b) 49½c.; (c) $19.73; (d) $21,586; (e) $21,791; Snare & Triest Co., 233 Broadway, New York, (a) 60c.; (b) 80c.; (c) $21; (d) $25,700; (e) $26,600; Clark & Winston Co., 10th and Water St., Washington, D. C., (a) 73c.; (b) 73c.; (c) $19.44; (d) $22,628; (e) $24,610; Frederick Drew Co., Inc., Woodward Bldg., Washington, D. C., (a) 70c.; (b) 70c.; (c) $18; (d) $24,558; (e) $26,141; Alsop & Pierce, Newport News, Va., (a) 40c.; (b) 62c.; (c) $21.79; (d) $23,473; (e) $22,457; Sanford & Brookes Co., Baltimore, Md., (a) $3.83; (b) 30c.; (c) $20.70; (d) $26,220; (e) $26,695.

Public Buildings—Washington, D. C.—The following appropriations are incorporated in the Sundry Civil Appropriations Bill, covering the year ending June 30, 1916.

(extension), $40,000; Alliance, Neb., $1000; Anoko, Minn., $10,000; Antigo, Wis., $1000; Ashland, Ky., $30,000; Attleboro, Mass., $30,000; Aurora, Neb., $1000; Bakersfield, Calif., $1000; Barnesville, Ga., $1000; Bartow, Fla., $1000; Belton, Tex., $10,000; Buffalo, Wyo., $1000; Burlington, N. C., $1000; Caribou, Maine, $1000; Chadron, Neb., $1000; Charles City, Iowa. $1000; Chattanooga, Tenn. (extension), $30,000; Columbia, S. C., $1000; East Orange, N. J., $1000; East St. Louis, Ill., $95,000; Ellensburg, Wash., $10,000; Elyria, Ohio, $20,000; Evansville, Ind. (extension), $75,000; Falls City, Neb., $10,000; Globe, Ariz., $1000; Greenwich, Conn., $50,000; Grinnell, Iowa, $1000; Hackensack, N. J., $1000; Hornell, N. Y., $30,000; Humboldt, Tenn., $1000; Huntington, Ind., $10,000; Huntington, W.Va. (extension), $100,000; Jasper, Ala., $1000; Kalispell, Mont., $15,000; Kansas City, Mo. (extension), $250,000; Kirksville, Mo., $30,000; Little Falls, Minn., $10,000; Madison, Wis., $200,000; Marion, S.C., $1000; Maryville, Tenn., $10,000; McComb, Miss., $1000; Merrill, Wis., $35,000; Middletown, Conn., $1000; Middletown, Ohio, $50,000; Minden, La., $20,000; Missoula, Mont. (extension), $50,000; Moberly, Mo. (extension), $20,000; Montevideo, Minn., $1000; Nacogdoches, Tex., $20,000; Nashville, Tenn. (extension), $200,000; Naugatuck, Conn., $25,000; Navasota, Tex., $15,000; Neenah, Wis., $1000; New Braunfels, Tex., $20,000; Oklahoma City, Okla. (extension), $111,000; Pulaski, Va., $1000; Redfield, S. D., $1000; Ridgway, Penn., $25,000; Rockville, Conn., $1000; Roseburg, Ore., $1000; Rumford, Maine, $1000; St. Louis, Mo., subtreasury, $50,000; Salamanca, N. Y., $20,000; Sandusky, Ohio, $80,000; Saranac Lake, N. Y., $25,000; Savanna, Ill., $1000; Shelby, N. C., $1000; Shelbyville, Ky., $10,000; Sidney, Ohio, $10,000; South Bethlehem, Penn., $1000; Stamford, Tex., $1000; Tamaqua, Penn., $27,000; Tarentum, Penn., $1000; Taylorville, Ill., $10,000; Titusville, Penn., $15,000; Valley City, N. D., $15,000; Vancouver, Wash., $10,000; Van Wert, Ohio, $25,000; Washington, Ind., $1000; Washington, Iowa, $10,000; Waterloo, N. Y., $20,000; Waynesville, N. C., $1000; Wenatchee, Wash., $1000; Williamson, W. Va., $1000; Winchester, Ky. (changes), $20,000.

For continuation: Albion, Mich., $40,000; Baltimore, Md., immigration station, $300,000; Batavia, N. Y., $40,000; Beardstown, Ill., $27,000; Blackwell, Okla., $20,000; Brenham, Tex., $20,000; Chillicothe, Mo., $80,000; Coeur d'Alene, Idaho, $55,000; Cuero, Tex., $20,000; East Pittsburgh, Penn., $40,000; Eureka Springs, Ark., $16,000; Fort Atkinson, Wis., $30,000; Fulton, Mo., $30,000; Gardiner, Maine, $65,000; Gouverneur, N. Y., $35,000; Juneau, Alaska, $75,000; La Junta, Colo., $10,000; Laurel, Miss., $40,000; Lincoln, Neb., $135,000; Live Oak, Fla., $20,000; Millville, N. J., $25,000; Monongahela, Penn., $23,000; Mount Vernon, N. Y., $20,000; Muskegon, Mich. (extension), $30,000; Newark, Ohio, $50,000; Newport, R. I., $150,000; Opelika, Ala., $40,000; Palatka, Fla., $18,000; Putnam, Conn., $10,000; Quitman, Ga., $20,000; Syracuse, N. Y., $180,000; Tulsa, Okla., $45,000; Utica, N. Y. (extension), $180,000; Waltham, Mass., $20,000; Washington, D. C., Interior Department offices, $1,500,000; Webb City, Mo., $20,000; Wellsburg, W. Va., $30,000; Wilkesboro, N. C., $30,000; Ypsilanti, Mich., $35,000;

For completion: Albany, Ore., $10,000; Alliance, Ohio, $20,000; Amarillo, Tex., $133,000; Ardmore, Okla., $95,000; Augusta, Ga., $50,000; Bainbridge, Ga., $15,000; Bangor, Maine, $40,000; Bedford, Penn., $50,000; Berkeley, Calif., $20,000; Boston, Mass., appraisers' stores, $350,000; Bozeman, Mont., $30,000; Brattleboro, Vt., $50,000; Bryan, Tex., $4000; Cadillac, Mich., $43,000; Camden, S. C., $6500; Canton, Ill., $30,000; Canton, Miss., $30,000; Carnegie, Penn., $35,000; Cartersville, Ga., $5000; Chanute, Kan., $42,000; Collinsville, Ill., $36,000; Concord, N. H., $18,000; Cookeville, Tenn., $40,000; Corpus Christi, Tex., $70,000; Covington, Tenn., $6000; Danbury, Conn., $55,000; Delavan, Wis., $10,000; Denver, Colo., $200,000; De Soto, Mo., $5000; El Reno, Okla., $75,000; Ennis, Tex., $43,000; Everett, Wash., $85,000; Excelsior Springs, Mo., $20,000; Fayetteville, Tenn., $15,000; Fulton, Ky., $35,000; Garden City, Kan., $45,000; Gary, Ind., $50,000; Gastonia, N. C., $15,000; Glen Falls, N. Y., $45,000; Goldfield, Nev., $60,000; Grass Valley, Calif., $10,000; Greenfield, Mass., $75,000; Grenada, Miss., $25,000; Hagerstown, Md. (extension), $30,000; Hampton, Va., $20,000; Hanford, Calif., $15,000; Harrisburg, Penn. (extension), $75,000; Hilo, Hawaii, $50,000; Holland, Mich., $55,000; Huntington, Penn., $15,000; Ishpeming, Mich., $30,000; Jackson, Ky., $35,000; Jellico, Tenn., $30,000; Jennings, La., $25,000; Kinston, N. C., $20,000; Lafayette, La., $10,000; Lake City, Minn., $29,000; La Salle, Ill., $35,000; Lawton, Okla., $152,300; Longview, Tex., $20,000; Lynchburg, Va., $25,000; Mandan, N. D., $11,000; Martinsburg, W. Va., 20,000; McPherson, Kan., $20,000; Medford, Ore., $20,000; Middleboro, Ky., $65,000; Miles City, Mont., $118,500; Milwaukee, Wis., appraisers' stores, $40,000; Minot, N. D., $20,000; Mobile, Ala., $70,000; Morristown, N. J., $80,000; Moundsville, W. Va., $10,000; Mount Vernon, Ill., $8000; Narragansett Pier, R. I., $39,000; Newcastle, Ind., $15,000; New Haven, Conn., $400,000; New Orleans, La., remodeling customhouse, $250,000; New Rochelle, N. Y., $15,000; North Attleboro, Mass., $50,000; Norton, Va., $25,000; Orange, N. J., $20,000; Osage City, Kan., $12,000; Pendleton, Ore., $73,000; Pensacola, Fla. (extension), $30,000; Pittsburgh, Penn., laboratory, Bureau of Mines, $350,000; Plainfield, N. J., $80,000; Port Jervis, N. Y., $16,000; Poughkeepsie, N. Y. (extension), $40,000; Princeton, Ill., $50,000; Reading, Penn. (extension), $40,000; Robinson, Ill., $45,000; Rocky Mount, N. C., $30,000; St. Petersburg, Fla., $25,000; San Luis Obispo, Calif., $71,000; Seymour, Ind., $28,000; Shelbyville, Tenn., $5000; Smyrna, Del., $10,000; Sparta, Wis., $23,000; Stamford, Conn., $100,000; Sycamore, Ill., $15,000; Tarboro, N. C., $25,000; The Dalles, Ore., $60,000; Thomasville, Ga., $46,000; Three Rivers, Mich., $10,000; Tiffin, Ohio, $70,000; Tupelo, Miss., $40,000; Urbana, Ill., $10,000; Uvalde, Tex., $35,000; Williston, N. D. $5000; Wilmington, N. C., custom house, $220,000; Wilson, N. C., $15,000; Winchester, Tenn., $15,000; Winfield, Kan., $44,000; Wytheville, Va., $25,000; Yonkers, N. Y., $250,000.

Floating Crane—Portsmouth, Va.—Bids were received for the construction of a 150-ton floating revolving crane for the Navy Yard, Norfolk, Va., item 1, crane complete in accordance with Government specifications, item 2, crane complete in accordance with bidders' specifications, item 3, deduction for omitting bituminous coatings, as follows: Woerf Gusto, firm of A. F. Smulters, Schiedam, Holland, (2) $380,000 (exclusive of customs duties and harbors duties), (3) $4000; Cleveland Crane & Engineering Co., Wickliffe, Ohio, (1) $422,990, (2) $442,790, (3) $10,700; Wellman-Seaver-Morgan Co., 7000 Central Ave., Cleveland, Ohio, (1) $323,750, (2) $299,000 (duplicate of 150-ton crane furnished at Boston Navy Yard), (3) $13,800; Morgan Engineering Co., Alliance, Ohio, (2) $381,985, (3) $10,000; Shipbuilding & Engineering Co., of Woerf Conrad, Haarlem, Holland, (1) $400,000 (exclusive of customs duties and harbors duties), (3) $12,000; Newmeyer & Diamond, Agents, 82 Beaver St., New York, (1) $439,500, (2) $450,000, (3) $4150; Bethlehem Steel Co., South Bethlehem, Penn., (1) $353,000, (2) $425,000, (3) $6000 (subject to award by Mar. 31). Noted Feb. 11.

Repairs to Buildings—New Orleans, La. — Bids were received as follows for repairs and alterations in buildings Nos. 8, 10, 11, marine barracks and marine quarters at the Naval Station, New Orleans: Henry Monk, Pensacola, Fla., $36,624; Grohne Contracting Co., Joliet, Ill., $31,890; Newport Contracting & Engineering Co., Inc., Newport News, Va., $29,605; L. M. Dalgarde, New Orleans, $77,645; C. O. Eure, Hattiesburg, Miss., $28,658. Noted Feb. 14.

Dwelling and Dormitory—New Orleans, La.—Bids will be received until 11 a.m., May 15, by William M. Smith, Acting Chief of the Bureau of Yards and Docks, Navy Dept., for constructing a one-story frame dwelling and a one-story frame dormitory at the naval station, New Orleans.

✚Steel Hull—Cincinnati, Ohio—The contract for constructing the steel hull for derrick boat No. 4, Kentucky River, has been awarded to the NASHVILLE BRIDGE CO., Nashville, Tenn., at $5900.

★Towboats—Cincinnati, Ohio.—The following bids were received for constructing and delivering two steel sternwheel towboats, "Cayuga" and "Ottawa": Charles Barnes Co., Cincinnati, $42,789; Edward J. Howard, Jeffersonville, Ind., $53,784; Dubuque Boat & Boiler Co., $48,366; Rees Co., Pittsburgh, Penn., $54,275. Noted Jan. 28.

Dredging—Toledo, Ohio—The following are the bids received for dredging in Toledo Harbor: Duluth Superior Dredge Co., Duluth, Minn., $97,580; John P. Breymann, Toledo, $77,420 (on two sections); Greiling Bros., Green Bay, Wis., $123,880; Zenith Dredge Co., Duluth, Minn., $94,133; Fitzsimons & Connell Dredge & Dock Co., Chicago, Ill., $112,050; Great Lakes Dredge & Dock Co., Cleveland, Ohio, $81,190. Noted Feb. 4.

★Dredging—Indiana Harbor, Ind.—Bids will be received until 10 a.m., Mar. 29, by Lieut.-Col. W. V. Judson, U. S. Engineer Office, Chicago, Ill., for dredging in Indiana Harbor.

✚Addition to Post Office—Lincoln, Neb.—The contract for the construction of the addition to the post office at Lincoln, has been awarded to J. H. WEESE, Omaha, Neb., at $213,720. Noted Jan. 7 and Feb. 25.

✚Post Office—Uvalde, Tex.—The contract for the construction of the post office at Uvalde has been awarded to the RIVERON CONSTRUCTION CO., Uniontown, Ala. Noted Dec. 17 and Jan. 28.

Sewer System—Phœnix, Ariz.—Bids will be received by Cato Sells, Comr., Dept. of the Interior, Office of Indian Affairs, Washington, D. C., until 2 p.m., Mar. 29, for constructing a sewer system at the Phœnix Indian School and Sanatorium.

Buildings—Tucson, Ariz.—Bids will be received by Cato Sells, Comr. of Indian Affairs, Dept., of the Interior, Washington, D. C., until 2 p.m., Mar. 22, for the construction of three combination adobe school buildings at Indian Oasis, Ventana and Comobabi Indian villages.

✚Wood Stave Pipe—Benton City, Wash.—The contract for the construction of the wood stave pipe for the Snipes Mountain pumping plant of the Sunnyside unit, Yakima project, has been awarded to the PACIFIC PIPE & TANK CO., Portland, Ore., at $11,094.

Foundations—San Diego, Calif.—The following are the bids received for the construction of three foundations for radio towers, at San Diego: Doran & Reedo, $9100; Snare & Triest Co., 233 Broadway, New York, N. Y., $11,980; Henry Monk, Pensacola, Fla., $13,650; Spalding Construction Co., San Francisco, Calif., $8187; John Campbell, $9014; W. E. Keir Construction Co., $10,300; C. L. Contracts to Be Let

Bids received until Mar. 10, 1915.

Storm-Water Contract No. 42, Gwynn's Run Trunk Drain, Section No. 1

OFFICE OF THE SEWERAGE COMMISSION
OF THE CITY OF BALTIMORE

Baltimore, Feb. 17th, 1915.

SEALED PROPOSALS, in duplicate, indorsed "Proposal for building Gwynn's Run Trunk Drain, Section No. 1, Stormwater Contract No. 42," addressed to the Board of Awards of Baltimore City, will be received at the office of the City Register, City Hall, Baltimore, Md., until 11 A.M. Wednesday, March 10, 1915, for building Section No. 1 of the Gwynn's Run Trunk Drain, as shown on plans on file in the office of Mr. Calvin W. Hendrick, Chief Engineer of the Sewerage Commission.

Specifications and plans can be obtained upon application at the office of the Secretary of the Commission, 904 American Building, on and after Tuesday, February 23rd, 1915.

A charge of $5.00 will be made for each set of specifications and plans, which charge will be refunded upon the return on or before March 10th, 1915, of the unused specifications and blueprints in good condition, or upon the return of the General Specifications and plans in case a bid is submitted.

A certified check of the bidders on a clearing house bank, in the sum of $3,000.00, made payable to the order of the Mayor and City Council of Baltimore, will be required to be deposited with each bid.

Approximate Quantities.

1,200 feet 15'x12'6" drain.
150 feet 18'x12'6" drain.
665 feet excavated outlet channels.
8,300 cu.yds. of earth excavation.
700 cu.yds. of rock excavation.
4,750 cu.yds. of concrete.
310 cu.yds. of brick masonry.
250,000 pounds of reinforcing steel.

The successful bidder on this contract will be required to give bond and comply with the City Charter respecting contracts.

The Board of Awards reserves the right to reject any and all bids.

By order of the Sewerage Commission:
CHARLES ENGLAND, Chairman.
HARRY W. RODGERS, Secretary.
Approved: February 17, 1915.
JOHN HUBERT,
Acting President, Board of Awards.

⁂

Bids received until April 1, 1915.

Disposal of Garbage

Wilmington, Delaware.

Sealed proposals, accompanied by plans and specifications for the disposal of garbage of the City of Wilmington, Delaware, will be received by the Board of Health, at their office, 6th and King Sts., until 3 p.m. April First, 1915, at which time and place the proposals will be opened and publicly read.

The contract to be let, will be for a term of Nine years, beginning June First, 1915. The amount of garbage to be disposed of, approximates, 14,000 tons, yearly.

Each proposal submitted, must be accompanied by a certified check upon a Bank or Trust Company doing business in the City of Wilmington, Delaware for the sum of Five Hundred Dollars ($500), drawn to the order of the Mayor and Council of Wilmington, Delaware.

General specifications and bidding blanks may be obtained from Mr. J. Austin Ellison, Secretary of the Board of Health after March First, 1915.

The right is reserved to award the contract under that proposal, the acceptance of which will in the judgment of the Board of Health best secure the efficient performance of work and to reject any or all bids.

BOARD OF HEALTH,
J. Austin Ellison, Secretary.

Bids received until Mar. 15, 1915.

Street Paving

Steelton, Pennsylvania.

Sealed proposals will be received by the Town Council of the Borough of Steelton, Pennsylvania, at the Council Chamber until 7:30 P.M., Monday, March 15th, 1915, to be opened at a special meeting of the Town Council to be held at the said time and place for the subgrading, paving and curbing of the following streets:

South Third Street from Highland to DuPont, Highland Street from Second to Third and Conestoga Street from Front to Christian Street.

Plans, specifications, form of proposal and form of contract can be had from the Borough Secretary upon the payment of $10.00, which will be refunded upon the return of plans and specifications in good condition.

No proposal will be considered unless accompanied by a certified check made payable to LeRoy H. Sutton, Borough Treasurer, conditioned on the entering into by the successful bidder of a contract in accordance with the specifications and form provided, and furnishing a bond with at least two sureties, or some surety company acceptable to the Town Council, in the sum of approximately twenty-five per cent. (25%) of the cost of the work as set out in detail for each job in the specifications, conditioned for the faithful performance of all terms and conditions of said contract, the form of said bond to be approved by the Borough Solicitor; also maintenance bond conditioned as set forth in the contract and specifications. The amount of the certified checks shall be as follows: Highland Street, $100.00; South Third Street, $500.00; Conestoga Street, $600.00. In the event that the bid covers all of the streets to be paved the certified check shall be in the sum of $1,200.00.

The Town Council reserves the right to reject any or all bids or any part thereof.

Foreign corporations desiring to make bids should be registered in the office of the Secretary of the Commonwealth, as required by the Act of June 8th, 1911, and have a bona fide resident agent in this state with a fixed office, and as a further precaution to the Borough of Steelton, the successful bidder, if a foreign corporation, may at the option of the Town Council be required to empower some person or company satisfactory to the Town Council to accept service for said successful bidder during the term of the contract and bond.

CHAS. P. FEIDT, Borough Secretary.

⁂

Bids received until Apr. 13, 1915.

Automatic Valves and Check Valves

DEPARTMENT OF WORKS.

Toronto, Ont.

Tenders will be received by registered post only, addressed to the Chairman of the Board of Control, City Hall, Toronto, Canada, up to noon on Tuesday, April 13th, 1915,

For the Supply of
Automatic Valves and Check Valves.

Specifications and Tender Form for the foregoing may be obtained upon application at Room 12, Purchasing and Accounting Section, of the Department of Works, City Hall, Toronto.

Envelopes containing tenders must be plainly marked on the outside as to contents.

The usual conditions relating to tendering as prescribed by City By-law must be strictly complied with, or the tenders may be declared informal.

Tenderers shall submit with their tenders the names of two personal sureties, approved by the City Treasurer, or in lieu thereof, the bond of a guarantee company, approved as aforesaid.

The lowest or any tender not necessarily accepted.

T. L. CHURCH (Mayor),
Chairman, Board of Control.
Toronto, February 8th, 1915.

FEBRUARY BUILDING OPERATION

A marked improvement in building operations is shown in the Eastern States. There is a gain of 17.8% in February in the building operations in 23 cities of this year over last year. There is also a gain of 16.4% for the first two months of this year over the corresponding period of last year. The Borough of Manhattan alone shows an increase of $3,000,000 in February over the corresponding month last year. While there is a falling off in the Middle West, it is not as great as was recorded in January. The reason for the decrease in building in the Western States this year is that plans were filed in 1914 for many buildings in connection with the Panama-Pacific Exposition.

In the following list is given the contemplated building operations from plans filed with the various building departments:

EASTERN STATES

	Month of February		First Two Months of Year	
	1915	1914	1915	1914

RAILWAYS

New Jersey—Pennsylvania & Atlantic R.R.—Articles of consolidation merging the Philadelphia & Long Branch R.R., the Pemberton & Hightstown R.R., and the Kinkora & New Lisbon R.R. into a new company of the above name, have been filed at Trenton, N. J.

North Carolina—Southern Ry.—Surveys are being made by this company for the enlargement of its yards at Pomona, N. C. W. H. Wells, Washington, D. C., is Ch. Engr. Constr.

Georgia—Georgia Lumber Co.—Plans are being considered by this company for the extension of its railway for several miles. J. S. Moreton, Hyromville, Ga., is Mgr.

✚Georgia—Ocilla Southern Ry.—This company has awarded the contract for the construction of the extension of its line from Rochelle to Pope City, about 7½ miles, to MARTIN TANKERSLEY.

Florida—Fort Myers, Marco Bay & Miami Ry.—Contracts will soon be awarded by this company for the construction of a railway from Fort Myers, Fla., via Naples and Marco Bay to Everglade, thence east across southern Florida to Miami, about 150 miles. W. B. Clay, Arcadia, Fla., is Ch. Engr.

Mississippi—New Orleans, Mobile & Chicago R.R.—According to press reports this company contemplates the construction of an extension from Estes, Miss., to Talla Haga and Noxapater Swamp. B. V. Wright, Laurel, Miss., is Ch. Engr.

Tennessee—Nashville, Chattanooga & St. Louis R.R.—This company has had plans prepared for the construction of an extension of its line from Antwerp to Estill Springs, about eight miles. H. McDonald, Nashville, Tenn., is Ch. Engr.

Wisconsin—Cashton & Hillsboro R.R.—This company has applied to the State Railroad Commission for permission to construct an extension from Cashton to Richland Center, about 28 miles. M. M. Cash, Cashton, is Pres.

Hawaii—Lihue Plantation Co.—This company is preparing plans for the construction of a railroad on Kauai Island. Estimated cost, $250,000.

ELECTRIC RAILWAYS

Webster, Mass.—The Worcester & Webster St. Ry. Co. has applied to the City Council for a franchise to construct an electric railway in Webster. F. H. Dewey, Worcester, is Vice-Pres.

Depew, N. Y.—The Buffalo & Depew Ry. Co. will soon award contracts for the construction of a two-mile extension to its line. George A. Ricker, Buffalo, is Ch. Engr.

Collegeville, Penn.—The Perkiomen Traction Co. is making preliminary arrangements for the construction of an electric railway from Collegeville to Schwenkville.

Hazleton, Penn.—The Wilkes-Barre & Hazleton Ry. Co. contemplates an expenditure of $600,000 for double-tracking its entire system. C. B. Houck, Hazleton, is Vice-Pres., Gen. Mgr. and Pur. Agt.

McConnellsburg, Penn.—The McConnellsburg & Ft. Loudon Ry. Co. has been granted a charter to construct an electric railway from McConnellsburg to Ft. Loudon, about ten miles. The incorporators include: E. J. Post, Washington, D. C., and G. A. Harris, B. C. Lamberson, J. L. Patterson, McConnellsburg; H. A. Duffy and D. H. Patterson, Webster Mills. Noted Feb. 11.

Charleston, S. C.—The Charleston-Isle of Palms Traction Co. has been granted permission to construct an extension of its line across the Government Reservation on Sullivan Island. James Sottile, Charleston, is Pres.

St. Petersburg, Fla.—Preliminary arrangements are being made by the St. Petersburg & Gulf Ry. Co. for the extension of its line on 22nd St. to the ball park at Coffee Pot Bayou. W. M. Mosedale, St. Petersburg, is Ch. Engr.

Rayville, La.—The Rayville Progressive League is having surveys made for the construction of a 21-mile electric railway south from Rayville. Theodore J. Coenen is Pres. of the League.

Cleveland, Ohio—The City Council has granted a franchise to the Cleveland Ry. Co. to extend its double track line on Clark Ave. George L. Radcliffe, Cleveland, is Gen. Mgr.

Lafayette, Ind.—The Lafayette & Northwestern Ry. Co. will be ready to start work sometime in April on the construction of its proposed electric railway to connect Lafayette, Rensselaer, Hammond, Princeton, Round Grove and West Point, Ind., and Chicago, Ill. O. L. Brown is Gen. Mgr.

Benton Harbor, Mich.—Henry Deam and Charles Sutherland, Sister Lakes, Mich., are interested in the construction of an electric railway to connect Benton Harbor, Sister Lakes and Keeler.

Harrisburg, Ill.—The Southern Illinois & St. Louis Ry. Co. is planning to start work soon on the construction of an electric railway to connect Harrisburg, Belleville, Duquoin, Herrin, Johnson City and East St. Louis.

Lee Center, Ill.—The Lee County Central Electric Ry. Co. contemplates the extension of its lines north to Ashton, Rochelle or DeKalb and south to Princeton.

Peoria, Ill.—The Allen Engineering Co. has been retained by the Peoria & Chillicothe Electric Ry. Co. to make surveys for its proposed electric railway from Peoria to Chillicothe. Arthur C. Black and E. V. Mattice are interested. Noted Mar. 4.

Kalispell, Mont.—The construction of an electric railway from Kalispell, Mont., to Spokane, Wash., is under consideration. Amos L. Thompson, Libbey, Mont., is interested.

Arcadia, Calif.—The Humboldt Transit Co. is securing the right-of-way for the construction of an extension to its line to Arcadia. F. C. Morrison, Eureka, is Gen. Mgr. and Pur. Agt.

Meridian, Calif.—The Northern Electric Ry. Co. is preparing plans for the reconstruction of its line from Meridian to Colusa, which was recently damaged by floods. W. A. McGovern, Chico, is Gen. Mgr.

LIGHT, HEAT AND POWER

Waterbury, Conn.—Bids will be received by the Board of Education until 5 p.m., Mar. 13, for the heating and ventilating plant and the mechanical equipment for the Clark School on Scovill St. Louis A. Walsh, 51 Leavenworth St., is Arch. and R. D. Kimball & Co., Boston, Mass., is Engr.

★Kings Park, N. Y.—(Official)—Bids will be received until 2:30 p.m., Mar. 18, by the State Hospital Commission, Capitol, Albany, for heating, plumbing and electrical work in a new building for chronic patients at Kings Park State Hospital. Lewis F. Pilcher is State Arch. E. S. Elwood is Secy. of the State Hospital Comn.

New York, N. Y.—(Borough of Brooklyn)—(Official)—Bids will be received until 3 p.m., Mar. 15, by C. B. J. Snyder, Supt. of School Bldgs., Park Ave. and 59th St., for electrical work in Public School No. 5, Tillary, Bridge and Lawrence St., and Public School 158, Belmont Ave., Ashford and Warwick St., Borough of Brooklyn.

New York, N. Y.—(Borough of Manhattan)—(Official)—Bids were opened Feb. 24 by the Board of Trustees, Bellevue and Allied Hospitals, for electrical work, additional gas piping, etc., in the main building of the Harlem Hospital as follows: Lord Electric Co., $4880; A. J. McCullough, $4495; Frank Nebeling, $4401; E. J. Electric Co., $4625. Noted Jan. 21, Feb. 4 and 18.

Riverhead, N. Y.—The Riverhead Electric Light Co. contemplates the installation of one 19x20-in. Skinner universal engine directly connected to a 140-kw. two-phase 60-cycle 2300-volt generator. F. Carl Hallett is Mgr. and Supt.

✚Butler, N. J.—The Borough Council has awarded the contract for the installation of a municipal electric-light plant to the WATSON-FLAGG ENGINEERING CO., 27 Thames St., New York, N. Y. The cost of the work will be about $50,000. Noted Feb. 4.

Brownsville, Penn.—Press reports state that the H. C. Frick Coke Co. is having surveys made with a view to securing options on power sites along the Monongahela River. It is understood that a power plant to supply energy to the 63 plants owned and operated by the H. C. Frick Coke Co. will be built.

Blackville, S. C.—(Official)—Bids will be received until Mar. 15 for improvements to the electric-light plant in Blackville. J. M. Farrell is Chn. of the Bd.

Pablo Beach, Fla.—See item under "Sewers."

Lake Charles, La.—The City Council has granted a franchise, so it is reported, to W. E. Barrett for the construction of a gas manufacturing plant and distributing system in Lake Charles. Andrew Cook is City Clk.

Holland, Mich.—The Board of Public Works is considering the construction of a new fireproof power house for the municipal electric-light plant to replace the present building on East Fifth St. The estimated cost is $25,000. H. Naverhuis is City Engr.

Ashland, Wis.—The Board of Supervisors of Ashland County has engaged Vaughn, Meyer & Sweet, 1007-1009 Majestic Bldg., Milwaukee, to prepare plans and award contracts for all electrical work and fixtures for the new $275,000 court house now in course of construction .

✚Blackcreek, Wis.—The Village Board has awarded the contract for the installation of a municipal electric-light plant to the FOSS GAS ENGINE CO., Springfield, Ohio.

✚Manitowoc, Wis.—The C. Reiss Coal Co. has awarded the contract for the construction of an electric power plant at its coal dock, Manitowoc, to the ALLIS-CHALMERS CO., Milwaukee. The unit includes a steam engine and a 450-kw. generator. The contract for a new coal-handling bridge and other alterations in the dock has been awarded to the MEAD-MORRISON MFG. CO., Boston, Mass. Noted Dec. 10.

Markesan, Wis.—The Markesan Electric Co., recently incorporated with a capital stock of $15,000, will, it is reported, equip an electric-light plant.

Poynette, Wis.—A franchise has been granted to the Poynette Electrical Co. to construct and operate an electric-light and power plant for commercial purposes. Water rights have been secured, and generating equipment will be installed and transmission lines built. Perry L. Speed is Pres. of the company.

Buffalo, Iowa—The citizens have voted in favor of issuing $10,000 in bonds to be used for the installation of a municipal electric-light plant.

Council Bluffs, Iowa—It is reported that the City Council is considering the installation of a municipal electric-light plant. E. E. Spetman is City Engr.

Schleswig, Iowa—At a recent election, the citizens voted in favor of issuing $16,000 in bonds, the proceeds of which will be used for the installation of a municipal electric-light plant. B. M. Ambresen is City Clk. Noted Feb. 4.

La Crosse, Kan.—R. M. Wilson, Sterling, Kan., has bought the municipal electric-light plant from the city, and has agreed to equip and operate a $6500 ice plant in connection with the lighting system.

Tacoma, Wash.—Henry Hewitt, Jr., and D. D. Bleyker contemplate the construction of a plant for the manufacture of writing paper. Estimated cost, $300,000.

Armona, Calif.—Preliminary plans are being prepared for the construction of a packing plant for the Kings County Packing Co. Estimated cost, $75,000.

+Los Angeles, Calif.—The contract for the construction of a factory on East Eighth St. for the General Chemical Co. has been awarded to the DAVIDSON CONSTRUCTION CO., 16th and Tennessee St., at $14,000. Noted Feb. 18.

San Fernando, Calif.—The San Fernando Heights Lemon Co. is having plans prepared by H. J. Knauer, 441 Wesley Roberts Bldg., Los Angeles, Calif., for the construction of a 80x172-ft. packing plant. Estimated cost, $12,000.

San Francisco, Calif.—O'Brien Bros., Arch., is preparing plans for the construction of an addition to a garage at Bush and Taylor St. for Dolson & Anderson. Estimated cost, $25,000.

+San Francisco, Calif.—The Western Sugar Refining Co. has awarded the contract for the structural steel work on its proposed factory to the GOLDEN WEST IRON WORKS, at $56.75 per ton. Noted Dec. 31 and Jan. 21.

Hamilton, Ont.—The United States Horse Shoe Co., Erie, Penn., contemplates the construction of a plant in Hamilton. Estimated cost, $125,000.

FEDERAL GOVERNMENT WORK

Building—Portland, Maine—Bids will be received by Oscar Wenderoth, Superv. Arch., Washington, D. C., for the construction of the steerage barracks and storehouse for the U. S. quarantine station at Portland.

Post Office—Greenfield, Mass.—Bids were received for the construction of a post office at Greenfield, (a) limestone, (b) sandstone, as follows: Conners Bros. Co., New York, (a) $62,710, (b) $63,710; Daniel O'Connell Sons, Holyoke, Mass., (a) $85,278, (b) $88,124; Charles W. Wright, Lynn, Mass., (a) $73,939; James Miles & Son Co., Worcester, Mass., (a) $71,747, (b) $72,447; C. M. Leach, Boston, Mass., (a) $77,873, (b) $79,673; Sarubbi Building & Construction Co., Springfield, Mass., (a) $82,000, (b) $82,000; Louis P. Fluhrer Co., New York, (a) $67,500; Thomas W. Cissel, Wooster, Ohio, (a) $59,000, (b) $62,000; Westchester Engineering Co., White Plains, N. Y., (a) $59,661, (b) $63,000; W. H. Fissell & Co., New York, (a) $60,400, (b) $62,900; E. T. Abbott Construction Co., New York, (a) $66,500, (b) $68,300; Charles E. Currier Co., Boston, Mass., (a) $60,900, (b) $61,300; Damon & Boutwell, Fitchburg, Mass., (a) $84,270, (b) $85,195; H. L. Hemenway Co., Boston, Mass, (a) $64,973, (b) $65,973; Horton & Hemenway, Boston, Mass., (a) $64,688; Woodbury & Leighton, Boston, Mass, (a) $66,970. Noted Feb. 11.

Structural Steel—Newport, R. I.—The following are the bidders for furnishing and erecting 2,050,000 lb. of steel at the Newport torpedo factory, price being per lb.: Phœnix Bridge Co., 0.0234c.; Belmont Iron Works, 0.0244c.; Lewis Shoemaker & Co., 0.0249c.; McClintic-Marshall Co., 0.0253c.; Darling-Slade Construction Co., 0.0261c.; Milliken Bros., Inc., 0.0264c.; Riter-Conley Mfg. Co., 0.02725c.; New England Structural Steel Co., 0.0284c.; Pittsburgh-Des Moines Steel Co., 0.0295c.; American Bridge Co, 0.0305c.; Penn Steel Co., 0.0285c.

+Post Office—Danbury, Conn.—The contract for the construction of a post office at Danbury has been awarded to the CHARLES McCAUL CO., Philadelphia, Penn., at $61,900. Noted Sept. 24 and Nov. 12.

Earthwork—New London, Conn.—The following are the bids received for bank revetment on the Connecticut River: Frederick S. Wardwell, Stamford, Conn., $25,510; Daniel O'Connell's Sons, 480 Hampden St., Holyoke, Mass., $16,770; C. R. Simpson, 170 Broadway, New York, N. Y., $30,060; Pierson Engineering & Construction Co., Hartford, Conn., $26,300; A. C. Sternberg, West Hartford, Conn., $19,990; Ralph M. Brown, 62 William St., New York, $20,780; Estate of John Beattie, Leete Island, Conn., $17,100; Elmer H. Brown, Hempstead, N. Y., $32,300; Olsen & Klavens, 336 61st St., Brooklyn, N. Y., $16,090; E. S. Belden & Sons, 217 Laurel St., Hartford, Conn., $21,490. Noted Feb. 4.

★Dredging—Buffalo, N. Y.—Bids will be received until 11 a.m., Apr. 15, by Col. J. G. Warren, Federal Bldg., Buffalo, for dredging in Niagara River.

★Supplies—New York, N. Y.—(Governors Island)—Bids will be received until 11 a.m., Apr. 14, by the Department Quartermaster, for furnishing forage and straw (three months' and a year's supply) and fuel, gasoline, mineral oil, beef and mutton.

Steel Tanks—New York, N. Y.—The following are the bids received by Col. S. W. Roessler, Army Bldg., New York, for furnishing at the manufacturers plant, 20 steel tanks: Standard Gas Power Corporation $12,000; Theodore Smith & Sons Co., $9625; Franklin Machine & Steam Boiler Works, $9997; M. H. Treadwell Co., $8900; S. Freeman & Sons Mfg. Co., $7300; Lake Erie Boiler Works, $9600; Steacy Schmidt Mfg. Co., $7850; Turl Iron & Car Co., Inc., $8950; Robert S. Hall, Warren, Penn., $6520; James Loppon Mfg. Co., $8746; Ruemmli Dawley Mfg. Co., $7625; Cruse Temper Co., $8000; The Ohio Co., $9876; A. D. Granger Co., $8425; Coltesville Boiler Works, $9760; D. B. M. Dillon Boiler Works, $11,130; McAllenan Bros. Co., $7961; Standard Boiler Plate & Iron Co., $7600.

+★Cement—New York, N. Y.—The contract for furnishing and delivering 32,000 bbl. of American cement has been awarded to the ALPHA PORTLAND CEMENT CO., Easton, Penn. Noted Feb. 18 and Mar. 4.

+★Dredging—Portchester, N. Y.—The contract for dredging in Portchester Harbor has been awarded to JOHN H. SEELY, at 31c. per cu.yd., scow measurement. Noted Feb. 18 and Feb. 25.

Experiment Station—Pittsburgh, Penn.—Bids were received for the construction and mechanical equipment for the experiment station of the Bureau of Mines, Pittsburgh, as follows: Construction, (a) clearing site and necessary excavation; (b) construction proper: George B. Wills & Co., New York, (a) $43,000, (b) $257,922; Bothwell & Carson, Pittsburgh, (a) $47,000; John F. Casey Co., Pittsburgh, (a) $29,200; Irwin & Leighton, Philadelphia, Penn., (a) $38,400, (b) $264,400; Golden & Crick, Pittsburgh, (b) $315,205; George A. Fuller Co., New York, (a) $44,000, (b) $309,464; David T. Riffle, Pittsburgh, (a) $43,269, (b) $342,552; C. A. Riffle, Pittsburgh, (a) $27,242; James L. Stuart, Pittsburgh, (a) $38,000, (b) $330,400; Conners Bros. Co., Lowell, Mass., (a) $54,800, (b) $289,450, both $339,450; George Hogg Co., Pittsburgh, (a) $36,411, (b) $304,683; Henry Shenk Co., Pittsburgh, (a) $39,000, (b) $309,399; Thompson-Starrett Co., New York, (b) $317,000; Booth & Flinn, Ltd., Pittsburgh, (a) $43,884; Lathrop, Shea & Henwood Co., Scranton, (a) $59,300; W. G. Costin, Pittsburgh, (a) $37,800; For the mechanical equipment, bids were as follows: W. G. Cornell Co., Washington, D. C., $63,795; S. Faith & Co., Philadelphia, $71,773; Standard Engineering Co., Washington, D. C., $67,150; Thompson-Starrett Co., New York, $76,770; Chris Irving Plumbing & Heating Co., Denver, Colo., $78,656; John W. Danforth Co., Buffalo, N. Y., $72,847; Fitzpatrick & Hoepfner, Columbus, Ohio, $72,688; Hanley-Casey Mechanical Equipment Co., Chicago, Ill., $63,900.

+Bridge—Washington, D. C.—The contract for substituting a through span for deck span in the Penn. Ave. bridge across the Anacostia River, has been awarded to the PENN BRIDGE CO., Beaver Falls, Penn., at $6780. Noted Jan. 21 and Feb. 25.

+Cement—Washington, D. C.—The following contracts have been awarded by the U. S. Reclamation Service for furnishing cement at its various projects: COLORADO PORTLAND CEMENT CO., Denver, Colo., 1500 bbl., for Grand and Uncompahgre projects, Colo., at $1 per bbl.; INTERNATIONAL PORTLAND CEMENT CO., Spokane, Wash., 10,000 bbl. for use on Okanogan and Yakima Storage projects, Wash., and Umatilla project, Ore., at $1.18; LEHIGH PORTLAND CEMENT CO., Allentown, Penn., 6000 bbl. for Flathead project, Mont., and Sunnyside project, Wash., at $1; PACIFIC PORTLAND CEMENT CO., San Francisco, Calif., 1300 bbl. for Klamath and Orland projects, Calif., at $1.40; THREE FORKS PORTLAND CEMENT CO., Ogden, Utah, 11,000 bbl. for projects in Montana, at $1.20; UNION PORTLAND CEMENT CO., Ogden, Utah, 24,000 bbl. for Boise and Minidoka projects, Idaho, and Strawberry Valley project, Utah, at $1.10.

Heating System—Washington, D. C.—Bids were received Mar. 12 by the Commissioners of the District of Columbia for installing a heating and ventilating system in connection with the reconstruction of the Western High School, as follows: Monarch Ventilating Co., 30 Church St., New York, $17,625; Biggs Heating Co., 917 H St., N. W., Washington, D. C., $18,125; Detroit Heating Co., Detroit, Mich., $17,863; W. G. Cornell Co., Southern Bldg., Washington, D. C., $14,740. Noted Nov. 5 and Dec. 3.

Grading—Washington, D. C.—Bids were received for grading certain streets in the District, the work aggregating about 30,000 cu.yd., as follows: Chesapeake Construction Co., Chesapeake, Md., 35c.; Harper & Voight, 34¾c.; Warren F. Brenizer Co., 22c.; George Hyman, 39c.; William F. Cush, 58c.; R. P. Dendy, Norfolk, Va., 34½c.; G. B. Mullen Co., 27⅞c.; Edward G. Gummel, 34c.; F. B. Beasman, Baltimore, Md., 33c. Above bidders are of Washington unless otherwise specified. Noted Mar. 11.

Retaining Wall—Washington, D. C.—Bids were received for the construction of a retaining wall along the west (16th St.) side of the Meridian Hill Park between W and Euclid St., N. W., as follows: National Foundation & Engineering Co., Cleveland, Ohio, $24,100; Kennedy-Campbell Co., 2504 Irving St., $23,425; Fred Drew, Inc., Woodward Bldg., $24,795; W. H. McCray, Bond Bldg., $24,600; R. J. Beall Construction Co., 734 15th St., $23,649; Davis Construction Co., Union Trust Bldg., $32,757; Arthur L. Smith, Woodward Bldg., $29,672; Boyle-Robertson Construction Co., 1416 H St., N. W., $23,397. All of the above bidders are of Washington unless otherwise specified. Noted Feb. 11.

✚Building—Arlington, Va.—The contract for furnishing the marble for the Arlington memorial has been awarded to the VERMONT MARBLE CO., Proctor, Vt. The contract price is about $750,000. Noted Nov. 19, Dec. 24 and Feb. 18.

Garbage Incinerator—Norfolk, Va.—Bids will be received until Mar. 30 by the Bureau of Supplies and Accounts, Navy Dept., Washington, D. C., for constructing a garbage incinerator at the Navy Yard, Norfolk.

★Dredging—Wilmington, N. C.—Bids have been received for dredging (a) Neuse River, (b) waterway, Pamlico Sound to Beaufort Inlet, (c) harbor at Beaufort. Prices are per cu.yd., as follows: Simons-Mayrant Co., Charleston, S. C., (a) 16.8c., (b) 16.8c., (c) 30c.; Coastwise Dredging Co., Norfolk, Va., (a) 13.9c., (b) 13.9c.; Norfolk Dredging Co., Norfolk, Va., 15.69c.; Ricards Dredging Co., Philadelphia, Penn., (a) 14.5c., (b) 10.5c., (c) 12.8c. Noted Feb. 11.

✚★Jetty Construction—Savannah, Ga.—The contract for placing stone in jetty at Savannah Harbor has been awarded to R. S. SALAS, Savannah, Ga., at $79,600. Noted Jan. 28.

★Stone—New Orleans, La.—Bids will be received until 11 a.m., Apr. 13, by Maj. Edward H. Schulz, U. S. Engineer Office, New Orleans, for furnishing and delivering about 10,000 cu.yd. of stone at South Pass and Southwest Pass, Mississippi River.

Earthwork—New Orleans, La.—Bids will be received until 11 a.m., Mar. 25, by Maj. W. G. Caples, U. S. Engineer Office, New Orleans, for constructing about 309,000 cu.yd. of earthwork in the Lower Tensas and Atchafalaya levee districts.

Post Office—Covington, Tenn.—The following are the bids received for the construction of the post office at Covington, (a) using limestone for all stonework, except where granite is required, (b) using sandstone for all stonework, except where granite is required: George W. Stiles Construction Co., Chicago, Ill., (a) $36,500; J. L. Crouse, Greensboro, N. C., (a) $37,990, (b) $38,490; Colonial Construction & Supply Co., Charlottesville, Va., (a) $38,279; Rogers & Kaiser, Chicago, Ill., (a) $38,422, (b) $39,500; Algernon Blair, Montgomery, Ala., (a) $38,472, (b) $40,000; Potter's Lumber Co., East Liverpool, Ohio, (a) $38,700, Newport Contracting & Engineering Co., Newport News, Va., (a) $39,193; R. S. Moore, LaFayette, Ind., (a) $39,554, (b) $40,444; W. H. Fissell & Co., New York, N. Y., (a) $39,990, (b) $40,990; V. E. Taylor, Huntington, W. Va., (a) $40,350; Mayben & Freuchtel, Gadsden, Ala., (a) $40,504, (b) $41,000; E. T. Abbott Construction Co., New York, N. Y. (a) $41,500, (b) $42,000; Thomas W. Cissel, Wooster, Ohio, (a) $41,760, (b) $42,850; George Hinchliff Co., Chicago, Ill., (a) $42,690. Noted Jan. 14.

★Steel Gates—Nashville, Tenn.—Bids will be received until 11 a.m., Apr. 12, by Maj. H. Burgess, U. S. Engineer Office, Nashville, for the construction and erection of steel gates for locks B and C, Cumberland River.

Post Office—Alliance, Ohio—Bids were received for the construction of a post office at Alliance, (a) limestone, (b) sandstone, as follows: Ohio Building & Construction Co., Cincinnati, Ohio, (a) $89,575, (b) $89,990; M. Yeager & Sons, Danville, Ill., (a) $90,969, (b) $91,769; R. S. Moore, LaFayette, Ind., (a) $85,575, (b) $86,349; John G. Unkefer & Co., Minerva, Ohio, (a) $89,525, (b) $90,275; J. G. Rogers Co., Moorestown, N. J., (a) $94,250, (b) $95,370; William H. Fissell, New York, (a) $84,900, (b) $86,500; Potter's Lumber Co., East Liverpool, Ohio, (a) $86,345, (b) $87,000; Torbert Construction Co., Hampton, Va., (a) $91,275, (b) $92,250; James Devault, Canton, Ohio, (a) $94,873, (b) $95,750; Charles W. Gindele Co., Chicago, Ill., (a) $84,000, (b) $84,600; James I. Barnes, Logansport, Ind., (a) $98,110, (b) $98,355; Thomas W. Cissel, Wooster, Ohio, (a) $93,968, (b) $94,742; E. T. Abbott Construction Co., New York, (a) $77,500, (b) $77,950; F. Schellenburg, Pittsburgh, Penn., (a) $82,000, (b) $83,000; J. L. Crouse, Greensboro, N. C., (a) $89,704, (b) $90,354. Noted Jan. 21.

✚★Towboats—Cincinnati, Ohio—The contract for constructing and delivering two steel hull sternwheel towboats has been awarded to the CHARLES BARNES CO., Cincinnati, Ohio, at $42,789. Noted Jan. 28 and Mar. 4.

Fuel Flats and Barge—Cincinnati, Ohio—The following are the bids received for constructing and delivering two steel fuel flats, Nos. 18 and 19 and one steel barge No. 15: Pittsburgh Des Moines Steel Co., Pittsburgh, Penn., (a) for two fuel flats, delivered at Cincinnati, $7743, (b) for one barge delivered at Cincinnati, $7509, (c) for two fuel flats delivered at bidders' yards, $7543, (d) for one barge, delivered at bidders' yards, $7309; Dubuque Boat & Boiler Works, Dubuque, Iowa, (a) $7142, (b) $7509, (c) $6902, (d) $6882; Milwaukee Bridge Co., Milwaukee, Wis., (a) $8997, (b) $8745; Charles Hegewald Co., New Albany, Ind., (a) $7899, (b) $7699, (c) $7799, (d) $7599; Hartman-Greiling Co., Green Bay, Wis., (a) $8185, (b) $8105, (c) $7685, (d) $7605; Rock Island Bridge & Iron Works, Rock Island, Ill., (a) $8450, (b) $8450, (c) $8250, (d) $8250; Edward J. Howard, Jeffersonville, Ind., (a) $7993, (b) $7349, (c) $7918, (d) $7274; American Bridge Co., Cincinnati, (a) $7850, (b) $7600, (c) $7600, (d) $7350. Noted Feb. 4.

✚Post Office—Tiffin, Ohio—The contract for the construction of a post office at Tiffin has been awarded to the COLONIAL CONSTRUCTION & SUPPLY CO., Charlottesville, Va., at $71,916. Noted Dec. 17 and Feb. 18.

Remodeling Post Office, Courthouse and Customhouse—Toledo, Ohio—Bids will be received until 3 p.m., Apr. 23, by Oscar Wenderoth, Superv. Arch., Treasury Dept., Washington, D. C., for the extension, remodeling, etc., of the post office, courthouse and customhouse at Toledo.

Fir Timber—Michigan—The following are the bids received for furnishing fir timber for river and harbor work at Ontonagon, Grand Marais and Keeweenaw Point, Mich.: Martin Bros., Duluth, Minn., $6262; Ward Lumber Co., Lynchburg, Va., $25,830; Corey Bros. Lumber Co., Superior, Wis., $6262; James Pryor & Son, Houghton, Mich., $6614; J. O. Nessen Lumber Co., Chicago, Ill., $6457; G. Elias & Bro., Inc., Buffalo, N. Y., $6575; Hoquiam Lumber & Shingle Co., Hoquiam, Wash., $7045; A. V. Holahan, Superior, Wis., $6457; Lord & Bushnell Co., Chicago, Ill., $7685; Mutual Lumber Co., Minneapolis, Minn., $7045; H. B. Waite Lumber Co., Minneapolis, $6184; Union Lumber Co., Union Mills, Wash., $6371; Henry D. Davis Lumber Co., Portland, Ore., $6262; White Star Lumber Co., Whites, Wash., $6347; Eatonville Lumber Co., Tacoma, Wash., $6575; Charles L. Spaulding Logging Co., Portland, Ore., $6449; Keystone Lumber Co., Minneapolis, Minn., $7045; Pacific States Lumber Co., Tacoma, Wash., $7427; Woodruff Lumber Co., Duluth, Minn., $6215; Pacific Fir Co., Seattle, Wash., $6849. Bids were opened by Maj. E. D. Peek, U. S. Engineer office, Duluth, Minn.

Post Office—Miles City, Mont.—The following are the bids received for constructing the post office at Miles City, (a) using limestone for all exterior stonework, except where granite is required, the building to be stone-faced design, (b) using sandstone for all exterior stonework, except where granite is required, the building to be stone-faced design, (c) using limestone for all exterior stonework, except where granite is required, the building to be of the brick-faced design with stone trimmings, (d) using sandstone for all exterior stonework, except where granite is required, the building to be of the brick faced design with stone trimmings; Hiram Lloyd Building & Construction Co., Odd Fellows Bldg., St. Louis, Mo., (a) $92,517, (b) $98,517, (c) $85,517, (d) $89,517; Gray Construction Co., Watertown, S. D., (a) $94,177, (b) $108,990, (c) $89,302, (d) $96,487; William O'Neill & Son Co., Faribault, Minn., (a) $94,785, (c) $92,285; Campbell Building Co., of Utah, Salt Lake City, Utah, (a) $96,938, (b) $107,000, (c) $93,000, (d) $97,00; John Lauritzen, Fergus Falls, Minn., (a) $96,990, (c) $91,990, Frank L. Johnson & Co., Duluth, Minn., (a) $97,046, (b) $103,946, (c) $93,096, (d) $95,496; Olson & Johnson Co., Missoula, Mont., (a) $99,285, (b) $103,885, (c) $94,650, (d) $97,800; Sound Construction & Engineering Co., Seattle, Wash., (a) $100,193, (b) $101,693, (c) $93,548, (d) $94,548; J. H. Wiese, Omaha, Neb., (a) $107,730, (c) $103,500; Liegland, Kleppe & Co., (a) $111,970, (b) $119,470, (c) $105,850, (d) $109,850; Bailey-Marsh Co., Minneapolis, Minn., (a) $112,896, (c) $108,196; J. W. Miller, St. Paul, Minn., (a) $116,724, (b) $129,924, (c) $111,954. Noted Jan. 7.

✚Remodeling Building—St. Louis, Mo.—The contract for the construction of an extension to the custom house at St. Louis, Mo., has been awarded to the WHARTON BUILDING & SUPPLY CO., St. Louis, Mo. Noted Dec. 17 and Jan. 28.

Post Office and Court House—Lawton, Okla.—Bids were received for the construction of a post office and court house at Lawton, (a) light-colored limestone, (b) light-colored sandstone, (c) Oklahoma limestone, as follows: Thomas W. Cissel, Wooster, Ohio, (a) $132,497, (b) $140,000; R. S. Moore, LaFayette, Ind., (a) $121,946; Hiram Lloyd Bldg. & Construction Co., St. Louis, Mo., (a) $129,917, (b) $133,917, (c) $131,917; M. Yeager & Sons, Danville, Ill., (a) $123,835, (b) $128,335, (c) $125,971; King Lumber Co., Charlottesville, Va., (a) $149,300, (b) $139,100, (c) $179,700; Campbell Building Co., Salt Lake City, Utah, (a) $120,500, (b) $134,000; George A. Shaul, Seneca Falls, Kan., (a) $129,352; Kreipke-Schafer Construction Co., El Reno, Okla., (a) $152,219; Volney T. Taylor, Huntington, W. Va., (a) $147,000, (b) $155,000; Dieter & Wenzel Construction Co., Wichita, Kan., (a) $124,727; W D. Lovell, Minneapolis, Minn., (a) $130,000; William O'Neill & Son Co., Faribault, Minn., (a) $123,340; R. P. Farnsworth & Co., Owensboro, Ky., (a) $153,000. Noted Jan. 7.

✚Canal Work—Payson, Utah—The contract for the construction of Schedule 4 of the Highline Canal, Strawberry Valley project, Utah, has been awarded to the REYNOLDS-ELY CONSTRUCTION CO., Springville, Utah. The work consists of approximately 155,000 cu.yd. of excavation for canals, 26,000 cu.yd. of excavation for structures, 1250 cu.yd. of reinforced concrete, 467,000 sq.ft. of concrete canal lining and other miscellaneous items. Noted Jan. 28.

✚Excavation, Etc.—Payson, Utah—The contract for construction, involving 158,000 yd. of excavation, 7000 yd. of concrete and other items has been awarded to the REYNOLDS-ELY CONSTRUCTION CO., Springville, Utah, at $82,625. Noted Jan. 7 and Feb. 18.

Canal Work—Payson, Utah—Bids will be received until 2 p.m., Apr. 8, by the U. S. Reclamation Service, Provo, Utah, for canal work involving about 8000 yd. of excavation and 1350 yd. of concrete. The work is located near Payson on the San Pedro, Los Angeles & Salt Lake R.R. and the Tintic branch of the Denver & Rio Grande R.R. H. P. Davis is Ch. Engr.

Slide Gates—Glendale, Ariz.—The following bids were received by the U. S. Reclamation Service, Los Angeles, Calif., for furnishing bronze slide gates, Salt River project; Pelton Water Wheel Co., San Francisco, Calif., $6660, at San Francisco Calif.; Llewellyn Iron Works, Los Angeles, Calif., $6950, Los Angeles; Fulton Engine Works, San Francisco, $6957, Los Angeles; Joshua Henry Iron Works, San Francisco, $8212, Sunnyside, Calif.

✚Cofferdam—Seattle, Wash.—The contract for excavating and removing an existing cofferdam and constructing a new cofferdam at the Puget Sound-Lake Washington lock site, has been awarded to the ERICKSON CONSTRUCTION CO., Seattle, Wash., at $56,777. Noted Jan. 28.

✚Wireless Towers—San Diego, Calif.—Contracts have been awarded for the construction of wireless towers, three each at San Diego, Calif., Pearl Harbor, Hawaii and Cavite, P. I., as follows: San Diego, Calif., LLEWELLYN IRON WORKS, Los Angeles, Calif., at 4.85c. per lb. and at Pearl Harbor, Hawaii, at 5.15c. per lb.; Cavite, P. I.: CHICAGO BRIDGE & IRON CO. and PITTSBURGH-DES MOINES STEEL CO., Pittsburgh, Penn., at 5.7c. The towers are to be each 600 ft. high and will weigh 300 tons. Noted Mar. 4.

St. Catharines, Ont.—The Niagara, St. Catharines & Toronto Ry. plans to build an extension on Bridge St. of the Falls Division from Erie to Victoria Ave. in Niagara Falls. E. F. Seixas is Gen. Mgr.

LIGHT, HEAT AND POWER

Waterville, Maine—It is reported that the City Council contemplates the installation of a municipal electric-light and power plant. Eugene W. Crawford is City Engr.

Brockton, Mass.—The Edison Electric Illuminating Co. of Brockton contemplates the construction of a new substation in the northern part of the city, and building two transmission lines from Brockton to North Easton. A. F. Nelson, Brockton, is Mgr.

✚Bristol, Conn.—(Official)—The contracts for plumbing and electrical work for the new school on Maple St. have been awarded to ROBERTS & ARNOLD, Bristol, at $4498, and W. E. THROOP, Bristol, at $2179, respectively. The contract for heating and ventilating will soon be awarded. Walter P. Crabtree, 272 Main St., New Britain, is Arch.

✚Albany, N. Y.—The Municipal Gas Co. has awarded the contract for the construction of a 108x146-ft. power house to the PETER KEELER BUILDING CO., Albany, at about $60,000.

★Kings Park, N. Y.—(Official)—Bids were received Mar. 18 by the State Hospital Commission, Albany, for heating, plumbing and drainage, and electrical work in a new building for chronic patients at the Kings Park State Hospital. The three lowest bids for each contract are given below, Proposals Nos. (1) and (2): Heating, W. B. Armstrong Co., Albany, (1) $5531, (2) $1900; Walker & Chambers, New York, N. Y., (1) $5540, (2) $1985; E. Rutzler Co., New York, N. Y., (1) $5690, (2) $1999, and nine others; plumbing and drainage; Arthur S. Gaynor Co., 168 West 99th St., New York, (1) $7381, (2) $2065; George E. Gibson Co., 49 East 21st St., New York, (1) $7630, (2) $1980; W. B. Armstrong Co., (1) $7943, (2) $2255, and seven others; electrical work, S. G. Waterman, 817 Broadway, New York, (1) $909, (2) $332; Isador Fajans, 122 East 25th St., New York, (1) $1179, (2) $449; Murphy & Walsh, (1) $1194, (2) $418, and four others. Noted Mar. 11.

Newark, N. Y.—It is reported that an appropriation of $15,000 has been made for extensions to the street-lighting system, and plans for the work are now under consideration.

New York, N. Y.—(Borough of Bronx)—Bids were opened Mar. 22 by the Department of Health for plumbing and gasfitting, and steam-heating plant for two concrete pavilions on the grounds of the Department of Health, Riverside Hospital, North Brother Island, Borough of Bronx. The bids for plumbing and gasfitting were as follows: E. Kraus, $7900; William Young Plumbing Co., $10,665; A. S. Gaynor Co., $8195; T. E. O'Brien, $11,700; J. B. Brady, $9662; J. S. Murphy, $8787; George E. Gibson, $8187; Harry Kline, $9010; J. J. Kenny, $9175; J. F. Hook, $9285; J. G. Barth Plumbing & Heating Co., $11,729. Bids for the heating plant were as follows: A. B. Demerest, $9876; Philp & Paul, $11,944; Leslie & Tracy, $8900;

Raisler Heating Co., $10,300; E. Rutzler, $10,279; Adam Britz, $10,840; George E. Gibson, $8200; Walker & Chambers, $7260; J. G. Barth Plumbing & Heating Co., $9025; J. A. Scollay, $11,995. Noted Mar. 18.

New York, N. Y.—(Borough of Manhattan)—(Official)—Bids will be received until noon, Apr. 2, by the Board of Trustees, Bellevue and Allied Hospitals, for lighting fixtures in Pavilions "I" and "K" of the new Bellevue Hospital, 26th to 29th St., First Ave. to East River, Borough of Manhattan. John W. Brannan, M. D., is Pres. Bd. of Trustees.

Wellsville, N. Y.—Press reports state that the Wellsville Electric Light, Heat & Power Co. has accepted the offer of the village to purchase the local plant. H. B. Sweet, Utica, is preparing plans for remodeling and improving the plant.

Jersey City, N. J.—It is reported that the City Commission has decided to install a conduit system to eliminate overhead wires and poles. The estimated cost of the work is $1,500,000. Charles A. Van Keuren is City Engr.

+Newark, N. J.—The Public Service Electric Co. has awarded contracts for equipment for its new power plant on the Passaic River at Point-no-Point, at a total cost of about $125,000, to the following: Steel foundations for turbines, PENNSYLVANIA STEEL CO.; four underfeed stokers and four economizers, B. F. STURTEVANT CO.; cast iron motor-operated valves for low pressure condensers, PITTSBURGH VALVE, FOUNDRY & CONSTRUCTION CO.; steel valves for high pressure steam lines, PRATT & CADY CO.; boiler feed pumps, H. R. WORTHINGTON CO. Noted July 2, 1914; Jan. 14 and Feb. 11, 1915.

Perth Amboy, N. J.—The City Council has engaged Runyon & Carey, 845 Broad St., Newark, to prepare plans for the construction of the proposed municipal electric-light plant. Noted Nov. 19 and Jan. 21.

+Trenton, N. J.—The Public Service Gas Co. has awarded the contract for the construction of a two-story addition to its gas generating plant on New York Ave. to W. J. & J. H. MORRIS.

Everett, Penn.—It is reported that the citizens of Everett are promoting the installation of a municipal electric-light plant. Service is now furnished by the Everett Light, Heat & Power Co.

Baltimore, Md.—Plans have been prepared by Charles L. Reeder, 921 Equitable Bldg., for additions and improvements to the power plant and laundry of the Hebrew Hospital. The work will include the construction of an addition to the power house, new boilers, engines, laundry machinery, etc.

Westminster, S. C.—The Town Council is reported to have authorized the issue of $16,000 in bonds, the proceeds of which will be used for the installation of a municipal electric-light plant. Noted Aug. 14, 1914.

St. Petersburg, Fla.—It is reported that the citizens will be asked to vote on the question of installing a municipal electric-light plant. If the vote is favorable, a bond issue of $150,000 for the purpose will be submitted to the voters.

Jackson, Miss.—At a special election held Mar. 13, the citizens defeated a bond issue of $160,000 for the construction of a municipal electric-light and power plant. M. L. Culley is City Engr. Noted Oct. 8 and 22, 1914, and Feb. 25, 1915.

Clay, Ky.—It is reported that the Clay Light & Ice Co. will build a transmission line to Dixon, a distance of about eight miles. An additional boiler and generator will be installed. C. R. Clark is Supt.

Cincinnati, Ohio—It is reported that Walter H. Hutzler, 116 West Elder St., and associates, will apply to the City Council for a franchise to establish and operate an electric-light plant in the vicinity of Findlay Market. It is stated that $50,000 has already been subscribed for the construction of a steam-driven plant.

Cleveland, Ohio—The city plans to build a new municipal power station at 7616 Woodland Ave. S. E., to cost about $25,000. It will be two stories, of reinforced concrete and brick, and will contain 4914 sq.ft. of floor space.

Peebles, Ohio—The Village Council is considering plans for the establishment of a municipal electric-light plant, for the construction of which bonds for $11,500 have been issued.

East St. Louis, Ill.—(Official)—Contracts will be awarded about Apr. 19 for the construction of a two-story high school. Low bids were received as follows: Plumbing, McEvilly & Flynn, East St. Louis, $10,520; heating, Peters, Eichler Co., St. Louis, Mo., $31,007; electrical work, F. E. Newberry Electric Co., St. Louis, $11,930.

Manitowoc, Wis.—It is reported that the Oslo Power & Light Co., Manitowoc, has increased its capital stock from $5000 to $30,000 for the purpose of rebuilding its hydro-electric plant which was damaged by floods a few months ago. A. O. Anderson is Pres.

Rose Hill, Iowa—It is reported that bids are being received by A. L. Zink, representing the Town Council, for the construction and operation of an electric-light plant.

+West Bend, Iowa—The Town Council has awarded the contract for the installation of an electric-light plant to the ALAMO ENGINE & SUPPLY CO., 1122 Farnam St., Omaha, Neb., at $8270. W. H. Grover, Ames, Iowa, is Engr.

Hibbing, Minn.—Burns & McDonnell, Scarritt Bldg., Kansas City, Mo., has recommended to the Water and Light Board improvements to the electric-light plant and water-works to cost from $100,000 to $157,000. E. D. Hawley is City Engr. Noted May 14 and June 11, 1914, Feb. 4, 1915.

Edgar, Neb.—The citizens have voted in favor of issuing $13,500 in bonds for the purpose of constructing a municipal electric-light plant. V. S. Hollister, Lincoln, is Engr.-in-Charge.

+Kansas City, Mo.—The Board of Education has awarded the contract for heating equipment in the William Cullen Bryant School to the WOODLING HEATING & VENTILATING CO., Reliance Bldg., Kansas City, at $15,847. For heating equipment in the Mark Twain School, the contract was awarded to the CAPLAN GALVANIZED IRON CO., St. Louis, at $14,375.

+Poplar Bluff, Mo.—The City Council has awarded the contract for the construction of the municipal electric-light plant to the FULLER-COULT CO., Chemical Bldg., St. Louis. Bonds for $75,000 will be sold for the purpose. Noted Apr. 2, 1914.

Austin, Tex.—George S. Westerfield, Engr., and Charles T. Boelhawe, Arch., who were employed to ascertain the cost of installing a new heating plant, power plant, elevators, sanitation and ventilating systems, telephone exchange, and other improvements in the State Capitol, have submitted a report to the Legislature. Their recommendations entail an expenditure of about $450,000. An appropriation for the purpose will probably be made.

Mission, Tex.—See item under "Water Supply—Irrigation."

Walter, Okla.—The town has abandoned the idea of installing a municipal electric-light plant, and is negotiating with the Comanche Light & Power Co to furnish electrical service.

+Yale, Okla. — See item under "Water Supply — Irrigation.

Oakland, Calif.—The Pacific Gas & Electric Co. has taken out permits for the construction of a one-story boiler house and a one-story generator house, to be located at the plant at First and Market St. They will cost $5000 each. F. A. Leach, Jr., Oakland, is Dist. Mgr.

Venice, Calif.—It is reported that the Abbot-Kinney Co. will equip an electric generating plant at a cost of about $70,000. J. B. Griffen is Engr. for the company

Montreal, Que.—Bids will be received until noon, Apr. 6, by the Board of Control for the installation of a street-lighting system on St. Catherines and Bleury St. to cost about $40,000.

Tara, Ont.—It is reported that the City Council is considering the installation of a hydro-electric light and power plant. W. J. Taylor is Clk.

BRIDGES

Claremont, N. H.—The Board of Selectmen has passed a resolution calling for a bond issue of $26,000 to be used for building steel bridges across the Sugar River at Broad St. and the Lower Village.

New York, N. Y.—(Borough of Bronx)—It is reported that plans are being prepared for a new bridge over Westchester Creek at East 177th St. It will have two steel spans and a double-leaf bascule span with granite abutments. The estimated cost is $170,000. F. J. H. Kracke, Municipal Bldg., is Comr., Dept. of Bridges.

New York, N. Y.—(Borough of Manhattan)—(Official)—Bids will be received until 2 p.m., Apr. 1, by F. J. H. Kracke, Comr., Dept. of Bridges, for wood paving blocks for the Department of Bridges.

Rochester, N. Y.—Press reports state that the Buffalo, Rochester & Pittsburgh Ry. will build six new steel bridges this year. One will be a viaduct over the tracks of the Erie R.R. at Silver Lake Junction, and the others will be located on the Buffalo division. About 1163 tons of steel will be required. E. F. Robinson, Rochester, is Ch. Engr.

Hightstown, N. J.—It is reported that the Common Council and the Board of Chosen Freeholders of Mercer County are negotiating for rebuilding the Main St. Bridge. It is estimated to cost $20,000. Noted Jan. 28 and Mar. 11.

★+Mt. Holly, N. J.—The Boards of Chosen Freeholders of Burlington and Atlantic Counties have awarded the contract for repairing the Mullica River Bridge on Chestnut Neck Rd. between the two counties, to EDWARD FAY & SON, Philadelphia, at about $69,000. Noted Feb. 18 and Mar. 11.

Newark, N. J.—(Official)—Bids will be received until 3 p.m., Mar. 30, by a joint committee of the Boards of Chosen Freeholders of Essex and Hudson Counties, at the Essex County Court House, Newark, for rebuilding the fenders of the center and rest piers of the Jackson St. Bridge between Jackson St., Newark, and Fourth St., Harrison.

West New York, N. J.—The New York Central R.R. plans to build a viaduct over its tracks opposite the West New York Ferry. James L. Wolfe is Town Clk.

+Albany, Penn.—The Philadelphia & Reading Ry. has awarded the contract for the construction of a reinforced-concrete bridge near Albany to the READING CONTRACTING CO., Reading. The bridge will be 189 ft. long and 15 ft. wide.

Emaus, Penn.—Plans have been prepared by E. R. Wenner, Borough Engr., for the construction of a new bridge at Chestnut St.

+West Chester, Penn.—(Official)—The contract for repairing two bridges over Brandywine Creek, south of Chadds Ford, has been awarded to GEORGE DALE, 102 East 12th St., Wilmington, Del. Noted Mar. 4.

+York, Penn.—(Official)—The Board of County Commissioners has awarded the contract for the construction of a bridge over the south branch of Muddy Creek on the road between Muddy Creek and Gatchelville to M. D. PORMAN, York. Noted Mar. 4.

Elkins, W. Va.—(Official)—We are advised by Thaddeus Pritt, Clk. of Elkins County, that the opening of bids for seven bridges, advertised for Mar. 1, was postponed, and will be readvertised about Apr. 1. Noted Jan. 28.

Durham, N. C.—(Official)—Bids will be received until 2 p.m., Apr. 6, by P. C. Crompton, Audr. of Durham County, for the construction of four steel bridges with concrete substructures. The estimated cost is $5000 each. Noted Mar. 18.

Sumter, S. C.—Sumter County will issue $10,000 in bonds, the proceeds of which will be used for bridge construction. P. M. Pitts is Chn. of County Comrs. R. L. McLeod is Clk.

Clearwater, Fla.—(Official)—Bids will be received until Apr. 6 by the Board of Commissioners of Pinellas County for furnishing corrugated iron culverts of various sizes. Clements McMullen is County Highway Engr.

Jasper, Ala.—(Official)—All bids received Mar. 15 by the Commissioners of Walker County for the construction of four bridges over the Black Warrior River at Cordova, Sipsey Fork, Mulberry and Town Creek, have been rejected. Charles M. Sartain is Chn. of Comrs. Noted Mar. 4.

Baton Rouge, La.—Bids will be received until noon, Apr. 13, by the Police Jury of East Baton Rouge Parish for the construction of a steel bridge across Baton Rouge Bayou on the Irene Rd., and for a wooden bridge over the Amite River on Benton Ferry Rd.

Cambridge, Ohio—(Official)—Bids will be received until noon, Apr. 13, by the Board of Commissioners of Guernsey County for building abutments for the Dewey Ave. Bridge over Wills Creek in the City of Cambridge. T. C. White is County Audr.

Canton, Ohio—(Official)—Bids will be received until 10 a.m., Apr. 14, by the Board of Commissioners of Stark County for the construction of the James Steele reinforced-concrete bridge over Pigeon Run on the Massillon-Millersburg Rd. in Tuscarawas Township. C. L. Stoner is Clk. of Comrs.

+Harrisburg, Penn.—The Cumberland Valley R.R. Co. early in the year sent out invitations to about 40 contractors to bid on a 4300-ft. reinforced-concrete double track roadway. One trackway is to be built this season which involves the placing of 40,000 cu.yd. of concrete. The foundations were built by the railway company last year. The work involves enveloping 23 old piers and building 22 new ones. There will be 23 arches of 77 ft. and 22 arches of 74 ft. 6 in. with 20 ft. rise. Sand will cost $1.08 per net ton delivered and stone $1. The number of bidders, and the size of the work make the figure submitted of unusual interest and they are reproduced herewith. The contract was awarded to ROBERT GRACE CONTRACTING CO., 514 Smithfield St., Pittsburgh, Penn., at $270,290.

Danville, Ind.—(Official)—Bids will be received until 10 a.m., Apr. 19, by the Commissioners of Hendricks County for the construction of seven steel, and nine concrete bridges. L. W. Borders is Audr.

Scottsburg, Ind.—(Official)—Bids will be received until 1 p.m., Apr. 5, by the Commissioners of Scott County for the construction of several concrete bridges and culverts and two steel bridges. Robert Blunt is Audr.

Winchester, Ind.—Bids will be received until 10 a.m., Apr. 1, by Charles E. Tillson, Audr. of Randolph County, for 31 bridges, abutments and repairs.

Custer Park, Ill.—(Official)—Bids will be received until 2 p.m., Apr. 13, by the Bridge Committee and Superintendent of Highways of Will County for the construction of four reinforced-concrete bridges in Custer Township. W. H. Smith, Joliet, is County Supt. of Highways. Alex Cooper is Clk. of Custer Township.

+McLeansboro, Ill.—(Official)—The Highway Commission of Hamilton County has awarded the contract for the construction of a reinforced-concrete bridge in Mayberry Township to the VINCENNES BRIDGE CO., Vincennes, Ind., at $4273. The Engineer's estimate was $5600. Five other bids were received. Gregg Garrison is County Supt. of Highways. Noted Feb. 25.

Murphysboro, Ill.—(Official)—Bids will be received until 2 p.m., Mar. 31, at the Court House, Murphysboro, for the construction of the Rattlesnake Ferry Bridge between Grand Tower and Pomona Townships, Jackson County. It will be a 180-ft. steel span on reinforced-concrete abutments. The estimated cost, including piling, is $13,600. Thomas G. Dunn, Gorham, Ill., is County Supt. of Highways. Noted Mar. 4.

De Pere, Wis.—It is reported that a special election will be held Apr. 6 to vote on the question of issuing $15,000 in bonds, the proceeds of which will be used for rebuilding the drawbridge at Main Ave. and George St. The estimated cost of the work is $21,000, of which $6000 is now available.

* Cement, reinforcing steel and anchor bolts to be furnished on cars, at site of bridge by the railroad company.

Cincinnati, Ohio—(Official)—Bids will be received until noon, Apr. 14, by William Leimann, City Audr., for the purchase of a bond issue of $165,000, the proceeds of which will be used for the construction of a viaduct over Kemper Lane at the Park Ave. entrance to Eden Park. Noted Oct. 22, Nov. 26 and Dec. 10, 1914.

Cleveland, Ohio—(Official)—Bids will be received until 10 a.m., Apr. 14, by the Board of Commissioners of Cuyahoga County for the construction of a concrete bridge, Report No. 3487. W. A. Stinchcomb is County Surv. E. G. Krause is Clk. of Comrs.

+Lima, Ohio—The Board of Administration has awarded the contract for the construction of the Pine St. bridge to the BURKE CONSTRUCTION CO., Newcastle, Ind., at $20,363. There were 20 bids submitted, ranging from that of the successful contractor to $29,765. The engineer's estimate was $28,232. Chester & Fleming, Union Bank Bldg., Pittsburgh, Penn., is Engr.-in-Charge. Noted Feb. 11 and 25.

Youngstown, Ohio—(Official)—We are advised by F. M. Lillie, City Engr., that the railways interested in the construction of the East Federal St. Viaduct have appealed to the higher courts from the recent decision that the bridge shall be built according to plans prepared by the City Engineer, rather than those of the railway engineering forces. The estimated cost is $500,000. Noted Mar. 18.

Crawfordsville, Ind.—The Board of Commissioners of Montgomery County will advertise about May 1 for bids for the construction of six reinforced-concrete flat top bridges. M. L. Nees is County Surv.

Des Moines, Iowa—(Official)—Bids will be received until noon, Mar. 29, by the Board of Supervisors of Polk County for the construction of four reinforced-concrete bridges. H. L. Barquist is Chn. of the Bd.

+Dubuque, Iowa—The Board of Supervisors of Dubuque County has awarded the contract for the construction of 122 bridges and culverts in the county to J. J. LEONARD, Dubuque, at $36,100.

Dubuque, Iowa—(Official)—Bids will be received until 2 p.m., Mar. 31, by the Board of Supervisors of Dubuque County for the construction of 75 concrete box culverts on the Iowa Post Rd., locally known as the "Hawkeye Highway." John Inghram is County Audr.

Ft. Madison, Iowa—The Board of Supervisors of Lee County has passed a resolution of necessity for the construction of four reinforced-concrete bridges and six reinforced-concrete culverts at an estimated total cost of $15,669.

Lone Tree, Iowa—Press reports state that the Boards of Supervisors of Johnson County, Iowa City, and Louisa County, Wapello, are considering the construction of a $10,000 bridge over the Iowa River about seven miles from Lone Tree, to replace the structure carried away recently by floods and ice floes. The two counties will share the cost equally.

+Marengo, Iowa—The Board of Supervisors of Iowa County has awarded the contract for the construction of 45 county bridges to M. O. BURNETT, Marengo, at about $26,000.

Sibley, Iowa—Bids will be received until 1 p.m., Apr. 7, by G. W. Creighton, Audr. of Osceola County, for the construction of two steel bridges, and 36 concrete bridges and culverts.

Tipton, Iowa—Press reports state that the Board of Supervisors of Cedar County plans to build several concrete bridges this year. The estimated total cost is $22,000.

+Caledonia, Minn.—(Official)—The Board of Commissioners of Houston County has awarded the contract for constructing several bridges to the JOLIET BRIDGE CO., Joliet, Ill., at $6044. Four other bids were received, ranging from $6550 to $8287. E. N. Newhouse is County Audr. Noted Mar. 4.

+Minneapolis, Minn.—(Official)—The Board of Commissioners of Hennepin County has awarded the contract for the construction of a bridge over County Ditch No. 10, Rd. No. 83, to WILLIAM O'SHEA & SONS, 129 East 25th St., Minneapolis. F. E. Haycock is County Surv. Noted Mar. 11.

+Garfield, Kan.—(Official)—The Board of Commissioners of Pawnee County has awarded the contract for the construction of a reinforced-concrete bridge over the Arkansas River at Garfield to the TOPEKA BRIDGE & IRON CO., Topeka, at $12,350. Noted Oct. 22, Dec. 24, 1914, and Feb. 25, 1915.

McCook, Neb.—Bids will be received until noon, Mar. 30, by C. K. Dutcher, Clk. of Redwillow County, for bridge work in the county during the ensuing year.

Columbus, Mont.—(Official)—Bids will be received until 10 a.m., Apr. 12, by the Board of Commissioners of Stillwater County for the construction of five reinforced-concrete bridges, Nos. 9, 11, 12, 13 and 14, ranging from 22 to 95 ft. long. R. W. Barr is County Surv. B. F. Harris is Chn. Bd. of Comrs.

Rockport, Mo.—Bids will be received until 2 p.m., Apr. 12, by J. A. Krusor, Highway Engr. of Atchison County, for bridge work in the county.

Belton, Tex.—The Commissioners Court of Bell County has ordered the construction of two new county bridges, one over Cedar Creek on the Moffat Air Line Rd., and the other on the Belton-Sulphur Springs Rd.

Dallas, Tex.—The Board of City Commissioners has voted to appropriate $22,000 for constructing the east approach of the Commerce St. Bridge. J. M. Preston is City Engr.

+Floresville, Tex.—The Commissioners Court of Wilson County has awarded the contract for the construction of two steel bridges, one over the San Antonio River, and the other over Picosa Creek, to the ALAMO CONSTRUCTION CO., San Antonio, at $10,500.

Robert Lee, Tex.—(Official)—Bids will be received until Apr. 12 by the Commissioners Court of Coke County, for the construction of two county bridges. The estimated cost is $8000. S. B. Kemp is County Judge.

Hoquiam, Wash.—It is reported that bids will be received until Apr. 7 by the Commissioner of Public Works for repairs to the Eighth St. Bridge. C. E. Fowler, Central Bldg., Seattle, is Engr.

Wenatchee, Wash.—The Board of Commissioners of Chelan County has instructed the County Engineer to prepare plans for a steel bridge to be known as the Wenatchee River Bridge. The estimated cost is $35,000, and it is reported that construction will be begun some time during the summer. Fred A. Warren is County Engr.

Fairfield, Calif.—Press reports state that bids for the construction of four bridges on the State Highway in Solano County will be received at the April meeting of the Board of County Supervisors. One bridge will span American Canon Creek near Cordelia, one over Sweeney Creek near Benicia, and one each across Gibson and McCune Creeks near Batavia.

Holtville, Calif.—Bids will be received until 2 p.m., Mar. 29, by M. S. Cook, Clk. of the Bd. of Supervisors of Imperial County, El Centro, for the construction of a reinforced-concrete bridge over the Alamo River on the extension of Sixth St. in the City of Holtville. Noted Feb. 4.

Red Bluff, Calif.—It is reported that the Board of Supervisors of Tehama County is having plans prepared for the construction of a bridge over Sand Slough. The estimated cost is $35,000. W. F. Luning, Red Bluff, is County Surv.

Riverside, Calif.—(Official)—We are advised by A. P. Campbell, City Engr., that, as no appropriation has been made for the purpose, bids for the construction of a bridge over Tequesquite Wash will probably not be asked before next summer, as the yearly budget is made in July. Noted Mar. 4.

Stockton, Calif.—The Board of Supervisors of San Joaquin County is having plans prepared for a bridge across Middle and Old Rivers. The estimated cost is $122,000. Frank E. Quail, Stockton, is County Surv.

Visalia, Calif.—Bids will be received until Apr. 7 by the Board of Supervisors of Tulare County, for the construction of a bridge over Cameron Creek at Mooney Grove. George R. Prestige is County Clk.

Lunenburg, N. S.—Bids will be received until noon, Mar. 27, by E. H. Armstrong, Minister of Pub. Wks., Halifax, for the construction of 277 culverts in Lunenburg County.

Toronto, Ont.—The Board of Control will shortly call for bids for a bridge to be built over Merton St. in connection with the extension of Mt. Pleasant Rd. It will have steel girders on concrete abutments. The estimated cost is $41,000.

Calgary, Alta.—(Official)—We are advised by J. M. Miller, City Clk., that the construction of the Louise Bridge at Ninth St. has been indefinitely postponed. It will be a steel structure costing about $40,000. Noted Jan. 14 and Feb. 25.

The Pulsometer Steam Pump Co., 17 Battery Pl., New York, is having a most satisfactory run of business. According to W. J. Berow, of that company, the amount of business booked during February exceeded that of any month in the history of the company, and that for the first two months of the year was almost as satisfactory. This business does not come from any particular section but is general all over the United States and Canada with a fair amount of export business sprinkled in.

WATER SUPPLY—IRRIGATION

Scarboro, Maine—An election will be held to vote on the question of constructing a water system.

Greenville, N. H.—At a recent election the citizens voted to issue bonds for $18,000, the proceeds of which will be used for the construction of a water system. H. J. Taft is Chn. Bd. of Water Comrs. Noted Apr. 30, 1914.

Troy, N. H.—Bonds for $40,000 have been voted, the proceeds of which will be used for the construction of a water system. Dudley & Sawyer, Manchester, is Engr. Melvin T. Stone is Chn. of Comrs. Noted Nov. 5.

Boston, Mass.—Bids will be received until Apr. 2 by the Public Works Department for laying 5800 ft. of 30-in. high-service water pipe. L. K. Rourke is Comr.

Boston, Mass.—Bid will be received until Apr. 1 for the construction of a tower of Quincy granite around the steel water tower on Mt. Bellevue St., West Roxbury. Dexter Brackett, 1 Ashburton Pl., is Engr.

Cambridge, Mass.—The citizens contemplate installing a filtration plant to filter water from Stony Brook. L. M. Hastings is City Engr. Timothy W. Good is Mayor.

Middleton, Mass.—The Water Commissioners will spend $8000 for laying water mains this summer.

New Britain, Conn.—The city will retain engineers to prepare plans for the construction of the Burlington reservoir. William H. Hall, City Engr., will make an inspection of the reservoir site.

Bellmore, N. Y.—The State Conservation Commission has approved the application made by the Bellmore Citizens' Water Co. for the construction of a water system. Noted Oct. 22.

Elmsford, N. Y.—Plans have been prepared for the construction of a water system but have not as yet been submitted to the Board of Trustees. J. E. Murray is City Clk.

Le Roy, N. Y.—Bonds for $105,000 have been voted by the citizens. The proceeds will be used for the extension of the water system. J. P. Wells, Rochester, is Engr. and C. A. Chapman is Village Clk. Noted Dec. 3 and Feb. 25.

Madrid, N. Y.—A filtration plant and a water tank on a 60-ft. tower will be constructed. The estimated cost is $22,000. A. D. White is Village Pres. Noted Feb. 25.

+New York, N. Y.—(Borough of the Bronx)—(Official)—The contract has been awarded to H. E. FOX CONSTRUCTION CO., 81 East 125th St., at $15,608, for laying a water main across the East River and in 140th St. Noted Mar. 4 and 18.

New York, N. Y.—(Borough of Queens)—(Official)—Bids will be received until 3 p.m., Apr. 1, by the Park Board, Municipal Bldg., Manhattan, for laying water mains in Forest Park.

Rochester, N. Y.—The only bid received Mar. 3 by the Board of Contract and Supply for 2350 tons of specials and pipe for the water department was that of the United States Cast Iron Pipe & Foundry Co., at $51,148.

★Atlantic City, N. J.—(Official)—Bids were received Mar. 11 for an 18,000,000-gal. centrifugal pump for the Absecon pumping station as follows: Kerr Turbine Co., $14,317; Dravo-Doyle Co., $17,100; Westinghouse Machine Co., $15,000; Southwark Foundry & Machine Co., $14,000 and Ingersoll-Rand Co., $14,931. Noted Mar. 4.

Jersey City, N. J.—The city is considering the installation of a high-pressure water system for lower Jersey City.

Newark, N. J.—Runyon & Carey, Consult. Engr., Newark, has been instructed by the Essex County Board of Freeholders to revise the specifications for the construction of a water system at the Overbrook Hospital. Noted Dec. 3, Feb. 18 and Mar. 4.

+Allentown, Penn.—The contract for valves for the water department has been awarded to the RENSSELAER VALVE CO., Troy, N. Y.

Barnesboro, Penn.—According to press reports bids will soon be received by the Borough Council for the construction of a reservoir for the municipal water system. The estimated cost is $7000. Noted Oct. 29.

Conemaugh, Penn.—(Official)—Plans have been approved by the State Department of Health for the construction of a storage reservoir and for the installation of a disinfection plant for the Conemaugh & Franklin Water Co.

Dubois, Penn.—Press reports state that C. W. McKnight, Rome, is preparing plans for the enlargement of the reservoir. H. A. Daly is Chn. of Water Comn.

Hellertown, Penn.—(Official)—The State Department of Health has approved plans for additional sources of water-supply and for the construction of a gravity main.

Philadelphia, Penn.—(Official)—The State Department of Health has approved plans for the construction of loop main extensions to the distributing system in the commercial district.

Williamsport, Penn.—(Official)—Plans have been approved by the State Department of Health for making improvements at the wells and for pumping equipment.

+Petersburg, Va.—The contract has been awarded to TUCKER & LAXTON, Charlotte, N. C., at $9100 by the Directors of the Central State Hospital, for installing a filtration plant.

Wheeling, W. Va.—A report will be submitted by the Board of Control on the relaying of the 42-in. intake pipe and for the installation of a coal heating system at the water-works in place of the gas heating system. W. J. Scoggins is Supt. of Water Wks.

Southport, N. C.—Bids will soon be received, according to press reports, for the materials for the construction of water and sewer systems. The J. B. McCrary Co., Atlanta, Ga., is Engr. Noted Feb. 18.

Union, S. C.—Bids will be received until Mar. 30 by the city for making extensions to the water system. About 21,120 ft.

of 8-in., 1600 ft. of 6-in. and 2000 ft. of 4-in. pipe, as well as valves and hydrants will be required. Noted Feb. 4 and Mar. 4.

Dadeville, Ala.—An election will be held to vote on the question of issuing $15,000 in bonds, the proceeds of which will be used for the construction of a water system. W. C. Roeck is City Clk.

Dresden, Tenn.—Bids are being received, according to press reports, for material and machinery for the construction of a water system and electric-light plant. The estimated cost is $27,000. P. Porter, Clinton, Ky., is Engr. Noted Nov. 4 and Dec. 3.

Maryville, Tenn.—R. C. Huston & Co., Exchange Bldg., Memphis, has been retained by the city to prepare plans for the construction of a water system. Bonds for $55,000 have been voted. Noted Apr. 30, 1914, and Mar. 4, 1915.

Spring City, Tenn.—The citizens contemplate constructing a water system.

Alliance, Ohio—Chester & Fleming, Pittsburgh, Penn., has been retained to prepare plans for the construction of an elevated reinforced-concrete tank.

Cleveland, Ohio—Bids will be received until noon, Apr. 2, by A. R. Callow, Comr. of Pur. and Supplies, for excavating Baldwin reservoir.

+Cleveland, Ohio—The contract has been awarded by the Board of Control to the WALSH CONSTRUCTION CO., Davenport, Iowa, at $272,636, for constructing a clear water reservoir.

Coshocton, Ohio—An ordinance, providing for the construction of a 3,000,000-gal. reservoir, has been vetoed by L. N. Staats, Mayor. Noted Mar. 11.

Fostoria, Ohio—Bids will be received until Mar. 31 by E. K. Cunningham, Dir. of Pub. Serv., for the purchase of $65,000 in bonds, the proceeds of which will be used for the construction of a reservoir. Charles Latshaw is City Engr. Noted Sept. 17, 1914, and Jan. 7.

Sandusky, Ohio—(Official)—Bids will be received until noon, Apr. 3, by John J. Molter, Dir. of Pub. Ser., for constructing a 42-in. intake in Sandusky Bay, a concrete intake and crib.

Sebring, Ohio—The water company has retained Chester & Fleming, Pittsburgh, Penn., to appraise the water system in connection with an expert appointed by the city with a view of selling the system.

+South Newburg, Ohio—(Cleveland post office)—The contract has been awarded for constructing a water main in Granger Rd. to WILLIAM SMITH, Cleveland. Noted Dec. 31 and Feb. 18.

+Paoli, Ind.—The contract for constructing a pumping station and reservoir has been awarded to the NORWOOD ENGIGEERING CO., Florence, Mass. Noted Feb. 4.

Chicago, Ill.—Bids will be received until Mar. 26 by the Board of Local Improvements for constructing water mains in North 48th Ave., South May St., South Carpenter St. and in various other streets. E. J. Glackin is Secy.

+★Chicago, Ill.—Bids were received Mar. 12 by the Board of Public Works for erecting five pumping engines at Mayfair pumping station as follows: Filer Stowell, Milwaukee, Wis., $497,900; ALLIS-CHALMERS CO., Milwaukee, Wis., at $448,750 (awarded contract); Holly Mfg. Co., Buffalo, N. Y., $489,679; Hooven, Owens, Rentschler Co., Hamilton, Ohio, $498,700; Nordberg Mfg. Co., Milwaukee, Wis., $464,800, and William Tod Co., Youngstown, Ohio, $629,800. Noted Feb. 25.

+Joliet, Ill.—The contract for constructing a 5,000,000-gal. reservoir has been awarded to H. L. WINSLOW CO., Old Colony Bldg., Chicago, at about $19,500. List of bidders noted Mar. 11.

Menomonee Falls, Wis.—An election will be held Apr. 6 to vote on the question of issuing $20,000 in bonds, the proceeds of which will be used for laying water mains, constructing a standpipe and a reservoir. J. W. Cannon is Clk.

La Crosse, Wis.—Plans are being prepared for the construction of a one-story, 80x125-ft. addition to the Wisconsin Pearl Button Co. Estimated cost, $20,000. Daniel W. McMillan is Pres.

Madison, Wis.—Plans are being prepared for the construction of a warehouse for the J. I. Case Threshing Machine Co., Racine. Estimated cost, $30,000.

Omaha, Neb.—Plans are being prepared for the construction of a plant for the W. T. Redman Perfect Hollow Wall Concrete Form Mfg. Co. Estimated cost, $100,000.

Kansas City, Mo.—Edwin W. Shields contemplates the construction of a six-story garage with 45,000 sq.ft. of floor space.

✚Kansas City, Mo.—The contract for the construction of a seven-story reinforced-concrete motor car factory for the Studebaker Corporation, Detroit, Mich., has been awarded to the SWENSON CONSTRUCTION CO. Estimated cost, $100,000.

Idaho Falls, Idaho—Plans are being prepared for the construction of an addition to the Utah Idaho Sugar Co. Estimated cost, $75,000. B. R. Smoot is Supt.

Davenport, Wash.—The Banner Meat Co., Davenport, Wash., contemplates the construction of a cold-storage plant. Estimated cost, $10,000.

★Portland, Ore.—Plans have been prepared by Jacobberger & Smith for the construction of a two-story factory for the Coin Machine Mfg. Co. The estimated cost is $25,000. Noted Jan. 28.

Los Angeles, Calif.—Plans are being prepared by John F. Blee, Arch., 509 Union League Bldg., for the construction of a five-story reinforced-concrete warehouse for the Neptune Meter Co., 90 West St., New York.

Juneau, Alaska—Preliminary plans are being prepared for the construction of a factory for the Vendlyssel Packing Co.

FEDERAL GOVERNMENT WORK

Building—Portland, Maine—Bids for constructing the steerage barracks and storehouse at the Quarantine station will be opened at 3 p.m., Apr. 20. Mention of this date was omitted in issue of Mar. 8.

Post Office—Brattleboro, Vt.—Bids were received for the construction of the post office at Brattleboro, (a) using limestone for all stonework except where granite is required, (b) using standstone for all stonework except where granite is required, (c) using granite for all stonework below the first-floor level and marble for all stonework above the first-floor level, as follows: Charles W. Wright, East Lynn, Mass., (a) $99,939, (b) $102,939, (c) $109,039; Potter's Lumber Co., East Liverpool, Ohio, (a) $109,000, (b) $112,000; George B. Wills & Co., New York, (a) $98,675, (b) $99,765, (c) $108,765; W. H. Fissel & Co., New York, (a) $98,300, (b) $103,000, (c) $106,700; Elliott & Kieslich, Burlington, Vt., (a) $131,324, (b) $138,500, (c) $141,000; M. Yeager & Son, Danville, Ill., (a) $104,945, (b) $109,445, (c) $114,945; C. M. Leach, Boston, Mass., (a) $107,771, (b) $109,753, (c) $118,811; E. T. Abbott Construction Co., New York, (a)$94,345, (b) $97,400, (c) $102,900; Westchester Engineering Co., White Plains, N. Y., (a) $96,429, (b) $104,000, (c) $105,929; King Lumber Co., Charlottesville, Va., (a) $109,724, (b) $115,000, (c) $125,000; Colonial Construction & Supply Co., Charlottesville, Va., (a) $119,987, (b) $122,937; Lewis P. Fluhrer Co., New York, (a) $105,533; Wiley & Foss, Fitchburg, Mass., (a) $103,709, (c) $111,309; John Lowry, Jr., New York, (a) $94,870, (b) $97,670, (c) $104,500; George Baker Long, Worcester, Mass., (a) $102,300, (b) $106,300, (c) $111,730; James E. Cashman, Burlington, Vt., (a) $125,297, (b) $125,747, (c) $139,232; Norman Ker Co., New York, (a) $103,400, (b) $104,400, (c) $113,200; Woodbury & Leighton Co., Boston, Mass., (a) $107,878, (b) $109,878, (c) $116,878; Conners Bros. Co., New York, (a) $99,043, (b) $101,500, (c) $108,200. Noted Feb. 11.

Cranes and Bridge—Newport, R. I.—Bids will be received until 11 a.m., Apr. 10, by H. R. Stanford, Chief, Bureau of Yards and Docks, Navy Dept., Washington, D. C., for two 2½-ton 3-motor electric traveling cranes and one movable bridge, delivered and erected at the Naval Torpedo Station, Newport.

Building Improvements—Newport, R. I.—Bids will be received until 11 a.m., Apr. 10, by H. R. Stanford, Chief, Bureau of Yards and Docks, Washington, D. C., for roofing, sheet-metal work, iron work, plumbing, heating, lighting, painting, and wood block pavements for new buildings, at the Naval Torpedo Station, Newport.

★Dredging—New London, Conn.—Bids were received as follows for approximately 100,000 cu.yd. of dredging in the Connecticut River, prices being per cu.yd.: Hartford & New York Transportation Co., Hartford, Conn., 13c., and John A. Seely, 30 Church St., New York, 25c. Noted Feb. 18.

Building—Gloucester, N. J.—Bids will be received until 3 p.m., Apr. 20, by Oscar Wenderoth, Superv. Arch., Treasury Dept., Washington, D. C., for the construction of the receiving building for the Philadelphia Immigration Station at Gloucester. It will be a one-story, frame building, and will cost about $50,000.

✚Retaining Wall—Washington, D. C.—The contract for constructing the concrete retaining wall on the west (16th St.) side of the Meridian Hill Park has been awarded to the BOYLE-ROBERTSON CO., Washington, at $23,397. Noted Feb. 11 and Mar. 18.

★Alterations and Additions to Stable—Fort Monroe, Va.—Bids will be received until noon, Apr. 15, by the Quartermaster, for constructing alterations to casements and addition to Quartermaster Stable, including plumbing and electric lighting.

★Improving Post Office and Court House—Pensacola, Fla.—Bids will be received until 3 p.m., Apr. 29, by Oscar Wenderoth, Superv. Arch., Treasury Dept., Washington, D. C., for improving the post office and court house at Pensacola.

✚Repairs to Buildings—New Orleans, La.—The contract for making repairs to buildings at the naval station has been awarded to C. A. EURE, Hattiesburg, Miss., at $28,658. Noted Feb. 14 and Mar. 4.

★Manila Bolt Rope—Memphis, Tenn.—Bids will be received until 11 a.m., Apr. 10, by Maj. E. M. Markham, Custom House, Memphis, for furnishing and delivering 62,200 lb. pure manila bolt rope.

★Wire, Wire Strand, Staples, Clips—Memphis, Tenn.—Bids will be received until noon Apr. 10, by Maj. E. M. Markham, Custom House, for furnishing and delivering about 725,000 lb. galvanized wire, silicon bronze wire, wire strand, and staples, and 36,000 wire rope clips.

★Cement—Louisville, Ky.—Bids will be received until noon Apr. 19 by Maj. J. C. Oakes for furnishing and delivering American portland cement for Dam No. 43, Ohio River.

Cement, Limestone, Sand—Ashtabula, Ohio—Bids will be received until 2 p.m., Mar. 31, by the Lighthouse Inspector, Buffalo, N. Y., for furnishing and delivering at Ashtabula Harbor about 1400 bbl. of portland cement, 800 yd. of broken limestone and 500 yd. of sand.

✚Cement—Fort Leavenworth, Kan.—The contract for furnishing 5000 bbl. portland cement has been awarded to the UNION SAND & MATERIAL CO., Kansas City, Mo., at $6725.

✚Canal Work—St. Ignatius, Mont.—The contract for the earthwork on the Pablo Lateral A and sublaterals of the Flathead Project, Mont., has been awarded to A. L. MARKHUS, Polson, Mont., at $16,570. Noted Nov. 12 and Dec. 24.

✚Post Office—Uvalde, Tex.—The contract for the construction of a post office at Uvalde has been awarded to GEORGE W. HINCHLIFF CO., Chicago, Ill., at $52,400. Noted Dec. 17, Jan. 28 and Mar. 4.

Post Office—Ardmore, Okla.—Bids will be received until 3 p.m., Apr. 28, by Oscar Wenderoth, Superv. Arch., Treasury Dept., Washington, D. C., for the construction of a post office at Ardmore, to be three stories and basement, of brick and stone. The building will cost about $142,000.

Canal Excavation—Grand Junction, Colo.—The following bids were received for about 640,000 yd. of excavation in the vicinity of Grand Junction and Fruita, Colo. The work is divided under seven schedules: Charles Wilhite & Co., Boise, Idaho, (a) Schedule 1, $25,125, (b) Schedule 2, $21,374, (c) Schedule 3, $13,710, (d) Schedule 4, $18,040, (e) Schedule 5, $12,865, (f) Schedule 6, $11,365, (g) Schedule 7, $9115, (h) total, $111,594; King & Son, (f) $13,528; Bate Miller & Co., Springville, Utah, (c) $13,100; Walsh Construction Co., Davenport, Iowa, (a) $22,510, (b) $20,609, (c) $13,555, (d) $16,575, (e) $14,072, (f) $12,422; (g) $9947, (h) $109,692; Reynolds Ely Construction Co., Springville, Utah, (a) $22,890, (b) $19,070, (c) $12,618, (d) $15,785, (e) $12,802, (f) $11,302, (g) $9052, (h) $103,519; Orman Construction Co., Montrose, Colo., (a) $16,180, (f) $14,280; (g) $11,430, (h) $41,891; C. A. Riley & Co., Omaha, Neb., (a) $30,605, (b) $26,859, (c) $17,680, (d) $21,615, (e) $14,065, (f) $12,415, (h) $123,239; Mesmer & Rice, Los Angeles, Calif., (a) $24,706, (b) $19,884, (c) $13,100, (d) $15,876, (e) $12,774, (f) $11,274, (g) $9024, (h) $106,638; Mendenhall, Straw & Bird Co., Springville, Utah, (a) $24,230, (b) $18,092, (c) $11,946, (d) $16,110, (e) $11,536, (f) $10,186, (g) $8161; (h) $100,261; Winston Bros. Co., (a) $23,680, (b) $19,884, (c) $11,500, (d) $18,759, (e) $11,985, (f) $12,085, (g) $9085, (h) $106,978; Maurice A. Wogan, Denver, Colo., (a) $35,816, (b) $32,124, (c) $21,100, (d) $25,486, (e) $14,080, (f) $12,435, (g) $9967, (h) $151,008. Noted Feb. 11.

✚Canal Work—Payson, Utah—The contract has been awarded for the construction of lateral 30 of Division 5, Highline Canal, Strawberry Valley project, to the WASATCH GRADING CO., Salt Lake City, Utah, at $47,084. This work consists of approximately 49,000 cu.yd. of earthwork and 3670 yd. of reinforced concrete and is located near Payson. Noted Jan. 28 and Mar. 11.

✚Pumping Units—Benton City, Wash.—The U. S. Reclamation Service has awarded the contract for furnishing direct pumping units for the pumping plants of the Outlook irrigation district, Sunnyside Unit, Yakima project, to CHARLES C. MOORE & CO., San Francisco, Calif., at $10,611, delivered at station nearest the work.

Post Office—Everett, Wash.—Bids were received for the construction of a post office at Everett, (a) using light-colored limestone for all exterior stonework except where granite is required, (b) using local standstone produced in the State of Washington for all exterior stonework except where granite is required, (c) using light-colored sandstone (exclusive of that produced in the State of Washington) for all exterior stonework except where granite is required, (d) using granite for all exterior stonework, the building to be granite faced, except where brick is indicated on the plans, as follows: Martin & Dugan, Seattle, Wash., (a) $132,900, (b) $132,500, (c) $137,534, (d) $157,500; Sound Construction & Engineering Co., Seattle, Wash., (a) $112,517 ,(b) $112,107, (c) $123,500, (d) $134,500, $137,132; King Lumber Co., Charlottesville, Va., (a) $163,800, (b) $159,400, (c) $170,000, (d) $189,000; M. Yeager & Sons, Danville, Ill., (a) $118,569, (b) $117,957, (c) $125,569, (d) $137,381; Erikson & Larson, Seattle, Wash., (a) $115,138, (b) $114,487, (c) $114,886, (d) $137,325; McAdam

Bros., Everett, Wash., (a) $136,970, (b) $136,460, (c) $137,045, (d) $159,695; Pearson Construction Co., Seattle, Wash., (a) $128,200, (b) $127,600, (d) $154,100; Olsen & Johnson, Missoula, Mont., (a) $105,500, (b) $106,650, (c) $106,300, (d) $129,875; J. B. Cullen Construction Co., Janesville, Wis., (a) $139,961, (b) $140,961, (d) $179,598; Campbell Building Co., Salt Lake City, Utah, (a) $117,500, (b) $117,500, (d) $141,700; Henrickson & Co., Seattle, Wash., (a) $114,344, (b) $109,344, (c) $111,319, (d) $127,344; J. B. Sweatt, Spokane, Wash., (a) $126,453, (b) $126,089, (c) $125,953, (d) $150,683; William H. Maxwell, Bangor, Maine, (a) $133,381, (b) $137,881,, (d) $154,381; Butler Construction Co., Seattle, Wash., (a) $119,900, (b) $110,200, (c) $129,100, (d) $139,500. Noted Feb. 18.

Building—Neah Bay, Wash.—Bids will be received by D. F. Houston, Secy., Dept. of Agriculture, Washington, D. C., until noon, Apr. 27, for the erection of a two-story frame cottage, telegraph office building, at Neah Bay.

+Bungalows—Mare Island, Claif.—(Vallejo post office)—The contract for the construction of two bungalows at the naval station has been awarded to S. J. WEEKS, 331 Eldorado St., Vallejo, at $6975. Noted Feb. 25.

Vessel—San Francisco, Calif.—Bids will be received by the Bureau of Light Houses, Dept. of Commerce, Washington, D. C., until Apr. 27, for constructing the steel light house tender "Cedar," about 1750 tons displacement.

Lumber, Hardware, Roofing Paper—Ketchikan, Alaska—Bids will be received by the Light House Inspector, Ketchikan, until 2 p.m., Apr. 1, for furnishing approximately 55 M ft. spruce, 7 M ft. cedar and 5 M ft. of fir lumber, miscellaneous hardware, roofing paper and steel rail and fittings for Cape St., Elias Light Station.

Pumping Plant—Panama—Bids were received Mar. 17, by Maj. F. C. Boggs, Corps of Engineers, U. S. A., General Purchasing Officer, The Panama Canal, Washington, D. C., for the design, fabrication, delivery and supervision of erection, of a complete pumping plant for Dry Dock No. 1, at the Pacific terminus of the Panama Canal, and for the fabrication and delivery of four flooding valves arranged in pairs, each pair provided with screens and guard valves, provision for screens and guard valves for a twin discharge culvert, cylinders for actuating four sluice valves, said material to be embedded in or supported by the concrete structure of Dry Dock No. 1. The pumping plant will consist of four main pumps, two drainage pumps and one bilge or seepage pump. The water to be handled is salt, weight to be considered 64 lb. per cu.ft., average temperature, 80° F. The main pumps will be required to pump out the dry dock at any stage of the tide. The drainage pumps will be capable of laying bare the floor of the suction chamber at any stage of the tide. The bilge pump will be required to handle salt or fresh water, and will be capable of laying bare the floor of the lowest part of the pump well at any stage of the tide, whether the drainage pumps are running or not. Bids are subdivided as follows: (a) design, fabrication and delivery of all parts (structural, mechanical, electrical and hydraulic), for the pumping plant, in accordance with government specifications; (a-1) same, in accordance with bidder's specifications; (b) design of all parts (structural, mechanical, electrical and hydraulic), and fabrication and delivery of all parts except structural, for the pumping plant, in accordance with government specifications, (b-1) same, in accordance with bidder's specifications; (c) material for valves and accessories, based on the use of water under pressure of approximately 300 lb. per sq.in.; (c-1) same, based on the use of water direct from the mains; (c-2) same, based on the use of compressed air from compressor plant. The bidders were: Alberger Pump & Condenser Co., 140 Cedar St., New York, N. Y., (a) $147,845; Allis-Chalmers Manufacturing Co., Milwaukee, Wis., (b-2) $179,000; Hanscom Construction Co,. Boston, Mass., (a) $153,172, (b) $143,676; C. C. Moore & Co., San Francisco, Calif., (a) $185,000, (b) $172,000, (a-1) $181,639, (b-1) $168,539; Poole Engineering & Machine Co., Baltimore, Md., (a) $154,500, (c) $51,225; R. D. Wood & Co., Philadelphia, Penn., (a) $144,500, (b) $133,000, (c) $47,500; A. S. Cameron Steam Pump Works, 11 Broadway, New York, (a) $153,348; Henry R. Worthington, 115 Broadway, New York, (a) $140,834, (b) $129,121; Pittsburgh Valve Foundry & Construction Co., Pittsburgh, Penn., (c) $62,500; Seattle Dry Dock Construction Co., Seattle, Wash., (c) $55,000, (c-1) $64,000, (c-2) $59,000.

MISCELLANEOUS

+Station Improvements—Boston, Mass.—The Boston Transit Commission has awarded the contract for enlarging the Park St. station to COLEMAN BROS., Boston, at $12,164.

Asphaltic Road Oil—Waterbury, Conn.—See item under "Streets and Roads."

Fire and Police Department Equipment—Albany, N. Y.—Appropriations for the following improvements will soon be asked of the Common Council: $10,000 for construction of an addition to the police stable; $4000 for motor patrol wagon; $8000 for extension of the fire alarm system; $8000 for two motor chemical and hose wagons.

Oils—New York, N. Y.—(Borough of the Bronx)—(Official)—See item under "Streets and Roads."

Fill—New York, N. Y.—(Borough of Brooklyn)—(Official)—The following bids were received by the Department of Parks for furnishing and placing 230,000 cu.yd. of earth fill along the Shore Rd. between 94th St. and Ft. Hamilton Ave.; Rogers & Haggerty, 18c. per cu.yd.; Cullen Fleming Contracting Co., 18.5c.; H. Steers, Inc., 19.4c.; Norton & Gorman, 19.9c.; O'Brien Bros., Inc., 23.25c.; Moran Towing & Transportation Co., 24c.; F. V. Smith, Inc., 24c.; Wilson & English, 33c.; Oelson Contracting Co., 36c. Noted Mar. 4.

+Motor Tractors—New York, N. Y.—(Borough of Manhattan)—The Department of Street Cleaning has awarded a contract for furnishing 12 motor tractors to the GENERAL VEHICLE CO., INC., at $49,992.

Corporation Yard—New York, N. Y.—(Borough of Manhattan)—(Official)—Bids will be received until 2 p.m., Apr. 1, by the Borough President for the construction of a corporation yard under the Manhattan Bridge between Madison and Monroe St.

Drydocking, Painting and Scraping—New York, N. Y.—(Borough of Manhattan)—(Official)—Bids will be received until noon, Mar. 31, by the Commissioner of Docks for furnishing the materials and labor necessary for drydocking, scraping, scaling, cleaning and painting the hulls of the municipal ferryboats.

Artificial Granite Balustrade—New York, N. Y.—(Borough of Manhattan)—(Official)—Bids will be received until 3 p.m., Apr. 1, by the Park Board, Municipal Bldg., for the construction of an artificial granite balustrade on top of the present granite coping of the speedway bulkhead wall.

Tar Road Oil and Coal Tar—New York, N. Y.—(Borough of Manhattan)—(Official)—See item under "Streets and Roads."

Wood Paving Blocks—New York, N. Y.—(Borough of Manhattan)—(Official)—See item under "Bridges."

Dock—Niagara Falls, N. Y.—Press reports state that the Municipal Harbor Board is considering the construction of a municipal dock. Joseph E. Montague is Pres.

Motor Fire Apparatus—Rome. N. Y.—On Mar. 4 the citizens voted favorably on the proposition to issue $15,000 in bonds, the proceeds to be expended for motor fire apparatus.

Fire Station—Edgewater, N. J.—The citizens will vote, Apr. 27, on the proposition to issue $45,000 in bonds to cover the cost of erecting a fire station and purchase of motor apparatus.

Fire Apparatus—Jersey City, N. J.—Frank Hague, Comr. Pub. Safety, has recommended that the contract for furnishing seven horse-drawn engines, three motor-driven aërial trucks and three fuel wagons be awarded to the American La France Fire Engine Co., Inc., 17 Battery Pl. New York, at its bid of $79,995. Noted Mar. 4.

Fire Equipment Bonds—Long Branch, N. J.—The city plans to issue $32,000 in bonds, the proceeds to be used for the construction of a fire station, the purchase of motor apparatus, and the installation of an alarm system.

+Dike—Newark, N. J.—The Essex County Mosquito Extermination Commission, 790 Broad St., Newark, has awarded the contract to J. R. MONOHAN, Red Bank, at 22.50c. per lin.ft. for the construction of about one mile of dike in Newark meadows.

Motor Fire Equipment—Easton, Penn.—D. W. Nevin, Mayor, has sent a recommendation to the City Council that it take steps toward completing the motorization of the fire department. T. P. Ricker is Ch., Fire Dept.

Mine Drain—Hazleton, Penn.—The Lehigh Valley Coal Co. has ordered preliminary surveys to be made for the construction of 5½ miles of tunnel for draining the Hazleton coal basin into Butler Valley. The estimated cost is $3,000,000.

+Package Elevators—Philadelphia, Penn.—The Department of Wharves, Docks and Ferries has awarded the contract for the installation of package elevators at the Southwark piers to the LINK BELT ENGINEERING CO., at $15,250. Noted Mar. 18.

★Competition for Engineers and Architects—Pittsburgh, Penn.—(Official)—Applications will be received until 1 p.m., Apr. 10, from engineers, architects and landscape architects for entrance in a competition for designing an entrance to Schenley Park. Committee on Competition, 634 Oliver Bldg., Pittsburgh. See advertisement under "Contracts to Be Let."

Subway—Pittsburgh, Penn.—Plans have been completed by A. D. Neely, Consult. Engr., for the construction of a twin tube subway from East Carson and Third St. to the Pittsburgh Ry. Co.'s southern portal. The estimated cost is $1,927,854.

Dredging and Bulkhead—Norfolk, Va.—Walter H. Taylor, City Engr., has sent a recommendation to the board of control urging the strengthening of the eastern bulkhead and dredging the slips at the Roanoke dock.

Motor Fire Apparatus—Wheeling, W. Va.—The Fire Committee has asked the City Council to authorize a bond issue of $100,000 for the motorization of the fire equipment.

Motor Fire Apparatus—Charlotte, N. C.—A special committee of the Board of Aldermen is receiving bids for furnishing the fire department with an aërial truck. From $9000 to $10,000 will be spent. A. H. Wearn is City Clk.

Drainage Bonds—Wilmington, N. C.—Bids will be received by M. F. H. Gouverneur, Secy., County Drainage District No. 1, for the purchase of $21,000 in bonds.

Drainage—Shrewsbury, La.—Bids will be received until Mar. 30 by the Board of Commissioners, Fourth Jefferson Drainage District, for constructing canals and other necessary work in Sub-Drainage District No. 2. Ernest Arnoult is Secy.

+Drainage—White Castle, La.—The contract for the construction of the White Castle drainage canal has been awarded to W. H. LAWES, at 4.75c. per cu.yd. A bond issue of $60,000 was recently voted to defray the cost of this project.

Elimination of Grade Crossing—Alliance, Ohio—Bids will be received until noon, Apr. 6, by James T. Ricard, Dir. Pub. Ser., for the construction of a reinforced-concrete subway under the tracks of the Pennsylvania R.R. at Arch St. The estimated cost is $100,000.

Docks—Cleveland, Ohio—The city plans the construction of municipal docks on the land fronting upon Lake Erie and controlling Cleveland's inner harbor. The title to this tract of land, 30 acres, has recently been awarded to the city after a 21-year legal battle with the Pennsylvania, Lake Shore & Michigan Southern and Big Four railroads.

+Dredging—Cleveland, Ohio—The Board of Public Service has awarded the contract for dredging in the Cuyahoga River to the GREAT LAKES DREDGE & DOCK CO., at $40,680. Noted Mar. 11.

+Coal Station—Cleveland, Ohio—The city has awarded a contract to the MASTER & MULLENS CONSTRUCTION CO., 454 Rose Bldg., at $38,000, for the construction of a three-story coal station on Division St.

Dredging—Mansfield, Ohio—C. L. Bushy, County Engr., has been commissioned to make surveys in Richland and Ashland Counties for 13 miles of dredge work. The estimated cost is $65,000.

Retaining Wall and River Improvements—Tiffin, Ohio—(Official)—Bids will be received until noon, Apr. 20, by William Heller, Dir. Pub. Service, for deepening, widening and straightening the Sandusky River in the city of Tiffin. In addition to the specified excavation separate bids will be received for concrete retaining walls.

Creek Improvement—Wooster, Ohio—The Commissioners of Summit and Wayne counties are contemplating dredging and widening Chippewa Creek. Estimated cost, about $50,000.

Dredging—Hartford City, Ind.—Bids will be received until Apr. 20 by Frank Wallace, Supt. of Construction of Blackford County, for dredging Lick Creek. The estimated cost is $48,000.

+Gymnasium—Beloit, Wis.—Beloit College has awarded the contract for the construction of a gymnasium, containing swimming pool, to JOHN SCHNEIBERG, Beloit. E. D. Eaton is Pres.

Motor Trucks—Milwaukee, Wis.—See item under "Garbage."

Peshtigo, Wis.—The Board of Education contemplates the construction of an addition to the Peshtigo High School. Estimated cost, $45,000.

Shiocton, Wis.—Plans are being prepared by Anderson & Williams, Arch., Green Bay, for rebuilding the high school recently destroyed by fire. Estimated cost, $75,000.

Missouri Valley, Iowa—(Official)—Bids will be received until 3 p.m., Mar. 30, by J. S. Dewell, Secy. of Bd. of Education, for the construction of a high school. Estimated cost, $70,000. Noted Feb. 11 and Mar. 18.

✚Sioux City, Iowa—(Official)—The contract for the construction of a four-story building has been awarded to EGLEY & PAYETTE, Sioux City. Benttler & Arnold, Davidson Auto Blk., is Arch. Noted Feb. 25.

Fertile, Minn.—F. E. Broomhall, Arch., 710 Alworth Bldg., Duluth, has prepared plans for the construction of a school. Estimated cost, $40,000. Noted Feb. 4.

Lincoln, Neb.—The Board of Education has voted to issue $600,000 and $200,000 in bonds for the construction of a high school and grade schools, respectively.

✚Jefferson City, Mo.—The contract for the construction of a seven-story, 60x91-ft. bank and office building for the Jefferson Investment Co. has been awarded to MILLER & LOGAN, Carthage. Estimated cost, $125,000. Noted Oct. 1 and 29, and Dec. 3.

Kansas City, Mo.—Plans are being prepared by J. G. Braecklein, Arch., 315 Massachusetts Bldg., for the construction of a six-story addition and nurses' home on McCoy Ave. for the German Hospital. The estimated cost is $150,000. Noted Dec. 24.

St. Louis, Mo.—The Westminister Presbyterian Church will construct an auditorium at Union and Delmar Blvd. The estimated cost is $70,000. J. F. Cannon is Pastor.

Cleburne, Tex.—The citizens have voted to issue $130,000 in bonds, the proceeds to be used for the construction of schools.

Ogden, Utah—The Board of Education plans to hold an election to vote on the question of issuing $450,000 in bonds. The proceeds will be used for the construction of additions and improvements to schools in Ogden. John M. Mills is Supt. and L. S. Hodgson is Arch.

Olympia, Wash.—The Legislature has approved the following appropriations for state buildings: $128,000 for two ward buildings at the Institute for Feeble-Minded; $75,000 for a building at the State School for Blind; $60,000 for buildings at the State School for Girls; $50,000 for improvements at the Bellingham Normal School; $50,000 for buildings at the Cheney Normal School.

Seattle, Wash.—The Colisium Co. is having plans prepared by B. Marcus Pretica, Arch., Empire Bldg., for the construction of a motion-picture theater on Pike St. and Fifth Ave. The estimated cost is $600,000. J. L. Gottstein is Pres. of the company.

Grants Pass, Ore.—(Official)—Bids will be received about Apr. 1 by E. E. McClaran, Arch., 525 Lumber Exchange Bldg., Portland, for the construction of a three-story, 64x130-ft. court house. Estimated cost, $100,000. Noted Mar. 4.

Junction City, Ore.—The Directors of the Junction City Hotel plan to rebuild the hotel which was recently destroyed by fire. Estimated cost, $60,000.

✚San Francisco, Calif.—The contract has been awarded to FARRELL & REED, at $55,500, for the construction of a museum in Golden Gate Park for the California Academy of Sciences.

Visalia, Calif.—The Southern Pacific Co. plans to construct a passenger station. Estimated cost, $40,000. W. Hood, San Francisco, is Ch. Engr.

New Westminster, B. C.—Plans have been prepared by F. N. Senecal, Arch., Hart Bldg., for the construction of a municipal market building at 10th St. The estimated cost is $40,000.

The Sanderson-Cyclone Drill Co. is the successor to the Cyclone Drill Co. The officers of the company are: R. R. Sanderson, Pres. and Gen. Mgr.; Will Ford, Vice-Pres.; and Paul Hildebrant, Secy. and Treas. The officers, together with a number of other men who have been interested in and advocates of the big blast hole drill business, are all thoroughly familiar with either the manufacturing or sales organization and are able to render expert advice, from a long experience, to contractors and others who may be in need of such assistance.

The National Railway Appliances Association, which organizes the exhibits of railway materials and appliances at the annual meetings of the American Railway Engineering Association and the Railway Signal Association, held its annual meeting in Chicago in March. Officers were elected as follows: Pres., Philip W. Moore, P. & M. Co., Chicago; Vice-Pres., Henry M. Sperry, General Railway Signal Co., Rochester, N. Y.; Secy., B. V. Crandall, Chicago.

Dorchester Tunnel, Section H, Boston, Mass.

✚Bids were received Feb. 25 by the Boston Transit Commission for the construction of the Dorchester Tunnel, Section H, Contract No. 550, from: (A) Oscar Daniels Co., Woolworth Bldg., New York, N. Y.; (B) P. McGovern & Co., Tremont Bldg., Boston; (C) Rowe Contracting Co., Brighton, Mass.; (D) James E. Gaffney, 101 Tremont St., Boston; (E) Thomas-Harmon Co., Railway Exchange Bldg., St. Louis, Mo.; (F) James J. Coughlan Co., 43 Tremont St., Boston; (G) Hugh Nawn Contracting Co., 82 Savin St., Roxbury; (H) Coleman Bros., Boston; (I) Lou B. Cleveland, Cleveland Bldg., Watertown, N. Y.; (J) Bruno & Petitti, 18 Tremont St., Boston; (K) William J. Barry, 431 Ashland St., Roslindale; (L) Jeremiah P. O'Riorden, 1 City Sq., Charlestown; (M) H. P. Converse & Co., 88 Broad St., Boston; (N) T. A. GILLESPIE GO., 50 Church St., New York, (contract awarded). The item bids were as follows:

MORE HIGHWAY CONSTRUCTION THAN EVER

Preparations have been made by several states to spend more money than ever before for state highways or aid to counties in constructing improved roads. In some states the movement is just under way, but from practically every section of the Union there is a disposition to spend large sums of money in building new roads. In California about a third of the $18,000,000 bond issue will be spent this year. In West Virginia it is planned to spend about $4,000,000, while Kentucky will spend a like amount. Ohio, where there is now $8,000,000 of road work under contract, will spend $2,000,000 more and in New York $15,000,000 will be spent. In a few of the states no direct state aid has been given but the counties are exerting themselves toward securing financial aid for road improvements. A compilation is given below of the sum which will be spent by the several states and the officials in charge of highway work:

Maine—Chief Engineer State Highway Commission, Paul D. Sargent, Augusta. I. W. Barbour, Asst. Engr., P. L. H. Hardison Asst. Engr., A. J. Wiggin Supt. of Maintenance. There will be an appropriation of $500,000 by state. The state and counties will also contribute $300,000 each for state aid roads.

New Hampshire—State Superintendent of Highways, Chase R. Whitcher, Concord. Will spend $275,000 for highways during the year.

Massachusetts—State Highway Commissioners, William D. Sohier, Boston, Frank D. Kemp, Springfield, James W. Synan, Pittsfield. Chief Engineer, Arthur W. Dean, Winchester. About $2,500,000 will be spent for road construction during the year.

Vermont—State Highway Commissioner, Stoddard B. Bates, Franklin, Vt. An expenditure of $450,000 for highways is contemplated during the year.

Rhode Island—Engineer State Board of Public Roads, Irving W. Patterson, Providence. No appropriations made for constructing new roads this year, only for maintenance of roads already constructed.

Connecticut—State Highway Commissioner, Charles J. Bennett; Deputy Highway Commissioner, Richard L. Saunders (in charge of construction), Highway Superintendent, W. LeRoy Ulrich (in charge of repairs and maintenance). Appropriation of $1,000,000 has been made for highways.

New York—State Engineer and Surveyor, Frank M. Williams; Deputy Engineer, H. E. Breed, both of Albany. The Legislature has appropriated $10,000,000 for new state highways. It is expected that $3,500,000 will be allowed for repairs and maintenance and that $1,500,000 will be spent for the construction of highways by state and county aid.

New Jersey—State Highway Engineer, R. A. Meeker; State Road Commissioner, E. A. Stevens, both of Trenton. About $500,000 will be spent for highway construction during the year.

Pennsylvania—State Highway Commissioner, Edward M. Bigelow; Chief Engineer, Samuel D. Foster, both of Harrisburg. No appropriations made as yet for highway construction.

Delaware—State Highway Commissioner and Engineer Newcastle County, James Wilson, Wilmington. The counties (three) can draw $10,000 each from the State Treasurer provided each county raise and spend $20,000 for highway construction.

Maryland—Chief Engineer State Roads Commission, Henry G. Shirley, Baltimore. An expenditure of $2,000,000 for highway work is planned.

Virginia—State Highway Commissioner, G. P. Coleman; Asst. Commissioner, C. B. Scott, both of Richmond. About $1,750,000 has been appropriated for highway construction.

West Virginia—Chief Road Engineer, A. D. Williams, Morgantown, W. Va., Kanawha County, L. C. Massey, Clk., has advertised for and will receive bids on 17½ miles of hard surface (road) construction up until April 10. They have called for a bond issue to be voted on April 24, for $350,000 to cover this construction. Marshall County, T. J. Bartrug, Engr., Moundsville, will spend $50,000 on macadamized roads and bonds have been voted. Wetzel County, Grant District, will spend $90,000 on grading, Blake Taylor, Engr., Jacksonburg. A bond issue is called in Lincoln District, Marion County, J. Russell Wilson, Engr., Washington, Penn. Work heretofore contracted in Fairmont and Mannington Districts in Marion County, which have voted $700,000 in bonds, will be completed this year. Ohio County will spend $170,000 on road construction. Wayne County will construct 2½ miles of brick road between Cabell County line and Kenova. A $500,000 bond issue is contemplated in Logan County and petition for a $600,000 bond issue has been filed in Mercer County, George Hilmon, Princeton, Engr. A bond issue of $165,000 was voted on Mar. 20, in Big Creek District, McDowell County. W. J. Welch, Engr. A $47,500 bond issue is being contemplated in Lubeck District, Wood County, Burdette Woodyard, Engr., Parkersburg. There will be spent during the year in the state on roads in addition to the above, approximately $2,000,000, and approximately $600,000 will be spent on bridges.

North Carolina—State Geologist and State Highway Commissioner, Joseph Hyde Pratt, Chapel Hill. An appropriation of $10,000,000 for state highway work is expected.

South Carolina—There is no state highway work. In most cases the roads of several counties are managed by County Commissioners.

Georgia—State Highway Engineer, T. P. Stanley, Atlanta. The State does not appropriate any money for highway construction, but allows each of the counties to use the convicts who are able to do manual labor. The counties appropriate the needed funds for the construction and maintenance of roads.

Florida—The Boards of County Commissioners of the respective Counties attend to the construction and maintenance of roads.

Alabama—State Highway Engineer, W. S. Keller; Asst. State Highway Engineer, R. P. Boyd, both of Montgomery. About $400,000 will be spent for state aid roads.

Mississippi—No State Highway Commission. The Boards of Supervisors of the various counties authorize the Supervisors Districts to issue bonds for road improvement in the district.

Louisiana—Chief State Engineer, Frank M. Kerr; State Highway Engineer, W. E. Atkinson, both of New Orleans. The State will spend $150,000 for road construction.

Kentucky—State Commissioner of Public Works—Robert C. Terrell; First Asst. Highway Engineer, R. H. Reese, both of Frankfort. An additional tax of five cents will net about $600,000 which will be apportioned to several counties, the state paying half and the county, half. In addition five counties have voted bonds aggregating $1,500,000 and 13 other counties will vote on $2,015,000.

Tennessee—County Engineer, E. G. Buck, Jackson, Tenn. No definite amount has been appropriated for road construction. The General Assembly proposes to enact laws providing for a State Highway Department and to improve roads on the state aid plan.

Ohio—State Highway Commissioner, Clinton, Cowen, Columbus. About $2,250,000 has been appropriated for road construction. Approximately $8,000,000 worth of road work is now under contract.

Indiana—County Engineer, C. E. Cheney, Indianapolis. Road work is not done by the State but by the township within which the road lies. Townships of Marion County will spend about $200,000 on the construction of new roads this year, and the County will spend about $150,000 on the maintenance of existing roads.

Michigan—State Highway Commissioner, Frank F. Rogers, Lansing. No appropriations made as yet for road construction.

Illinois—Chief State Highway Engineer, William W. Marr, Springfield. The State will spend $1,000,000 for road work this year.

Wisconsin—Chief Engineer, Wisconsin Highway Commission, A. R. Hirst, Madison, Wis. About $4,000,000 will be spent for road work this year. One third of this amount will be furnished by the State and two-thirds by the Towns and Counties.

Iowa—Highway Engineer, Thomas H. MacDonald, Des Moines.

Minnesota—State Engineer, George W. Cooley; Deputy State Engineer, J. H. Mullen, both of St. Paul. The State will spend about $1,500,000 for road work this year.

Kansas—State Engineer, W. S. Gearhart, Manhattan.

Nebraska—State Engineer, Donald D. Price, Lincoln. No appropriations have been made for road work.

South Dakota—State Engineer, Homer M. Derr, Pierre, S. D. There is no state fund for highway work, but $1,229,000 has been levied by the various counties.

North Dakota—State Engineer, Jay W. Bliss, Bismarck, N. D. There is no state supervision of highway construction in this state. The Highway Commission acts as an advisory board. No appropriations have been made for road work.

Wyoming—State Engineer, J. B. True, Cheyenne, Wyo. No direct expenditures for road work by the State but the Counties will spend about $400,000.

Missouri—State Highway Commissioner, Frank W. Buffum, Jefferson City, Mo.

Texas—State Reclamation Engineer, Arthur A. Stiles, Austin, Tex. Roads are built by the various counties.

Colorado—Engineer Roads and Bridges, J. E. Maloney; State Highway Commissioner, T. J. Ehrhart, both of Denver. About $200,000 will be spent by the State and $1,500,000 by the Counties for constructing and maintaining roads this year.

New Mexico—State Engineer and State Highway Commissioner, James A. French, Santa Fé, N. M. The State will spend $120,000 and the counties, $400,000, for the construction of roads this year.

Utah—State Engineer, W. D. Beers; State Road Engineer, E. R. Morgan, both of Salt Lake City. The state plans to spend $500,000 or over for road work during the year.

Nevada—State Engineer, W. M. Kearney, Carson City.

Arizona—State Engineer, Lamar Cobb, Phœnix, Ariz. An appropriation of $396,000 has been made for road work this year.

Washington—State Highway Commissioner, William R. Roy; Chief Engineer State Highway Commission, James Allen, both of Olympia. The State Legislature has appropriated $2,150,288 and re-appropriated $153,640 for the construction and maintenance of state highways and $4,000,000 for the construction and maintenance of other permanent highways. In addition the various counties will spend about $4,000,000 for constructing roads and bridges. The above does not include any expenditures that may be made within the limits of incorporated cities or towns.

California—State Engineer, W. F. McChue; Highway Engineer, Austin B. Fletcher. The state will spend about $5,000,000 this year on highway improvements.

PRICE CHANGES AND THE BUSINESS OUTLOOK

Construction work looks more promising than for many months, but there has been such a dearth of anything like normal construction for at least seven months that contractors are hungry for work, and are taking it at extremely low figures. It is evident that a good deal of work will come out later in the year, particularly by municipalities who have been advised to postpone construction, and much of this will necessarily be at materially higher prices. It seems evident that more concrete road construction will be done this year than ever before. The low cost of other materials, notably cast-iron pipe, is responsible for considerable work.

Orders for war materials have been the chief matter of interest in the iron and steel market, and while the tonnage involved is not large, the amount of money which will be expended in machine shops for the manufacture of war materials is enormous.

The improvement in financial conditions has enabled municipalities and governments to put out long-time bonds, and on a more favorable basis than last year. The general financial situation has decidedly improved. A month ago there was plenty of money for temporary needs, but comparatively little for long-time financiering. There is still a plethora of loanable funds for day-to-day needs, and quite a little capital is seeking investments. The unique conditions of the United States in financing South American countries, as well as European countries which formerly had been able to secure their funds in London markets or at home, argues well for an expansion of foreign trade.

The iron trade has shown slightly more activity, the output of iron during February showing an increase of more than 10%, compared with January and a decrease of only 10% compared with February of last year. The unfilled orders of the United States Steel Corporation increased during February, and at the end of the month were larger than at the end of July, 1914—just previous to the breaking out of the war. The steel trade is running at about 60% of capacity, although in some departments, such as fabricated steel, the ratio of operations comes far below this proportion. Pig iron business was uniformly dull throughout the month, but some encouragement has been noticed within the last few days.

Railroads are not large buyers of steel products, but are more interested in the market than they have been for some time. Then, too, there has been a change of sentiment toward the railroads, and not as much hostility as formerly. Few car orders have been reported, chiefly because the railroads now have 300,000 idle cars on their lines, but it is lamentable that the railroads have allowed their equipment and motive power to deteriorate in the way it has. Should there be a return to anything like normal traffic conditions, the motive power and rolling stock of most of the lines at least will be entirely inadequate to meet the demand. A few of the trunk lines are making improvements suspended some time ago, but most of them are attempting to improve the maintenance which has necessarily been allowed to slacken.

Metals show an improvement both in demand and price. Copper is squarely at 15c., with a very good foreign demand and slightly better domestic inquiries, although these latter are not large. Lead is higher and spelter is exceedingly scarce. The sharp fluctuations in the tin market are caused by a shortage of the supply in the United States, but this will be remedied.

Shipbuilding contracts have been fairly large, a number of boats being planned both on the Atlantic Seaboard and the Great Lakes. Some plants which have been idle for a number of years have been rehabilitated.

The phenomenal returns of foreign trade are highly gratifying. In February alone, the United States exported $170,000,000 more worth of goods and supplies than was imported. Moreover, there will be less money spent by American tourists in Europe this year than ever before since the Civil War.

Preparations for phenomenal wheat crops are being made, and it is evident that even with a bumper crop, prices will be unusually high.

The announcement that one of the shrewd men of the cement trade, E. M. Hager, intends to establish a chain of cement mills across the country, particularly in the undeveloped country, is simply an indication that competent judges believe business is going to be considerably more active.

Activity in the Pittsburgh district is evident. Following the announcement that the Allegheny County Commissioners would at once begin construction work involving the outlay of $5,000,000, the City Council of Pittsburgh agreed with the Baltimore & Ohio R.R. and the Pittsburgh Rys. Co. to begin work on the elimination of the 33d St. grade crossing at Liberty Ave. The estimated cost is $500,000. Besides this the city will start the work of raising all the streets between Eighth St. and the Monongahela and between the Allegheny River front and Liberty Ave. The municipal improvement will be started by Apr. 1, as most of the damage waivers given by property owners will expire on that date and the city is desirous of keeping out of any unnecessary litigation. It entails not only the raising of several miles of thoroughfares in the very heart of the downtown section of Pittsburgh but makes necessary the razing, rebuilding or extensive alterations of all the factories, mills, stores, lofts, hotels, dwellings and, in fact, every structure in the district. With this job, the grade crossing elimination, the construction of the new tunnel through Mt. Washington, the new City-County Bldg., the William Penn Hotel and the Schenley High School all under construction at the same time, the money spent will amount to considerably more than ten millions. The coming summer promises to be the best since the summer of 1912 when there was a labor famine in the Pittsburgh district.

Highway building will be more active than ever, a report on a previous page shows that the various states will spend for state aid highways about $60,000,000. At this the appropriations for some large states—notably Pennsylvania—have not been received.

Will There Be a Scarcity of Labor?

The repeal of the objectionable features of the Alien Labor Clause by the New York Legislature has permitted construction work on the New York subways to go forward. Preference is given to native labor, but unfortunately very few of the men who will work for the wages of the alien are physically able to perform the work. There does not seem to be the great surplus of rough labor which one would naturally expect with so many mechanics out of work. This is accounted for by the returns of the Department of Commerce and Labor, which show that the steerage passengers going east across the Atlantic outnumber those coming into the United States.

Immmigration statistics for the past several months have shown a steady falling off in the number of aliens arriving at these shores, and although there is no pressing need for laborers, some are seriously questioning whether there will be a sufficient number to care for the work when prosperity returns.

Since the first canals were built, practically the earliest important construction work in the United States, the heavy manual labor has been done by recently arrived immigrants. Most of these came from Europe, but Africa contributed her share, sending early plantation laborers to the South, and in the early '50's there was a migration of Orientals. The discovery of gold in California drew adventurers from all parts of the world, and the high record of 427,000 aliens admitted in one year was established in 1854. During the Civil War, immigration was materially reduced, and fell to 72,000 in 1862. The record of '54 was unequaled until 1873, when 459,000 aliens were admitted, and a new high record was again set up in 1881, when 669,000 came to these shores; but this was exceeded in the following year. This record stood until 1903, since when the records have been repeatedly broken, although that established in 1907, when 1,285,000 aliens were admitted, still stands. In the seven months ending with January, 1915, only 296,000 arrived, compared with 883,000 in the corresponding period last year. Further than that, departures in the first seven months of third-class and steerage passengers actually exceeded the arrivals, so there has been a distinct loss on immigration.

There are several reasons to account for this, namely, the war in Europe and the impossibility of some countries sending any immigrants, such as Russia, which in the six months ending Jan. 1, 1914, sent us 175,000, compared with 25,000 in the corresponding period in 1915. Emigration from Austria and Hungary both was cut off by the lack of transportation, and the fall in Italian migration to this country from 173,000 in the last six months of 1913, to 27,000 in the last six months of 1914, is more readily traceable to economic conditions in this country than from the lack of transportation facilities.

When the war is over, as it will be some day, there will be a vast amount of new construction necessary in Europe, but it is scarcely probable that Italian laborers will be called to repair damage in northern France, Belgium or Poland. Such reconstruction will necessarily be slow. The high wages offered by America in times past cannot be paid by those countries, but in other European countries, where the ravages of war have not taken place, if there be such, there will be no great amount of work to be done. As most of the efficient labor for construction work has come from Italy, there is little doubt that that country will continue to send us laborers when we need them. From the Scandinavian peninsula will be drawn farmers, and from Hungary and Austria other forms of labor which have been so useful in the past. While there may be a temporary shortage, this is not likely to continue for any length of time.

CEMENT, LIME AND BRICK

Sales agents in the New York market are not at all optimistic over the outlook. So much cement has been sold for forward delivery at low prices that it will take a vast amount of construction work to bring quotations to anything like normal. The low quotation at $1.23 New York, equivalent to about 60c. per bbl. in bulk at the mill, continues, and, although many dealers have filled their available storage places, it has not had the effect on the storehouses and the mills that was expected. Numerous salesmen from a mill which has been one of the important factors in cutting quotations for a number of years, are seeking positions, and this leads to the belief that this price cutter has been eliminated for the time being. The announcement that E. M. Hagar, former President of the Universal Portland Cement Co., is forming a company to build a chain of cement mills across the country, is a reflection of the optimism in the West. It is known that the cement mills there have had much more business than the eastern mills, and the excellent outlook for concrete highway construction this year promises well for the maintenance of quotations in that field. Cement prices, less the charge of 40c. made for bags, are as follows:

Chicago	$1.11	Boston	$1.46
Detroit	1.19	Cleveland	1.16
Jersey City	0.74	Duluth	1.32
New York	0.82	Minneapolis	1.30
St. Paul	1.30	Pittsburgh	1.00

Brick—Prices are steady and there seems to be a better demand. It is probable that business will show an improvement compared with last year, but this has not been reflected in the price. It would seem unlikely that any considerable advance could take place in the near future, but many men believe the present year will witness the greatest building boom since 1906. Hudson River common brick sell at $5.50@6, New York.

Gravel—An improvement in the demand is evident and prices are firm. Ordinary gravel sells at 85c., but subway gravel is held at $1.15. These prices are for barge loads of 500 cu.yd. delivered alongside of dock, New York.

Lime—It is evident that business is better. For what business is doing prices remain unchanged at 97c. per bbl. for state common, 200 lb. net; $1.37 for 30 lb. barrel; $1.55 for 300 lb. finishing; $1.10 for 200 lb. finishing; and $1.72 for 350 lb.

Crushed Stone—Prices are steady at 80@85c. for 1½-in. stone and 90@95c. for ¾-in. stone.

IRON AND STEEL

Pig Iron—The extremely quiet condition of pig iron which has prevailed ever since November continued until the latter part of the month when Buffalo furnaces reduced prices and obtained orders amounting to about 175,000 tons, making concession in prices of about 50c. a ton. Advices from that point indicates a large business in No. 2X foundry at $12, while No. 2 was quoted at $11.75. The principal buyers were foundries in New York, New England and New Jersey, and in some cases sales went into the second half of the year. It was expected that producers in the Central West and Chicago would follow the example of Buffalo when, late in the month, Buffalo interests reëstablished the old prices. This arrangement however, is understood to be temporary. Virginia furnaces are reported to have sold a number of small lots of foundry for Eastern and New England delivery for shipment over the last half of the year. Nearly all of the Tennessee iron sold of late was in warrant yards, and sales were made as low as $9 for No. 2 Foundry, in Birmingham. A hopeful tone is voiced by the leading producers and large business is confidently predicted.

Prices are slightly lower and for lots of 100 tons or over at the points named are as follows: Cincinnati, Southern Foundry No. 2, $12.25@12.75; Northern Foundry, No. 2, $14@14.50; Northern Foundry No. 3, $13,75@14. In New York quotations are as follows: No. 2X Northern Foundry, $14@14.25; No. 2 plain Northern Foundry, $13.75@14. No. 2 Southern Foundry, delivered, $14@14.25. In Birmingham Southern Foundry No. 2 is $9.25@9.75. In Chicago, Northern Foundry is $13@13.25. In Pittsburgh bessemer iron is $14.55 and basic $13.45, including the 95c. freight rate from the valley to the Pittsburgh district.

Steel Rails—Few orders of any moment have been booked for standard rails. The chief interest in the steel market is in the placing of the Pennsylvania orders. The railroads do not seem to be in any hurry about placing their orders, and evidently are trying to bargain for better cropping. Some considerable business has been transacted in light rails, and a few export orders have been placed. It is rumored that some business will be booked for Argentine as a result of the credit established by New York bankers. Prices are of course unchanged. The standard prices for lots of 1000 tons are as follows: Standard sections of bessemer, $28; openhearth, $30, both f.o.b. Pittsburgh, per net ton. Girder rails, 30-ft. length, are $36.40 per gross ton, and 60-ft. length $38.40 per gross ton, both f.o.b. New York. Other quotations f.o.b. Pittsburgh for large lots, the price being given in cents per pound, are as follows: Standard sections 1.25c., 25 to 35 lb. 1.15c., 15 to 20 lb. 1.20c., 12 to 13 lb., 1.25c., 8 to 12 lb. 1.30c. Relaying rails from New York are quoted at a slightly higher figure of $19.50.

Structural Shapes—The fabricating shops of the country are operating about 35% of capacity, whereas the steel trade is working for nearly 70% of capacity. Bridge work is coming out very slowly, and large buildings are scarcely being figured. There are a few roof trusses, but these do not run into tonnage. One of the peculiarities in trade is that it is possible to secure shapes with a few punching, or slightly fabricated, in the New York market at a cheaper price than plain material can be had. For shipbuilding work there is a fair demand but other than this the construction which has developed so far this year is for work where there will be little structural steel used. Quotations are as follows: I-beams, 3 to 15 in.; channels, 3 to 15 in.; angles, 3 to 6 in.; tees, 2- to 3-in. and over, $1.15. Other quotations, including I's over 18 in., H-beams 18 in., channels over 15 in., angles over 4 in., $1.30. Tees, $1.25. Deck beams and bulb angles, $1.50; handrail tees, $1.95. Cutting to specified length is charged at the following rate: Cutting 3 ft. to 2 ft. inclusive, 25c. per 100 lb.; 2 ft. to 1 ft. inclusive, 50c. per 100 lb.; less than 1 ft., $1.55. No charge is made for cutting to lenghs over 3 ft. In Chicago the base price is $1.34, in New York $1.26 to $1.31, in Philadelphia $1.25 to $1.30, and San Francisco $2 to $2.05.

Plates—Continued activity at the shipbuilding plants, together with the knowledge that there will be a great deal more work in this line within the next few months, gives much promise to the market. The price is supposed to be $1.20, Pittsburgh, and in fact $1 a ton higher all around than last month, which would mean $1.35 to $1.40, Philadelphia; $1.36 to $1.41, New York, and $1.35 to $1.39, Chicago, but this price is not closely adhered to, and there seems to be considerable cutting of quotations. Japan is figuring on 15,000 tons additional, following the order for 22,000 tons early in the month. Car-building work is very light, but there have been a few orders from Western roads for tank cars, and it is evident that the motor-car business will increase. The ability of railroads to finance many improvements should be most helpful to the plate market in the near future. Shipbuilders have taken at least 75,000 tons in the last few weeks, and more orders of like character are being figured. In the Pittsburgh district the plate mills are operating to about 70% of capacity.

Cast-Iron Pipe—Business continues fair. Developments are more noticeable in the Mississippi Valley and the Central West, than a month ago, and are relatively less in the East. There are a number of fair sized inquiries in the market, and the 13,000-ton order for Cleveland is peculiar from the fact that it involves some large sized pipe—36-, 42- and 48-in. Prices are slightly higher in Birmingham, but easier in Chicago. The following quotations are given per net ton: Birmingham, 4 in., $20, 6 in., $18; Chicago, 4 in., $25.50, 6 and 12 in., $23.50, 16 in. and upwards, $23; in New York, 6 in. and larger, $20. Gas pipe is $1 a ton higher in all markets.

Pipe—The market is steadier than a month ago and operations are larger, the ratio being about 70% of capacity. Quite a few orders of importance are in sight. It is evident that the fear about not having sufficient spelter to galvanize pipe was warranted, but the mills are holding back shipments on this class of material as much as possible. Prices on black pipe are low, considering the cost of materials, and the same applies to galvanized pipe, but, of course, these are high by comparison. Discounts are unchanged, and for large orders, amounting to carload or more, are as follows:

	Black	Galvanized
¾- to 2-in. steel, butt welded	80%	69½%
2½- to 6-in. steel, lap welded	79%	68½%
7- to 12-in. steel, lap welded	77%	66½%

At these discounts, the net prices of pipe per foot, in large lots, at Pittsburgh are as follows:

	Cents			Cents	
Diameter	Black	Galvanized	Diameter	Black	Galvanized
¾-in.	2.20	3.50	5-in.	31.00	47.00
1-in.	3.40	5.20	6-in.	40.40	61.00
1¼-in.	4.60	7.00	7-in.	55.00	80.00
1½-in.	5.50	8.40	8-in.	57.50	84.00
2-in.	7.40	11.15	9-in.	79.50	$1.16
2½-in.	12.20	18.60	10-in.	95.00	$1.38
3-in	16.10	24.20	11-in.	$1.06	$1.55
4-in.	22.90	34.50	12-in.	$1.17	$1.70

Sheets—The mills are operating to about 65% of capacity, and while galvanized sheets are not so scarce and it is easier to get supplies, deliveries are by no means as backward as they were. Another factor has appeared in the galvanized market, and that is that jobbers and other large consumers who have contracted for a fairly large amount, seeming to have a surplus, are selling at some times at less than the market quotation. This, of course, is having effect on mill quotations, and leads to considerable talk about unevenness in price. The demand is fair, but not as large as a few weeks ago, when the trade was thoroughly scared, and it was feared that consumers would be unable to secure galvanized sheets.

The following quotations are for large lots of sheets in Pittsburgh, and small lots from store, New York.

	Cents per Pound			
	Large lots Pittsburgh		Warehouse delivery New York	
	Black	Galv.	Black	Galv
No. 10	1.55	2.40	....	....
No. 12	1.55	2.50	....	....
No. 14	1.60	2.50	....	....
No. 16	1.65	2.60	2.35	3.25
Nos. 18 and 20	1.70	2.80	2.40	3.40
Nos. 22 and 24	1.75	2.90	2.45	3.55
No. 26	1.80	3.05	2.50	3.70
No. 27	1.85	3.25	2.55	3.85
No. 28	1.90	3.40	2.60	4.00

Steel Shapes—Prices are not as steady as they might be, although the following quotations are supposed to represent the New York market. It is cheaper to buy shapes with a few holes punched in them, as fabricated material, rather than pay the full store price for plain material. In Jobbers' Warehouse, New York, prices are as follows:

	Cents Per Pound
Refined iron:	
1 to 1⅞ in., round and square	1.85
1½ to 4 in. x ⅜ to 1 in.	1.85
1½ to 4 in. x ¼ to 5/16 in.	2.05
Norway bars	3.20
Burdens bar iron	3.15
Soft steel:	
¾ to 3 in., round and square	1.85
1 to 6 in. x ⅜ to 1 in.	1.85
1 to 6 in. x ¼ and 5/16	2.00
Rods—⅝ and 11/16 in.	1.95
Bands—1½ to 6x3/16 in. to No. 8	2.15
Beams and channels—3 to 15 in.	1.90
Angles:	
3 in. x ¼ in. and larger	1.90
3 in. x 3/16 in. and ⅛ in.	2.35
1½ to 2¾ in. x 3/16 in. and thicker	2.00
11½ to 2½ in. x ⅛ in.	2.10
1 to 1¼ in. x 3/16 in.	2.10
1 to 1¼ in. x ⅛ in.	2.15
Tees:	
1½ to 2½x¼ in.	2.05
1½ to 2½x3/16 in.	2.15
3 in. and larger	1.95

Old Materials—The market is very uneven. Advances are the rule in Pittsburgh, in New York there are more advances than declines, but in Chicago the market is undeniably down from last month. A fair demand for cast scrap is noted, but the rolling mills are doing little or no business. The low prices in Chicago are probably due to the oversupply of material, mostly coming from the railroads. This has been unusually large for two or three weeks, and there has been an especially large tonnage of car wheels turned in, which reduced the prices on that market below what they normally would be. In Pittsburgh, dealers are reluctant to sell, preferring to hold stock on hand for higher prices, and those who have stock will not dispose of it at these low figures. Therefore the market is relatively better. Prices in New York per gross ton are as follows:

	Per Gross Ton
Heavy-melting steel scrap	$8.75 to $9.00
Pipes and flues	8.00 to 8.25
No. 1 railroad wrought	10.50 to 11.00
Stove plate	7.75 to 8.00
No. 1 machinery cast	10.50 to 11.00
Wrought turnings	6.25 to 6.50

The Chicago market is, as stated, slightly lower. Quotations are as follows:

	Per Gross Ton
Heavy-melting steel scrap	$9.25 to $9.75
	Per Net Ton
No. 1 railroad wrought	$9.00 to $9.25
No. 2 railroad wrought	8.50 to 8.75
No. 1 cast scrap	9.00 to 9.25
Pipes and flues	6.75 to 7.25
Agricultural malleable	7.25 to 7.50
Railroad malleable	8.00 to 8.50

The higher prices in the Pittsburgh market are reflected in the following quotations:

	Per Gross Ton
Heavy-melting steel scrap	$12.00 to $12.25
Re-rolling rails	11.75 to 12.00
No. 1 foundry cast	12.00 to 12.25
Old car wheels	10.75 to 11.00
Machine shop turnings	8.00 to 8.25
Railroad malleable	10.00 to 10.25

Freight Rates—The freight rates on finished steel products from the Pittsburgh district, including plates, structural shapes, merchant steel, bars, pipe fittings, plain and galvanized, wire nails, rivets, spikes, bolts, black sheets (except planished), chain, etc., are as follows, in cents per 100 lb.: Boston, 18.9c.; Buffalo, 11.6c.; Baltimore, 15.4c.; Cleveland, 10.5c.; Cincinnati, 15.8c.; Chicago, 18.9c.; Denver, Colo., 68.6c.; New Orleans, 30c.; New York, 16.9c.; Philadelphia, 15.9c.; St. Louis, 23.6c.; Minnesota and St. Paul, 32.9c.; Pacific Coast (all rail), 80c.

Steel Sheet Piling—Prices are without change at 1.55@1.60c. per lb. f.o.b. Pittsburgh.

Wire Rope—A fair inquiry leads to the belief that better business may be expected. Discounts are unchanged at 47 and 5% from list for galvanized, and 55 and 5% for bright. At these discounts the net price of wire rope at the mill is as follows:

Diameter in Inches	Price per Foot		
	Cast Steel	Crucible Steel	Plow Steel
2½	$0.75	$0.90	$1.07
2¼	0.61	0.73	0.86
2	0.47	0.57	0.67
1¾	0.39	0.49	0.58
1½	0.28	0.34	0.40
1¼	0.20	0.24	0.27
1	0.13	0.15	0.18
¾	0.08	0.09	0.11
⅝	0.06	0.07	0.08

Wire—A continued heavy demand from abroad is keeping the mills active and specifications against contracts placed at much lower prices by domestic consumers are liberal. Prices are slightly higher, and per 100 lb. f.o.b. Pittsburgh are as follows: Plain wire to retailers, $1.50; galvanized wire to retailers, $2; painted barbed wire, $1.70; galvanized barbed wire, $2.20. Wire nails are $1.75 and galvanized wire nails $3.30.

Coke—In spite of a larger demand, an increased output and a better feeling in the trade, the price is lower than a month ago. Prompt shipments can be had at $1.50@1.55 delivery up to July 1 at $1.65 and contracts for the second half $1.75. Foundry coke is very quiet, selling at $2@2.15 for prompt and $2.25@2.40 for contracts.

CLAY PRODUCTS

Sewer Pipe—No marked change has been shown in the market, although there have been indications of a general improvement. Discounts remain unchanged as follows: 3 to 24 in., 78%; 27 to 30 in., 70%; 33 to 36 in., 65%. At these discounts, net prices are as follows:

PRICE OF SEWER PIPE PER FOOT

Size		Size	
3-in	$0.055	18-in.	$0.418
4-in.	0.055	20-in.	0.495
5-in.	0.088	22-in.	0.66
6-in.	0.088	24-in.	0.715
8-in.	0.1265	27-in.	1.35
10-in.	0.184	30-in.	1.65
12-in.	0.22	33-in.	2.20
15-in.	0.297	36-in.	2.45
18-in.	0.418		

Flue Lining—Conditions are about the same as they were a month ago, discounts being 80 per cent. from list. At this rate, prices are as follows:

FLUE LINING PRICE PER FOOT

Size	Weight in Lb.	Price per Ft.	Size	Weight in Lb.	Price per Ft.
4½x8½-in	14	$0.07	8½x18-in	45	$0.18
4½x13-in	20	0.09	13x13-in	45	0.17
7½x7½-in	15	0.08	13x18-in	57	0.24
8½x8½-in	18	0.09	18x18-in	75	0.40
8½x13-in	28	0.13			

REINFORCING MATERIALS

Bars, Concrete Reinforcing—Inquiries are far more numerous and there is a prospect that much work will come out. The advance of $1 per ton announced, some time ago, for Apr. 1 went into effect raising the quotation to 1.20c., Pittsburgh. Other prices are as follows:

Size	Cents per Pound		
	Mill Shipments Pittsburgh	*Warehouse Pittsburgh	Delivered from *Warehouse New York
¾-in and larger	1.15	1.50	1.95 to 2.00
⅝-in.	1.20	1.65	2.00 to 2.05
½-in.	1.35	1.80	2.15 to 2.20
⅜-in.	1.45	1.90	2.25 to 2.30
¼-in.	1.75	2.20	2.60 to 2.65

*Bars from warehouse are cut to desired length without extra charge.

Triangle Mesh—Prices continue steady and there is a fair inquiry:

PRICE PER 100 SQ.FT.

Style No.	Cross Sec. Area per Ft. Width	Plain Material		Galvanized	
		Carload Lots	Less Than Car Lots and Over 10,000 Sq.Ft.	Carload Lots	Less Th Car Lot and Ove 10,000 Sq.Ft.

42	0.151	1.55	1.88	1.72	2.05
†43	0.101	1.10	1.34	1.23	1.46

†This material is made in regular widths of 18, 22, 26, 30, 34, 42, 46, 50, 54 and 58 in. Standard lengths in rolls are 150, 250, 300 and 600 ft.

Copper—Lack of competition among the large producing interests resulted in higher prices for electrolytic. Another cause for the higher prices was the action of the British Government in taking over all copper which it has prevented from going to Germany. The producing interests are asking 15¾c. delivered thirty days, while there are few buyers at 15½c. Business from abroad has fallen off and the domestic orders for manufactured material continue small. For the first 27 days of March exports from New York amounted to 25,100 tons and imports at Atlantic ports only aggregated 5810 tons.

Tin—A marked advance in the price of tin during the past month has been brought about mainly by the limited amount of imports. The net gain after a sensational rise is about 10c. and the present price being around 47½c. for spot for five ton lots. Imports during March amount to 780 tons and cargoes afloat amount to 2945 tons. The market has been anything but steady, the price having gone as high as 55c. The prospects now appear to indicate a more liberal supply for the United States and consumers are inclined to buy in small quantities, expecting a reaction from prevailing high prices.

Lead—The price for lead has advanced steadily and a firm tone to the market has been evident from the steadiness manifested. Spot was held at 4.15c. New York and 4.10c. East St. Louis with a fair demand.

Spelter—The market for a month past has been unsettled prices advancing as high as 11½c. for spot. Reaction ensued and some sales of 50,000 lb. lots were reported as low as 8½c. for April delivery. Single car loads of spot are quoted at 9¼c. New York and 9⅛c. East St. Louis.

Old Metals—Selling prices of old metals are as follows:

	Cents per Lb.
Copper, heavy and crucible	14.00 to 14.25
Copper, heavy and wire	13.65 to 14.00
Copper, light and bottoms	12.50 to 12.80
Heavy machine composition	11.50 to 11.80
Brass, heavy	9.50 to 9.75
Brass, light	7.65 to 8.00
Clean brass turnings	9.40 to 9.70
Composition turnings	9.75 to 10.25
Lead, heavy	3.80
Lead, tea	3.50
Zinc, scrap	6.50

Miscellaneous Metals—The prices of various metals from jobbers' warehouse, New York, are as follows:

	Per Pound
Brass tubes, iron-pipe sizes:	
½ in.	19.00c.
¾ in. to 3 in.	18.00c.
3½ in.	18.00c.
4 in.	19.00c.
Brass rods	17.00c.
Brass sheets	17.25c.
Solder	35.00c.
Copper tubes	21.50c.
Zinc sheets	14.00 to 14.50c.
Copper sheets	19.75c.
Pig tin (five-ton lots, cash)	60.00c.
Bismuth	$3.75 to $4.00

MISCELLANEOUS

Railway Ties—No change has occurred during the month and shipping conditions remain about the same. First-class standard ties are quoted as follows: 7x9-in. by 8 ft. 6 in., 72c.; 6x8 in. by 8 ft., 63c. These prices are f.o.b. New York.

Rubber—Prices are somewhat easier while the demand is large. The rubber markets have presented many curious phases during the last few years, but none of them more uncertain than for the past few months. Up River Para fine is quoted at 58c., while up-river Para coarse to 47c. Island fine 53 to 54c., Ceylon sheet is 54c. and Ceylon crepe is 65c. Old rubber shows little change. Automobile tires sell at 4¾c., bicycle tires at 3c., airbrake hoses, 2½ to 3c., and inner tubes, 12 to 14c.

RAILWAYS

New York—According to press reports plans are being made by the MacIntyre Iron Co., Sanford, for the construction of a railway from Sanford Lake to Tahawus, N. Y.

Virginia—New York, Philadelphia & Norfolk R.R.—This company is preparing plans for extensive improvements to its system. M. W. Clement, Cape Charles City, Va., is Div. Engr.

Virginia—Radford-Willis Southern Ry.—T. W. Simpson, Engr., is making surveys for the construction of a railway from Radford to Willis, Va., about 25 miles. John L. Vaughan, Shawsville, Va., is Pres. Noted Feb. 25.

West Virginia—Virginian Ry.—Bids will soon be received by this company for the construction of a railway from Stone Coal, W. Va., to Stone Coal Creek, about six miles. H. Fernstrom, Norfolk, Va., is Ch. Engr.

West Virginia—West Fork R.R.—This company is being organized to construct a railway from Fairmont, W. Va., to Monongah and Grafton, W. Va., about 18 miles. Scott C. Lowe, J. A. Jamison and M. A. Fletcher are interested.

North Carolina—Avery Northwestern Ry.—Preliminary work will soon be started by this company on the construction of its proposed railway from Edgemont to Newland, N. C. P. M. Brown, Newland, is Pres. and W. W. Barber, Edgemont, is Mgr. Noted Mar. 18.

North Carolina—Carolina & Northwestern Ry.—According to press reports this company contemplates the improvement and extension of its lines from Newton, N. C. J. W. Fletcher, Jr., Chester, S. C., is Roadway Supt.

North Carolina—Graham County R.R.—E. Philbrick, Cornelia,, Ga., has been retained as consulting engineer for the construction of the proposed railway from Andrews to Robbinsville, N. C.

Georgia—Ocilla Southern R.R.—This company is making surveys for the extension of its line to Macon, Ga. The company now operates a line from Nashville to Rochelle and is constructing a line from Rochelle to Pope City. D. C. Smith, Ocilla, is Gen. Mgr. Noted Dec. 24 and Mar. 11.

Georgia—Ocmulgee Valley Ry.—Preliminary arrangements are being made and work will soon be started by this company on the construction of the proposed railway from Jacksonville, Ga., to Lumber City, Ga., about 20 miles. J. C. Work, Lumber City, is Ch. Engr. Noted Mar. 4.

Alabama—The construction of a 15-mile railway from Tuscaloosa, Ala., to the timber lands, is contemplated by Fox Henderson, Troy, Ala., and associates.

✚Alabama—The Tidewater Securities Corporation has awarded a contract to J. N. GILLIS & SON, Brewton, Ala., for the construction of a railway from Alabama Port to Cedar Point, Ala.

Wisconsin—Minneapolis, St. Paul & Sault Ste. Marie Ry.—The construction of an extension from Dresser Junction to New Richmond, Wis., is contemplated by this company. C. N. Kalk, Minneapolis, Minn., is Ch. Engr.

Wyoming—Beaver Hills Coal Co.—Plans are being considered by this company for the construction of a 10-mile railway from Sheridan, Wyo., to its mines.

Montana—Keating Gold Mining Co.—According to press reports this company will construct a railway from Toston to Radersburg, Mont., about 14 miles.

Texas—J. Shelby, El Paso, Tex., is reported interested in the construction of a 28-mile railway from Sierra Blanca, Tex., to the coal fields.

ELECTRIC RAILWAYS

New Britain, Conn.—The Hartford, New Britain & Meriden Ry. Co. has applied to the Council for a franchise to extend its lines by another route to New Britain.

New Britain, Conn.—The New Britain, Kensington & Meriden Ry. Co. is making arrangements to complete the construction of its electric railway from Meriden to New Britain. E. A. Moore, New Britain, is Pres.

Buffalo, N. Y.—The International Ry. Co. contemplates the extension of its line on South Park Ave. to the south city line. J. C. Sheldon, Buffalo, is Pur. Agt.

Mt. Vernon, N. Y.—The Council has granted a franchise to the Westchester Electric Ry. Co. for the extension of its North Pelham-Mt. Vernon line from the North Pelham village line to Union Corners, East Chester. William B. Wheeler, 519 South Fifth Ave., Mt. Vernon, is Supt.

STREETS AND ROADS

Boston, Mass.—Bids will be received until Apr. 6 by the State Highway Commissioner for the construction of 10,200 lin.ft. of road in Duxbury; 3800 lin.ft. in Grafton, and 5200 lin.ft. in Gloucester. Arthur D. Dean, 15 Ashburton Pl., is Ch. Engr.

Northampton, Mass.—Bids will be received until noon, Apr. 3, by the Superintendent of Streets for 50,000 gal. road oil, 40 to 60% asphalt.

Pittsfield, Mass.—Bids will be received until April 9 by Board of Public Works for ten cars of 45% asphaltic road oil. Louis B. Cummings is Clk. of the Bd.

Revere, Mass.—Bids will be received until Apr. 5 by the Public Works Department for the construction of granolithic sidewalks during 1915. Carl G. Richmond is Supt.

Hartford, Conn.—Bids for state road work were received by the State Highway Commissioner Mar. 22, as follows: Wethersfield Township, about 7860 lin.ft. of bituminous macadam on Maple, Mill and Prospect St., Pierson Engineering & Construction Co., Hartford, $13,390; Olmsted & Olmsted, Inc., East Hartford, $14,757, Leonardo Suzio, Meriden, $12,771; Connecticut Good Roads & Construction Co., New Britain, $14,527; A. Brazos & Sons, Middletown, $13,672; Lane Construction Corporation, Meriden, $12,751; Thomas Kearney, Meriden, $13,282; B. D. Pierce, Jr. Co., Bridgeport, $12,748. Enfield Township, 8650 lin.ft. of three-in. trap rock macadam on South St. A. E. Douglas, Glastonbury, $10,668; Leonardo Suzio, Meriden, $10,816; A. D. Bridge's Sons, Inc., Hazardville, Conn., $9779. South Windsor Township, about 8310 lin.ft. of bituminous macadam on Deming St., Thomas Kearney, Meriden, $20,920; Olin T. Benedict, Pittsfield, $16,319; B. Perini & Co., Ashland, Mass., $17,166; John DeMichiel & Bro., Torrington, $18,588; A. D. Bridge's Sons, Inc., Hazardville, $14,180; Louis Longhi & Bro., Torrington, $18,819; Connecticut Good Roads & Construction Co., New Britain, $16,858; Leonardo Suzio, Meriden, $14,172; A. Brazos & Sons, Middletown, $14,167; Pierson Engineering & Construction Co., Hartford, $17,415; B. D. Pierce, Jr. Co., Bridgeport, $16,352. Bloomfield Township, about 6610 lin.ft. of native stone macadam on the Simsbury Rd., Louis Longhi & Bro., Torrington, $14,945; Connecticut Good Roads & Construction Co., New Britain, $15,159; A. D. Bridge's Sons, Inc., Hazardville, $15,365; A. Brazos & Sons, Middletown, $14,421; John DeMichiel & Bro., Torrington, Conn., $14,247; Robert G. Miller Contracting Co., Hartford, $13,620; also 6879 lin.ft. trap rock macadam and macadam resurfacing on the Blue Hills Rd.; Louis Longhi & Bro., Torrington, Conn., $11,865; Connecticut Good Roads & Construction Co., New Britain, $13,468; A. D. Bridge's Sons, Inc., Hazardville, $11,971; A. Brazos & Sons, Middletown, $12,243; John DeMichiel & Bro., Torrington, $11,548; Robert G. Miller Contracting Co., Hartford, $11,594; John Arborio, New Haven, $11,930; A. C. Sternberg, Jr., Construction Co., West Hartford, $13,413; B. D. Pierce, Jr. Co., Bridgeport, $10,964; Pierson Engineering & Construction Co., Hartford, $13,055. Stamford Township, about 4810 lin.ft. of native stone macadam (a) or gravel (b) on the Long Ridge Rd. Goodman & Trumbull Co., Torrington, (a) $12,481 (b) $9039; A. D. Bridge's Sons, Inc., Hazardville, (a) $11,082; Peter Mitchell, Greenwich, (a) $12,654, (b) $8648; A. Brazos & Sons, Middletown, (a) $9731, (b) $6859; John Arborio, New Haven, (a) $10,270, (b) $6180, Louis Longhi & Bro., Torrington, (a) $12,943, (b) $8375; Kellogg & Gregory Co., Danbury, Conn., (a) $11,227, (b) $7715; H. Sanford Osborn, Redding Ridge, (a) $11,374, (b) $7504; B. D. Pierce, Jr. Co., Bridgeport, (a) $10,507, (b) $7680; Angelo Roina, Greenwich, Conn., (a) $20,031, (b) $10,100; Frank Palmer, Stamford,, (a) $13,509, (b) $8748; T. F. Foley & Co., South Norwalk, (a) $12,766, (b) $11,937; William H. Arthur, Stamford, (a) $11,473. Windham Township, about 6930 lin.ft. of gravel road on the Windham-Scotland Rd. Frank Arrigoni & Bro., Middletown, $11,358; Goodman & Trumbull Co., Torrington, $11,609; Framingham Construction Co., Framingham, Mass., $9632; A. D. Bridge's Sons, Inc., Hazardville, $10,966; A. Brazos & Sons, Middletown, $9642; Connecticut Good Roads & Construction Co., New Britain, $11,547; Dean L. Chilson, Franklin, Mass., $13,529; B. N. Beard, Co., Shelton, $11,880; A. Vito, Construction Corp., Thompson, $11,559; Archie B. Cadwell, New Britain, $11,737; Ahern Construction Co., Willimantic, $12,345; Fred E. Ellis, Melrose, Mass., $14,686. Columbia Township, about 9964 lin.ft. of native stone macadam on the Columbia Green Rd. Fred E. Ellis, Melrose, Mass., $28,054; Connecticut Good roads & Construction Co., New Britain, $21,976; Goodman & Trumbull, Co., Torrington, $21,876; Frank Arrigoni & Bro., Middletown, $22,271; A. Brazos & Sons, $19,725; A. D. Bridge's Sons, Inc., $20,802; Ahern Construction Co., Willimantic, $20,323; Robert G. Miller, Contracting Co., Hartford, $18,354; Archie B. Cadwell, New Britain, $20,047; A. Vito, Construction Corp., Thompson, $19,181; Caputo & Giovaninni, 178 North St., Boston, Mass., $18,810. Waterbury City, about 10,100 lin.ft. of 8-in. gravel on Thomaston Ave. C. W. Tryon, Meriden, $16,443; Connecticut Good Roads & Construction Co., New Britain, $12,217; John Arborio, New Haven, $14,148; Goodman & Trumbull Co., Torrington, $18,331; B. Perini, Ashland, Mass., $13,536; Barbara & D'Auria, Waterbury, $14,849; Framingham Construction Co., Framingham, Mass., $14,293; B. N. Beard Co., Shelton, $17,465; E. B. Reilly, Waterbury, $15,611; H. Sanford Osborn, Redding Ridge, $15,610; Pierson Engineering & Construction Co., Hartford, $16,391; John DeMichiel & Bro., Torrington, $12,884; Thomas Kearney, Meriden, $16,012; B. D. Pierce, Jr. Co., Bridgeport, $13,319; A. Brazos & Sons, Middletown, $15,052; Louis Longhi & Bro., Torrington, $391,442; Andreani & Buzzi, Torrington, $14,116. Noted Mar. 18.

Manchester, Conn.—Bids will be received until 5 p.m., Apr. 3, for the construction of about 60,000 sq.ft. of concrete walks and 10,000 ft. of concrete curbing. J. Frank Bower is Supt. of Streets.

✚Meriden, Conn.—(Official)—Contracts have been awarded for paving State St. with wood block to LEONARDO SEIZIO, 185 Lewis Ave., Meriden, and for brick paving to THOMAS KEARNEY, at $8388. Noted Mar. 11.

New Haven, Conn.—Bids will be received until 2 p.m., Apr. 5, by F. L. Ford, City Engr., for improving Harriet St.

★Albany, N. Y.—(Official)—Bids will be received until 1 p.m., Apr. 20, by Edwin Duffey, State Highway Comr., for improving highways in various counties.

Albany, N. Y.—Press reports state that Edwin Duffey, Highway Comr., has decided to reject all bids received for the construction of a road around the base of Storm King Mountain.

✚★Albany, N. Y.—(Official)—Bids were received by the State Highway Commission, 55 Lancaster St., Mar. 23 for the construction of public highways, by State Aid as follows:

Road No. 965-A, Allegheny County, 9.52 miles—Richard Hopkins, Troy, $19,676; Flood & Van Wirt Co., Hudson Falls, $19,149; Kennedy Construction Co., Albany, $19,449; McGREEVEY. McGUIGAN & BAUM CONSTRUCTION CO., Elmira, $17,968 (awarded contract); P. J. Kennedy, Utica, $19,502; Bison City Engineering & Contracting Co., Buffalo, $18,997; Dale Engineering Co., Utica, $18,468.

Road No. 5543, Cattaraugus County, 6.98 miles—I. M. Ludington & Sons, Inc., Rochester, $120,749; George Holler, Albany, $119,438; AUSTIN W. SUMMERS, Buffalo, $107,770 (awarded contract); Woolsey Construction Co., Davenport, Iowa, $115,072; M. Bennett & Sons, Indiana, Penn., $112,060; Bison City Engineering & Contracting Co., Inc., Buffalo, $123,270; Lesher, Roess & Lesher, Oil City, Penn., $114,507.

Road No. 5258-A, Cattaraugus County, 5.35 miles—George Holler, Albany, $95,348; I. M. Ludington & Sons, Inc., Rochester, $96,560; Serviss & Mackey, Youngstown, $93,800; AUSTIN W. SUMMERS, Buffalo, $90,223 (awarded contract); Lake Shore Construction & Supply Co., Dunkirk, $94,730; Michael H. Ripton, Rochester, $93,995; James Rossney, Buffalo, $95,792.

Road No. 1230, Columbia County, 4.97 miles—Brady & Oltarsh, New York, $61,736; James Garafano & Sons, Mt. Vernon, $60,817; C. W. Tyrone, Boyntonville, $62,549; RUSSO-PARKER CONSTRUCTION CO., Hudson, $58,922 (awarded contract); John L. Hayes Construction Co., Yonkers, $60,492; Harris-Rose Construction Corporation, New York, $62,811; H. B. Sproul Construction Co., Inc., Peekskill, $61,654.

Road No. 5546, Erie County, 4.48 miles—Michael H. Ripton. Rochester, $69,754; Harry B. Harrison, East Rochester, $71,206; Lake Shore Construction & Supply Co., Dunkirk,. $71,301; AUSTIN W. SUMMERS, Buffalo, $69,736 (awarded contract); John Johnson Construction Co., Buffalo, $70,484; Louis H. Gipp, Buffalo, $73,300; Bison City Engineering & Contracting Co., Inc., Buffalo, $73,245.

Road No. 1222, Franklin County, 0.22 mile—M. J. Vitilli, Saranac Lake, $3586; Rumpft & Stevens, Lake Placid, $3599; JOHN F. LEWIS, Albany, $3474 (awarded contract); Flood & Van Wirt Co., Hudson Falls, $3682; P. J. Kennedy, Utica, $4155; William H. Murray, Saranac Lake, $3919; S. B. Van Wagonen, Inc., Rondout, $4038.

Road No. 5269-B, Jefferson County, 0.51 mile—John F. Lewis, Albany, $6032; P. J. Kennedy, Utica, $6453; A. J. Rockwood, Rochester, $6092; Phelan & Sullivan, Utica, $6432; Semper Bros., Watertown, $6249; Ward E. Griffin, Massena, $6370; Rumpft & Stevens, Lake Placid, $6499; J. A. WEIDMAN, Syracuse, $5816 (awarded contract).

Road No. 1237, Monroe County, 0.66 mile—Michael H. Ripton, Rochester, $22,762; Fulton Engineering Co., Inc., Albany, $22,891; Ribstine-Holter Construction Co., Inc., Rochester, $22,834; John Petrossi Co., Rochester, $22,951; Monroe Roads Co., Pittsford, $22,395; GREENFIELD CONSTRUCTION CO., Hornell, $22,294 (awarded contract); Connors & Gallivan, Elmira, $22,628.

Road No. 758-A, Niagara County, 8.33 miles—Public Service Contracting Co., Niagara Falls, $38,977; Greenfield Construction Co., Hornell, $39,046; J. A. Culkin, Oswego, $41,717; Harradine Bros. Co., Inc., Spencerport, $38,880; Greece Construction Co., Rochester, $40,427; C. B. Whitmore Co., Lockport, $41,540; AUSTIN W. SUMMERS, Buffalo, $38,767 (awarded contract).

Road No. 909-A, Putnam County, 0.13 mile—John Twinane, Hartsdale, $1848; JAMES GARAFANO & SON. INC., Mt. Vernon, $1733 (awarded contract), James L. Kehoe, Newburgh, $2346; Amos D. Bridge's Sons, Inc., Hazardville, Conn., $2066; H. B. Sproul Construction Co., Inc., Peekskill, $1911.

Road No. 5533, Rensselaer County, 2.11 miles—John Arborio, New Haven, Conn., $29,413; John W. Davitt, Albany, $29,943; Gifford Construction Co., Jamaica, $28,811; Highway Engineering Co., Albany, $29,449; Parker-Hassam Paving Co., Worcester, Mass., $29,799; Murray Contracting Co., Troy, $26,936; BELMAR CONTRACTING CO. INC., Troy, $26,814 (awarded contract).

Road No. 5234, Sullivan County, 8.51 miles—JOHN S. ARMSTRONG, Middletown, $37,127 (awarded contract); H. B. Sproul Contracting Co., Inc., Peekskill, $41,313; John De Michael & Bro., Torrington, Conn., $40,601; John J. Guinan

Contracting Co., Brooklyn, $37,205; Eggleston & Garthwaite, Yonkers, $37,878; Flood & Van Wirt Co., Hudson Falls, $40,605; Ruddy-Saunders Construction Co., Troy, $41,456. Noted Mar. 4.
